Lesnick proposed the following steps to combat Japanese entry into the U.S. computer industry:

Restriction of technology transfer to Japanese companies. Lesnick reported that Wang refuses to allow visits by Japanese trade delegations.

Refusal of Japanese overtures to U.S. firms to form joint ventures.

Swift congressional approval of tax credit increases for capital investment in research and development projects.

Court review of foreign cartel activity in the U.S. and a revamping of American antitrust laws to permit closer cooperation among domestic computer firms.

More support from U.S. government for businesses trying to market American-made goods overseas.

Of particular importance right now, Lesnick said, was government support of the semiconductor industry. "If Japan captures the semiconductor market, it captures the computer market. It's essential for government to realize that we maintain a strong national defense only if we maintain a strong semiconductor industry," he said.

In the question and answer session that followed the presentations, Ochi responded that Wang's closed-door policy could have negative consequences for American executives beginning to reverse the traditional traffic flow and visiting Japanese companies to study management, manufacturing and quality-control techniques. "Japan will close its doors if American companies follow suit," he said.

But, replied Lesnick, Japanese companies already have a restrictive policy for visits by American trade missions. He cited a recent Newsweek article that described how a U.S. delegation was refused entry into Japanese companies. "Learn Japanese ways," Ochi responded. He explained that because of the intense level of competition among Japanese companies, a request for a visit will be refused if it is learned that the mission already has visited or plans to visit a competitor's facility.

Complete tapes and transcripts of the session can be obtained from the American Institute for Professional Education, 100 Kings Road, Madison, N.J. 07940.

JAPANESE COMPUTER COMPANIES RANKED BY R. & D. EXPENDITURES, 1979

[Dollars in millions]

Company	R. & D. expenditures	Percent of net sales
1. Hitachi Ltd	$466	5.8
2. Toshiba Corp	325	4.8
3. Matsushita Electric Co	236	2.9
4. Nippon Electric Co	203	6.0
5. Mitsubishi Electric	203	4.0
6. Sony Corp	155	7.0
7. Fujitsu Ltd	144	6.1

THE TOP OFFICIALS NEED A RAISE

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 18, 1981

● Mr. WOLF. Mr. Speaker, once again the New York Times has addressed the inequity and inefficiency of the pay cap for senior executives. I submit this timely editorial to be printed at this point in the RECORD.

[From the New York Times, Nov. 18, 1981]

THE TOP OFFICIALS NEED A RAISE

In the parlance of the moment, Congress ought to get off the backs of senior Govern-

ment officials. It needs once and for all to eliminate the link between their salaries and its own.

Increases in the top-level executive grades are urgent. Since 1977 the pay of the highest Federal officials has been raised 5.5 percent; other white-collar Federal employees meanwhile had raises that total 33.5 percent. That means more than 48,000 employees' pay has been leveled flat, eliminating distinctions between managers and those they manage.

That is no way to run a Government or hold superior talent. With executive pay now capped at $50,112 a year, senior managers are fleeing Federal service. Programs in health, education and space exploration seem typically hard hit. Whereas 15.5 percent of eligible executives retired in 1978, the current rate is above 90 percent. Replacing them is no easier than holding them.

The problem is rooted in politics. To camouflage its own pay raises, Congress over the years contrived to link its salary scales to those of the top people in the judicial and executive branches. But it also prohibited almost all of these officials from earning more than a member of Congress.

Now the cost of that folly is coming home. The legislators are embarrassed to raise their own pay while they cut most Federal budgets. And so some of the best talent in Government is deprived and driven away.

The House debate of the issue is not promising; it turns on a bill that would merely extend the cap for another year. The case for a fundamental change has never been stronger. But if that is rejected, Congress should at least provide some relief, by approving a proposal in the Senate to give senior executives an immediate 4.8 percent increase.

A decent raise would surely pay for itself in efficiency and morale. Federal executives deserve it, and so does the nation.●

VIETNAM VETERANS

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 18, 1981

● Mr. BEREUTER. Mr. Speaker, in the aftermath of Veterans' Day, 1981, I take this opportunity to call to the attention of my colleagues an editorial which was published in the November 12, 1981, Lincoln Star relating to the specific and unique problems faced by the veterans of the Vietnam war and the efforts of the Reagan administration to address those problems. This program will couple the talents of those veterans who have been fortunate enough to find meaningful and rewarding employment and the aptitudes and abilities of those less fortunate veterans and will result in the enhancement of productivity in this Nation as well.

Mr. Speaker, the needs of the Vietnam veteran are indeed unique, and I applaud this effort to address those needs in an innovative and inexpensive manner. The article follows:

AID TO VIETNAM VETS

Appropriately so, President Reagan on Tuesday, the eve of Veterans Day, officially inaugurated a new program to help Vietnam veterans and to improve their public image. The program is called the Vietnam Veterans Leadership Program and has a modest federal appropriation.

The idea is for successful Vietnam veterans to volunteer themselves in assisting those Vietnam veterans who need it in finding employment suitable to their qualifications and to give the nation a greater sense of appreciation for the men and women who fought in that war. We find the program worth mentioning because we have never really understood the plight of these veterans.

We know why they have been a more or less forgotten group, because they fought in an unpopular war. But the war was not of their making and they did not ask to fight it. The war's unpopularity is a political situation and has nothing at all to do with the loyalty and personal sacrifice of those actively engaged in it.

The Vietnam veterans are entitled to all the benefits, all the considerations and all the thanks that have characteristically gone to all the veterans of all the wars fought by this nation. To honor them and to give them a special measure of assistance in rebuilding their lives is to say nothing political at all about the Vietnam war.

It is ridiculous, thoughtless and wrong to shun the Vietnam veterans because of the unpopular nature of the conflict in which they were involved. Honoring veterans is not an endorsement of any war or of the idea of war itself. It simply is a national statement of thanks to those young people who served the nation in a time of great and threatening need, whether the rest of us want to argue that need or not. In this week of Veterans Day, it is appropriate to single out the Vietnam veterans for an extra dose of recognition.●

THE B-1 PROGRAM

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 18, 1981

● Mr. DORNAN of California. Mr. Speaker, in further extension of my previous comments in justification of the B-1, I am taking this opportunity to insert into the the CONGRESSIONAL RECORD a letter of January 1980 to President Carter in support of the B-1 program. This letter, which I initiated, was signed by 170 House Members. Of that 170, 147 of our colleagues are still in the House of Representatives. I also have enclosed the list of the Members because of the continuing importance of this issue to our national defense.

HOUSE OF REPRESENTATIVES,
Washington, D.C., January 23, 1980.

President JIMMY CARTER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: On June 30, 1977, in the aftermath of your decision to cancel the B-1 bomber, you told the American people: "If at the end of a few years, the relations with the Soviet Union should deteriorate drastically, which I don't anticipate, then it may be necessary for me to change my mind."

Mr. President, we respectfully suggest that the time has indeed come for you to change your mind on the B-1 bomber. No member of the Congress can possibly fault you for your diligent search for peace, no matter how much we may have disagreed with any of your individual policy decisions. However, the Soviet invasion of Afghanistan merely confirms a pattern of Soviet inspired tension and international aggression. This pattern was discerned by leading figures of your own Administration within a year of your June 30, 1977, statement on the B-1. Dr. Zbigniew Brzezinski pointed to a grand design of the Soviet leadership to extend their influence throughout the globe, an assessment you confirmed in your June 7, 1978, speech to the graduating class of the United States Naval Academy. Vice President Mondale told the UN General Assembly two years ago that the Soviet Union has been engaged in a massive military build-up. Soviet declarations concerning the importance of detente have been continually compromised by the arrogant support for so-called "national wars of liberation" directly aided and assisted by Cuban proxy troops and advisors in Africa and the Middle East.

Military experts testify to the inherent value of the manned bomber in general and the B-1 in particular, which, as of this date, has not been surpassed as a penetrating bomber aircraft under the most sophisticated computer analyses. It is our conviction that this monument to American technological ingenuity, if brought on line through an accelerated production schedule, could preserve the security of the United States and the peace of the world for the rest of this century.

Recently, Mr. President, in response to the crisis in the Persian Gulf region, you have seen fit to take advantage of the range of the Guam-based B-52's for flights over the Indian Ocean. I am sure that you would agree that flights of new B-1's would have strengthened American resolve and added even greater flexibility to our airpower in that part of the world.

Mr. President, in the face of the conditions you yourself had set for the reconsideration of the B-1 bomber, it is our hope that you will recommend the restoration of the B-1 program as a direct, forceful response to the awesome growth of Soviet military power and blatant aggression of the Kremlin.

Sincerely,

Bill Archer, Skip Bafalis, Douglas Bereuter, Carroll Campbell, Richard Cheney, Bill Clinger, Barber Conable, Dan Crane, Bill Dannemeyer, Ed Derwinski, Charles Dougherty, John Erlenborn, Hamilton Fish, Barry Goldwater, Jr., Wayne Grisham.

WORLD FOOD DAY OBSERVANCES

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 18, 1981

● Mr. GILMAN. Mr. Speaker, as sponsors of the resolution designating October 16, 1981, as World Food Day, my good friend and colleague, the gentleman from Illinois (Mr. SIMON), and I were heartened at congressional passage of that measure and the President's subsequent proclamation commemorating World Food Day.

Through the able and dedicated leadership of Ms. Patricia Young, the National Committee for World Food Day, an organization of over 178 volunteer groups, helped launch thousands of observances throughout the United States, including special proclamations from the Governors of all 50 States and the island of Guam.

As a member of the U.S. delegation to the current session of the United Nations General Assembly, I had the privilege to address the General Assembly plenary observance of World Food Day.

Mr. Speaker, I believe we can all be encouraged by the success of the first World Food Day in increasing public awareness about the gravity of the world hunger problem. In order to share this public interest with my colleagues, I request that the national committee's report "The First World Food Day—An Evaluation," be inserted at this point in the RECORD:

THE FIRST WORLD FOOD DAY—AN EVALUATION

Thousands of observances across the United States on the first World Food Day proved that an enormous groundswell of compassion and concern exists for the world's hungry. Support for this untried idea came from all regions of the country and from all sectors of the community. We believe, further, that this first year was part of a learning process and that next year's observance, on October 16, 1982, can and should be much larger. Briefly summarized, here is what was accomplished in the first year:

At the national level, World Food Day won the support of the Congress, which passed a joint resolution of support, of the President, who issued a special World Food Day proclamation on October 14, and of key government departments and agencies such as the U.S. Department of Agriculture and the Agency for International Development. Important "flagship" observances were held at the United Nations, the Organization of American States and the Department of Agriculture headquarters in Washington.

At the state level, the Day was supported by special proclamations from the governors of all 50 states and the island of Guam. More than 250 colleges and universities, public and private, held special seminars and other activities. In many states, media attention was given to meetings of governors and World Food Day organizers. In many observances, state and federal legislators participated as guest speakers.

At the local community level, thousands of small and large observances were organized, with the main thrust coming from the churches and from local hunger activist groups, but also with a very large number of schools participating either as a whole or in separate class activities organized by individual teachers. Hospitals, libraries, clubs, civic organizations and youth groups of all kinds were also active.

Of the greatest importance was the support of private voluntary organizations, especially those which endorsed the Day through their membership on the National Committee. The Committee, with 178 member organizations in this first year, was the main instrument for achieving national recognition and for informing people at the community level of our plans and purpose.

Through these efforts, we have achieved some important goals.

First, we have established World Food Day officially, through the recognition of the Congress and White House, state legislatures and governors' offices, and city, county and state authorities.

Second, we have established World Food Day among many voluntary organizations, proving its usefulness in heightening public awareness to issues which are of common concern, in creating a new community of shared interest between farm, food, nutrition, labor, industry, religious, academic, anti-hunger activist, world development and relief interests, and in demonstrating there is a broad constituency for food issues.

Third, we have brought together thousands of people in towns and cities throughout the country, showing them that others share their concerns and providing an opportunity to work together.

Fourth, we have established the link between national and international hunger concerns, building new bridges between those working on each side of these problems and between Americans and people in other countries who share our goals. It is important to remember that World Food Day is a global observance, and activities of all kinds were organized in 145 countries around the world.

An evaluation of the first year's experience reveals the following:

Each time that a co-sponsoring organization included a World Food Day appeal in its publications or mailings—even a small announcement of the Day and date—this resulted in a flood of inquires to the National Committee. Local chapters and individuals responded positively when approached through a trusted organization. We think this is further proof of the value of getting voluntary orgnizations involved at local and state as well as national levels.

The most successful community observances were those which involved the widest networking, bringing together different sectors of the community in the planning. The many activities in San Diego, Calif., for example, reflected the creation of a citywide committee of 52 member organizations. But networking doesn't require a big city. An equally impressive effort was made in Amsted, W. Va., a town of 1,800 with participation by the women's club, churches, local businesses, the town library and the mayor's office.

Many community groups, based on their experience this year, are looking for ways to keep new allies and coalitions together, both to plan for World Food Day in 1982 and for consideration of year around farm, food, nutrition and anti-hunger planning and programs. The National Committee will try to support these efforts throughout the coming year. The struggle to eliminate hunger—and the relevance of World Food Day—will require this kind of year around and long range planning and activities. (See enclosed paper on planning aids.)

Hundreds of letters from teachers (kindergarten through high school) asked the National Committee for classroom materials. We were stunned to find how little suitable material on world hunger is available especially for younger childern. Several of our sponsoring organizations as well as other educational groups have promised to help prepare special study kits for young people and their teachers for the next year.

The above evaluation may make it appear that the National Committee achieved these goals by itself, which of course is not the case. World Food Day was established by consensus among the 147 member governments of the UN Food and Agriculture Organization. The official promoter of the observance in the United States was the U.S. Department of Agriculture. The National Committee staff worked closely with FAO and USDA in what has actually been an unusual joint effort by a multinational UN agency, a U.S. government department and all the private voluntary organizations on our Committee. And, of course, those deserving the most credit are all the community organizers around the country. World Food Day was planned as a grass-roots, effort, counting on the initiative, energy and imagination of community leaders. Your response to this call was the heart of our success.

Sometimes we are asked, "How many people did you feed?" We answer that there is, first, importance in a symbolic act, particularly one shared around the world, and

second, that action can only from an informed and caring people.

World Food Day will be held each year on October 16. We hope that we will all be working together again on that day in 1982.

WORLD FOOD DAY PLANNING AIDS

RESOURCE DIRECTORY

As a special project for the first World Food Day, the National Committee has published a Resource Directory of organizations working on food and hunger issues in this country and around the world. It includes all the private voluntary groups, 178 in all, which have co-sponsored the National Committee, explaining the purpose of each and the materials each has for further study. The Directory also lists the main U.S. Government and United Nations agencies dealing with food problems. We believe this publication can be a valuable tool for expanding local and state networks and for discovering new resources on farm, food, nutrition and hunger problems in preparation for the next World Food Day on October 16, 1982. The price of the Directory is $5 including postage. Copies can be obtained through the National Committee for World Food Day. This money will be used either for reprinting the current edition or preparing a new one for use in 1983.

FOOD AND HUNGER ASSESSMENTS

One of the main values of World Food Day each year will be as a time for evaluation and assessment—to review what has been done in the previous year and examine problems for the year to come, both nationally and internationally, in the struggle to eliminate hunger and malnutrition. To begin this annual review, the National Committee is able to offer two assessments for World Food Day 1981, one related to the U.S. and the other on the global situation. We hope that these will be updated each year and that the first assessments will serve as benchmarks for measuring future developments. The U.S. national assessment, prepared by the Community Nutrition Institute, is ready now and is available through the National Committee. The global assessment is expected to be ready for distribution in December. One purpose of these papers is to help community organizers consider whether to prepare a local assessment on food and nutrition issues. There will be no charge for the national and global assessments.

WORKING PAPER ON LONG-RANGE PLANNING

Many World Food Day organizers are eager to find ways to turn enthusiasm for this single day observance into year-around activities and long-range planning. The National Committee has prepared a short "working paper" on long-range farm-food-nutrition planning and global hunger education to provide some ideas on how such initiatives can be launched and suggesting a number of background studies that are available. This short paper is available on request from the National Committee without charge.●

A PUBLIC SERVANT AND GOOD FRIEND—BOB BOWERSOX

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 18, 1981

● Mr. PANETTA. Mr. Speaker, it is with sadness but also with great pride that I wish to bring to the attention of my colleagues the retirement of Dr. Robert Bowersox as director of public health for Monterey County, Calif.

Bob has been a friend of mine for many years, and his dedication to public service has made him one of the best known and best respected citizens of the Monterey Peninsula. Since he came to California in 1957, Bob has taken part in a variety of activities, from opening and operating successful medical clinics to running for Congress to serving on the Governor's Council on Wellness and Fitness and as president of the California Conference of Local Health Officers. Since 1973, he has been working as a public health advocate for Monterey County. In 1974, he was appointed director of health for the county, and in 1975, he was named director of health services, the position which he holds today.

As director of health services, Bob has been responsible for numerous reforms and advances that have made Monterey County's public health services among the best in California. Among other things, he has worked to reorganize the management structure of Natividad Medical Center, the principal public hospital in the county, organized the county's excellent mental health and environmental health departments, and played a major role in creating the Monterey County Health Initiative, an innovative, integrated health system for the poor.

Bob has also been extremely active politically in our area. In addition to his run for the Congress in 1962, Bob has chaired the Monterey County Democratic Central Committee, he has served as a member of both the executive committee and the steering committee of the California State Democratic Committee, and he has chaired the Monterey County campaigns of a number of distinguished candidates.

Mr. Speaker, I know the fact that Bob Bowersox will no longer be director of public health does not mean that he is ending his career of public service for good. I am sure that the communities of the Monterey Peninsula will be able to count on his wisdom and experience for use in some capacity in the future. Bob's contributions have been immense, but I do not believe they have come to an end.●

CONGRESSIONAL SALUTE TO HON. JOHN NICCOLLAI OF NEW JERSEY, OUTSTANDING LABOR LEADER, DISTINGUISHED CITIZEN, AND GREAT AMERICAN

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 18, 1981

● Mr. ROE. Mr. Speaker, on Sunday, November 22, residents of my congressional district and State, of New Jersey will gather in testimony to the outstanding public service rendered to our community, State and Nation by one of our most distinguished labor leaders and good friend, the Honorable John Niccollai, whose standards of excellence throughout his lifetime are applauded by all of us who have had the good fortune to know him.

As John Niccollai retires from his esteemed office of secretary-treasurer of Local 464A, United Food & Commercial Workers Union, where he has served with distinction for over 40 years, I know that you and our colleagues here in the Congress will want to join with me in extending deepest appreciation of all of his good works and share great pride in the success of his achievements with his wife Jessie, son John, daughter-in-law Rene, and grandchildren John and Justine.

Mr. Speaker, John Niccollai has indeed earned the highest respect and esteem of all of us for the quality of his leadership in his career pursuits. This is particularly manifested in the strong support and depth of friendship that he enjoys among his colleagues who organized the John Niccollai retirement dinner to pay tribute to the many contributions he has made in the labor movement. A roster of the dinner committee comprised of business and labor leaders of national and international renown who laud him as "a man motivated by the needs of the working people but yet governed by a sense of propriety and the bounds of fairplay," is, as follows:

The John Niccollai Retirement Dinner Committee:

The Honorable: Harold Krieger, Esq., general counsel, local 464A; Chairman John T. Niccollai, director, operations, local 464A; Secretary William H. Wynn, president, UFCW International Union (honorary); Anthony J. Lutty, secretary-treasurer, UFCW International Union (honorary); Irving Kaplan, former president, local 464A (honorary); Elmer DeProspo, president, UFCW Local 174; Frank DeVito, president, UFCW Local 1245; Michael Dolan, secretary-treasurer, UFCW Local 174; E. J. Fox, vice president, Big V Supermarkets, Inc.; Frank Fusco, senior delegate, UFCW Local 464A; James Gillis, secretary-treasurer, UFCW Local 5; John G. Hickey, president, UFCW Local 34; Stanley Kaufelt, president, Mayfair Super Markets, Inc.;

J. Barron Leeds, vice president-labor relations, Grand Union Co.; Melvin Levy, vice president-industrial relations, Waldbaum's, Inc.; John J. McAteer, vice president-personnel, Foodarama Supermarkets, Inc.; James Meister, vice president-operations, King Super Markets, Inc.; Chris Petrillo, administrative assistant, UFCW Local

464A; Martin J. Quinn, vice president-industrial relations, First National Supermarkets, Inc.; Ray Rando, senior delegate, UFCW Local 464A; Joseph Spector, president, Delicacy Shop; Irving Stern, UFCW international vice president; Joseph C. Talerico, president, UFCW Local 1; Bernard J. Woolis, UFCW international vice president; Isadore Zalkin, vice president-industrial relations, Supermarkets General Corp.

Mr. Speaker, John Niccollai was born on May 30, 1912, in Monongahela, Pa. He is the first of seven children whose parents emigrated from Florence, Italy, to the United States.

His personal commitment to the workingman and workingwoman commenced as a very young man shortly after completing grammar school when he began his career pursuits, learning the trade of meat cutting. By age 15 he had attained the level of journeyman meatcutter and in 1936 became a charter member of the first meatcutter union formed in northern New Jersey. He was immediately elected secretary-treasurer of the newly established local 389 and in 1947 was a leading participant in a conference of the international officers of the Amalgamated Meat Cutters & Butcher Workmen of South America held in Chicago, Ill., which resulted in bringing together local 39, local 389, and local 261—merging into local 464 effective February 1, 1947. Subsequent mergers into local 464 in which he played a major role included local 177 of the Poultry Workers Union—all adding up to a total growth of the union in which he served as secretary-treasurer from 120 members in 1936 to 15,000 members in 1977.

John has served 14 consecutive terms in office as secretary-treasurer of local 464. During his tenure he was instrumental in implementing the following benefit programs of local 464:

Self-insured hospital, medical, surgical plan, self-administered pension program, prepaid legal plan, dental and optical program, prescription and drug program, credit union, preventive care mobile medical van.

In 1981 he has been working on the local 464 diagnostic and medical center.

Mr. Speaker, John Niccollai has been a staunch supporter and active participant in many civic and community improvement programs. He served as a distinguished member of the Board of Chosen Freeholders of Passaic County during the late sixties and early seventies. He is a member of the North Jersey Country Club, Wayne Elks, Italian Circle and Unico. We are particularly proud of his compassion, dedication and untiring efforts on behalf of our young people. His favorite charitable organization for the last 20 years has been the Boys Town of Italy and it therefore came as no surprise to us that the proceeds of the John Niccollai retirement dinner will be donated to the Boys Town of Italy, a most prestigious youth organization which, in addition to the magnificence of its contribution in helping young men to achieve leadership qualities of self-reliance, character building, sportsmanship, fair play and eagerness to serve others, epitomizes the grandeur and strength of pride in one's heritage and particularly John's Italian-American ancestry.

Mr. Speaker, it is indeed appropriate that we reflect on the deeds and achievements of our people and as John Niccollai retires his official office as secretary-treasurer of Local 464A, United Food & Commercial Workers Union, I appreciate the opportunity of seeking this national recognition of his contribution to our country. His lifetime of dedication, sincerity of purpose and personal commitment to the needs of our workingmen and workingwomen and their families have truly enriched the quality of life and way of life for the people of our community, State, and Nation. We do indeed salute an outstanding labor leader, distinguished citizen, good friend and great American, the Honorable John Niccollai of New Jersey.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, November 19, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

NOVEMBER 20

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on the nominations of Bobby Jack Thompson, of New York, to be Administrator of the U.S. Fire Administration, and Robert M. Garrick, of California, to be a member of the Board of Directors of the Communications Satellite Corporation (Comsat).
235 Russell Building

9:30 a.m.
Rules and Administration
To hold oversight hearings on the application and administration of the Federal Election Campaign Act (P.L. 96-187).
301 Russell Building

10:00 a.m.
Judiciary
**Juvenile Justice Subcommittee
To resume hearings on S. 1688, making it a Federal offense when a convicted criminal commits a series of crimes involving firearms, and S. 1689, providing that a convicted criminal sentenced to life imprisonment under State habitual criminal statutes be incarcerated in a Federal penitentiary.
2228 Dirksen Building

Conferees
On H.R. 3455, authorizing funds for fiscal year 1982 for military construction programs of the Department of Defense.
EF-100, Capitol

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

NOVEMBER 23

9:00 a.m.
Commerce, Science, and Transportation
To hold joint hearings with the House Committee on Energy and Commerce on the proposed purchase of Marathon Oil Co. by the Mobil Corp.
318 Russell Building

9:30 a.m.
*Judiciary
*Immigration and Refugee Policy Subcommittee
To hold hearings on certain preference system provisions of the Immigration and Nationality Act (Public Law 94-571).
5110 Dirksen Building

Select on Indian Affairs
To hold hearings on S. 1370, authorizing the Secretary of the Army to acquire such oil, gas, coal, or other mineral interest owned by the Osage Tribe of Indians necessary for the construction of the Skiatook Lake, Osage County, Okla.
5302 Dirksen Building

10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To hold hearings to examine the presence of Cuban intelligence operations within the United States.
2228 Dirksen Building

NOVEMBER 24

9:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings on S. 1660, to validate certain oil placer mining claims in Hot Springs County, Wyo.
3110 Dirksen Building

*Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings on State implementation of Federal standards, focusing on hazardous waste management provisions of the Resource, Conservation and Recovery Act.

HOUSE OF REPRESENTATIVES—*Thursday, November 19, 1981*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Blessed are the peacemakers, for they shall be called sons of God.—Matthew 5: 9.

Grant unto Your people, O God, the persistence to seek peace in a troubled and broken world. We confess our lack of vision of Your purpose in our lives and we admit we have missed the path of reconciliation among people and understanding among nations. Yet, O God, bless us with wisdom and spiritual grace that we may do what we can to bring about a world where nations will know respect one for another. In spite of all the obstacles that keep people from seeing each other as created in Your image, may we ever be messengers of peace and good will and so serve Your holy will. This we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3454) entitled "An act to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the intelligence community staff, and for the Central Intelligence Agency retirement and disability system, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes."

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1211) entitled "An act to extend the Toxic Substances Control Act for 1 year," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. GORTON and Mr. BAUCUS to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1493. An act to deauthorize several projects within the jurisdiction of the Army Corps of Engineers.

CONFERENCE REPORT ON H.R. 4144, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1982

Mr. BEVILL submitted the following conference report and statement on the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-345)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 8, 9, 10, 11, 12, 13, 15, 16, 49, 53, and 54.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 3, 4, 7, 19, 20, 22, 26, 27, 28, 30, 32, 34, 35, 37, 38, 39, 43, 44, 45, 48, 50, 58, 63, and 65, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$137,225,000*; and the Senate agree to the same.

Amendment numbered 5:

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,008,355,000*; and the Senate agree to the same.

Amendment numbered 6:

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$91,000,000*; and the Senate agree to the same.

Amendment numbered 25:

That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$118,518,000*; and the Senate agree to the same.

Amendment numbered 31:

That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,970,926,000*; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,606,351,000*; and the Senate agree to the same.

Amendment numbered 41:

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$368,368,000*; and the Senate agree to the same.

Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$200,468,000*; and the Senate agree to the same.

Amendment numbered 46:

That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,066,803,000*; and the Senate agree to the same.

Amendment numbered 51:

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$76,177,000*; and the Senate agree to the same.

Amendment numbered 55:

That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$150,000,000*; and the Senate agree to the same.

Amendment numbered 56:

That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$100,000,000*; and the Senate agree to the same.

Amendment numbered 62:

That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$129,162,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 14, 17, 18, 21, 23, 24, 29, 33, 40, 47, 52, 57, 59, 60, 61, 64, and 66.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4144) making appropriations for energy and water development for fiscal year ending September 30, 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effects of the action agreed upon by the managers and recommended in the accompanying conference report.

Report language included by the House which is not changed by the report of the Senate, and Senate report language which is not changed by the conference is approved by the committee of conference. The statement of the managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein.

TITLE I—DEPARTMENT OF DEFENSE—CIVIL DEPARTMENT OF THE ARMY CORPS OF ENGINEERS—CIVIL

GENERAL INVESTIGATIONS

Amendment No. 1: Appropriates $137,225,000 for general investigations instead of $154,114,000 as proposed by the House and $132,575,000 as proposed by the Senate.

The Corps of Engineers is directed, within available funds, to allocate $175,000 in order to continue planning and engineering of the beach erosion control and storm protection project extending from Cape May Inlet to Lower Township, N.J.

The conferees direct that the funds included in the bill for the Red River and tributaries above Denison Dam, Okla. investigation be applied to the Rush Creek Watershed-Purdy Reservoir segment of the study.

Within the funds provided for the ongoing Saginaw River, Michigan investigation, the Corps of Engineers is to develop and make operational a computer model to predict flood damages in the Saginaw River Basin. This model is to be made operational in an expeditious manner and is to be compatible with local planning efforts. Development of this model is to compliment the flood routing studies and the operation of the completed flood control projects in the Saginaw River Basin.

No funds are included for a study to determine the feasibility of constructing a project at Lincoln School, Maine.

The conferees direct that the funds included for the Metropolitan Savannah study be allocated equitably to study the impacts on both Georgia and South Carolina.

The funds appropriated are to be allocated as shown on the following table:

(N) Navigation.
(FC) Flood control.
(BE) Beach erosion control.
(MP) Multiple-purpose, including power.
(FDP) Flood damage prevention.
(SP) Shoreline protection.
(Spec) Special.
(Comp) Comprehensive.
(Phase I) Authorized for Phase I of advance engineering and design in the Water Resources Development Act of 1974 or 1976.

Amendment No. 2: Deletes language proposed by the House relating to the North Nashua flood control project, Massachusetts. Funds for this project have been deleted from the appropriation totals and on the report table and the language is no longer required.

CONSTRUCTION, GENERAL

Amendment No. 3: Appropriates $1,416,992,000 for construction, general as proposed by the Senate instead of $1,518,941,000 as proposed by the House.

The conference agreement includes $800,000 for the East Bay Marina, Wash. and $80,000 for the Burns Ditch, Ind. project under Section 107, Small Navigation Projects; $500,000 for Colonial Beach, Va. under Section 103, Small Beach Erosion Control Projects; $1,600,000 for Euclid Creek, Ohio under Section 205, Small Flood Control Projects; and $1,000,000 for Miami Harbor Bay Front Park, Fla. under the Recreation Facilities at Completed Projects category.

The funds appropriated are to be allocated as shown on the following table:

Small navigation projects (section 107)	11,000	11,880
Mitigation of shore damages attributable to nav. proj. (section 111)	600	600
Small beach erosion control projects (section 103)	1,000	1,500
Small projects for flood control and related purposes (section 205)	17,500	19,100
Emergency streambank and shoreline protection (section 14)	2,500	2,500
Small snagging and clearning projects (section 208)	400	400
Recreation facilities at completed projects	13,950	14,950
Streambank erosion control evaluation and demonstration (section 32)	1,000	1,000
Aquatic plant control (1965 act)	3,630	3,630
Employees compensation	6,971	6,971
Reduction for anticipated savings and slippage	−267,049	−218,343
Subtotal	−208,498	−155,812
Fiscal year 1981 deferrals		−10,000
Total, construction, general	1,356,661	1,416,992

Type of project:
(N) Navigation.
(FC) Flood control.
(BE) Beach erosion control.
(MP) Multiple-purpose, including power.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES

Amendment No. 4: Appropriates $256,310,000 for flood control, Mississippi River and tributaries as proposed by the Senate instead of $278,598,000 as proposed by the House.

OPERATION AND MAINTENANCE, GENERAL

Amendment No. 5: Appropriates $1,008,355,000 for operation and maintenance instead of $1,110,909,000 as proposed by the House and $993,355,000 as proposed by the Senate.

The conferees direct that the Corps of Engineers should be guided by the recommendations and emphasis contained in the project table in the House Report, the Senate Report language and the language contained in the House Report on the Continuing Resolution (H.J. Res. 357) regarding the various projects and safety related work in allocating funds for operation and maintenance.

GENERAL EXPENSES

Amendment No. 6: Appropriates $91,000,000 for general expenses instead of $95,440,000 as proposed by the House and $87,805,000 as proposed by the Senate.

SPECIAL RECREATION USE FEES

Amendment No. 7: Appropriates $4,784,000 for special recreation use fees as proposed by the Senate instead of $5,200,000 as proposed by the House.

GENERAL PROVISIONS

Amendment No. 8: Restores language proposed by the House and stricken by the Senate relating to the Cuyahoga River Basin, Ohio project.

Amendment No. 9: Restores language proposed by the House and stricken by the Senate relating to the Beverly Shores, Indiana project.

Amendment No. 10: Restores section number as proposed by the House.

Amendment No. 11: Restores section number as proposed by the House.

Amendment No. 12: Restores language proposed by the House and stricken by the Senate relating to the Grays Harbor, Washington project.

Amendment No. 13: Restores language proposed by the House and stricken by the Senate relating to the Illinois Waterway project.

Amendment No. 14: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

Sec. 110. Funds herein or hereinafter appropriated in this title for the Chetco River, Oregon navigation project, authorized by the 1945 River and Harbor Act, as amended and modified, shall be used to design and construct further modifications to that proj-

ect in accordance with the Report of the Chief of Engineers, dated May 2, 1977.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 15: Restores section number as proposed by the House.

Amendment No. 16: Restores language proposed by the House and stricken by the Senate relating to a study of flooring in Alexander and Pulaski Counties, Illinois and for the main stem study of the Ohio River.

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

Sec. 111. The Chief of Engineers is hereby directed to raise the dam at Lake Darling, North Dakota, by approximately four feet and to implement upstream and downstream flood control measures.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 18: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

Sec. 112. No funds appropriated in this Act may be used to construct channel realignment work on the Ouachita and Black Rivers navigation project in Arkansas and Louisiana until such time as the Chief of Engineers has completed a restudy of the various options for navigation above Crossett, Arkansas, including the two barge abreast configuration, with a view toward reducing the number of cutoffs and bend widenings required. The results of this restudy should be reported to the respective Appropriations Committees of both Houses of the Congress for review, and should accurately reflect the economic and environmental tradeoffs of providing greater than two-barge navigation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

TITLE II—DEPARTMENT OF THE INTERIOR

BUREAU OF RECLAMATION

GENERAL INVESTIGATIONS

Amendment No. 19: Appropriates $30,596,000 for general investigations as proposed by the Senate instead of $36,744,000 as proposed by the House.

Amendment No. 20: Provides that $30,396,000 is to be derived from the reclamation fund as proposed by the Senate instead by $36,544,000 as proposed by the House.

The conferees direct that the $1,500,000 provided for the Wind Hydroelectric Energy Study shall be used for the termination of the second wind verification unit.

The conference allowance of $650,000 for the Enlarged Shasta Lake investigation includes $150,000 to study the contribution a Sites Reservoir build independent of the West Sacramento Unit could make to the Central Valley Project's overall water supply picture.

The funds appropriated are to be allocated as shown in the following table:

[In thousands of dollars]

Project title	Budget estimate	Conference allowance
GENERAL INVESTIGATIONS		
ARIZONA		
Lower Colorado River water consv. and efficient use prog.	600	600
CALIFORNIA		
Central Valley:		
Shasta Division, enlarged Shasta Lake investigation	500	650
Delta support studies	775	1,312
Fish and wildlife management studies	475	475
Kellogg unit reformulation	.....	150
Central California-Nevada wind energy study (formerly wind-hydro opportunities study)	230	230
Geothermal resource investigations	60	60
Palo Verde hydropower	25	25
San Joaquin drainage investigation	.....	1,400
Santa Margarita project	.....	260
Water conserv. opportunities, imperial irrig. district	265	265
COLORADO		
Dominguez Reservoir	50	50
Water resources planning and engineering research	4,000	4,000
IDAHO		
Boise project power and modification study	125	125
Idaho anad. fish habitat restoration	300	300
Upper Snake River water management study	179	179
KANSAS		
Solomon River basin water management study (P–SMBP)	283	283
MONTANA		
Fort Benton reformulation	300	300
Hungry Horse powerplant enlarg. and reregulating resv.	250	250
Offstream storage, Yellowstone River	150	150
Northern Great Plains wind energy study (formerly regional wind energy study)	300	300
Tiber powerplant	90	90
NEBRASKA		
Farwell unit water conservation study (P–SMBP)	130	130
Republican River basin water management study (P–SMBP)	343	343
Upper Platte River study (formerly Platte River study)	67	67
NEW MEXICO		
Llano Estacado Playa Lake water resources study	75	75
Santa Cruz Dam and Reservoir study	175	175
Tularosa basin water and energy study	250	250
NORTH DAKOTA		
Garrison diversion unit, M and I water facilities (Garrison division, P–SMBP)	100	100
OREGON		
Hermiston water conservation	110	110
Klamath River basin	.....	165
Rogue River basin, Grants Pass division	100	100
Rogue River basin, Medford division (reformulation)	65	65
Umatilla basin	115	115
Upper John Day	100	100
SOUTH DAKOTA		
Lower Brule Indian Reservation area (P–SMBP)	85	85
Lower James-Fort Randall water diversion proposal	240	240
Central South Dakota water studies	.....	200
TEXAS		
Nueces River basin study	300	300
Texas basin, Big Cow Creek	180	180
Texas basin, Bon Wier	250	250
UTAH		
CRSP power peaking capacity	1,300	1,300
WASHINGTON		
Yakima, Cle Elum and Tieton powerplants	100	100
Yakima River basin water enhancement	100	100
WYOMING		
Guernsey Dam powerplant enlargement	60	60
North Platte River hydroelectric power study	380	380
Wind hydroelectric energy study	3,040	1,500
VARIOUS		
Colorado River water quality improvement program	4,935	4,935
Hydro power at existing facilities, various	395	395
General engineering and research:		
Advanced scientific and technological applications	250	250
Atmospheric water resources management program	4,822	5,922
General planning studies	350	350
Special investigations:		
Environmental and interagency coordination activities	2,300	2,300
Investigations of existing projects	542	542
Minor work in connection with completed proj. invest.	961	961
Print reports	35	35
Technical assistance to States	1,035	1,135
Projects not yet identified	35	35
Allowance for pay raise increases	1,450	1,450
Total, various	17,110	18,310
Reduction based on anticipated savings, slippage, and carryover balances	−4,048	−5,658
Total, general investigations	29,684	30,596

Amendment No. 21: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that not to exceed $50,000 shall be available to initiate a rehabilitation and betterment program with the Farmers Irrigation District.

CONSTRUCTION PROGRAM

Amendment No. 22: Appropriates $548,505,000 for the construction program as proposed by the Senate instead of $605,258,000 as proposed by the House.

The conference allowance includes $306,000 for the Bostwick Division, Neb. and Kansas; $1,031,000 for the Farwell Unit, Nebraska; and a general reduction due to slippage, savings and carryover balances of $104,399,000

Within available funds, $2,000,000 may be made available from previously appropriated funds for Teton Dam claims for removal of substantial quantities of fibrous asbestos in project waters of the California Aqueduct/San Luis Canal.

Amendment No. 23: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate relating to the Garrison Diversion Unit, North Dakota.

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that $2,000,000 of the amount appropriated under the Central Arizona Project shall be available for preconstruction activities on distribution systems.

OPERATION AND MAINTENANCE

Amendment No. 25: Appropriates $118,518,000 for operation and maintenance instead of $128,606,000 as proposed by the House and $116,018,000 as proposed by the Senate. The conference allowance includes $2,500,000 for the Suisun Marsh management facilities, Delta Division, Central Valley Project, California.

LOAN PROGRAM

Amendment No. 26: Appropriates $22,614,000 for the loan program as proposed by the Senate instead of $24,580,000 as proposed by the House.

Amendment No. 27: Provides a limitation of $26,922,000 for gross obligations for the principal amount of direct loans as proposed by the Senate instead of $28,888,000 as proposed by the House.

GENERAL ADMINISTRATIVE EXPENSES

Amendment No. 28: Appropriates $39,928,000 for general administrative expenses as proposed by the Senate instead of $43,400,000 as proposed by the House.

GENERAL PROVISIONS

Amendment No. 29: Reported in technical disagreement. The managers on the part of

the House will offer a motion to recede and concur in the amendment of the Senate which deletes House language and inserts Senate language relating to the McGee Creek, Oklahoma Project.

Amendment No. 30: Deletes language proposed by the House which provided that not to exceed $300,000 shall be available to the Yuma Mesa Irrigation and Drainage District, Gila Project, and the Unit B Irrigation and Drainage District, Yuma Auxiliary Project, Arizona.

TITLE III—DEPARTMENT OF ENERGY

Operating Expenses

ENERGY SUPPLY, RESEARCH AND DEVELOPMENT ACTIVITIES

Amendment No. 31: Appropriates $1,970,926,000 for Operating Expenses, Energy Supply, Research and Development Activities, instead of $2,115,499,000 as proposed by the House and $1,970,119,000 as proposed by the Senate.

SOLAR ENERGY

Solar Applications for Buildings.—The conference allowances include funding to implement a decision on the Southeast Regional Residential Experiment Station as outlined in the Senate Report and funding for the Sacramento Metropolitan Utility District project at the level outlined in the House Report. The allowances also include funding to continue ongoing projects such as the National Exemplar project.

Solar Applications for Industry.—The conference allowances include $6,000,000 for repowering systems design and applications, as provided for in the House Report, and $3,100,000 for technology development for the parabolic dish program. The Committees would be willing to consider additional funding for the parabolic dish program from funding provided in the solar reserve account if needed to maintain a vigorous R&D program.

The conferees understand that the potential exists for power generation from brine lakes created as part of the Arkansas-Red River Chloride Control Project by exploiting stratified solar brine pond technology. Area VIII of the project is currently under construction and feasibility studies on the use of the stored salt water for power generation show promise. Further, the Department of Energy has undertaken model tests of solar ponds under various conditions at other locations in the United States. The conferees believe that the Department of Energy should take the lead in further site specific work, but in close coordination with the Corps of Engineers.

Therefore, the conferees direct the Department of Energy and the Corps of Engineers to develop a joint recommendation which addresses the economic feasibility, costs and funding alternatives for construction of potential power generation facilities using stratified solar brine ponds at Area VIII of the project. The joint report and recommendation should be submitted to the Committees on Appropriations by September 30, 1982.

Solar Applications for Power.—Sufficient funding is provided to complete the preliminary design and engineering effort for the Mod 5 wind machine development program. The allowance also provides funding to continue a reduced level of basic research and technology development in ocean energy systems, including the cold water pipe development effort and the OTEC pilot plant design competition as outlined in the House and Senate Reports.

Other Solar Programs—The conference allowance includes funding for the program support account as outlined in the House Report.

Solar Reserve Account.—The allowance provides $15,000,000 for the purposes specified in the House and Senate Reports, except that funding for continued operation of the Regional Solar Energy Centers should take into account the programmatic funding available for RSEC type activities in active and passive systems and solar energy accounts.

GEOTHERMAL

The conference allowance provides $47,136,000 for geothermal research and development consistent with the provisions in the Senate Report. The conferees are aware of the contributions to component development which have been made by the Department's Geothermal Test Facility, East Mesa, California, and have provided sufficient funding to support activities at the facility at a level of at least $750,000 which would represent a 12% reduction in the program level.

NUCLEAR FISSION REACTOR PROGRAMS

Light Water Reactor Systems.—The conference allowance includes $3,000,000 for thorium fuel cycle development. The allowance includes $10,500,000 for the research and development program at the Barnwell Nuclear Fuels Facility, to be derived as follows:

Light Water Reactor Systems	$7,500,000
Spent Fuel Storage	1,000,000
Nuclear Material Safeguards and Security	2,000,000

The conferees agree that no additional funding will be considered for the Barnwell program after FY 1982.

Three Mile Island Activities.—The conference allowance provides $26,750,000 for Department of Energy research and development activities relating to the Three Mile Island accident consistent with the provisions in the House and Senate Reports.

Advanced Reactor Systems.—The conference allowance includes $4,800,000 for advanced reactor systems consistent with the Senate Report.

Breeder Reactor Systems.—The conference allowance includes $592,274,000 for breeder reactor systems, with allowances as outlined in the Senate Report and in debate on the Senate floor in the November 4, 1981, Congressional Record on pages S12833-34, except that $195,000,000 is provided for the CRBR demonstration project or project alternative as approved by Congress in authorizing legislation.

FUSION ENERGY R. & D.

The conference allowance provides $292,700,000 for fusion energy research and development consistent with the provisions of the House and Senate Reports.

REMEDIAL ACTION PROGRAMS

The conference allowance includes $52,145,000 for remedial action programs. The conferees believe that the Department should work with NRC and EPA to develop realistic standards for its remedial action programs as quickly as possible. Meanwhile the Department should act with prudence in committing to specific actions on individual sites until firm standards are developed and agreed upon, and the programs approved by Congress in authorizing legislation.

EFFECT OF FISCAL YEAR 1982 DEFERRAL/UNOBLIGATED BALANCES

The conference allowance reflects the reduction in obligation requirements for this account consistent with Deferral D82-103 and the application of unobligated balances from prior appropriations to reduce the new budget authority required in FY 1982 to carry out programmatic activities at the recommended level.

ALLOCATION OF FUNDS

The funds are allocated as shown in the following tables:

[In thousands of dollars]

	Budget estimate	Conference allowance
ENERGY SUPPLY RESEARCH AND DEVELOPMENT—OPER EXPENSES		
I. Solar energy R. & D.:		
A. Solar applications for buildings:		
1. Active solar heating and cooling	11,000	11,000
2. Passive solar heating and cooling	10,100	10,100
3. Photovoltaic energy systems	55,900	74,000
Subtotal, solar applications for buildings	77,000	95,100
B. Solar applications for industry:		
1. Solar thermal energy systems	42,650	52,650
2. Biomass energy systems and alcohol fuels	29,500	29,500
Subtotal, solar applications for industry	72,150	82,150
C. Solar applications for power:		
1. Wind energy systems	19,200	34,700
2. Ocean energy systems		20,300
Subtotal, solar applications for power	19,200	55,000
E. Other Solar Programs:		
International solar energy program	4,000	4,000
Solar information systems	6,700	6,700
Program support		4,000
Program direction	4,000	4,000
F. Solar Reserve Account		15,000
Total solar energy R. & D.	183,050	265,950
II. Geothermal:		
A. Hydrothermal industrialization	2,124	8,624
B. Geopressured resources	20,336	17,336
C. Geothermal technology development	19,576	19,576
D. Program direction	1,600	1,600
Total geothermal	43,636	47,136
III. Hydropower:		
a. Small scale hydropower		2,750
D. Program direction		250
Total hydropower		3,000
Total solar, geothermal, and hydropower	226,686	316,086
IV. Nuclear Fission Reactor Programs:		
A. Conventional reactor systems:		
1. High temperature reactor technology		35,000
2. Light water reactor systems	27,000	37,500
3. Three Mile Island activities	29,000	26,750
4. Advanced reactor systems	2,800	4,800
5. Program direction	1,500	1,500
Subtotal, conventional reactor systems	60,300	105,550
B. Commercial nuclear waste:		
1. Commercial waste management	215,150	195,000
2. Program direction	3,124	3,124
Subtotal, commercial nuclear waste	218,274	198,124
C. Spent nuclear fuel:		
1. Spent fuel storage:		
a. Domestic	5,000	5,000
b. International	900	900
2. Program direction	517	517
Subtotal, spent nuclear fuel	6,417	6,417
D. Advanced nuclear systems:		
1. Space and terrestrial applications	33,900	33,900
3. Program direction	1,200	1,200
Subtotal, advanced nuclear systems	35,100	35,100
E. Breeder reactor systems:		
1. Liquid metal fast breeder reactor	312,700	312,700

[In thousands of dollars]

	Budget estimate	Conference allowance
2. Clinch River breeder reactor demonstration	254,000	195,000
3. Water cooled breeder reactor	57,000	51,000
5. Fuel cycle research and development	23,000	23,000
6. Program director	10,574	10,574
Subtotal, breeder reactor systems	657,274	592,274
Total nuclear fussion reactor programs	977,365	937,465
V. Fusion energy R. & D.:		
A. Confinement systems	133,470	124,470
B. Development and technology	67,650	61,650
C. Applied plasma physics	70,400	67,400
D. Planning and projects	26,130	26,130
E. Center for magnetic fusion eng	9,150	9,150
F. Program director	3,900	3,900
Total fusion energy R. & D	310,700	292,700
VI. Electric energy systems:		
A. Electric energy systems:		
1. System architecture and integration	4,100	7,100
2. Power delivery	4,525	12,525
3. Generation and storage applications		3,600
4. Program director	875	875
Subtotal, electric energy systems	9,500	24,100
B. Energy storage systems:

ENERGY SUPPLY RESEARCH & DEVELOPMENT—OE TRANSFER		
By transfer from Southwestern Power Administration and Plant and Capital Equipment, Departmental Administration		−25,000

Amendment No. 32: Deletes House language earmarking $9,800,000 for carrying out the West Valley Demonstration Project in accordance with Public Law 96-368. As explained in the Senate Report, the issues related to the initial cooperative agreement with the State appear to have been resolved and the project funding is provided for in the tables reflecting the conference allowance.

Amendment No. 33: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: *: Provided, That of the funds appropriated herein, $9,000,000 is to be derived by transfer of unobligated balances from the funds appropriated under the heading "Operation and Maintenance, Southwestern Power Administration", and $16,000,000 is to be derived by transfer from funds appropriated under the heading "Plant and Capital Equipment, Departmental Administration": Provided further, That $1,300,000 of the funds provided herein shall be for the Region X wood-derived fuels program and transferred to the Bonneville Power Administration for obligation and expenditure*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides for the transfer of unneeded funds available to the Southwestern Power Administration as a result of lower than expected costs of purchased power in fiscal year 1981, and funds resulting from reductions proposed by the Administration in Plant and Capital Equipment, Departmental Administration for fiscal year 1982, to the Operating Expenses, Energy Supply, Research and Development Activities account. The conferees agree with the Senate bill and report language relating to the Region X wood-derived fuels program.

OPERATING EXPENSES

Uranium supply and enrichment activities

Amendment No. 34: Deletes House language providing separate appropriation accounts for Operating Expenses and Plant and Capital Equipment for Uranium Supply and Enrichment Activities. The conference agreement on Amendment No. 47 combines these activities into a single account.

OPERATING EXPENSES

General science and research activities

Amendment No. 35: Appropriates $411,060,000 for Operating Expenses, General Science and Research Activities as proposed by the Senate instead of $431,060,000 as proposed by the House.

The conference allowance provides a uniform increase of roughly 10 percent over fiscal year 1981 levels for all accounts to offset the effects of inflation and maintain a stable programmatic effort. The allowance for high energy physics includes an additional $5,700,000 in high energy technology towards the new initiatives reflected in the March budget request. The funds are allocated as shown in the table that follows. Should the Department's priorities reflect a different allocation at the subprogram level, the Committees on Appropriations will give prompt consideration to an appropriate reprogramming request.

OPERATING EXPENSES

Atomic energy defense activities

Amendment No. 36: Appropriates $3,606,351,000 for Atomic Energy Defense Activities, instead of $3,634,565,000 as proposed by the House and $3,606,228,000 as proposed by the Senate.

The table following the narrative on this amendment sets forth the conference agreement with respect to the individual programs funded in this account.

The conferees agree that an additional $3,000,000 shall be provided for operating costs related to weapons and other research at the Los Alamos Meson Physics Facility. The conferees agree to provide $2,500,000 to begin a program to develop beneficial uses for radioactive waste. The conferees agree to restore $4,000,000 for security investigations and direct that future justification material identify separately the amounts requested for defense and other-than-defense security investigations.

The House deleted part of the funds for production of cruise missile, MX and 155mm artillery warheads for reasons related to test status and capability to produce. The conferees agree to restore $25,394,000 of the funds deleted for these weapons systems with the requirement that the Department obtain prior approval from the Committees on Appropriations before obligating funds for these systems. No funds are provided for Nike Hercules modifications.

The conferees agree that an additional $6,400,000 shall be available to continue the accelerated special isotope separation research program under the conditions stipulated in House Report No. 97-29.

OPERATING EXPENSES

Departmental administration

Amendments No. 37 and 38: Deletes headings and language proposed by the House to establish separate appropriation accounts for Operating Expenses, Departmental Administration, Office of the Secretary and General Administration. The conference agreement combines these accounts as proposed by the Senate in Amendment No. 39.

Amendment No. 39: Deletes language proposed by the House and inserts language proposed by the Senate to provide a single appropriation account for Operating Expenses, Departmental Administration.

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate to provide not to exceed $35,000 for official reception and representation expenses consistent with prior appropriation limitations for this purpose.

Amendment No. 41: Appropriates $368,368,000 for Operating Expenses, Departmental Administration, before revenues are applied, instead of $353,252,000 as proposed by the House and $375,368 as proposed by the Senate.

Amendment No. 42: Appropriates $200,468,000 for Operating Expenses, Departmental Administration, after revenues are applied, instead of $185,352,000 as proposed by the House and $207,468,000 as proposed by the Senate.

The conference agreement reflects a single account for Operating Expenses, Departmental Administration, with allowances as detailed in the Senate Report tables, except for a general reduction of −$21,068,000 instead of −$14,068,000. Within the allowance for Policy Analysis and System Studies, $750,000 is provided to continue the Indian Affairs program with the Council of Energy Resource Tribes. With respect to the general reduction, the conferees direct that at least $800,000 be applied to the Office of Legislative Affairs.

PLANT AND CAPITAL EQUIPMENT

Energy supply, research and development activities

Amendment No. 43: Appropriates $332,200,000 for Plant and Capital Equipment, Energy Supply, Research and Development Activities, as proposed by the Senate instead of $350,000,000 as proposed by the House.

The conference allowance reflects the provision of $39,700,000 for Project 78-6-f, Fuels and Materials Examination Facility, instead of $42,000,000 as proposed by the House and $24,200,000 as proposed by the Senate. Funding for Projects 81-T-314, ISX-C Modification, and 82-E-322, High Temperature Materials Labs, are deferred without prejudice for consideration in future appropriations. The allowance reflects a reduction in obligation requirements consistent with Deferral D82-104 and the application of unobligated balances available for fiscal year 1982 program activities. The funds are allocated as shown in the following tables:

PLANT AND CAPITAL EQUIPMENT

Uranium supply and enrichment activities

Amendment No. 44: Deletes House language providing separate appropriation accounts for Operating Expenses and Plant and Capital Equipment for Uranium Supply and Enrichment Activities. The conference agreement on Amendment No. 47 combines these activities into a single account.

PLANT AND CAPITAL EQUIPMENT

General science and research activities

Amendment No. 45: Appropriates $118,300,000 for Plant and Capital Equipment, General Science and Research Activities, as proposed by the Senate instead of $128,300,000 as proposed by the House.

The conferees have accepted the general reduction of $10,000,000 as proposed by the Senate. However, the conferees have strongly supported the General Science and Research Activities programs and expect the Department to apply this reduction prudently so as to minimize any long-term impact on scientific capabilities.

PLANT AND CAPITAL EQUIPMENT

Atomic energy defense activities

Amendment No. 46: Appropriates $1,066,803,000 for Atomic Energy Defense Activities instead of $1,063,453,000 as proposed by the House and $1,083,822,000 as proposed by the Senate.

The table following the narrative on this amendment sets forth the conference agreement with respect to the individual programs funded in this account.

The conferees agree to provide an additional $12,500,000 for project 78–4–A, the NOVA high energy laser facility and expect the Department to complete the full 20-beam project as expeditiously as possible. The conferees also agree to provide $14,000,000 for project 81–T–502, the Advanced Special Isotope Separation Laboratory, and direct the Department to continue the accelerated research program.

Should it be necessary or desirable during the course of the fiscal year to accelerate construction of facilities for certain weapons systems, the Department may, with prior approval of the Appropriations Committees, reprogram funds for that purpose.

Funds provided for cruise missile facilities are not available until submission of satisfactory test results to the Committees on Appropriations of the House and Senate.

Uranium supply and enrichment activities

Amendment No. 47: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

Uranium Supply and Enrichment Activities

For expenses of the Department of Energy in connection with operating expenses; the purchase, construction, and acquisition of plant and capital equipment and other expenses incidental thereto necessary for uranium supply and enrichment activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95–91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of passenger motor vehicles (not to exceed 23 for replacement only); $1,806,000,000, to remain available until expended; Provided, That revenues received by the Department for the enrichment of uranium and estimated to total $1,805,000,000 in fiscal year 1982, shall be retained and used for the specific purpose of offsetting costs incurred by the Department in providing uranium enrichment service activities as authorized by section 201 of Public Law 95–238, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484): Provided further, That the sum herein appropriated shall be reduced as uranium enrichment revenues are received during fiscal year 1982 so as to result in a final fiscal year 1982 appropriation estimated at not more than $1,000,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have accepted the Senate allowances for the Advanced Isotope Separation Technology program which restores the shift of $6,000,000 from operating expenses to plant and capital equipment as proposed by the House. This is based on information from the Department that it is not necessary to create a construction project line item for the AIS Development Module since it is experimental in nature and can be funded from the operating account. The conferees believe that the Department should make every effort to proceed with a process selection as soon as an adequate technical basis for evaluation is available so as to minimize the requirement for funding of parallel approaches and permit a more focused effort.

The conference allowance defers without prejudice funding for projects 81–R–506 and 82–R–416 for consideration in future appropriations.

The conferees regret the necessity of a general reduction because of budgetary constraints and agree with Senate Report language and floor statements regarding the need to minimize any impact on production capacity. In this regard, the conferees believe that there are several steps the Department could and should take to minimize any programmatic impact. These include:

Negotiations to reduce, or recover through the sale of surplus electricity, some or all of the $166,000,000 requested for demand charges for contract power which is not being taken due to the reduction in the operating level of existing facilities.

Deferral of lower priority construction activities not critical to the maintenance of existing facilities nor to the critical path schedule for new capacity.

Modification of contracting practices so as to maximize use of available funds, including GSO balances and contract prefinancing.

The conferees note with some concern the very large increase in uncosted obligations related to uranium enrichment construction activities. It would appear that better use of available funds could substantially avert any serious programmatic affect of the necessary funding constraints for this account.

The conference allowance is allocated as shown in the following table:

POWER MARKETING ADMINISTRATIONS

BONNEVILLE POWER ADMINISTRATION

Amendment No. 48: Approves expenditures of $2,000 from the Bonneville Power

Administration Fund for official reception and representation expenses as proposed by the Senate instead of $1,000 as proposed by the House.

Amendment No. 49: Deletes language proposed by the Senate to appropriate additional borrowing authority for the Bonneville Power Administration. The conferees agree that this matter can be deferred to fiscal year 1983 and that Bonneville should move aggressively in fiscal year 1982 to implement the program specified in the Pacific Northwest Electric Power Planning and Conservation Act (Public Law 96-501) within their existing authority.

Amendment No. 50: Limits to $40,000,000 gross obligations for the prinicpal amount of direct loans from the Bonneville Power Administration Fund as proposed by the Senate instead of $2,400,000 as proposed by the House.

Repayment Obligations.—The conferees are aware of the recent GAO report on Bonneville Power Administration's repayment policy and repayment status. BPA is expected to expedite and complete a review of its repayment policy and procedures so as to provide a full report to the Committees on Appropriations in time for consideration of the fiscal year 1983 appropriations request.

FEDERAL ENERGY REGULATORY COMMISSION

SALARIES AND EXPENSES

Amendment No. 51: Appropriates $76,177,000 for salaries and expenses instead of $78,677,000 as proposed by the House and $73,677,000 as proposed by the Senate. The conferees agree that FERC shall submit reports on TAPS and personnel turnover and safety as required in the House report. It is the conferees' intention that the funds be allocated such that no personnel reduction occur in FERC.

The conferees wish to emphasize the importance of allocating sufficient personnel and other resources to the small hydropower licensing functions to avoid delays in this area.

GEOTHERMAL RESOURCES DEVELOPMENT FUND

GEOTHERMAL LOAN GUARANTEE AND INTEREST ASSISTANCE PROGRAM

Amendment No 52: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

For administrative expenses of the Geothermal Resources Development Fund, $200,000, to remain available until expended; and for carrying out the Geothermal Loan Guarantee and Interest Assistance Program as authorized by the Geothermal Energy, Research, Development and Demonstration Act of 1974 (Public Law 93-410), $2,000,000, to remain available until expended: Provided, That not to exceed $2,000,000 from the Fund shall be available for interest differential payments in fiscal year 1982: Provided further, That the amounts remaining in the Fund shall be used as a default reserve for loan guarantees issued pursuant to section 201 of title II of Public Law 93-410, as amended.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees fully concur with the Senate Report language regarding the Geothermal Loan Guarantee and Interest Assistance Program and direct the Department to advise the Committees on Appropriations not later than January 1, 1982, of the steps being taken to comply with the Committees' direction in implementing Public Law 93-410, as amended.

GENERAL PROVISIONS, DEPARTMENT OF ENERGY

Amendment No. 53: Deletes language proposed by the Senate relating to the use of civilian spent fuel for nuclear weapons purposes.

The conferees agree with the intention of the Senate amendment that separability be maintained between the civilian nuclear power program and the nuclear weapons programs. However, since there are no funds in this bill to use civilian spent fuel for weapons purposes, the legislative limitation is not necessary.

Amendment No. 54: Deletes language proposed by the Senate to appropriate an additional $335,525,000 for atomic energy defense operating and plant and capital expenses activities. Additional funds were included in the existing appropriating accounts.

TITLE IV—INDEPENDENT AGENCIES

FUNDS APPROPRIATED TO THE PRESIDENT

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS

Amendment No. 55: Appropriates $150,000,000 for Appalachian Regional Development Programs instead of $200,000,000 as proposed by the House and $83,000,000 as proposed by the Senate. Funds may be allocated as the Commission determines appropriate. The conferees agree that the Commission should prepare for submission to the Congress a report and plan for finishing up ARC programs in a reasonable period of time, as detailed in House Report 97-177. The conferees also agree that ARC should not enter into any projects that cannot be completed with any available Federal, state, local, private or other funds.

Amendment No. 56: Earmarks $100,000,000 for the Appalachian Development Highway System instead of $140,000,000 as provided by the House and $60,000,000 as provided by the Senate.

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

Amendment No. 57: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: *official entertainment expenses (not to exceed $1,500);*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 58: Appropriates $465,700,000 as proposed by the Senate instead of $477,534,000 as proposed by the House.

The NRC shall submit to the Committees on Appropriations for prior approval any changes from priorities in research programs identified in the House and Senate Reports, and subject to the above is directed to carry out the testing matrix and schedule identified by the Office of Nuclear Regulatory Research drawing from the LOFT Special Review Group. The conferees agree that up to $3,500,000 is available for gas-cooled reactor research. A total of $200,000 is provided for the nuclear data link and the Commission is to submit a report addressing those issues identified in House Report No. 97-177 in FY 1982.

Amendment No. 59: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which deletes language proposed by the House earmarking funds and adds Senate language providing that funds remain available until expended.

Amendment No. 60: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which deletes language proposed by the House that would limit availability of research funds to two years and makes funds available until expended.

Amendment No. 61: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which allows for NRC to retain regulatory jurisdiction on a case-by-case basis where the Commission can demonstrate a need to protect the public health and safety.

TENNESSEE VALLEY AUTHORITY

PAYMENT TO TENNESSEE VALLEY AUTHORITY FUND

Amendment No. 62: Appropriates $129,162,000 for Payment to Tennessee Valley Authority Fund instead of $140,743,000 as proposed by the House and $124,162,000 as proposed by the Senate.

WATER RESOURCES COUNCIL

WATER RESOURCES PLANNING

Amendment No. 63: Deletes language proposed by the House which would have appropriated $2,500,000 for salaries and related expenses.

Amendment No. 64: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

Water Resources Planning

For the Water Resources Council for salaries and related expenses necessary in carrying out the provisions of the Water Resources Planning Act of 1965 (42 U.S.C. 1962-1962d-3), as amended, including services as authorized by 5 U.S.C. 3109 and 42 U.S.C. 1962a-4(5), $3,888,000 including $658,000 for expenses in administering the Act (42 U.S.C. 1962d(b)), and $3,230,000 for preparation of assessments and plans (42 U.S.C. 1962d(c)): Provided, That none of the funds included herein shall be used for an independent Project Review, for expenses of River Basin Commissions or for Grants to States.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have provided a total of $3,888,000 to the Water Resources Council, including $3,230,000 for preparation of assessments and plans and $658,000 for salaries and expenses. No funds are included for the Upper Mississippi Comprehensive Management Plan inasmuch as H.R. 4035, the fiscal year 1982 Department of Interior and related agencies Appropriation Bill, contains a total of $1,842,000 for water policy, planning and coordination and for program support of the Office of Water Policy. No funds are included for an independent project review, grants to states, or for expenses of River Basin Commissions.

TITLE V—GENERAL PROVISIONS

Amendment No. 65: Provides language proposed by the Senate prohibiting implementation of a program of retention con-

tracts for senior employees of the Tennessee Valley Authority.

Amendment No. 66: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. There is no intention on the part of the conferees to preclude appropriations for the operation and maintenance, or restoration and rehabilitation as required, on the existing authorized project.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1982 recommended by the Committee of Conference, with comparisons to the fiscal year 1981 amount, the 1982 budget estimates, and the House and Senate bills for 1982 follow:

THE FATE OF THE SOCIAL SECURITY MINIMUM BENEFIT LIES IN THE HANDS OF THE SENATE CONFEREES

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, the House has twice voted, by overwhelming margins, to restore the $122 a month benefit which Gramm-Latta took away from 3 million of America's oldest and poorest citizens. Many weeks ago, we sent to the Senate a bill to accomplish this purpose.

The Senate, in spite of protestations of sympathy, are insisting that if the minimum benefit is to be restored, future benefits must be reduced and degraded and certain benefits subjected for the first time to being taxed.

Upon this rock of disagreement, the conference committee is foundering. Notifications already have gone out to these elderly citizens that those meager benefits are being reduced.

May every citizen know exactly where the blame lies. It is the will of the American people that these benefits be restored in full to America's elderly, without degradation. Their fate lies in the hands of the Senate conferees.

ACCEPTABLE FARM BILL CALLED FOR

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, the nails were driven firmly into the coffin of the farm bill yesterday with the actions taken by the conference committee. With a cosmetic change in the sugar and peanut legislation, by agreeing on excessive increases in target prices for grains, with questionable action on embargo products and bankruptcy procedures, this conference is producing a bill that is doomed to defeat. With the bill still not complete, the President's budget is exceeded by nearly $610 million.

If I were a farmer, Mr. Speaker, I would be calling out to members of the Agriculture Committee involved in this conference, asking them to recognize it is in everybody's best interests to have a farm bill that will be acceptable by the Congress, by the President, and by the American people.

REAGAN-VOLCKER DEPRESSION

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, the latest housing starts figures based on October's starts level of 857,000 are down 3.6 percent from October of last year. The housing industry in our Nation is coming to a screeching halt. In fact, it already has, and the economy right along with it. There are over 61 percent of the woodworkers in Oregon unemployed. Factory output dropped 2 percent in just less than 60 days. There are 1 million plus more Americans unemployed today than there were when President Reagan raised his hand to take his oath of office on January 20, and the chief economist adviser to the President predicts another million before too long.

If we wait for 2 or 3 or 4 years for a recovery, as the administration is suggesting, there will not be a delivery system in place to produce homes. And without a strong housing program the American people not only cannot be housed but the effect on the economy will be devastating.

HIGH INTEREST RATE THREATENING OUR COUNTRY'S FOOD SUPPLY BASE

(Mr. McCURDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCURDY. Mr. Speaker, farmers and ranchers are telling their kids that there is no future in agriculture. They are in serious trouble. Some observers report they have never seen farmers in so much trouble. For over 2 years now, most farmers have not been able to turn a profit.

The administration's policies of continued high interest rates are forcing farm families to give up their dreams, their hopes, and finally, their farms.

The USDA reported recently that over the past 2 years, the Nation's farm population has decreased by 450,000. Another USDA report says we are losing 1,000 farm families per week to nearby cities and towns.

It is the high cost of borrowing that is suddenly threatening the very base of our country's food supply. Besides borrowing to purchase land and machinery, many farmers obtain loans in the spring to buy seed, fuel, fertilizer or herbicides. They can pay off the loan when the crop is in. Cattlemen borrow to buy young feeder calves. They can pay off the loan when the calf is grown and ready for slaughter. In 1981, farmers and ranchers hope to pay interest alone.

Since most farm loans made this year are not due until early next year, we do not have any idea what the true impact of sustained high interest rates will be. Judging by the message from farmers to their children, most are not planning beyond 1982.

DESTRUCTION OF THE HOUSING INDUSTRY

(Mr. FRANK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRANK. Mr. Speaker, the latest housing start statistics just confirm what a drastically depressed situation we face in the housing industry. The so-called American dream for young people to buy their own homes is simply being demolished. The absolute destruction of any new housing construction in this country is causing a situation where, as housing prices and interest rates go higher and higher, young people who want to start a new family have no hope whatsoever.

The Reagan administration's conscious policy in turning investment away from housing is producing an economic and social disaster to which the Congress must respond. Mr. Speaker, disaster is not too strong a word when one examines the statistics involved: Housing starts for October were 43 percent less than a year ago and the lowest since 1966 and starts for single family homes were at an all-time record low. And the administration's simplistic, antihousing policy that lower interest rates will cure all the problems just ignores reality: Homebuilders are going out of business and those who are left have had their profits decimated. Marginally lower interest rates, which is all we can realistically hope for in the short term, will not solve the bankruptcy problems of homebuilders nor the unemployment problems of construction workers nor the housing needs of the American people. We in Congress must design well-conceived proposals if we are to rescue this industry from the disaster it is facing.

HOUSING SLUMP INTENSIFIES

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, the housing slump intensifies. The Washington Post reported today that October housing starts have plunged to a record low. The New York Times reports that in October starts fell to a 15-year low.

I talked this morning to a lifelong friend in Osceola, named W. F. Fletcher, who has been in the real estate business all of his life. He reports that the housing industry in Arkansas is in the worst condition that he has ever observed; because of the state of the economy, particularly the high interest rates, he has only been able to build two houses this year, and neither one has sold.

Mr. President, we are waiting for Reaganomics to work and for you to reduce the interest rates to below 10 percent as you promised a year ago.

FUTURE OF HOUSING INDUSTRY AT STAKE

(Mr. MITCHELL of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL of Maryland. Mr. Speaker, I am compelled to express a very grave concern about the status of the housing industry. Yesterday, I and several of my colleagues learned, from the Department of Commerce, that this industry has experienced the second lowest number of housing starts ever recorded. The October 1981 housing starts figure of 857,000 units is second only to the year 1966 when the number plummeted below 850,000. Additionally, this figure is 43 percent below the October 1980 recorded level.

As we become increasingly aware that the Federal involvement in providing housing will diminish significantly, as the administration's and Congress policies dictate, we must ask ourselves several questions:

First. Can the private sector realistically meet the immediate and growing national demand for housing? In my city of Baltimore alone, there are currently 40,000 citizens seeking housing;

Second. Will the continuing state of high interest rates, increased speculative demand as a result of massivie tax cuts and breaks, and significant reductions in federally subsidized housing units, foster a healthy economy in which the housing industry might insure that every citizen can afford decent housing?; and

Third. Can we risk the elimination of a significant number of subsidized housing units across the Nation in the absence of quantifiable evidence that the elimination of such units will be matched by private sector initiatives to replace them, in tandem?

I believe that the latest Department of Commerce figures place serious doubt in our minds when we try to answer these questions. The housing industry is fighting for its survival. The diminishing role of the Federal Government in undergirding this industry, or at least, providing where the industry cannot, may be a fatal mistake.

□ 1015

PENDULUM SWINGS ON ANGTS WAIVERS

(Mr. CORCORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN. Mr. Speaker, as you know, the Congress of the United States has been considering during the last 30 days the proposed waivers with respect to the Federal laws that govern the transportation of natural gas at Prudhoe Bay on the North Slope of Alaska to the lower 48 States.

I am happy to report to my colleagues in the House that, as our colleagues in the committees both in the Senate and the House have been working in evaluating these proposed waivers, we have learned more about them; and the pendulum has begun to swing in favor of those who would like, as would my friend, the gentleman from Iowa (Mr. TAUKE), to see them rejected.

As a matter of fact, in the first test vote in the Senate, the vote was 14 to 1 in the Committee on Energy and Natural Resources in favor of the waivers. The second test vote was here in the House in the Committee on Interior and Insular Affairs; the vote was a little better from our standpoint, it was 32 to 7 in favor of the waivers.

However, the Subcommittee on Fossil and Synthetic Fuels of the Committee on Energy and Commerce has voted just this week, and the vote was 12 to 9, with three rather interesting abstentions by Members who are in fact opposed to the waivers.

Later on today the full House Committee on Energy and Commerce will vote. There is no way we can predict what that vote might be, but I can assure the Speaker that it is now a divided question as more and more Members become informed about these waivers, and in my judgment they should indeed ultimately be rejected.

REVEALING A NEW SIDE TO THE SPEAKER OF THE HOUSE

(Mrs. MARTIN of Illinois asked and was given permission to address the House for 1 minute, and to revise and extend her remarks.)

Mrs. MARTIN of Illinois. Mr. Speaker, occasionally my side of the aisle has been accused of perhaps not treating the Speaker as well as we should and not recognizing his many good qualities. As Republicans, we are more than willing to admit that others can show us the way.

I have here a Journal—but not the Congressional Journal—with which my colleagues may not be too familiar, the Ladies Home Journal, and I thought it appropriate to read to the Members from the December issue something that an outsider said about our Speaker. Perhaps this will show Republicans and Democrats alike a side of our Speaker we have never seen before.

The article was entitled, "Kiss and Tell." Eighteen celebrities reveal whom they would like to find under the mistletoe. Some people chose Sean Connery and others whom we could identify rather quickly. But Marie

Osmond chose our Speaker to meet under the mistletoe with these lines:

I would like to get him under the mistletoe right up front, and I would mess up his hair real good and give him a big hug so that he would then have something to talk about other than Ronald Reagan.

I have never met Mr. O'Neill, only watched him on TV, and I have a feeling under all that polish and political prowess there lurks an enormously affectionate teddy bear. I'd like to be the one to find it.

Mr. Speaker, we all join Marie and wish her and you a happy Christmas.

NATIONAL DEFENSE COSTS JUSTIFIED

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, in this time of talking about Defense Department appropriations, we sometimes forget to put our budget problems in perspective, and we talk about balancing and thinking about the expenses and the cost of military just like everything else that goes on. We have heard the discussions on housing this morning for example, but we would not be discussing the dollars and cents if it were not for the fact that we have a strong enough national defense to deter the Soviet Union and to give us the opportunity to have that quality of life and freedom that is so precious.

As we look at the comparative statistics on the percentage of gross national product between the United States and the Soviets relating to national defense expenditures, it makes yesterday's votes all that much more meaningful. I would remind my colleagues that in 1960, in the Kennedy years, in 1960-62 and 1963, we spent about 9 percent of our gross national product on national defense. Today, even with out appropriation yesterday, we are only spending about 5½ percent of our gross national product on our national defense, and even in the out years, 1986 and 1987 with future projections commencing to increase spending, we are only going to get up in the neighborhood of 6 to 7 percent.

In the meantime, in the last 10 years or so, the Soviet Union has been spending at an average annual rate of about 15 percent of its gross national product on its national defense.

Mr. Speaker, we must continue to strive to spend a substantial portion of our gross national product and increase that amount on our national defense if all the rest is going to succeed and all the economic concerns are going to be worth the effort.

THE PRESIDENT'S PEACE INITIATIVE

(Mr. MORRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON. Mr. Speaker, the President's peace initiative was well received yesterday by everyone, except, naturally, the Soviets, who now wear the black hats.

We have a tendency to use these 1-minute dissertations to throw stones—this week has been highlighted by the continuing resolution fiasco, delays due to political committee hearings, the continued politicizing of social security, and the efforts of the majority party to transfer the responsibility for high interest rates to our new President.

Today, let me give credit when credit is due. The overwhelming vote last night in support of the Defense appropriations bill, and to sustain the President's position on the B-1 and MX, was a vote of confidence. Both sides of the political aisle were saying, "Mr. President, we agree, America's defense has been shortchanged in recent years. We need to be strong as we go to the negotiating table."

I believe that America agrees also. We have taken a positive step—and in the right direction—toward peace, through strength.

HOUSING INDUSTRY SUFFERING FROM REGULATIONS

(Mrs. FENWICK asked and was given permission to address the House for 1 minute.)

Mrs. FENWICK. Mr. Speaker, I rise to speak to the House very briefly. This morning twice we have heard about the question of housing, and certainly we all should be concerned. But I think the Members would be happy to hear about a meeting of a subcommittee of this House yesterday under the very able chairmanship of the gentleman from California (Mr. ROYBAL).

We are suffering and our people in this country are suffering under the regulations of the previous administration. Now, I do not mean to get too partisan about all this, but let us face it. Those regulations were made by that administration, not by this administration, and the definition of what constitutes, for example, something as simple as shared housing has been a barrier to many, many satisfactory, inexpensive and sensible ways of providing housing to people who want it. The regulations make it almost impossible to do so in any commonsense way.

I was happy to hear yesterday the administration official who appeared before us, before the gentleman from California (Mr. ROYBAL), Mr. EVANS, and me. I think we all felt that we are moving in a direction that is productive, from the specific needs of people instead of from statistics and charts. We may finally stop building the massive projects that kill the people in them.

Mr. Speaker, I have written reports for the U.S. Commission on Civil Rights condemning the hideous housing to which we have assigned human beings in our well-meant but disastrous projects. We have got to stop doing this and move forward in another direction.

SOCIAL SECURITY PARTISANSHIP DISTURBING

(Mr. WALKER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, this morning on this floor we heard another couple of speeches tinged with partisanship on the issue of social security.

This is a very disturbing trend, Mr. Speaker. We have seen the Democratic National Committee use the Committee on Aging for a political fund-raising effort. We understand that the Speaker of the House has made a conscious decision to keep the Committee on Ways and Means from even considering solutions to what we all know is a major social security problem, and now today on the floor we hear another series of partisanly tinged speeches on this very basic issue.

Mr. Speaker, I think the question asked by the American people is: Should not something as vital and important as social security be raised above partisan bickering? I certainly believe so.

IN SUPPORT OF HOUSE JOINT RESOLUTION 349, MULTINATIONAL FORCE AND OBSERVERS PARTICIPATION

(Mrs. COLLINS of Illinois asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. COLLINS of Illinois. Mr. Speaker, today we will be asked to authorize $125 million so that U.S. soldiers can participate in the multinational peace force that is designed to monitor the Israel-Egypt truce following the final stage of Israel's withdrawal from the Sinai Peninsula. This is a small price to pay for peace and to insure the security of Israel in exchange for that country's courageous agreement to give up large portions of territory that were won at great cost in lives and suffering.

Israel's territorial acquisitions are a legacy of its historical vulnerability in a region where its statehood is still not a fully accepted fact. The Camp David agreements, signed by Prime Minister Begin and the late, great statesman Anwar el Sadat, represent a major breakthrough in recognizing Israel's

right to exist in peace and as a partner in the region's development.

In place of territory of tremendous military and strategic value as well as oil resources, Israel has accepted Egypt's hand in peace and has chosen to stake its future on faith rather than force. Let us hope that this momentous achievement will not only endure, but will soon be replicated with Israel's other recalcitrant neighbors—including the Palestinians as well as Saudi Arabia, Syria, Lebanon, and Jordan.

HOUSING STARTS PLUMMET

(Mr. EVANS of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Indiana. Mr. Speaker, each day the American public is being given new evidence of the continued downward plunge of the U.S. economy, thanks to the results of the Reagan economic recovery program. Today we are told that the housing starts for October of this year are the second lowest since the Department of Commerce has been keeping housing starts records.

The October housing starts level of 857,000 units on an annualized basis is the lowest since October of 1966. The level for October of this year is 43.6 percent below last October's level and only one-third of the amount of housing starts necessary to meet the housing needs of this Nation.

This record low housing starts level is the result not just of high interest rates, but of the persistently high inflation level which the Reagan administration's policies have done little to stop and of the policy of this administration of not doing anything to assist the thrift industry's disastrous situation. The thrift industry is the principal provider of mortgage credit and, as such, the major underpinning for the housing industry. The savings and loan associations are not in the business any more of making long-term, level-payment mortgages and for that reason the dream of most Americans of homeownership will be only that, a dream.

Mr. Speaker, I regret our housing industry has been so devastated, and I would hope that this new evidence of economic depression will cause the administration to change course on economic policy direction that OMB Director David Stockman has no faith in.

FLORIDA—PARADISE LOST

(Mr. MICA asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. MICA Mr. Speaker, a national magazine this week on its front cover declared Florida a "Paradise Lost." The crime rate there is skyrocketing. Illegal narcotics, drugs, illegal aliens, and criminals from Castro's prisons have created a deadly combination. Now is the time for a major coordinated effort.

We have disaster areas declared for earthquakes, hurricanes, and floods.

I will shortly introduce legislation to allow the President to declare a crime emergency area. This would allow the assignment of a coordinator to immediately and efficiently direct Federal, State, and local efforts in a major crime battle.

Mr. Speaker, this is a major battle. It is a crimewave, and it needs a major coordinated effort now.

THE PRESIDENT'S INITIATIVES ON ARMS CONTROL

(Mr. KASTENMEIER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. KASTENMEIER. Mr. Speaker, later today we will be called on to endorse the President's initiatives on arms control as communicated by him to the National Press Club on yesterday.

Apparently the plan is to have this body unanimously rubberstamp Mr. Reagan's views on this matter. I believe the House would do well to consider carefully whether or not it should approve or whether or not it should even be called upon to approve the President's position.

I recall that when Mr. Carter was President and was unable to attain approval of SALT II, we were not asked to go on record to endorse what was indeed a worthy initiative.

□ 1030

Indeed, many in the Congress and some outside the Congress, including the man who is now President, opposed and eventually frustrated that approval.

While I do not oppose Mr. Reagan in terms of the speech he made yesterday, I think it would be well we understand its purpose. It is not because the President has overnight become an arms controller. No. It is, rather, because the administration has found it is in great difficulty on the issue both at home and abroad, with the Conference of Catholic Bishops taking a position on Tuesday in opposition to the arms race, and with our friends in Germany and elsewhere in a sad state in terms of our introduction of nuclear arms in their countries.

So even before the President's speech was delivered, the press and commentators had analyzed the aims and content. It had been pointed out the proposal is not new and that it is foreordained to rejection but, nonetheless, we would gain in terms of a propaganda advantage.

I look for more, Mr. Speaker. Maybe on November 30, with the Geneva Conference, and beyond, we will have something to applaud the President for. But that time has not yet arrived.

For now, however, I see no reason why the President should enjoy any particular credibility on this issue, any more than his Budget Director should enjoy credibility on economic issues.

Mr. Speaker, I will not today object to the immediate consideration of this resolution but I shall most certainly vote against it.

PRESIDENT'S PEACE INITIATIVE

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, yesterday the President made what people all around the world are proclaiming as an historic move toward peace. Clearly it is a different sort of initiative than we have seen. Peoples from all around the world are complimenting the President. They see it as different. Parliaments are passing resolutions all across the world endorsing this bold move.

The President himself, in his special way, has reached into the hearts and minds of people, not just the leaders all around the world. It occurs to me that this House should unanimously endorse the President.

Any idea that this President has come to this position recently is as farfetched as it could ever be. This President has been talking about peace through strength for years. This party, the Republican Party, has been talking about peace through strength. And this party, by the way, went on record last year, in 1980, at the national convention on the idea of arms reduction as opposed to arms limitation.

If I could just read one passage from those proclamations last summer.

A Republican administration will continue to seek to negotiate arms reductions in Soviet strategic weapons, in Soviet Bloc force levels in Central Europe, and in other areas that may be amenable to reductions or limitations.

This is not a position that the President has come to recently.

SUCCESS OF THE PRESIDENT'S ECONOMIC PROGRAM

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, again we listen to those who take the well and criticize the Reagan administration and its economic policies for the failures in our economic situation at the present time.

I would just suggest to them that rather than look to Reaganomics for

the problems that we see today, they might very carefully look at Tiponomics.

What are Tiponomics? Those are the policies that this House has followed under the leadership of the present Speaker of the House with respect to the economy.

What happened during that period of time? We managed to bring inflation from 4.8 percent to double-digit heights. We had double-digit inflation for 2 years back to back for the first time in the history of the United States.

We managed to bring interest rates from a low which looks incredible at the present time, at about 5.3 or 6 percent up to double-digit figures, to even 20-plus percent. We had that for 2 years in a row.

Our rate of productivity growth has gone to a negative level for 3 years in a row. And what else did Tiponomics give us? We had the real growth in the gross national product going to an absolute negative dive for a solid year.

When we have those problems confronting us, we have to do something to work ourself out of it. It seems to me to be almost indecent to suggest when we followed one way of doing things on this floor for several years—that is, high taxes, high spending—with miserable results, that we should criticize this administration for just beginning to see if it can make a change. And this seems to be particularly bad timing at a time when we see inflation rates going down, interest rates going down and, yes, incredibly, a growth in productivity in our economy.

EXPRESSION OF SUPPORT OF CONGRESS FOR PRESIDENT'S INITIATIVES FOR PEACE

Mr. ZABLOCKI. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 224) to express the support of the Congress for the President's initiatives for peace and ask unanimous consent for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 224

Whereas President Ronald Wilson Reagan has called upon Soviet leader Leonid Brezhnev to engage in Strategic Arms Reduction Talks (START);

Whereas the President's willingness to cancel deployment of Pershing II and ground-launch cruise missiles if the Soviet Union dismantles its SS-20, SS-4, and SS-5 missiles is a dramatic and bold step toward real nuclear arms reduction;

Whereas the President's call for "equality at lower levels of conventional forces in Europe" is a necessary part of his goal of reducing the threat of war;

Whereas the President's invitation to President Brezhnev to join in a conference that would "develop effective measures that would reduce the dangers of war arising out of uncertainty and miscalculation" demonstrates this Nation's belief in the need for mutual restraint between the superpowers; and

Whereas the President's goal of "mutual reduction of conventional, intermediate range nuclear and strategic forces" is in the great American tradition of seeking and keeping the peace through realistic methods: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress expresses its commendation of and support for the President's initiatives for peace and reaffirms its desire to work with him so that the threats of nuclear war can be reduced and, perhaps, eliminated in our lifetime.

The SPEAKER pro tempore (Mr. BOLAND). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin is recognized for 1 hour.

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume and, pending that, I yield one-half hour, for purposes of debate only, to the gentleman from Michigan (Mr. BROOMFIELD), the ranking minority member of the House Foreign Affairs Committee.

Mr. Speaker, together with the distinguished leadership on both sides of the aisle, I rise in support of House Concurrent Resolution 224 commending President Reagan for the arms control initiative expressed in his National Press Club speech yesterday.

Mr. Speaker, our colleague, the distinguished minority leader, Mr. MICHEL, initiated the draft of this resolution. This bipartisan resolution is enthusiastically supported by the House Foreign Affairs Committee. It recognizes that President Reagan's proposals represent important and bold initiatives for world peace. If accepted by the Soviet Union, they will result in significant reductions in strategic and theater nuclear weapons and conventional weapons.

Mr. Speaker, I wholeheartedly welcome and share President Reagan's commitment to arms reductions. His arms control proposals have at long last given us the negotiating high ground and should dispel doubts among our European allies about the seriousness of our arms control efforts.

While the President's proposals are only the first step in a difficult road ahead, they do deserve the special commendation and support that House Concurrent Resolution 224 will provide. I urge the adoption of the resolution.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first of all, I would like to thank the chairman of the Foreign Affairs Committee, the gentleman from Wisconsin (Mr. ZABLOCKI) for bringing this resolution before the House today.

The House of Representatives should publicly endorse President Reagan's initiatives for peace which he set forth yesterday. The resolution before us now clearly underlines our concern for arms control and strongly supports the President's course of action.

It is disappointing and disgusting to witness the Soviet's cynical dismissal of this historic proposal as just another propaganda ploy.

Peace-loving people around the world recognized and embraced it as a hopeful sign for the future. We can only hope that the pressure of world opinion will force the Soviets to take a sober second look at the real implications of the President's message before the Geneva talks begin later this month.

By passing this resolution, the House will be sending a message to the Soviet Union, and to our allies in Western Europe and around the world, that the President's policy enjoys bipartisan support in the Congress. They will know that the President is dealing from a strong position, and has the confidence of the American people.

Now is the time to rally around this peace initiative. It is important that friend and foe alike understand what the United States stands for and what our goals are internationally. We have heard a great deal of Soviet disinformation lately regarding U.S. motives in the defense field, and we have heard some well-intentioned but misguided groups in Western Europe question our seriousness in pursuing arms control.

Now is the time when we can set the record straight. Let there be no doubt that the United States prefers peace to war, and let there be no doubt that we believe that arms control is a viable tool for achieving a peaceful world.

The President's initiative challenges the Soviet Union to live up to its pronouncements in favor of peace. If they accept the challenge, the world will be better off. If they do not, then we will know where we stand, and more importantly, those groups who say the Soviets can be trusted will have an opportunity to see the Soviets stripped of their rhetoric and propaganda.

I encourage all of my colleagues to support this resolution.

Mr. ZABLOCKI. Mr. Speaker, I yield so much time as he may require to our distinguished and able majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, this peace initiative is very much in the American tradition. This resolution of bipartisan support for the President's peace initiative also is in the dominant line of tradition that dates back at least to the days of President Harry

Truman and Senator Arthur Vandenberg.

Had it not been for a disposition on the part of a Republican Congress immediately following World War II to support the important peace initiatives of President Harry S. Truman, history might have been much different, and much less benign. Such initiatives as food for peace, help for Greece and Turkey, for the Berlin airlift, and for that great monumental work which has been described by Winston Churchill as the most unsordid act in the history of the human race, the Marshall plan, enjoyed bipartisan support. Without it, the great progress that was made in those years toward the development of the basis for a peaceful world would not have come about. It was Senator Vandenberg and a then Member of the U.S. House named Christian Herter, a Republican Member, later to be Secretary of State, who led the effort to adopt the great Marshall plan that became the cornerstone of our postwar policy.

When President Eisenhower was our Chief Executive and there were Democratic leaders in the Congress, his open skies policy was greeted with uniform bipartisan support on the part of the congressional leadership and the congressional membership. When difficulties arose and the United States was challenged, first in the gulf off the coast of Formosa involving the islands of Quemoy and Matsu, and later in the throbbing Middle East in the area of Lebanon, the House and the Senate almost unanimously passed resolutions supporting the firm resolve of then President Dwight D. Eisenhower to make certain to the world that the United States was a Nation united in purpose as well as in name. Because of that show of strength and near unanimity, we removed any doubt from the minds of would-be aggressors in the world that we would weaken under attack or under provocation or that we would split apart and tear ourselves asunder upon the shoals of partisan political division within our country.

During the administration of John F. Kennedy, in the Cuban missile crisis and the Berlin crisis, Republican Members of the Congress rallied, as did the Democratic Members, to support the united position of the United States.

□ 1045

Because of that unified demonstration in support, the President's hand has been strengthened down through the years. In all of these postwar years, we have followed the basic philosophy that partisanship must end at the water's edge.

So what is being done today is a reaffirmation of that principle. Not only is it a reaffirmation of the principle of bipartisan foreign policy on the part of the United States, it is a reclaiming of what is rightfully ours—and that is the initiative in the worldwide search for peace.

President Reagan's four basic proposals made yesterday before the National Press Club and in an unprecedented forum before all of the people of the world viewed by means of Telstar in all of the lands where television sets were available, comprise a bold, imaginative, sensible, and reasonable offer that the Soviet Union would do well favorably to consider and not automatically or out of hand to reject.

So it is a seizing again of the initiative in the continuing struggle for the minds of men and women throughout the world. But it is even more than that, I think. "Blessed are the peacemakers, for they shall be called the children of God." This initiative restores, I believe, once more to the United States that shining mantle of being a peacemaker for the world.

For all of those reasons, it is a great honor and privilege for me, as one spokesman for the Democratic majority in the House, to join wholeheartedly and enthusiastically in support of this initiative of President Reagan so that all the world may know that we here in the United States are indeed united in this determined search for peace.

Mr. BROOMFIELD. Mr. Speaker, I first want to congratulate the majority leader for that tremendous statement in support of this resolution, and I now yield such time as he may consume to the minority leader of the House, the gentleman from Illinois (Mr. MICHEL).

Mrs. HOLT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentlewoman from Maryland.

Mrs. HOLT. Mr. Speaker, I want to commend the committee for this resolution.

Mr. Speaker, because of our President's splendid speech on disarmament yesterday, the world is watching the Soviet Union for some kind of meaningful response.

The first reaction from the Kremlin was to describe the President's proposals as a propaganda ploy, but the Soviet leaders should know that that answer is not good enough.

In a world alarmed by the potential for cataclysmic war and nuclear holocaust, the people of this planet do not want serious disarmament proposals dismissed by either superpower.

The American commitment to peace should not even need restatement, but our President has restated it as well as it has ever been expressed.

President Reagan asked for real reductions of both nuclear weapons and conventional arms, not just ceilings that accommodate all current weaponry.

If the Soviet Union does not like our plan to place new intermediate-range ballistics missiles in Europe, then we are willing to drop the plan if the Soviet Union scraps its intermediate-range missiles aimed at Europe.

Let us have real reductions. Let us move together to make some real progress on averting the danger of nuclear war.

That is what President Reagan has told the Soviet Union, and the test of Soviet intentions will come when we begin the European nuclear arms negotiations November 30.

Let us tell our Soviet rivals that our overwhelming interest is to achieve the accords necessary for lasting peace and a reduction of the terrible nuclear arms that threaten all humanity.

I believe the President has made our position clear, and it is a position that should be welcomed by the whole world.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I rise in support of the President's excellent address which hopefully will lead to world peace.

Mr. Speaker, I rise in strong support of House Concurrent Resolution 224, to express the support of the Congress for the President's initiatives for peace.

President Reagan has called upon the Soviet leadership to engage in a new and significant peace effort. This proposal steps beyond the past efforts of strategic arms limitation talks (SALT) which had sought to halt the arms race. The President's plan breaks new ground in calling for strategic arms reduction talks (START) or an actual reduction of current arms levels.

Through this initiative the United States has offered the olive branch to the Soviet Union in the hope that proposals to reduce arms and to deescalate the nuclear buildup in Western Europe can become a reality. With this effort there can be no doubt about our Nation's commitment to arms reduction as a viable tool in preserving peace in Europe and around the world.

Contrary to efforts of those who seek to paint the United States as unwilling to pursue arms control, this resolution recognizes that it is now up to the Soviet Union to demonstrate its willingness to reduce the level of tension and threat to peace in the world. Our support in this effort will demonstrate that the President enjoys strong bipartisan support in the Congress and will thereby be dealing with the issue from a position of strength.

As a cosponsor of this resolution, I urge my colleagues to join with me in

strong support of House Concurrent Resolution 224.

Mr. MICHEL. Mr. Speaker, may I first commend the distinguished minority leader for the brief review of recent history with respect to the bipartisan support of the Congress to whatever administration was in power for important foreign policy decisions. And may I thank, particularly, the chairman and the ranking minority member of the Committee on Foreign Affairs for coming forth so promptly with this concurrent resolution. It was to have been considered last evening, but in view of the legislative schedule, it was deferred until this hour.

Yesterday, the President's historic address called for the beginning of a process of strategic arms reduction talks.

The President emphasized the word "reduction." He did so to point out that arms limitation talks, despite some advances, have not brought us closer to the goals of a world free from the threat of a nuclear holocaust.

I think we can say, without exaggeration, that the President's message is the most important one made concerning nuclear arms in many, many years. History may well record that its four major points are among the most important to ever have been raised in arms negotiations between the United States and the Soviet Union.

The President's challenge to the Soviet Union is as dramatic as it is logical. He brings the rulers of that country face-to-face with the reality of what they alone have created in Europe, a reality of nuclear threat.

For many years we have been hearing calls for disarmament in the United States. Some go as far as to say we need unilateral disarmament.

Unilateral disarmament, in the face of armed aggressors leads to slavery, to death camps, to boat people, and to the crushing of all human and civil rights.

But President Reagan's call for balanced arms reduction, based on verification techniques that are open and creative, is a realistic method of approaching the complex problem of arms reduction. The President has shown himself and our Nation to be interested in the realistic pursuit of an achievable peace rather than just in the rhetoric of peace.

So I am happy to join with my colleagues, hopefully in a unanimous vote here, in support of this historic concurrent resolution.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I rise in favor of House Concurrent Resolution 224. I commend President Reagan for his bold, innovative, historic plan to set the world on a new course toward significant arms reductions and lasting world peace.

The beneficiaries of the President's actions, assuming there is now a serious response from the Soviet Union, will be this and future generations in every corner of the globe.

I think I speak on behalf of every Member of this body when I say that our hopes and prayers are with the President in this undertaking. There can be no higher calling than seeking the serious pursuit of a secure, peaceful world through significant, balanced reductions of deadly nuclear weapons—the presence of which has threatened destruction of life as we know it for a generation.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. MICA).

Mr. MICA. Mr. Speaker, some are questioning the President's motives in making this proposal. I read the proposal, and I take it for what the President has said—an honest effort to see peace in this world.

Many are questioning and saying it was not a sincere move. We have had that response from the Soviet Union. But I think today, Mr. Speaker, the American people through their Representatives in the House of Representatives, 220 million people, will be saying, "We want to give this proposal a chance. We endorse the President's proposal."

So whoever questions, whoever is skeptical of reasons that this plan came about can look to the people of the United States, look to the Congress of the United States, and see a total endorsement that this Nation and this Nation's people are committed for every possible opportunity for peace in this world.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the distinguished gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, we have heard in this House today something that does honor to this House and to its traditions. I would like to speak, particularly, of the splendid speech of the majority leader and of our chairman, the chairman of our Foreign Affairs Committee, who leads us in a very sensitive and delicate field with such kindliness and such understanding and tact.

But, of course, it is more than that. I wonder and I hope if anybody can hear, or if anybody would be influenced, that the press and the public will understand the responsibility that falls on all of us now, not just in this House, but in this country. There is nothing that is going to persuade the Soviet Union to come to some reasonable arrangement at the table except the united voice of those who are free to speak.

Why has Poland remained free of invasion with all its difficulties, with its pandemonium on the borders of the Soviet Union? Because in Europe, and here, the public and the press are united. The Soviet Union knows that any movement of tanks, rolling across those borders, will be met with condemnation in every corner of the world that is free to hear.

It is understandable that some of our peace groups, mistakenly I think, will fall into the temptation of saying this is propaganda. But I would like to say to them—"Leave that to the Soviets." That is what the Soviets are going to say. That is not what truly peace-loving people will say. If there is any hope, it is in the united voice of all of those who are free to talk without fear the press and the public, the Congress, the parliaments, the Cortes, the Chambre des Deputés—the free people and free assemblies all over the world.

They know now in the Scandinavian countries, where the nuclear submarine was found, how hollow was the boast of a free Baltic Sea, a free Scandinavia, free of nuclear weapons. You only have to talk to the representatives of those countries now.

We cannot afford that this country should give some mixed signal as to what our President has said, as to what this House feels, and what the American people want in the way of peace and a peaceful world.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. DOWNEY).

Mr. DOWNEY. Mr. Speaker, I rise in support of the resolution and in support of the goals of the President achieving arms reduction in Europe. I think if we are fair and candid both sides have to recognize that these will be long and difficult negotiations, with the outcome and the benefits measured in inches and feet as opposed to yards and miles. I hope and I pray that the administration and this House and the Senate will continue to support the President in the efforts to achieve meaningful arms reductions.

We should not judge this effort and the outcome of this effort the way we judged President Carter's March 1977 strategic arms limitation talks recommendations. We were far too critical in judging what he proposed and what was ultimately accomplished, and I would hope that we do not make the same mistake in judging the outcome of these important negotiations.

I also hope and pray that this will be the first of several steps the President will take to achieve arms reduction. We still have a SALT II treaty that in my opinion should be ratified, and I know the President is interested and wants to move quickly to begin the START negotiations in March.

Mr. Speaker and my colleagues, I hope we see the beginning of a new dawn and a new era with this adminis-

tration, one that recognizes the very vital and important role of arms control. I am encouraged indeed by these efforts that the President has made yesterday, but I want as well to express some reservations that deserve attention.

But as I look at his strategic program and at his previous actions relative to arms control, I find reason for skepticism. I see the MX missile program, which because of political considerations is now designed to be nonsurvivable and is, therefore, usable only in a first strike mode. I see the Trident II D5 missile, whose advantages over the Trident I are almost exclusively in the service of first strike.

Most troubling of all, I see a refusal to ratify SALT II, for reasons totally incompatible with our military security. I see a national security apparatus staffed almost exclusively by the most dogmatic and intransigent opponents of arms control. And I see a desire to one-up the Russians in the sterile propaganda game they have been playing with our European friends.

As I see all this, my head tells me I have seen little more than the first in a series of empty propaganda gestures which will not lead to arms control and which will result in the American people paying a great deal more and buying a great deal less military security.

At the same time, my heart tells me I hope I am wrong, and the happiest day of my life would be the day Mr. Reagan, by his specific achievements, would prove my suspicions to be ill-founded.

Finally, it may be that it does not matter whether Mr. Reagan's speech grew out of sincerity or cynicism. What matters is where he goes from here. It may be that this resolution will encourage him to reflect upon the historical fact that the peacemakers are blessed and that those who refuse to serve peace are quite the other thing. It may be that this resolution will encourage him to reflect that, if such accolades can spring from such a preliminary and insubstantial act as his speech, what would be his place in history if he were to achieve arms control that really did reduce the probability of nuclear conflict.

Mr. BROOMFIELD. Mr Speaker, I yield 2 minutes to the gentleman from Iowa (Mr. LEACH).

Mr. LOWERY of California. Mr. Speaker, will the gentleman yield?

Mr. LEACH of Iowa. I yield to the gentleman from California.

Mr. LOWERY of California. I thank the gentleman for yielding. Mr. Speaker, I rise in support of this resolution commending the President for his bold proposal for arms reduction. I know I speak for all Americans in the hope for world peace. This was a very bold move and one that is quite sincere on behalf of this country and one which I am sure all Americans hope will be successful.

Mr. Speaker, I congratulate President Reagan on his foreign policy address and commend him for taking the leadership role in efforts to bring about disarmament, not on a unilateral basis, but through mutual and meaningful arms reduction. There is probably no issue before civilized mankind more important than bringing some control to the spread of nuclear weapons, whether they are on the continent of Europe or throughout the world itself.

The President's initiative will place us in a strong opening position as we go into negotiations with the Soviet Union on the question of theater nuclear weapons deployment. Clearly, the Soviets have engaged in a very intensive propaganda offensive in Europe to discredit America's commitment to arms control. This must be expected and is certainly in accord with their style and past behavior. They have skillfully attempted to divide the NATO alliance and to play on the fears of Europeans that Europe would be used as a battleground by the "superpowers." They point their fingers at the United States while they continue to deploy medium-range nuclear warheads, at the rate of one SS-20 per week, primarily aimed at Europe.

The President has very effectively taken the offensive out of the Soviets' hands. He has spoken most convincingly and in such a persuasive manner that our European friends should be encouraged.

I also applaud the President's announcement that the NATO alliance is prepared to forego the deployment of new land-based, intermediate-range missiles in Europe, provided the Soviets agree to eliminate their enormously hostile and destabilizing force of SS-20, SS-4, and SS-5 missiles. Taken in full consultation with our NATO Allies, this decision should once and for all reassure the people of Europe and the world that the United States is committed to the pursuit of peace and stability in its relationship with the Soviet Union.

Our eminently reasonable offer will appropriately test the Soviets' self-declared dedication to a peaceful and harmonious relationship with the Western alliance. I can only hope that the Soviet Union recognizes and acts on this unique opportunity to reverse what otherwise could prove to be another costly spiral in the nuclear arms race.

Mr. LEACH of Iowa. Mr. Speaker, yesterday President Reagan delivered the most important speech of his life and, perhaps, of any modern American President. While he has been criticized by some as too preoccupied with defense concerns, the President has presented the Soviet Union a full plate of arms control initiatives which, if successfully negotiated, would carve out an historic leadership role for himself and for the American people in the struggle to reduce the likelihood of nuclear war.

The President's speech is seminal from a strategic point of view and also from an economic one; for if we cannot restrain military budgets, we will never get the American economy moving again. There would be no step more likely to turn the stock market around, if not cause the biggest rally in history, than ratification of a START agreement.

Finally, a comment about motives. There are those who criticize the President for having faults or propagandistic intentions. But the fact of the matter is, President Reagan has established an agenda of preparedness to make in order an agenda of restraint. His speech was not lightly or precipitiously prepared. It signals new hope for all mankind. The resolution before us today is premised on bipartisan recognition of the seriousness of Presidential intentions. I would hope it would not be sullied by any negative votes.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, on the same day that the House passed a $197.4 billion military spending bill providing funds for a new bomber and a new missile, it was timely for the President to change the tune of the rhetoric that has been ongoing on the issue of nuclear war.

Americans and Europeans both were beginning to be very apprehensive about the administration's recent statements on the prospect of regional conflict in Latin America and the tension building up in Western Europe.

I commend the President for offering to reduce nuclear arms in exchange for a like reduction by the Soviets. While a speech is not a policy, it sets the proper tone for the impending negotiations for arms reductions which are to convene soon in Geneva.

Now that the Congress has authorized the arms race, maybe the Soviets will be serious in the arms limitations negotiations.

□ 1100

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. ROTH).

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Speaker, I rise in strong support of President Reagan's historic initiative for peace and this resolution formally commending him.

With his message, he reaffirmed our Nation's role as a world peacemaker

by extending to the Soviet Union a sincere invitation to join us in our quest for a peaceful world.

With it becoming more and more obvious that the United States and the Soviet Union are the two greatest military powers that have ever existed on the Earth, a nuclear arms buildup by the two nation's must not be permitted to continue on European soil. President Reagan is proposing not only a limitation of those arms, but in fact, an actual reduction in intermediate-range nuclear and strategic forces.

To further the drive for world peace and a scaled back military presence in Europe, President Reagan has also offered to negotiate with the Soviet Union to achieve an equality in lower level European conventional forces.

Clearly President Reagan has taken the initiative in the quest for peace by presenting a sound plan for Soviet President Leonid Brezhnev to consider. Ironically, these leaders met 10 years ago, and at that time expressed their desire to see a mutual peace accord, but as events of the past decade indicate, those hopes were never met.

Now President Reagan, as the undisputed leader of the free world, is in a position to see that his dreams are tranformed into reality. As he clearly stated yesterday, he is committed to doing whatever is necessary to guarantee world peace because he knows that we cannot afford to have our hope for peace raised then dashed again as in past years.

In just 11 days, representatives of the world's two superpowers will meet in Geneva, hopefully to embark on the path to that peace which President Reagan has outlined. It is a course we would all like to believe will check the planned increase of deadly weapons that are poised for action in Europe and around the globe, and, as President Reagan said, eventually result in a fair and verifiable reduction of those weapons.

Even though the United States and the Soviet Union exist in different hemispheres of the world, and support totally opposite ideologies, there is one common denominator between the two nations. The people of the United States and the people of the Soviet Union want a world of peace and security—void of the threat of bloodshed and nuclear war. This is a view shared by the poor and suppressed people of the underdeveloped Third World countries, as well as the people of the richest, most powerful nations. I pray that our President's historic effort will also convince the politicians of these countries that we must attain this goal of peace.

Mr. ROTH. Mr. Speaker, I also wish to join those who have thanked our distinguished chairman of the Foreign Affairs Committee and the ranking member and minority leader for this resolution this morning.

There is an ancient Russian proverb which states that "two mountains can never come together, but two men always can." I think yesterday the President tried to go a long way to prove the truth of that ancient Russian proverb.

Now if Mr. Brezhnev will be moved by the same magnanimous spirit, we can have an era of peace rarely seen in recorded history. If peace can be achieved, history will record that the east and west were lead by giants, men and women of good will.

The angels heralded on that blessed night, "Peace on Earth to men of good will."

Yes, we will have peace on Earth if the states of the world are led by men and women of good will.

Our President's initiative is only a first step and we must guard against unrestrained euphoria; but the President's bold initiative must be applauded by all men of good will.

Let us hope and pray that our President's call for peace will be met by a favorable response from the Soviet leadership.

This resolution, this expression of Congress will underscore the deep, deep longing we all have for peace, but as the expression goes, "It takes two to tango," and likewise, it will take more than President Reagan, this Congress, or the American people to bring about peace. It will take a corresponding deep desire for peace from the other side.

In my opinion, the President has extended the open hand. Let us hope that the other side will respond with an open hand, too.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma (Mr. McCURDY).

Mr. McCURDY. Mr. Speaker, I want to rise in support of the resolution and thank the chairman and the ranking minority member for bringing this resolution to the floor.

I would like to associate myself with the remarks of the majority leader.

I strongly support the President's initiative for peace.

His bold proposal literally "puts the ball in the court of the Soviets." I hope our friends in Europe will note that Russia must now abandon their argument that America is the agressor and be prepared to negotiate during the upcoming arms control negotiations at Geneva. Let us not be too relieved however, at this initial thrust for peace. Let us not hasten to champion our own effort. Though we have made the first play, it is going to be a long time before we can recognize significant achievements. I would now urge caution and stern negotiating principles by the administration during the critical months that lie ahead.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Speaker, I appreciate the gentleman yielding. I want to congratulate both the gentleman and the distinguished chairman of the committee, as well as the gentleman from Illinois (Mr. MICHEL), and the gentleman from Texas (Mr. WRIGHT), the majority leader, for their efforts on behalf of this resolution.

I rise in strong support of the resolution. I want to reiterate something that I said yesterday in debate over the defense appropriations bill.

The first line of defense for this Nation, the first line of security for our Western Allies, is the credibility of the United States. That is why the votes yesterday supporting the President's defense budget and programs were so important to our country and our ability to maintain the unity of the free world.

I believe the President's speech yesterday morning was the single most historic contribution to strengthening the free world alliance that has been made by any President in many, many years.

I watched Mr. Schmidt last night on television from Germany. He said very soberly and very sincerely that he thought that deep down in the President's heart and in the President's mind that President Reagan is a man of peace, that President Reagan wants to pursue peace, and that this initiative of the President's, as the gentlemen from Wisconsin and Michigan have pointed out, is a bold step toward reaffirming the idea that the United States wants to initiate negotiations that will reduce the tension and the armaments, that are such a threat to global stability and peace.

The Belgians praised the President. The Dutch praised the President. The Italians praised the President. The British praised the President. And how long has it been since we have heard our NATO allies publicly speak so enthusiastically in support of a policy advanced by a President of either party? The outpouring of support from Europe is a well-deserved tribute to the President. And his outstanding leadership.

But I do not rise in a partisan sense. I rise in the same spirit that the gentleman from Wisconsin and the gentleman from Texas (Mr. WRIGHT) spoke. Arthur Vandenberg one time said that when it comes to the foreign policy of America, politics stops at the water's edge.

One thing that I have heard repeatedly from the floor and that we are hearing across the Atlantic Ocean is that there is today a unity within the Western alliance that we have not seen or heard in a long time. There is

a unity in our country and in this body that we have not heard in a long time.

This is the very spirit that is so essential to the strength and security of ourselves and our allies. Hopefully, following in the spirit of the gentlewoman from New Jersey, who put it so eloquently, far more ably than I, we can speak once again with one voice. Only if we are united in purpose can we hope to reduce those arms that pose such a threat not only to the peace of this country but to our Western Allies.

I believe that the President has offered the Kremlin's leaders the opportunity to bring the world closer to peace, and away from war. Their response to the President's overture should reveal whether or not this is the path they choose to follow.

And if this is not the path they choose to follow, then let there be no question about America's resolve to do whatever is necessary to counter the threat to the security of Western Europe.

An extensive Soviet propaganda effort has undermined the confidence of some Europeans in America's resolve, and has fostered the growth of a pacifist movement that characterizes the United States, not the Soviet Union, as the real threat to peace. This is an enormous perversion of the truth that must not go unchallenged. It seems to me that those who disparage America's commitment to peace dishonor the memory of those who died in two world wars in order to preserve the peace and independence of the free nations of Europe. President Reagan's frank and moving address should go far in setting the record straight.

The President has outlined a sound framework for arms control negotiations that attempts to address the security problems facing Europe at all levels: strategic and theater, nuclear and conventional. It is a framework advanced not out of rosy optimism, but out of an unflinching recognition of the threat to Europe and the need to seek arms reductions, not merely limitations, if that threat is to be quelled. When intermediate range nuclear force reduction talks begin on November 30, our allies can be confident in the deep dedication of the President of the United States to the integrity of the NATO alliance, to the indivisible security link between the United States and the nations of NATO, and to the maintenance of peace in Europe.

I thank the gentleman for yielding.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. BRODHEAD).

Mr. BRODHEAD. Mr. Speaker, I want to inject, I think, a few sour notes into this symphony of love here.

I have been one who has been very critical of this administration. I think that the actions by and large that this administration has taken have not brought us down the road toward peace, but rather, have gone in the other direction.

I think there has been a great deal of irresponsible talk in this administration, particularly in recent weeks, about the possibility of nuclear war in Europe.

I think the administration's abandonment of the SALT treaty was wrong and irresponsible, and I think that the arms buildup that we are going through is unnecessary and wasteful.

While there are certainly substantial weak spots in our defense, I think that the arms buildup, the unprecedented arms buildup that we are going through is provocative and unnecessary.

Despite my concerns in that regard, I am going to support this resolution because I think that I like to give the President the benefit of the doubt, and the administration the benefit of the doubt, and I think it is important to show that all Americans, whatever their views on the President's policies, and whatever their reservations about the President's actions, hope and pray that he will be successful in his efforts for peace and that this statement that he made yesterday does in fact represent a new direction and a change of policy and a sincere effort to achieve arms reduction and world peace.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. PURSELL).

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman from Arizona.

Mr. RUDD. I thank the gentleman for yielding.

The great seal of the United States of America shows an eagle holding an olive branch in one claw and arrows in the other. This symbol of our Nation's twin commitments to military strength and the quest for peace might well have served as an inspiration to President Reagan as he prepared his eloquent address on foreign policy.

The President was firm about the need to maintain our military strength but also open to any genuine possibilities for peace and cooperation.

He explained with a careful attention to facts that an enormous Soviet military buildup has occurred in the past decade.

And he made clear that America will match that buildup if necessary—missile for missile, ship for ship, gun for gun.

But he also made it plain that if the Soviet Union enters into serious arms negotiations, we can reverse the ongoing arms buildup and actually start reducing the number of weapons the superpowers possess.

This ray of hope is one that many Americans and many Europeans have been waiting for.

The President is to be commended in his sincere quest for peace, and this resolution offers support he needs in this quest. The Soviet leadership should recognize that their massive military establishment and massive arms buildup constricts the growth of their economy and what a heavy burden is imposed on an already overburdened people. Soviet aggressive action provides fear of war around the world.

There is fervent hope that the Soviets will respond favorably to the President's forthright proposals for arms reduction.

Their initial response is not positive, but we are a patient people and willing to engage in a long struggle for peace.

The Soviet Union must understand however, that any reduction in arms must be the result of mutual agreement. We sill not unilaterally disarm. Until the Soviet Union evinces a real willingness to negotiate a workable arms-control plan with us, we will continue on the course which the President has wisely set of increasing our military strength, which is the shield for our liberty.

The President's masterful address should go a long way toward reinvigorating the Atlantic alliance, which forms the foundation of our foreign policy. The great majority of Europeans, who are firm in their commitment to the Western alliance, will be heartened by the President's openness to peace and his daring proposal for major arms reduction. At the same time, they will appreciate his forthright declaration that we intend to maintain and, if necessary, increase our defense capability.

The strong praise for the President which has been heard in Europe today as well as across the political spectrum here in the United States, suggests that the Western democracies are united behind President Reagan as he pursues his search for peace. Now it is up to the Soviet leadership to be forthcoming and open to peace in their response. It is hoped the Soviet Union will not continue its course of more arms and continuing conflict with the peoples of the world.

Mr. McGRATH. Mr. Speaker, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman from New York.

Mr. McGRATH. Mr. Speaker, I applaud President Reagan's proposal to bring about meaningful nuclear arms reduction in Europe. The President's speech should help to allay the genuine fears of our European allies that their homeland will be the next nuclear battleground. In addition, it puts the onus for arms reduction where it belongs—on the Soviet Union.

Mr. Speaker, over the years we have seen a massive growth in Soviet military capabilities, and the result has been a major threat to the security of Western Europe. The Soviets have three different missile systems, each with the capability of striking virtually all of Western Europe. The only deterrent to this threat is a counterthreat to Soviet targets, which presently does not exist.

With the imminent start of arms control discussions between the United States and the Soviet Union, this proposal is especially important. This Nation will be going to the bargaining table having made a first, good-faith effort to reduce tensions in the European theater. The Soviet Union may dismiss this as a propaganda ploy, but if they are interested at all in an end to a mutually destructive arms race, they will sit down and bargain in good faith. For many years, people in this body have been saying that the Soviet Union should be judged by its actions rather than by its words. Now we will have the opportunity to see if the Soviet Union is prepared to act in the interests of peace.

Mr. PURSELL. Mr. Speaker, President Reagan has opened a new and promising peace initiative.

The President's proposals appear to provide a basis for real progress in promoting world peace and defusing the nuclear arms race.

Equally significant, they place the United States unmistakably as the leader in seeking peace.

President Reagan correctly perceived that our intentions had become unclear to many, particularly in Europe. His strong statement sets forth America's consistent peace posture with absolute clarity.

The President offered to cancel the 1983 deployment of modernized theater nuclear missiles in Europe, if the Soviets dismantle the new weapons they have amassed. This is a dramatic invitation to reduce the potential for nuclear annihilation. Elimination of medium range missiles from Europe is an excellent blueprint for the opening of the arms control talks in Geneva on November 30.

The President also made clear his desire to open expanded strategic talks with the Soviet Union early next year. I applaud the philosophy expressed in his new name for these talks: START, strategic arms reduction talks. The change from strategic arms limitation to strategic arms reduction is sound policy.

The President's four-point plan provides opportunity for a truly fresh start in arms control. There is no question that the Soviets have twisted the SALT talks to their advantage, using them as a smokescreen for a peacetime military buildup of unprecedented magnitude.

President Reagan has correctly shifted emphasis to the consideration of all aspects of nuclear and conventional armaments. He is focusing on actually reducing the arms race, rather than simply limiting its growth.

It is also significant that the President clearly recognizes the importance of real negotiations. We must negotiate with our potential adversaries—not with intercontinental ballistic rhetoric, but face-to-face dialog across the conference table.

Mr. Reagan set forth a firm position from which to negotiate, and clearly defined the consequences of an uncompromising Soviet attitude. He has escalated only two things: The prospects for real arms control progress, and America's standing in the world community.

The President made a telling point when he observed that the United States once stood with an unchallengeable ability to dominate the world. We responded in a way unmatched in history, by seeking only peace and independence for all nations.

He defended the Atlantic alliance, pointing out that its policies have provided Europe with a generation without war.

The United States has clearly staked out its position as the world's leader for peace and freedom. I am proud of our President for his firm and fair invitation for a real reduction in the arms race.

The first year of the Reagan administration has been marked by many momentous proposals. We in Congress have engaged in historic debates on the future of our economy, and the proper direction for our taxation and budgetary policies.

But all the great policies and programs depend on peace and security. Without peace between nations and security from armed conflict, we can accomplish nothing to improve the future of our Nation and the world.

Mr. Reagan's peace initiative has the potential to be the most significant proposal of his Presidency.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, I rise in support of the resolution and commend the distinguished chairman of the Foreign Affairs Committee and the gentleman from Michigan for bringing this resolution to the floor.

Mr. Speaker, it is indeed appropriate that Congress take steps to applaud the peace initiative unveiled by President Reagan in his November 18 speech at the National Press Club.

The President's speech was truly remarkable. His message was clear and unmistakable—the United States is interested in serious negotiations designed to produce substantial reductions in the number of nuclear weapons to be based or targeted on European soil. The President's pledge not to deploy advanced intermediate range missiles in Europe, in exchange for a Soviet agreement to dismantle their existing SS-20, SS-4, and SS-5 systems, was bold and dramatic. It has captured the attention of the world and should receive serious consideration from all those whose claim to an interest in reducing the risks of nuclear war is genuine.

President Reagan's speech was directed at the people of Europe. They have justifiable concerns over the continued buildup of the Soviet nuclear weapons which are targeted on them and what the response of NATO will be to that buildup. In recent weeks, the United States has been the target of protests in European cities—protests triggered by charges that the administration was not interested in the pursuit of peace.

The President's remarks at the Press Club should rebut that contention for they forcefully demonstrate a willingness by the United States to enter into serious discussions with the Soviets on arms reduction. Those who have alleged that President Reagan is not interested in reducing the size of the nuclear arsenals of the United States and the Soviet Union now have convincing evidence to the contrary.

Mr. Speaker, the President has presented the Soviet Union with a plan for meaningful arms reduction. It is now up to the Soviets to show the strength of their commitment to peace. If they respond in a manner consistent with the tone of President Brezhnev's recent statements to the European press, we may achieve a breakthrough of historic proportions. If so, the people of Europe and the people of all the world will benefit. If, on the other hand, the Russians choose to ignore the President's appeal, the people of Europe will be able to draw their own conclusions about the sincerity of the Soviets' desire to reduce tensions and work for peace. The next move is clearly up to the Russians, for the position of the United States has been clearly stated.

I urge the overwhelming approval of House Concurrent Resolution 224 so that the Soviet Union and all the people of the world will know that President Reagan enjoys bipartisan support in his efforts to reduce the threat of nuclear war.

Mr. ZABLOCKI. Mr. Speaker, I yield 3 minutes to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. Mr. Speaker, I want to take this opportunity to commend yesterday's initiatives by the administration to go forward with negotiations to control both theater and strategic nuclear weapons. These efforts

are critical to promotion of a lasting peace and a secure world.

With the proposal to refrain from deployment of Pershing II and GLCM in exchange for the Soviets dismantling the 270 SS-20 launchers, along with older SS-4 and SS-5 missiles, we have the opportunity to capture the high ground in the negotiations.

Unfortunately, past experience clearly shows that efforts to achieve real arms reductions are not easily accomplished. A successful effort will demand perseverence and flexibility, the Soviets cannot be expected to immediately agree to this "zero sum" proposal, but we must not abandon our negotiating effort if our initial attempt to reach this goal fail. I sincerely hope the administration will demonstrate the toughness and commitment displayed on other issues to this most important effort.

It is particularly important that we aggressively follow through on this commitment if we are to maintain needed cohesion in the European alliance. The allies in recent months have shown a deep skepticism toward this administration's true comment to arms negotiations. The reaction thus far to the President's announcement from NATO leaders has been most favorable, but it could evaporate quickly if the negotiations prove to be no more than talk. The Soviets are tough negotiators, and have the advantage of already deployed systems. But we have some advantages of our own, including the luxury of still having a range of options in responding to the Soviet threat, beyond Pershing II and GLCM, that should prove equally important. Our challenge will be to maximize those advantages in the tough sessions in Geneva.

I also applaud the commitment to move forward early next year with START, strategic arms reduction talks. Every person on this planet has a direct stake in the success of efforts to reduce the strategic nuclear arsenals. A reversal of the arms race must be our ultimate goal.

These efforts also are important in our efforts to improve the strategic deterrent. The Joint Chiefs were sincere, I am convinced, when they stated during the SALT II debate that a limitation on Soviet warheads was in the national security interest of the United States. The continuing dilemma we face with basing the MX missile is in no small part tied to the fact that we do not now have an effective limit on warhead proliferation.

But here again, agreements will not come easily. The Soviets will no doubt be suspicious of our sincerity and will try to gain advantages of their own. Success here will also depend on the same kind of perseverence and flexibility that is needed in the TNF talks.

In conclusion, I believe this administration has launched an important beginning on the arms reduction front. We must reaffirm that commitment again and again to the Soviets and the court of world opinion if we are to be successful. I stand willing and anxious to lend my support to any serious arms reduction efforts and pray that the journey we began yesterday will land us in a new world of stability and peace.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Speaker, I rise in support of House Concurrent Resolution 224, and applaud President Reagan for his splendid foreign policy peace initiative as detailed in yesterday's speech before the National Press Club.

I think the President's message was amply clear for all the world to see. The United States is unquestionably committed to significant reductions in arms with the Soviet Union—in strategic forces, in missiles based in Europe and in conventional forces.

Mr. Speaker, the President's four-point approach to United States-Soviet arms negotiations is prudent, responsible, and historic and seeks a real solution to the escalating and beguiling arms race.

Indeed, the President took the high road when he revealed that the United States would cancel its plans to deploy 572 new Cruise and Pershing II missiles in Europe if the Soviets dismantle the 600 SS-20, SS-5, and SS-4 intermediate range missiles deployed in Europe.

The President's second proposal is a call for a resumption of strategic arms talks this coming January. He is calling the new talks, START or strategic arms reductions talks. The President is seeking not just limitations or ceilings on increases of weapons but actual reductions to levels that are, as the President put it, "equal and verifiable." It is my understanding that Secretary of State Alexander Haig and Soviet Foreign Minister Andrei Gromyko will hold their first round of talks on strategic weapons on January 26 and 27 in Geneva.

President Reagan's third proposal calls for a reduction of nonnuclear forces in Europe. As the President so persuasively put it:

> The Soviet Union could make no more convincing contribution to Peace in Europe—and in the World—than by agreeing to reduce its conventional forces significantly and constrain the potential for sudden aggression.

Finally the President called for an international conference to reduce the risk of surprise war or attack based on a miscalculation or misinterpretation.

Mr. Speaker, the President is on the right track and I believe he has charted a course that will yield considerable results.

I commend the majority party for cosponsorship of this resolution and for their genuine spirit of cooperation, bipartisanship and for uniting behind the President in the cause of arms reductions, for surely mutual arms reductions are the surest road to global security and peace.

□ 1115

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Virginia (Mr. DAN DANIEL).

Mr. DAN DANIEL. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I wish to join with my many colleagues on both sides of the aisle in commending President Reagan for his offer to the Soviet Union of a mutual reduction in intermediate-range missiles deployed in Western Europe. It was a dramatic and historic initiative that demonstrates the President's dedication to world peace and his awareness of the sensitivities of our European allies.

There is an erroneous presumption in some quarters that taking a cold hard look at Soviet intentions somehow forecloses our option on mutual arms reductions. On the contrary, realism about the Soviet threat simply means that we must go into the negotiations without blinders. The President has made clear that this is precisely what he intends to do. Of equal importance, we must be able to negotiate from a position of strength.

The bipartisan outpouring of approval by this body coupled with the overwhelming vote of yesterday for weapons of peace augurs well for the success of the President's proposals. The ball is now in Mr. Brezhnev's court. He will serve well the cause of peace if he avoids the pitfall of the double dribble; if he takes the game seriously. No greater challenge faces world leaders than the removal and destruction of nuclear weapons from this Earth. I want to commend my colleagues in the House for the wisdom they displayed on a number of amendments offered to the Defense appropriations bill. In addition to rejecting deep cuts in several major weapons systems, the House also approved a series of amendments restoring funds for a number of vital programs, many of which have a direct impact on our readiness capabilities. Peace through strength is not a cliche, it should constitute the backbone of our foreign policy. General Eisenhower spoke well when he observed that, "Unpreparedness is well nigh as criminal as war itself."

The President's plan for a mutual arms reduction is not only consistent with, but also based upon a sound national defense. I heartily applaud Mr. Reagan for his courageous determination to assure that our children and grandchildren have the opportunity to

grow up in a better world—a world at peace. And I join with millions of my fellow Americans in supporting the President's overture and in praying for his success in this undertaking.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. DeNardis).

Mr. DeNARDIS. Mr. Speaker, I thank the gentleman from Michigan, the distinguishing ranking member of the Foreign Affairs Committee, for yielding. I rise to support the resolution commending President Reagan for his bold and courageous peace plan.

Mr. Speaker, one of the major provisions of the President's initiative is his willingness to cancel the European deployment of Pershing and ground-launched cruise missiles if the Soviets will dismantle the ones they have already in place targeting major cities and sites in Europe.

I think it is important to say for the record that misunderstanding has grown up about the origins of the plan to bring 108 Pershing II and 464 ground-launched missiles into West Germany, Britain, Italy, the Netherlands, and Belgium. This has been intensified by the massive demonstrations occurring in Europe's cities against this deployment.

By design or accident, most of the demonstrations seem to ignore that Europe's leaders, and Chancellor Helmut Schmidt of West Germany in particular, originally demanded that a Euromissile be created.

The demonstrations fed the reverse impression, that the Pershing and Cruise missiles are being forced by the United States on an unwilling Europe.

At the center of the controversy, as seen by Europe, was the fear that Americans would not risk having a nuclear exchange with the Soviets that would mean trading the destruction of Chicago to save or revenge Bonn.

There seemed to be no American affirmation or action short of doomsday itself. Now there is another course of action, the sane one, the only one that a civilized nation should opt for.

I applaud President Reagan for pointing the way toward sanity in this world. I know that he will work for his peace objectives with the same skill and persuasiveness that has marked his Presidency thus far.

I hope and trust that he and we will succeed.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. Crockett).

Mr. CROCKETT. Mr. Speaker, I am extremely grateful to the chairman of our Foreign Affairs Committee for this opportunity to speak. Initially I had intended to merely vote "present" as far as this resolution is concerned, because I see nothing in it that justifies this pean of praise that we are visiting upon the President. Actually, I had intended to absent myself from the discussion, until I heard what I believe was the very excellent presentation made by the gentleman from Wisconsin (Mr. Kastenmeier). I knew that his would probably be a very lonely voice and I decided to come over and register my support for the words that he uttered.

When I first learned that the President was to speak about the subject of peace, I made it a point to listen to his presentation. I was not convinced of its sincerity. I felt that the first part where he shared with us his letter to Mr. Brezhnev was very important and very significant. I felt that what he said really represented the prayers and the aspirations of Americans generally.

But then I went on to read his so-called peace initiative and peace proposal and I found absolutely nothing new. Instead, I found nothing more than the usual warmongering that has of necessity to accompany any program that calls for the expenditure of $1½ trillion within the next 5 years on nothing but armaments of war.

I would hope, Mr. Speaker, that eventually we will see the light. We will recognize the basic desires of Americans for world peace and we will devote ourselves to the achievement of that objective.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from Nebraska (Mr. Daub).

Mr. DAUB. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, President Reagan has just enunciated a bold and historic step to reduce the level of nuclear threat under which the world now lives. He spoke with candor. He spoke with sincerity. He has proposed a ban on the placement of medium-range nuclear missiles in Europe if the Soviets agree to remove their medium-range missiles now aimed at the heart of Europe.

The President also spoke of his intentions to be just as forthcoming on proposals for actual reductions, not merely caps, on strategic intercontinental missiles.

Mr. Speaker, the ball is now in the Kremlin's court. They can make good on their rhetoric about lasting peace by accepting this noble proposal or demonstrate their indifference to meaningful arms reductions and the legitimate aspirations of the world for peace.

The chairman, the gentleman from Wisconsin (Mr. Zablocki), and the ranking member, the gentleman from Michigan (Mr. Broomfield) are truly to be thanked by their colleagues for their leadership.

We are all proud of our President as a peacemaker, rallying conservative principles and broadening the base of support in America for not limitation, but actual reduction of the nuclear threat.

I urge support for this resolution.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. Ottinger).

Mr. OTTINGER. Mr. Speaker, I thank the chairman, the gentleman from Wisconsin (Mr. Zablocki) for yielding.

I am going to support this resolution, because I think there is nothing more important for the survival of humanity than the quest for peace, disarmament, and learning to live by agreement with the Soviet Union. There is nothing more important than that genuine steps should be taken for mutual arms limitation.

While I hope for the best from this declaration, I have to state, Mr. Speaker, that I fear the worst. We have had from this President, from the time he was a candidate until yesterday, nothing but warmongering. We have had from this President an abandonment of the SALT II agreements that were reached under a previous administration and would have limited arms.

We have seen from this President an approach to all the world's problems in military terms. We see him discussing nuclear war as being winable and thinkable, and developing neutron bombs, the B-1 bomber and MX missiles, and the largest military buildup in the entire history of this country.

One has to wonder whether our Secretary of Defense, who has been so active in promoting this weaponry, will be willing to give up any of it in the quest for peace.

One has to wonder about a Secretary of State who does not trust his own colleagues in the administration, who sees in every action in the world Russian responsibility and who sees enemies behind every tree, whether he is going to be willing to enter into any agreement and trust anybody with anything.

One has to hope that this initiative is real and not just a cover with words of peace for expanding threats of war. In short, we must be sure the President is not just being a hawk in dove's clothing.

I think the President must be encouraged in the initiative that he has taken. I do hope that he will enter real efforts to achieve a peaceful resolution of the tremendous threats to society from nuclear warfare and the staggering costs involved.

It is to hold the President to his procurement of peaceful intentions that I support this resolution.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. Erdahl), a member of our committee.

Mr. ERDAHL. Mr. Speaker, I want to thank the gentleman for yielding.

Yesterday is a day that will go down in history as a day when the possibility of peace became as real as it has been in recent times.

I want to join my colleagues in commending our President for this bold new initiative and commend the chairman of our Foreign Affairs Committee and the ranking member for their leadership today in setting aside this time and making the proper recognition.

In one masterful stroke President Reagan obviously served notice to the Soviets that we are sincere in not only arms limitation, but arms reduction. At the same time he has assured our allies in Western Europe, who have been a bit nervous of late, that we are an ally that is concerned about them and about their future in this nuclear age.

We in the Congress now have an obligation to be supportive of the President, not because he is a Republican, not necessarily even because he is our President, but because he is right and the quest for peace is a just one. As the President said, it is one of highest priority, not only for him and his administration, but for us and this Congress and I think for the people of the world.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from North Carolina (Mr. FOUNTAIN).

Mr. FOUNTAIN. Mr. Speaker, I rise as a cosponsor in support of the concurrent resolution expressing the support of the House of Representatives for the President's new initiatives for peace, and hope that my colleagues will give it an overwhelming vote of approval.

The world is weary of the Soviet Union's disturbingly warlike actions in many places around the world—sometimes via surrogates, notably the Cubans—and in or near Europe itself, especially via its deployment of a frightening array of intermediate range ballistic missiles, nuclear, aimed at targets in every one of the free nations of Europe.

The world wants every possible avenue toward peace explored, explored carefully, cautiously, thoroughly, and responsibly.

Taking note of these two truths, President Reagan has made a responsible and reasonable offer to the Soviet Union. He has proposed that the United States cancel its planned deployment to Europe of the Pershing II missile and the ground-launched cruise missile, if, and I repeat if, the Soviet Union agrees to dismantle its frightening force of offensive missiles trained on our friends and allies in Europe.

And he has proposed the opening of negotiations on strategic arms reduction next year with the Soviet Union, as well as action to achieve equality of conventional forces in Europe, and to take steps toward reducing the risk of a surprise attack.

This is a historic proposal made by the United States and the President should be commended for his bold move. It is comprehensive and forward-looking.

At one stroke, the United States has regained the initiative, strengthened the hands of our European allies, and thrown the ball into Leonid Brezhnev's court.

Clearly, the reaching of an agreement to do what the President has proposed would reduce the danger of war in Europe and everywhere else, and would demonstrate the need for unceasing superpower restraint.

The President's offer is realistic and achievable, if the Soviet Union has any sincerity whatsoever about seeking peace.

I hope the people of the world will examine the new U.S. initiative closely and join with us in moving our planet further away from war and closer to our unfailing goal of peace, by urging the Soviet Union to accept these proposals.

Mr. Speaker, we all remember the Cuban crisis, when Russian ships were en route to Cuba for the placement of offensive nuclear missiles on Cuban soil, obviously to be directed at the United States.

We also remember with both pride and fear how our courageous President Kennedy, backed by the Congress and the people of the United States, stood firm in telling Mr. Khrushchev to turn those ships around and take them back to Russia, or else expect them to be destroyed, actions which kept us for several days on the brink of a nuclear war.

People all over the world were glued to their television and radio sets, watching and waiting and hoping and praying that the Soviet Union would comply with our President's demand.

There were messages, by voice and in writing, rapidly moving back and forth between President Kennedy and Mr. Khrushchev. As a member of the House Foreign Affairs Committee, I had the privilege, with a State Department representative standing by, to read two of three letters which President Kennedy received from Mr. Khrushchev, letters depicting the horrors of a nuclear war between our two countries, while at the same time literally begging President Kennedy not to take the action which the entire world knew was contemplated. Those letters are self-explanatory and hopefully will someday be made public.

At any rate, Mr. Khrushchev finally discovered that we meant business, reversed the course of those Russian ships, and thus yielded to America's strength, and our abililty and determination to use it, if necessary.

For the moment we do not see on the horizon such an immediate and frightening crisis, but there are signs that in the not too distant future, if the armaments race is not slowed down and if we are not able to responsibly negotiate appropriate limitations and, yes, reductions in the continuing increase in nuclear weapons on both sides, we may soon be confronted not with just another all-out war, but with a war which could well end civilization.

Mr. Speaker, these are dangerous times in which we live, testing whether our Nation, or any other Nation "so conceived and so dedicated," shall long endure. We must not let up in keeping ourselves militarily strong, second to none, as a deterrent to any hasty and ill-conceived action by any would-be aggressor against us, from whatever direction, and for our own protection and the protection of the free world. We showed our intentions in that direction yesterday when we passed a terribly expensive defense appropriations bill, even as the President was taking historic peace initiatives.

The Cuban crisis to which I have referred is one of a number of examples indicating Russia's respect for adequate military strength and a willingness to use it if necessary. And history has taught us that in negotiating with Russia, we must negotiate from a position of strength. This is regrettable, but it is a fact of international life. We must have bargaining power.

In a peaceful move, however, let us pass this resolution of support and commendation without delay, indicating, not just to Russia, but to all the world that we strongly support our President's bold proposal.

I hope it will not here, or elsewhere, be considered inappropriate for me to suggest also that in this hour when we are confronted with a serious economic crisis here at home, as well as problems of war and attempts at peace abroad, in these times of confusion and frustration and seeming chaos in such a variety of ways all over the world, I deeply and sincerely feel that the time has long since come for all of us, public officials and private citizens alike, individually and collectively, to call upon the omnipotent Creator of the Universe, Almighty God, for more faith in Him, for a better understanding of His purpose in our lives, as a people and as a Nation, and a greater courage and willingness and determination to carry out the many magnificent and glorious tasks He has committed to our care.

□ 1130

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Iowa (Mr. TAUKE).

Mr. TAUKE. Mr. Speaker and Members of the House: I take these few moments to express my strong support for the President's initiative. I believe

that it is fair to characterize the proposals that the President made yesterday as new and bold initiatives.

I think it is also fair to say that it is the first time that many of the other proposals that have been offered before by this country have been put in such a comprehensive fashion. It is fair to say that the President has given to the Soviet Union a full plate, a plate of challenges which it cannot act upon.

With that in mind, I must say to my colleagues that I am appalled that some of the people who have stood here this morning have questioned the sincerity of the President. That is the kind of thing, it seems to me, that we ought properly to leave to the leaders behind the Iron Curtain. If we support this peace initiative, if we get behind it, if we push it, we can turn the words of the President into reality.

I believe that our charge, our task, is to make certain that we do get behind it and we do give it the momentum that it needs in order to become the real thing in this world.

If we fail by hindering the momentum of this initiative by the President, the arms race that will result will be our responsibility. So we now have the chance to either support this initiative wholeheartedly and make it work, or we have the opportunity, if we wish, to hold back our support and be responsible for its failure.

I hope and I believe that we in Congress will seize the moment, that we will grasp this opportunity that the President has given us, and turn his words into a lasting peace for our world.

Mrs. ROUKEMA. Mr. Speaker, will the gentleman yield?

Mr. TAUKE. I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. Mr. Speaker, I would like to commend the gentleman from Iowa for his forceful and compassionate statement, and associate myself with his remarks.

He is absolutely correct. There is no more important question for mankind, and there is no more important thing for this Congress to do now than to support the President's initiative.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. LUNGREN).

Mr. RINALDO. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. I yield to the gentleman from New Jersey.

Mr. RINALDO. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the President for his outstanding arms control proposal of yesterday. It should dispel any foolish doubts as to where the United States stands on the central issue of our time: Prevention of nuclear war. It is a completely reasonable proposal, based on figures on force levels of the two sides provided not by the Soviet Government, but by leading private research organizations. The President has put the Soviet Union to the test: Will it live up to its effusive professions of peace, or will it continue its unrelenting military buildup?

I hope the answer from the Kremlin in the negotiations will be the former, but, I am sorry to say, I am not optimistic. One point should be understood by all. The Soviets do not negotiate to reach reasonable agreements, but to limit our military strength. In the talks that open at the end of this month, they have one aim: To prevent deployment of American Pershing and cruise missiles in Europe. Only when they see they cannot prevent this deployment will they then start to seriously negotiate a reasonable agreement. The greatest obstacle to the President's admirable proposal, after the Kremlin, is the so-called European peace movement. So long as the Soviets think this movement can prevent deployment of our missiles, it is not likely they will negotiate in good faith.

Mr. LUNGREN. Mr. Speaker, last week I had the opportunity to observe an inspiring ceremony at the elementary school attended by my three small children. This ceremony honored our veterans, the fathers, the mothers, the grandparents of those children who had served our country in a past war. It was a moving and a very sincere ceremony, and yet it caused me to think even more seriously about the implications of today's troubled world.

Mr. Speaker, I genuinely feel that we have reason to fear for our children in a world plagued by the Hobson's choice of nuclear holocaust on the one hand or totalitarian slavery on the other. But yesterday President Reagan, I think, gave us hope. This President believes in the concept of peace through strength, that once we reestablished our national will and commitment to a defense sufficient to the international threat, we would be in a position to negotiate.

With the assist of this Congress, Mr. Speaker, our President can now say with credibility that we have regained our will. Now we can proceed not just for negotiated arms limitation but for arms reduction, something that we all support and something this President has always spoken for. But we must not forget the President's stress on the mutuality of action if we are to be successful.

This is best underscored, perhaps, by the words of a Catholic theologian, Charles Cardinal Journet, of Switzerland, who said recently, and I quote:

> If the non-Communist bloc unilaterally disarmed, it would give the world to the Soviet empire and would betray all the holy values, temporal and spiritual, which we ought to defend. This would be the evil of betrayal.

Mr. Speaker, yesterday President Reagan showed us that we can reject both betrayal and belligerency. Yesterday the President showed us that he has chosen peace. And, Mr. Speaker, let us join him in that quest.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. ZABLOCKI) has 3 minutes remaining, and the gentleman from Michigan (Mr. BROOMFIELD) has 2 minutes remaining.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Speaker, I favor this resolution. I congratulate President Reagan on taking the initiative for world peace. Mankind has no greater quest, and none of us can have a nobler purpose. It is the strangest anachronism of all time that man still decides the fate of nations, and their people, by war and death. I am not sure about just what measures need to be used to bring about multilateral reductions in arms, but I am sure that I want to be a part in trying to reduce the arms race and to base the security of the world in safer means than the present situation involves.

The circumstances call for a dedication to the policy of peace, and a resolve and action to implement whatever measures are possible to achieve a safe and secure peace for all nations and all people. Let us all hope that the Soviets will join with our country in these objectives, which they have indicated in past speeches may be possible for them to assist and secure.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Speaker, yesterday's speech by the President was definitely progress toward peace, but I have to remind people that sincerity cannot be shown through one speech alone. I think sincerity can only be shown by committed, dedicated followthrough. The hopes and fears of the world cannot be played with, there must be followthrough.

Our alliance with our European friends has been in real turmoil. This new direction must be more than just launching one peace initiative over the international airwaves and having the House say "hurray." Lasting peace cannot be accomplished without hard work.

So I call upon this body to make sure that we do not just all congratulate ourselves and the administration today and say we have done all we can for peace. We have just started and the hour is late. We must go to Geneva, we must negotiate with quiet voices, we must keep the warmongering rhetoric turned down and turned off, and we must rebuild and reassure the NATO alliance, because that is the

only way we are going to have lasting and meaningful peace.

I hope the speech was a real new direction. I hope real sincerity will be shown, and real followup will take place, because otherwise the speech will appear as just a passing fancy that came and went. We must be very, very careful on how we proceed. I am delighted the first step has finally been taken by President Reagan, but we are a long way from a lasting peace. Therefore, I will vote "present," reflecting my relief the peace process has finally begun but also the reality is a long way from being finalized. It is not concluded. This is only the first step.

Mr. BROOMFIELD. Mr. Speaker, I reserve the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. LANTOS).

Mr. LANTOS. Mr. Speaker, I am proud to commend our President for his initiative. We are at the hinge of history. We are connected to the past, but we are swinging in new directions, and no policy and no program will be more important than the program of moving toward meaningful, effective, verifiable reduction of arms, both conventional and nuclear.

I only hope, Mr. Speaker, that in addition to the Soviet Union and other potential adversaries, our friends in Europe and elsewhere understand the breadth of support our President has for this significant initiative for peace.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I am genuinely pleased to observe the kind of bipartisan support for the President's initiative. It is very heartwarming for me, after nearly 20 years in the Congress, to see this kind of forthcoming commitment on the part of the membership.

I would like to commend the President of the United States for his most recent peace initiatives and believe that we now have a proposal before us which affirms this Nation's commitment to world peace and clearly challenges the Soviet Union to "denuclearize" Europe.

The United States entered the decade of the 1980's at a time of deteriorating East-West relations and we were faced with the momentum of a massive Soviet military buildup which threatened to undermine the nuclear balance on which our security depends. The President has responded to this challenge with an effective, coherent U.S. foreign policy which I believe contains all of the elements of serious arms reduction negotiating policy on strategic arms and reconfirms our commitment to the Atlantic alliance (NATO).

Mr. Speaker, military, political, and economic stakes will be extremely high during the coming months, and the hopes and aspirations of millions of people throughout the free world will depend on the President's success. I would like to call on all of my colleagues to both support the resolution commending the President on his peace initiatives and more importantly to put aside partisan politics and work with the administration in their resolve to resume serious strategic arms reduction talks (START). In an atmosphere of cooperation and firm resolve, I believe that the Congress has the opportunity to make a significant contribution to major qualitative and quantitative peace negotiations—negotiations based on broad public understanding and statesmanship combined with vision and courage—and above all, credibility and verifiability on both sides—guaranteed.

I am pleased with the President's proposal to sharply reduce the number of European-based missiles. By calling for mutual cutbacks in missiles, strategic arms and conventional forces, President Reagan has sent a clear message to our allies and to the Soviets that the United States will and must be the leader in the quest for peace, stability, and freedom throughout the world.

The President has demonstrated that peace goes well beyond the absence of war. It includes economic growth for every nation, opportunities for every individual, but above all, individual liberty for every person on the face of this globe.

Mr. BROOMFIELD. Mr. Speaker, I yield back the balance of my time.

● Mr. CORRADA. Mr. Speaker, President Reagan's foreign policy speech given yesterday on new initiatives for improving relations between the United States and the Soviet Union is a step in the right direction and has my full support. The points made by the President to the Soviet Union to ask for their cooperation in building a solid foundation for world peace are important and attainable. It is heartening to note that November 30 has been set as the date for undertaking negotiations with the Soviets in Geneva toward a reduction of intermediate nuclear arms stationed in Europe and in the Soviet Union. These talks are of vital importance to us and our NATO allies and the scheduling of talks beginning in early 1982 regarding the control of strategic nuclear weapons is an additional important second step toward obtaining a durable and lasting peace for all the world and a balance between the United States and the Soviet Union that will avoid a nuclear war that would be a holocaust for the human race.

In addition, the invitation extended by President Reagan to the Soviet Union to enter into negotiations and discussions leading to the reduction of conventional forces in Europe is very important and timely. I trust that the Soviet Union will recognize the wisdom and need for these talks and will act in good faith to these proposals which offer great hope for a peaceful future for the United States and the entire world. These negotiations can lead to a reduction if the arms race between the Soviet Union and the United States and represent a ray of hope for peace between all the people of the world. Such a reduction would also allow our limited resources to be targeted to help the economic and social problems that afflict humanity instead of pouring billions and billions into armaments and weapons. If President Reagan's goal of bilateral arms reductions is reached, the funds freed could be used to solve the problems of health, education, housing, employment, and nutrition faced by our Nation and to aid in the economic and social development of the United States and the world which will allow us to build a world on the twin foundations of justice and peace.

The Congress and the Nation owes the President a vote of support as he undertakes this arduous and difficult task.●

● Mrs. SNOWE. Mr. Speaker, yesterday President Reagan said:

> There is no reason why people in any part of the world should have to live in permanent fear of war or its specter.

I could not agree more, and the President's four-point plan to reduce that fear of war is indeed a historic proposal. This Nation has taken a "giant step" on the road toward nuclear arms reduction. The world community's response has ben overwhelmingly positive, and I join them in applauding the President's courageous, unprecedented, action.

The President outlined a four-point plan for United States-Soviet arms negotiations. First, the United States will drop its plans to deploy 572 new cruise and Pershing II missiles in Europe if the Soviets dismantle their 600 SS20, SS4, and SS5 intermediate range missiles aimed at Europe. Second, strategic arms reduction talks will begin in January. Third, conventional forces in Europe should be reduced. And fourth, the President called for an international conference to reduce the risk of surprise attacks, or of a war arising from a miscalculation. This plan represents a serious, genuine effort to reduce tensions that have been allowed to stray dangerously close to the boiling point. The potential for superpower conflict seems too horrible to contemplate, but it is certainly too real to ignore. The United States is willing to grapple with this difficult problem; it seems the Soviets are not.

As much as I applaud the President's efforts, I deplore the Soviets callous rejection of this equitable plan.

The Soviet Union quickly dismissed the President's plan as a "propaganda ploy designed to stalemate" the upcoming Geneva talks on midium-range missiles. Nothing could be further from the truth. If the Soviets continue such intransigence, they must bear the responsibility for maintaining the specter of the fear of war, for continuing the nuclear nightmare. The world community will realize this and will quickly condemn the bellicose Soviet stance. President Reagan has taken a courageous step, I only hope the Soviets will realize this and act accordingly.●

● Mr. FISH. Mr. Speaker, I wish to join my colleagues on both sides of the aisle in endorsing House Concurrent Resolution 224, backing President Reagan's initiative for removing the threat of intermediate range nuclear missiles from Europe and for embarking on strategic arms reductions with the Soviet Union.

For one, I believe the initiative for arms reduction, rather than arms limitation is long overdue. I am personally particularly gratified by this initiative, as the President's proposal is closely in line with House Concurrent Resolution 151, which I introduced in this Congress calling for exactly this sort of nuclear arms reduction. This is the first critical step toward eliminating all nuclear weapons throughout the world.

I believe President Reagan's initiative marks a historic high point in this Nation's effort to control the buildup of nuclear arms. It places the mantle of peacemaker once again where it belongs—with the United States of America.

That this is true I believe has been demonstrated by the enthusiastic support of all peace-loving nations. That support was spontaneous and immediate.

Mr. Speaker, I therefore wish to endorse the President's great initiative. It is powerful and it is sincere. I believe the President's position can usher in a new era in meaningful negotiations for peace. The moral power is now on our side.●

● Mr. McCLORY. Mr. Speaker, in presenting America's program for peace yesterday, President Reagan gave eloquent voice to the aspirations of peoples throughout the world for peace on our planet Earth and the kind of stability among nations that will allow individual human beings to pursue individual dreams of fulfillment and happiness.

Our three-pronged policy of unity, deterrence, and dialog has served us well through decades of tension, cold war, and increasing terrorism. This conscious design of the Atlantic Alliance for the maintenance of peace should continue to provide the strength needed for the avoidance of general conflict, but it is a design that assumes a continuing cooperative effort to reach new levels of understanding in a changing world.

I applaud the President's heartstirring address and express a fervent hope that his words will find the audience they deserve across this troubled globe.●

● Mr. DERWINSKI. Mr. Speaker, I rise in support of the concurrent resolution expressing support for President Reagan's peace initiatives.

I wish to stress that this resolution is consistent with our action yesterday in passing the defense authorization bill. We must negotiate from a position of strength, and the President will be able to deal with the Soviets far more effectively than predecessor administrations.

The United States is not and never has been the threat to world peace or to the freedom of any peoples—contrary to the Soviet Union, which is a constant threat to world peace and the freedom of peoples. Afghanistan is the latest example. The ongoing turmoil in Poland is an example. Cuba, Nicaragua, El Salvador, Angola, and Ethiopia all show the evil manipulation of the Soviet Union.

With the support of our NATO allies, President Reagan has clearly seized the diplomatic initiative, and I join in commending him for his strong leadership, determination, and reemphasis on the role of the United States as the bastion of freedom and the major power of the world which truly seeks peace for all.●

● Mr. MOFFETT. Mr. Speaker, in the last 24 hours we have voted on a number of peace resolutions. But ironically, we rejected five of these peace initiatives, initiatives which would have substantiated President Reagan's espoused interest in peace with effective congressional action.

We had an opportunity to enact a peace resolution, through an amendment to trim $22 million in funds for the Pershing II missiles. This weapon is one on which the President is seeking reductions. Yet, this amendment, this peace resolution was defeated.

We had an opportunity to enact a peace resolution, through an amendment to delete funding for a bomber—the B-1—which is going to be absolete before it gets out of the hangar. This peace initiative was defeated.

We had an opportunity to enact a peace resolution, through an amendment to delete $1.9 billion in funds for the MX missile. These were moneys to go into an unobligated pot; they could not be used for production because the missile is not ready. This initiative was defeated.

A 5-percent across the board cut was defeated.

My 2-percent targeted cut was defeated.

An imitative amendment similar to mine was defeated.

Where was our commitment to peace yesterday?

We have before us a resolution which is not going to be enacted, a House concurrent resolution does not get signed into law. So we are dealing with a symbolic expression for peace. I appreciate symbols as much as the next man. It would have been much more effective, however, if we had demonstrated a more sincere interest in disarmament last night. The world would have been safer with fewer weapons and one less symbol.●

● Mr. LEE. Mr. Speaker, I was very pleased with the President's remarks of yesterday morning, and with the plain-talk initiatives for nuclear arms reduction which he has placed before the Soviet Union.

It is entirely appropriate that the first steps toward world nuclear arms reduction and permanent stability be made in the European theater. It is there that wars have taken such a dramatic toll during this century.

I join with all people of this world in praying that Soviet leaders eventually find the wisdom in President Reagan's offer; and that they find this the right opportunity to set aside propaganda to embrace realistic and lasting reductions in nuclear weapons.

My congratulations are extended to President Reagan for his bold, commonsense approach to the Soviet Union, and for his well-done reaffirmation of America's commitment to its NATO allies.●

● Mr. REGULA. Mr. Speaker, I rise in strong support of House Concurrent Resolution 224, "commending the President's peace initiative."

Speaking to groups in the 16th District of Ohio on Veterans Day, I said: "The challenge of Veterans Day 1981 is that our Nation take a strong role of world leadership in seeking peace."

I strongly emphasized that, in my view, our Nation's military and foreign policies "should command respect not only for our strength but also for our demonstrated desire to improve the quality of life for all people by bringing the superpowers to the peace table to achieve a responsible arms limitation agreement."

I was very pleased, therefore, when President Reagan unexpectedly delivered his excellent "peace" speech yesterday. It was an extraordinary address, referred to in the media as "proposing a radical change in the Soviet-American dialog."

Unfortunately, the initial Soviet response has been to label the speech "propaganda" and to dispute the accuracy of the President's figures.

To resolve this disparity, to somehow verify the facts and then to negotiate constructively to achieve a greatly reduced level of balanced military

forces—these are, the challenges I referred to in my Veterans Day address.

In ceremonies across the Nation November 11, we honored 30 million Americans, veterans of our wars, who sacrificed in so many ways to preserve our freedom. We owe it to each one of them to aggressively pursue agreements, such as those the President outlined yesterday, that will effectively reduce the possibility of a nuclear holocaust.

In addition to reducing the threat of war, the implementation of arms reduction agreements as proposed by the President would save billions of dollars. These funds, in turn, could be used for domestic programs, reducing the national debt or feeding the world's hungry, to name but three possibilities.

If a responsible and verifiable SALT-type agreement can be reached, all nations would be able to reduce their arms budgets and concentrate on meeting the economic and social needs of their citizens.●

● Mr. CRAIG. Mr. Speaker, for the past decade, perhaps longer, the comparative security of this country has been in a state of decline. The enemies of the free world have been rushing at breakneck speed to build bigger and better air, land, and sea forces while we have languished in uncertainty—without a viable plan of action or the resolve to find one.

If one most important thing can be said about the program of President Reagan, it is this: We now have a plan.

His efforts, as embodied in the Defense appropriations bill just passed, and his challenge of peace to the Soviet Union, gives us a clear direction. President Reagan realized, as did this Congress in agreeing with his defense proposals, that the U.S. strategic air, land, and sea based triad is the principal tool of our deterrent. These items are not optional maintenance expenditures.

Although I have been a forceful foe of the MPS basing mode for the MX missile, I have supported the creation of the MX as a necessary new generation of ICBM. The ICBM leg of the triad is the most important leg, and missiles now used—Titans and the Minuteman series—are aging. Their throw weight and accuracy are no longer the state of the art, particularly when compared with the missiles now making up the new Soviet arsenal. The MX, however, is.

The President's new peace initiative had to be developed based on the understanding that Congress would move as he had suggested and as wisdom would lead, to preserve and strengthen that triad. The effectiveness of his new initiative would have been severely undercut had the House not moved to upgrade our bomber fleet and our ICBM's. The effectiveness of that triad as a deterrent and as a weapons system depends upon the accuracy, dependability, and capability of each leg of the triad. With that now assured, the prospects of peace are advanced.

The President's peace program is a plan for the reduction of the likelihood of war. It is neither clouded in the bureaucratic double talk of previous negotiations, nor inflated with the needless saber rattling that destroys sincere prospects for progress. It is straightforward and sincere.

I applaud the President's efforts for peace, and I commend him for his preparedness for war. Strangely enough, I also find myself commending this Congress for the support of both.●

● Mr. BIAGGI. Mr. Speaker, I rise to join my colleagues to express my support for the resolution before us which commends President Reagan yesterday for his foreign policy speech before the National Press Club on this issue of arms control. His remarks have been lauded worldwide for their timely presentation and cogent nature. It is fitting and appropriate that we take this time to join with him in support of this historical diplomatic initiative.

The remarks made by President Reagan on his "Program for Peace" targeted for the Geneva talks scheduled to begin on November 30 between the United States and Soviet Governments, outlined his four-point plan for arms control and halting the spread of nuclear weapons. His speech is to be commended because he successfully rebutted the growing contentions that the United States was headed on a collision course with the Soviets that would surely result in a nuclear war. These contentions were surfacing both in this country as well as in circles abroad, where our allies were witnessing discontent in their own backyards.

His proposal that Moscow dismantle 650 intermediate-range missiles in Eastern Europe in return for our commitment not to deploy 572 American missiles in Western Europe in 1983 and 1984 was a bold step toward placing the onus of responsibility for arms control with the Soviets. While the initial reaction from Moscow has been less than cordial to this proposal, it is clear that they now feel growing international pressure to commit themselves to a workable and verifiable arms control agreement with our Government.

It is also to his credit that President Reagan's speech was well-received by our most imporant allies in Western Europe, Great Britain, and West Germany. Any unilateral plan to control arms must incorporate the interests of our NATO partners who will be most directly affected by any negotiated agreement between the two superpowers. It is this spirit of international cooperation that bodes well for this initiative and for international security and peace.

The bipartisan spirit which has characterized the reception his comments have been given must continue if we are to maintain our role as the leader of the free world. We must put partisan concerns in this matter aside. A nuclear war resulting from the unchecked growth of our nuclear arsenal is what we all seek to avoid—Democrats and Republicans alike.

This resolution, is fitting and appropriate and I urge my colleagues to join me in supporting it.●

● Mr. LAFALCE. Mr. Speaker, I support House Concurrent Resolution 224, to express the support of the Congress for the President's initiative for peace.

I welcome and applaud President Reagan's first major foreign policy speech, inviting Russia and the Atlantic alliance to join him in a quest for peace.

The President's proposal, sent to President Brezhnev about 24 hours before it was delivered, opens up the possibility for welcome change in the Soviet-American dialog. It further serves to reassure our allies that the United States is committed to reducing world tensions, by indicating our readiness to negotiate with the Soviets.

It was an excellent speech, tackling a critical aspect of foreign affairs; and since it was long overdue, it therefore has received much attention and positive response. But, it must be emphasized, one speech is not an end in itself. It can be, however, the beginning of a process that must be seriously and aggressively pursued. The difficult work is ahead of us. The President cannot sit back and relax and bask in the compliments received on a fine proposal. We must expect and demand more.

A closer look at the contents of the speech will shed light on what must be done to transform a speech about policy into an active working policy.

The President challenged Moscow to turn away from enlarging its military arsenal and to join him in reducing nuclear and conventional forces. Specifically, he offered to cancel deployment of new U.S. nuclear missile in Europe—572 new cruise and Pershing II missiles—if the Soviets would dismantle intermediate range missiles that they already have deployed—600 SS-20, SS-4, and SS-5 intermediate range missles. The Soviets, then would abandon an existing asset in exchange for a promise that the United States would forgo future plans. He also agreed to resume strategic arms talks in January with an emphasis on reduction—START—rather than limitation of arms—SALT—and to reduce our nonnuclear forces in Europe.

Absent from these proposals is the stridency that has characterized earlier statements from this administration, as well as the emphasis expressed to date, that military power is our primary instrument of foreign policy. It is a welcome shift, and I hope this latest tone continues. I would rather "speak softly and carry a big stick," as Teddy Roosevelt advised us, than "speak loudly and carry a big or little stick."

The President's earlier comments about our engaging in a limited nuclear war on European soil helped make it appear that the Russians were the pursuers of peace while we were pursuing war. We should no longer criticize those in Europe and in our own country who are "increasingly vocal" in their peace demonstrations, as the President did in October.

The President's speech is a 180 degree reversal for him, and would adopt a position that has long been favored by European administrations. It reiterated some old alliance policies, such as: an attack on one is an attack on all; that no NATO weapons—conventional or nuclear—"will ever be used in Europe except in response to attack."

Hence, it accomplished two major goals: We presented a thoughtful serious proposal indicating a willingness to negotiate with the Russians, and we have regained the confidence, support, and respect of our allies and our own citizenry.

A proposal to reduce intermediate range missiles will be before the United States and Soviet negotiators on November 30 in Geneva. The resumption of strategic arms talks are scheduled for January. The President must be prepared to pursue these talks with as much vigor as he gave to his own talk. Otherwise this speech will have been mere rhetoric.

President Nixon was probably the only person who could have opened the door to China; perhaps President Reagan, with his image as a hawk ready to wage war, if need be, will also prove peculiarly fit to wage peace, as must be. All Americans should encourage him and support him in that endeavor, wholeheartedly and unreservedly.●

Mr. ZABLOCKI. Mr. Speaker, I yield myself the balance of the time.

Mr. I take this time, Mr. Speaker, only to express sincere appreciation for the expression of bipartisan support for a policy. This is not only support for the President, but the policy he has reiterated. I would hope that all our colleagues would look at this resolution as a resolution of the United States, and that we would show absolute unity so that there would not be one iota of doubt in our adversary, the Soviet Union, that we are not sincere or that we have some ulterior motive, or that we are questioning our President.

We only have one President. We only have one policy. We must stand together and cast our political aspirations, our political views, aside when our country's interest is at stake.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the concurrent resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the concurrent resolution.

The question was taken.

Mr. BROOMFIELD. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 382, nays 3, answered "present" 14, not voting 34, as follows

□ 1145

Mr. ROE changed his vote from "nay" to "yea."

Mrs. COLLINS of Illinois, Mr. RANGEL, and Mr. WASHINGTON changed their votes from "yea" to "present."

So the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request from the gentleman from Wisconsin?

There was no objection.

PERSONAL EXPLANATION

(Mr. MOORHEAD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORHEAD. Mr. Speaker, on rollcall 321 I was not recorded. Had I been recorded I would have voted yea.

□ 1200

CONFERENCE REPORT ON H.R. 3413, DEPARTMENT OF ENERGY NATIONAL SECURITY AND MILITARY APPLICATIONS OF NUCLEAR ENERGY AUTHORIZATION ACT OF 1982

Mr. STRATTON. Mr. Speaker, pursuant to the order of the House on November 18, 1981, I call up the conference report on the bill (H.R. 3413) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. BOLAND). Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of November 18, 1981.)

Mr. STRATTON (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. STRATTON) will be recognized for 30 minutes, and the gentlewoman from Maryland (Mrs. HOLT) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conference report to authorize appropriations for the national security programs of the Department of Energy has been somewhat overtaken by events. It is my understanding that the conference report on H.R. 4144, the energy and water appropriations bill was also reported yesterday, November 18. This appropriation bill contains the appropriations for Department of Energy defense programs.

The House Committee on Armed Services reported H.R. 3413 on May 15, and the House passed the bill on June 11, 1981. The other body, however, did not report its bill until July 30, nor was the bill passed by the other body until November 3, 1981. The conferees reached a unanimous compromise on the differences in the House and Senate versions of H.R. 3413 on November 17.

Mr. Speaker, the conference report would provide authorizations in the amount of $5,120,200,000 for the seven major national security programs for which the Department of Energy is responsible. This compromise is $44.9 million below the Senate amount and $55.65 million above the House amount.

I would point out that both the House bill and the Senate amendment were above the amount of the President's request. For example, the House bill was $68.2 million above the request, while the Senate amendment was $168.7 million above the request. In essence, neither House believed that the amount requested was sufficient to finance these important DOE programs during fiscal year 1982. Both houses added a substantial amount to the important inertial confinement fusion research and development program in order to carry out the current level of effort. This program is being carried out at the three Department of Energy facilities now engaged in glass laser, gas laser, and electronic beam fusion research. In addition, both Houses provided sufficient amounts to continue important work being done by the Naval Research Laboratory and two private entities.

Together, the differences in the House and Senate versions of H.R. 3413 were only $300,000 apart with respect to the nearly $3.8 billion authorized for operating expenses.

The conference report would authorize a total of $1,335,772,000 for plant and capital equipment during fiscal year 1982. This includes the initiation of planning, design, and construction of several new facilities to support Department of Energy defense programs, the continuation of construction projects that are now underway, and the purchase and fabrication of capital equipment for existing facilities not related to construction.

In the plant and capital equipment category, both the House bill and Senate amendment contained authorizations above the President's request. The House bill was $12.3 million above the request, while the Senate amendment is $113.4 million above the request. These increases reflected the concerns of both Houses that important weapons research and production facilities, and radioactive waste management facilities, were underfunded by the request. The compromises agreed to by the conferees continue to reflect that concern.

Mr. Speaker, this conference report represents only 2.5 percent of the amounts under consideration for appropriations for the Department of Defense for fiscal year 1982. Yet, the importance of this bill is far out of proportion to its costs, even if every $1 authorized is eventually appropriated. This is because the strategic and theater nuclear delivery systems authorized for the Department of Defense would be of no use as a deterrent to war without the research and development and production of nuclear warheads which this bill would support.

Mr. Speaker, I urge the adoption of the conference report.

Mrs. HOLT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I fully support the remarks of the gentleman from New York (Mr. STRATTON) who is the chairman of our Subcommittee on Procurement and Military Nuclear Systems. As the ranking minority member of that subcommittee, I know that we have thoroughly reviewed the administration's fiscal year 1982 programs and have exercised very close oversight over them from year to year. I have personally visited a good many Department of Energy research, development, and production facilities.

To my great concern, and I believe that I share this concern with other members of the committee, we have found that many Department of Energy defense facilities are old, deteriorated, and ill equipped. I believe that this conference report would authorize a healthy increment for fiscal year 1982 to begin to reverse those conditions. This conference report will also continue the important naval reactor development program which has promise of bringing about naval propulsion reactors that will last the lifetime of a ship or submarine without refueling.

Of the highest importance is the nuclear weapons research, development,

and testing program supported by the conference report that has provided, and will continue to provide, confidence in our nuclear deterrent, and weapons that will be safer to handle and more secure from unauthorized use.

Mr. Speaker, I believe that this conference report is deserving of the support of all Members of the House, and I urge its adoption.

● Mrs. SCHROEDER. Mr. Speaker, I rise in opposition to the conference report to accompany H.R. 3413.

I used to think that Congress, as the elected representatives of the American people, set policy of nuclear weapons research, development, and construction. I used to think Federal agencies implemented the policy set by Congress and private industry, through the competitive process, came forward to augment the effort. Over time, I have learned that I had it all upside down.

The conference on this bill elucidated this. The House Armed Services Committee learned about the contracting out of the security guard service at Los Alamos National Laboratory and promptly called hearings to see what was going on. Convinced that it was a mistake, the committee chairman (Mr. PRICE) wrote the Department of Energy asking them to stop. With their normal sensitivity to congressional requests, the Department said, "No." I then offered an amendment on this bill to prohibit the contracting out of security at Los Alamos. It was adopted and then the bill wandered off to secret conference.

Meanwhile, the chamber of commerce decided to make this a cause célebre. Their Washington Report newsletter highlighted this amendment as an example of an assault on free enterprise.

And now the bill emerges from conference and my amendment is gone without a trace. While I am not surprised, I am disappointed and oppose the conference report.●

Mr. STRATTON. Mr. Speaker, I have no further requests for time, and I yield back the remainder of my time.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 335, nays 55, not voting 43, as follows:

□ 1215

The Clerk announced the following pairs:

On this vote:

Mr. Fary for, with Mr. Conyers against.

Mr. Pepper for, with Mr. Reuss against.

Mr. AuCoin for, with Mrs. Chisholm against.

Until further notice:

Mr. McDonald with Mr. Paul.

Mr. Miller of California with Mr. Young of Florida.

Mr. Richmond with Mr. Dougherty.

Mr. Mitchell of Maryland with Mr. Pritchard.

Mr. Dingell with Mr. Rhodes.

Mr. Dixon with Mr. Duncan.

Mr. Biaggi with Mr. Goldwater.

Mr. Florio with Mr. McCloskey.

Mr. Mattox with Mr. Dornan of California.

Mr. Clay with Mr. Grisham.

Mr. Bedell with Mr. Martin of New York.

Mr. Breaux with Mr. Hagedorn.

Mr. Jones of North Carolina with Mr. Bafalis.

Mr. Long of Louisiana with Mr. Dowdy.

Mr. Volkmer with Mr. Markey.

Mr. Bowen with Mr. Dymally.

Mr. Bonker with Mr. Benedict.

Mr. ECKART and Mr. DONNELLY changed their votes from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill, H.R. 3413, the Department of Energy National Security and Military Applications Act of 1982, just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

BUS REGULATORY REFORM ACT OF 1981

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 280 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 280

Resolved, That upon the adoption of this resolution it shall be in order to move, section 4.2(a) of the Congressional Budget Act of 1974 (Public Law 93-344) and clause 2(l)(6) of rule XI to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3663) to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers, and the first reading of the bill shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Public Works and Transportation now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Missouri (Mr. TAYLOR), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 280 is the rule providing for consideration of H.R. 3663, the Bus Regulatory Reform Act. The rule waives clause 2(l)(6) of rule XI which would otherwise require this legislation to lay over for 3 calendar days. This waiver is granted in recognition of the fact that the bill which will be before this House is the product of many days of hearings and months of negotiations which included representatives of the bus industry, labor, and the administration. No purpose would be served in delaying action on this important legislation any further.

As introduced, H.R. 3663 would be subject to a point of order under section 402(a) of the Congressional Budget Act.

Section 402(a) provides that it shall not be in order to consider any bill which authorizes the enactment of new budget authority for a fiscal year, unless that bill has been reportd on or before May 15 preceding the beginning of such fiscal year.

Section 18 of the introduced bill directs the Secretary of Transportation and the Interstate Commerce Commission to undertake a study of bus terminals. Since this section is an indirect authorization of new budget authority for fiscal year 1982 and since the bill was not reported by May 15, it would be subject to a point of order under section 402(a).

In markup, the Committee on Public Works and Transportation amended the introduced bill to cure all Budget Act violations. Therefore, the bill, as amended, does not violate section 402(a) of the Congressional Budget Act.

Nonetheless, this Budget Act point of order would still lie against the bill as introduced which would preclude its consideration. Since the committee amendment cures the Budget Act problem, the Committee on Rules has granted a technical waiver of section 402(a) of the Budget Act to permit the House to consider the bill as amended by the committee.

Mr. Speaker, the rule further provides for 1 hour of general debate in the Committee of the Whole to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation. The bill will then be read for amendment under the 5-minute rule. The amendment in the nature of a substitute which has been recommended by the Committee on Public Works and Transportation will be considered as an original bill for the purpose of amendment under the 5-minute rule.

The rule also provides that upon completion of the consideration of the bill for amendment, the bill will be reported to the House where a separate vote may be demanded on any amendment adopted in the Committee of the Whole. The rule also allows for a motion to recommit with or without instruction.

Mr. Speaker, the Bus Regulation Reform Act of 1981 is an important piece of legislation which will lessen Government regulation in the transportation marketplace. It will provide this long-forgotten industry greater flexibility to compete with other transportation modes which have already had the advantage of deregulation endeavors. Restrictive entry requirements will be significantly liberalized, pricing will be freer, yet antitrust immunity for collective ratemaking will be narrowed. Although the legislation would permit the industry to abandon segments of their operations, the ICC will be required to examine such actions to insure that service to small communities will not be adversely affected.

Mr. Speaker, H.R. 3663 represents an important, balanced compromise which should benefit the busing industry and the traveling public it serves. I urge adoption of this rule to expedite its consideration.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, House Resolution 280 is an open rule to allow quick consideration of H.R. 3663, a bill which eases Federal deregulation in the intercity bus industry.

While I am not opposed to this rule, I do want to point out that it contains several waivers that some Members will not appreciate. The bill itself is being rushed through this House in order to avoid close examination of the issues surrounding what I call deregulation fever.

□ 1230

The rule waives clause 2(l) of rule XI against consideration of the bill. Clause 2(l)(6) of rule XI prohibits consideration of a bill until the third calendar day on which the committee report has been available.

In this situation, the Committee on Public Works has not had its report available for 3 days, but it wants to take up the bill as soon as possible. I find this to be a rather unique situation, since the subcommittee reported the bill on Monday, the full committee reported it on Tuesday, the Rules Committee met on this rule yesterday—and here we are now, taking up the rule. It is my understanding that consideration of the bill will follow immediately after this consideration.

Mr. Speaker, I would simply say that this is the first bus bill to ever be considered on a railroad.

In addition to the 3-day layover, however, the rule waives section 402(a) of the Budget Act against consider-

ation of the bill. The Budget Act, in section 402(a), would otherwise prohibit our consideration of this measure because it does contain new budget authority that was not reported by the committee by May 15 preceding the beginning of the fiscal year for which it becomes effective.

Mr. Speaker, in other situations, waivers of this type have often raised questions about the legislation at issue and have, on occasion, made it more difficult for proponents to pass their legislation.

This rule also makes the committee amendment, now printed in italics in the bill, in order as an original bill for the purpose of amendment, and it will be read for amendment under the 5-minute rule.

Finally, the rule provides for one motion to recommit with or without instructions.

Given our recent experience, Mr. Speaker, with airline deregulation, and more recent complaints about the speed of truck deregulation, I want to say very clearly that I have severe reservations about the necessity of H.R. 3663 at this time. This is a difficult position for me, because I served for years on the Public Works Committee; but I do believe it is time that we slow down our urge to deregulate and try to calm our deregulation fever.

Rural America, especially, has been hurt by our efforts at airline deregulation, and many Members have personal experience with the inability of the airline industry to serve small towns and small communities. In this regard, we were assured several years ago by the administration and by the committee at that time that small cities and towns would be served by commuter and charter airlines since the big scheduled airlines had left their communities. That simply has not happened, and I doubt that it ever will.

Now the committee comes to the floor in a heated rush with a bill that could cause further damage to rural America's transportation systems.

We have no airplanes in smalltowns and cities, and we will soon have fewer interstate and intercity buses.

Mr. Speaker, it may be heresy for me to say this, but I do not agree with the administration's spokesman who says that there is no need to continue Federal economic regulation of the bus industry.

Many people in this Nation, especially in rural areas isolated from big population centers and in smalltowns between major population centers, rely on well-regulated bus transportation systems. Most of these people, by the way, are our senior citizens, those who would have to pay the high cost of airline travel, and who cannot afford it even if airline travel were still available.

Mr. Speaker, as a former member of the Public Works Committee, I know how long and hard the members have worked on this issue—and I have a great respect for the chairman of the subcommittee and the ranking minority member of this committee, and I know that they are dedicated and well-meaning people—and that it has not been easy for them, what with having to wrestle with the industry's financial problems and this administration's, as well as the previous administration's, urge to deregulate everything in sight.

It is not my purpose to overly criticize this bill, but I do want to alert the Members that this bill contains some real dangers to the rural bus transportation system that we have in America today and as we now know it. I think we should give the measure very close scrutiny.

I would have less reservation about this legislation, Mr. Speaker, if the committee would wait at least the otherwise required 3 days, so that Members would have a chance to read the committee report before bringing up the bill.

Mr. SAM B. HALL, JR. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Texas.

Mr. SAM B. HALL, JR. Mr. Speaker, I would like to associate myself with the remarks of the gentleman and state that the Texas Railroad Commission is adamantly opposed to this bill, and one of the reasons being that it wants no Federal preemption over the existing State authority to regulate intrastate carriers. If this bill is passed, that will take place.

Mr. TAYLOR. That is exactly right.

Mr. Speaker, the speed with which this matter is being considered makes it difficult for those Members who may have amendments to be able to write them and be ready to offer them. This is a prerogative that some will find impossible under this rule.

Mr. Speaker, since the Committee on Public Works seems to think that we should act in this unusual manner, I would simply conclude by saying that I will not oppose the adoption of this rule, although I may vote against it, but I think it is time for us to take a look and see whether in our passion for deregulation fever we are in fact penalizing rural America especially in serving their transportation needs.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR, I yield to the gentleman from Texas.

Mr. KAZEN. My understanding is that this bill just got out of committee yesterday, is that correct, or the day before?

Mr. TAYLOR. It was voted out Tuesday. I think it was voted out of the subcommittee on Monday, the full committee on Tuesday, the Rules Committee yesterday, the rule is on the floor today, and consideration of the bill will follow immediately after the passage of the rule.

Mr. KAZEN. When was the report printed?

Mr. TAYLOR. The report was printed this morning, I understand. We only had a typewritten report and bill in the Committee on Rules.

Mr. KAZEN. Well, what is the hurry? Does the gentleman know?

Mr. TAYLOR. No; I would say to my friend, the gentleman from Texas, that I do not know, and this is one of the reservations that I have—the unorthodox manner in which this bill has been handled and rushed through. I believe that it does not give the Members whose districts will be affected by this legislation adequate time to peruse the bill and perhaps to prepare some perfecting amendments that they might think necessary. And in view of what has happened with the airline deregulation and the havoc that has been wreaked upon the rural areas of this country, I think we should move slowly and with a great deal of discretion in the consideration of this type of legislation affecting transportation.

Mr. KAZEN. Let me commend the gentleman for putting these red lights, flashing red lights, and letting the membership know what is involved, because if this bill passes today in the form that it is written, we are going to wake up tomorrow, those of us who represent rural districts, and find out that we have no transportation whatsoever. Airlines do not stop, the train does not stop, and now they are going to take the bus stops away from us. You know, I heard a while ago a Member say the old refrain about how are you going to keep them down on the farm. This is the way you are going to keep them there, because they are not going to have any way of getting out.

Mr. ROBERTS of Kansas. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. I want to commend my friend and colleague from Missouri for, as the previous speaker said, raising the amber lights or the warning red lights. I have 57 counties that I am privileged to represent, and the blunt truth about it is that since deregulation has taken place, we cannot get there from here. In terms of airline deregulation, it costs less to fly from, say, New York to Miami, than it does, say, for me to fly from Dodge City to Wichita; but, yet the travel, in terms of distance, is far, far less. And that is the case, I do not care whether you are talking about bus transportation or, say, trucking transportation, or airline transportation.

We have a hospital in one of my larger communities that now cannot

get X-ray films because of the trucking deregulation, and they have to have a special bus to go all the way to Kansas City to get that film. That simply adds costs to our patients in our rural hospitals.

I commend the gentleman for his very fine expertise in this area. I, too, cannot see why we cannot consider this bill in a more regular fashion. As the gentleman has pointed out very clearly, rural America has been hurt by deregulation. I realize the bill contains "safeguards" designed to protect rural communities but we have been down that road before.

Mr. SHUSTER. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman for yielding.

Mr. Speaker, as the gentleman knows, I represent a rural district, and I am very sensitive to the problems of rural America. I do not want to take the time of the House now to go through the details of the arguments, but I would urge my colleagues to listen, when we enter into the general debate on this issue, because this legislation is a far cry from deregulation. This legislation is a far cry from the massive Federal preemption which was provided in airline deregulation.

There are numerous safeguards built into this legislation to protect rural areas. Now, the safeguards are not absolute. If we are going to talk about getting the Government out of regulation, particularly the conservatives, then on the one hand we cannot say we want less Federal regulation but on the other hand we want the Federal Government to make it impossible for free enterprise to decide where and when they want to market their products and services.

So I would simply urge my colleagues to listen to the general debate, with particular emphasis on the protections which are provided for rural America.

Mr. TAYLOR. May I respond to the gentleman? If these safeguards are contained within this legislation, then let me ask the gentleman this: Why all of the speed in passing this bus thing on a railroad track?

Mr. SHUSTER. This is a matter of the scheduling of the House. And as the gentleman knows, the minority does not schedule legislation.

I would answer the gentleman, however, that we have had months of hearings on this issue. There is bipartisan support in our committee, in the subcommittee and in the committee, and this was passed out unanimously.

Mr. TAYLOR. And the airline deregulation was also. And I voted for it.

Mr. SHUSTER. I am not here to debate any airline deregulation today. I am here to support the bus regulatory reform and with special emphasis on the protections which are provided for rural America.

Mr. TAYLOR. And these protections, I assume, will be brought out and clearly described within the debate that will ensue?

Mr. SHUSTER. That is certainly my intention, I would say to my friend.

Mr. TAYLOR. I would certainly urge everyone from the rural areas to be here to listen to this, to be sure that you are adequately protected by these safeguards that will be described by the Members who will be handling this bill on the floor, because I think it is important that you satisfy yourselves that these protections are there.

Mr. ERTEL. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. I thank the gentleman for yielding.

Just to correct one thing, I think the gentleman may have made a slight overstatement. Airline deregulation did not come out of Public Works unanimously. This did. If you will recall, there was at least one vote against airline deregulation coming out of committee.

Mr. TAYLOR. I think there was two. I recall now that the Senator from South Dakota (Mr. ABDNOR) at that time voted against it, and that is probably the reason he is in the Senate today.

Mr. KINDNESS. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

I have asked the gentleman to yield to me in order to direct a question on the procedure here. I know of no way to avoid the rather hasty consideration of this bill today except to defeat the previous question on the rule.

With all due respect to the Committee on Rules, which has reported this rule, I feel very much like the gentleman, only I read a different conclusion. I really think we ought to resist this rule. It is a little too sudden. I would certainly urge that that be the procedure.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the distinguished chairman of the Public Works Committee.

Mr. HOWARD. I would just like to say to the gentleman that I do intend to ask for a recorded vote on the rule.

Mr. RAHALL. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from West Virginia.

Mr. RAHALL. As a representative of a rural district and as a member of the subcommittee and the full committee that considered this legislation, I can assure the gentleman and those on the minority side that I do plan on a full discussion of the effect on the small communities that this legislation will have.

I would hope, though, that we could have a vote on the rule and move into the general debate on the bill itself, where I think you will find assurances that the effects on small communities have been taken into account in the consideration of this legislation.

Mr. TAYLOR. Just let me say at this time that I do not mean this as a criticism of the Public Works Committee. I have a high regard for the membership of this committee. I think they are trying to solve a problem that does exist. We all know that we have a bus industry that is in trouble. We know there is a big press on for deregulation. But I do want to raise the flag of saying that we better take a look at it because transportation in rural America can be affected by this.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Arkansas (Mr. ALEXANDER).

□ 1245

Mr. ALEXANDER. Mr. Speaker, in his news conference last week the President assured Americans that inflation is caused by a spendthrift Congress thereby excusing his economic policy as a party to the crime.

Today, we hear from the White House that Mr. Reagan intends to veto the appropriation bill (H.J. Res. 357) even though it appropriates less money than the President has requested for fiscal year 1982.

Let us not be confused by the facts. But, someone is confused.

After almost a year of closely observing the President's economic statements, I am better equipped to understand why Reaganomics was once characterized as "voodoo" by then candidate GEORGE BUSH.

His proposals have more to do with politics than economics. Ronald Reagan's words work political magic in the minds of the American taxpayer who desperately seeks a solution to the corrosive inflation which gradually lowers his standard of living.

Tomorrow, the President threatens to veto House Joint Resolution 357, further continuing appropriations, 1982. Once again Mr. Reagan will stick his Presidential pin in the congressional doll hoping to again work political magic by casting a spending spell over a Democratically controlled House.

Not only has the House appropriated less funds than the President has requested for fiscal 1982, I am herewith submitting data which clearly shows that only once since 1943 has Congress spent more money than a President has requested. Furthermore, during the last two Republican administrations, Nixon and Ford, a Democratically controlled Congress stub-

bornly appropriated $40.5 billion less than the Republican President requested.

Will this revelation of fact dispel the voodoo of Reaganomics? Only time will tell.

COMPARISON OF PRESIDENTIAL BUDGET REQUESTS AND CONGRESSIONAL APPROPRIATED AMOUNTS ENACTED IN REGULAR ANNUAL, SUPPLEMENTAL, AND DEFICIENCY APPROPRIATIONS BILLS

Calendar year	Presidential budget requests	Congressionally appropriated amounts	Congressionally appropriated amounts less (—) or more (+) than Presidential request
1943	$115,041,366,395	$110,634,660,785	—$4,406,705,610

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. HOWARD. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 306, nays 80, not voting 47, as follows:

□ 1315

The Clerk announced the following pairs:

On this vote:

Mr. Fary for, with Mr. McDonald against.

Until further notice:

Mr. Addabbo with Mr. McCloskey.
Mr. Dingell with Mr. Courter.
Mr. Breaux with Mr. Bafalis.
Mr. Conyers with Mr. Paul.
Mr. Jones of North Carolina with Mr. Pritchard.
Mr. Long of Louisiana with Mr. Rhodes.
Mr. Montgomery with Mr. Martin of New York.
Mr. Reuss with Mr. Hagedorn.
Mr. Wilson with Mr. Dornan of California.
Mr. Mavroules with Mr. Young of Florida.
Mr. Mitchell of Maryland with Mr. Duncan.
Mr. Biaggi with Mr. Goldwater.
Mr. Moffett with Mr. Dymally.
Mr. Pepper with Mr. Garcia.
Mrs. Boggs with Mr. Ireland.
Mr. Florio with Mr. Mattox.
Mr. Richmond with Mr. Volkmer.
Mr. Hance with Mr. Grisham.
Mrs. Chisholm with Mr. Clay.
Mr. Dixon with Mr. Bowen.
Mr. Dowdy with Mr. Bedell.
Mr. AuCoin with Mr. Deckard.

Mr. McCURDY changed his vote from "yea" to "nay."

Mr. LOWRY of Washington changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. EDWARDS of California. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3663) to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. EDWARDS).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. KAZEN. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 335, noes 33, answered "present" 1, not voting 64, as follows:

□ 1315

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3663, with Mr. PATTERSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from California (Mr. ANDERSON) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. SHUSTER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. I thank the Chairman.

I first yield such time as he may consume to the distinguished chairman of our full Committee on Public Works and Transportation, the gentleman from New Jersey (Mr. HOWARD).

Mr. HOWARD. Mr. Chairman, I rise in support of H.R. 3663. The Bus Regulatory Reform Act of 1981, the bill is yet another effort by the committee to lessen Government regulation in the transportation marketplace, the bill is the product of long and hard work by the committee, expecially by the subcommittee chairman. GLENN ANDERSON, and the ranking minority leader of the subcommittee, BUD SHUSTER.

This bill, as previous regulatory bills, is regulatory reform and not total deregulation. This result was thought to be the best approach. It is an approach reached after extensive and open meetings with many groups of interested persons. H.R. 3663 balances the interests of all parties, with the intent of the bill, which is to maintain and to improve transportation and to oversee closely that this intent bears fruition.

The bill permits freer entry for those who wish to participate in this marketplace by substantially reducing Federal entry requirements. Simultaneously, it permits the participants to augment their intrastate services where State regulation has prohibited them from fully utilizing their resources.

Conversely, it permits them to abandon segments of their operations unless such actions are not consistent with the public interest or such abandonment is not an undue burden on interstate commerce. The ICC is to oversee these processes in a manner that requires that agency to examine the effects on service to small communities and commuter services.

Under the act, pricing will be freer; yet, antitrust immunity for collective ratemaking is narrowed.

Under the act, more emphasis will be placed upon safety by requiring minimum insurance levels and by giving the ICC more clout in suspending unsafe operations.

Other provisions of the bill give the carriers opportunities to better utilize their equipment in a manner that should be beneficial to the public.

Some comment has been made about the intent of the amendment to section 10922(e)(4) of Title 49 of the United States Code contained in section 6 of the bill. That amendment directs the ICC to grant carriers authority to transport newspapers, baggage, and mail in the same vehicle with the passengers. It gives the same directive with respect to express. There, however, it permits the ICC to deny authority if, on the basis of evidence presented by objecting persons, it finds that it is not consistent with the public interest. Here, it should be noted that this will probably occur only in the most unusual circumstances.

Apparently, this type of authority is now granted in almost every, if not every, case. This language is not to authorize any contrary policy or any change in that policy. Quite to the contrary, it is assumed that this type of authority will be granted except in the most unusual circumstances. The purpose of the change is solely to preserve some of the ICC's discretion where the ICC finds a clear and convincing reason for denying or limiting that portion of the application seeking authority to transport express.

The bill represents a compromise position, yet it is a balanced compromise, one that should benefit the industry and the traveling public it serves.

Mr. Chairman, I believe this is an important piece of legislation that should be considered by the House.

At this time, I wish to thank all the members of the committee, especially Mr. ANDERSON and Mr. SHUSTER, for their hard work on this bill.

Mr. ANDERSON. Mr. Chairman, as you know, the House Public Works and Transportation Committee has been trying, for the past several years, to promote flexibility in the regulatory structure surrounding the Nation's transportation industries. This has been done, and is continuing to be done, with a spirit of bipartisan cooperation.

The Bus Regulatory Reform Act is a natural extension of our efforts. But it is not an effort which we undertook lightly. When we entered into our hearing process this spring, I, for one, was not certain I would want to pursue the matter legislatively. By the time our hearings were concluded, I was certain beyond any doubt. During our hearings, we heard numerous horror stories. We heard of bus companies who were forced to operate on routes for total revenues which only covered half the route's costs. We heard of bus carriers going through large cities which were not permitted to open their doors in those cities, thus inhibiting their efficient operations and effectively eliminating competition to the other operator who was enjoying a monopoly on the route. We saw that carriers received immunity from the Nation's antitrust laws in collectively determining their own single-line rates.

We saw problems which we thought—and think—can be corrected.

H.R. 3663 sets out to do this. The bill establishes a new regulatory scheme for the intercity bus industry. The major thrust of the bill deals with reform at the Federal level, however, it does provide an opportunity for Federal oversight of some actions by States that affect interstate carriers.

First, at the Federal level, the bill provides significantly easier entry standards for all types of interstate operations. Section 6 provides for a public interest test for all applicants seeking to operate as common carriers. Under the new test, an applicant must prove that it is fit, willing, and able to conduct the proposed operation. Some protection for regular route operators is provided under new subsection 10922(c)(3), where issuance of a certificate would substantially impair the existing carrier's ability to provide service over its system of routes. Entry for contract carriers and brokers is reduced to a fit, willing, and able standard in sections 13 and 14, respectively.

Regulatory controls for interstate rates are substantially reduced by providing for a zone of rate freedom in section 11 and by substantially lessening regulatory controls for charter service and special operations in section 12. The Interstate Commerce Commission retains authority to correct discriminatory rates or predatory practices.

Antitrust immunity for collective ratemaking will be narrowed by the provisions in section 10. Moreover, that section requires the Motor Carrier Rate Bureau Study Commission to issue a separate report on the bus industry.

The bill also provides for better utilization of equipment with the objective of providing better service to the traveling public. This is accomplished first, in section 7 by providing a mechanism for removal of restrictions in operating authorities, second, in section 8 by allowing the carriers to mix types of passengers, and third, in section 15 by allowing carriers to provide experimental service on a temporary basis.

Other sections of the bill attempt to improve safety and to curtail illegal operations. For example, the ICC can more easily suspend operating authority for unsafe practices that threaten life or property, section 22. Interstate carriers will have to maintain adequate insurance, section 18. Illegal operators will be subject to larger civil penalties, section 23. A thorough review will be made, and rulemaking entered into, of whether or not the use of citizen band radios enhances public safety, section 25.

In an attempt to discourage State practices that burden interstate carriers and thus interstate commerce, the bill allows interstate carriers to eliminate State closed door policies on their interstate routes and to exit and reduce service on intrastate segments of their interstate routes on a case-by-case basis at the ICC. Relief must be in the public interest and must be consistent with not burdening interstate commerce. These reforms are achieved in section 6 and section 16.

Closed door intrastate restrictions on interstate routes are presumed to be unreasonable burdens on interstate commerce and not in the public interest. However, protestants, including the States, are given an opportunity to rebut this presumption before the ICC. Protestants in such cases have the same burden of showing that an intrastate entry application before the ICC is inconsistent with the public interest that they would have in an interstate case. Moreover, the ICC shall consider such intrastate applications in the context of the underlying interstate service being performed and shall consider the same factors in reaching its decision, as it would in an interstate application case.

Protestants also have the opportunity to rebut the presumption that intrastate operating authority limitations on interstate routes are unreasonable burdens on commerce. In the case of intrastate entry preemption, the arguments of the protestant would have to be compelling given the policies favoring increased competition and improved operational and energy efficiency, which strongly favor the lifting of intrastate closed door restrictions on interstate routes.

If a carrier has been granted authority to discontinue its interstate operations, State denials of the carrier's application to discontinue its intrastate service over the same route are presumed to be unreasonable burdens on interstate commerce and not in the public interest. However, protestants, including the States, are given an opportunity to rebut this presumption before the ICC. In reaching a decision in these cases, the ICC must consider the national transportation policy, whether a carrier is receiving financial assistance, whether the service to be discontinued is the last service to the area, and whether the request will have adverse effects on commuter operations, when a protestant raises these issues. These factors or others may create situations where the withholding of authorization to discontinue intrastate operations is found to be

consistent with the public interest or not an unreasonable burden on interstate commerce even though authority to discontinue the corresponding interstate operations has been granted.

The committee does not expect the Commission to implement exit policies which differ from the policies established under the relaxed entry requirements of new subsection 10922(c) of title 49, United States Code. It is the strong belief of the committee that simple equity requires carriers to be treated comparably under the entry and exit provisions of the act given the close relationship of these provisions.

Consistent with the policy is the policy in section 17, which permits relief from State actions dealing with intrastate rates of interstate carriers where the State action discriminates against or unduly burdens interstate commerce. Again, the ICC is the agency to which the carriers can appeal for relief.

The legislation contains a limited employee protection section which should help benefit many of those employees—and we believe they will be few in number—who are dislocated because of exit or reduction in service provisions.

Finally, the bill gives special consideration to small communities service and commuter services. They are singled out for special consideration in the provisions of the bill dealing with entry, exit, reduction in service, and removal of operating restrictions. The overall intent is to maintain and to improve these types of service.

Other provisions of the bill provide: First, for a study on all aspects of bus terminals; second, for faster or less regulatory controls over mergers and securities, section 19 and 21; third, for administrative assistance to small carriers and local governments which might become involved in proceedings involving the new procedures established for limited State preemption, section 24; and, fourth, addresses a serious problem regarding foreign reciprocity of motor carriers operating rights.

Sections 6 and 13 of the bill address the granting of U.S. operating rights to Mexican and Canadian motor common carriers, and contract carriers, respectively.

This section is intended to deal with motor common carriers domiciled in Canada or Mexico, or which are owned or controlled by persons domiciled in those two countries, which seek operating authority from the ICC. Because of differences between those countries, the language speaks of political subdivisions—that is, the Canadian provinces or the Mexican States.

Under the Motor Carrier Act of 1980, of course, we considerably eased entry standards by which motor carriers of freight could enter the industry or expand their operations. It was not intended, or indeed even considered, at that time, that foreign carriers might be applying to the ICC under this easier entry.

It is apparent, though, that foreign carriers ought not be permitted to avail themselves of entry into our country on the same basis as which our own carriers enter in those cases when our carriers are either prohibited by their govenments from entering their markets, or are treated differently from those governments' carriers.

It is not the intention of these provisions to stop the free movement of international commerce. It is, however, clearly our intention to make certain that our operators can take advantage of that commerce.

While I do believe that the ICC currently possesses the authority to turn down applications for operating authority filed by foreign carriers, this provision serves to make clear that if foreign carriers wish to be treated in the United States the same as our domestic carriers, then our carriers must be treated the same in their home country, or, where applicable, their home province or political subdivision.

We have been concerned that, in the case of one nation in which the economic regulation of the motor carrier industry is largely addressed at the provincial level, there exists nonetheless a national authority which may review provincial grants of operating authority to U.S. carriers under the aegis of examining foreign investments in that country. Clearly, this is a process in which U.S. carriers are treated differently from that nation's carriers.

The fact that a U.S. carrier may be granted authority in a foreign nation following a process which is different than the process which that nation's carriers are granted authority, does not necessarily mean that the U.S. carrier is not treated as favorably as the nation's own carriers.

The ICC should certainly consider, though, whether the different process by which a U.S. carrier is granted operating rights is an onerous one, or tends in and of itself to be prohibitive. Of course, should the different process result in unfavorable treatment vis-a-vis the nation or province's own carriers, the ICC, at its discretion, is directed to deny issuance of a certificate to that nation's or province's carriers.

Finally, in determining whether "persons from the United States are not treated as favorably as persons from such political subdivision or country," the Commission should consider constraints on the operation of U.S. motor carriers not shared by the motor carriers of such political subdivision or country, apart from the subdivision or country's granting of operating rights. Conditions or circumstances that are imposed upon U.S. carriers operating in a foreign nation or political subdivision which are not imposed on operators native to that land should also be considered.

Mr. Speaker, it has come to my attention that the California Department of Transportation is undertaking a statewide study of intercity bus transportation. They are doing this to try to identify problems that may occur due to intercity bus reform at the State and/or Federal level.

The State of California is attempting to determine which of its communities require continued bus service even if it is necessary for the State or local government to subsidize it.

Since this legislation provides for the possibility of preemption of State regulation regarding discontinuance of routes, the State of California is concerned that not enough time will be provided for them to develop alternatives and/or subsidies to continue desirable service that may be eliminated.

It is the intention of this committee that every consideration be given by the ICC to States that are trying to develop methods to continue desirable service that may otherwise be eliminated.

Our intent in drafting this legislation. Mr. Speaker, was to reduce the maze of regulations surrounding the intercity bus industry, thus restoring competition in the marketplace. H.R. 3663, before us, will allow us to meet this objective. With its enactment, we will be giving the American free enterprise system an opportunity to work. I strongly urge its passage.

□ 1330

Mr. SHUSTER. Mr. Chairman, I yield 8 minutes to the distinguished ranking minority member of the full committee, the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Chairman, I rise in support of H.R. 3663, the Bus Regulatory Reform Act of 1981. H.R. 3663 represents, in my judgment, a carefully constructed approach to a very difficult regulatory reform problem. It is the product of countless hours of Member negotiation, as well as constructive participation by all people affected by the intercity bus industry. I wish to commend the chairman of the Committee on Public Works and Transportation, Mr. HOWARD, the chairman of the Subcommittee on Surface Transportation, Mr. ANDERSON, and the subcommittee ranking member, my colleague from Pennsylvania, Mr. SHUSTER, for bringing us to the point where we can proceed with the final piece of regulatory reform legislation designed to modernize our Nation's transportation industry.

I believe the compromise bill before us today is a responsible effort that meshes both the philosophy of de-

regulation with the practicalities with the Federal-State climate in which the intercity bus industry has developed during the past half century. Our legislation recognizes that even though the intercity bus industry has shared a common regulatory framework with motor carriers of property since 1935, the structure of the two industries is considerably different. The intercity bus industry is dominated by its two largest firms which account for more than 80 percent of the intercity industry revenues. No sector of the trucking industry is as concentrated. In addition, the bus industry differs from the trucking industry in terms of the competitive environment in which it operates. Although the trucking industry faces competition on many fronts, it has enlarged and continues to enlarge its share of the intercity freight market. The bus industry, however, has lost market share over the years, particularly in the last 10 years because of strong intermodal competition, especially from the automobile. Buses also compete with the airlines, while trucks have less airline competition. For this reason, buses were not included in the motor carrier regulatory reform legislation enacted in the last Congress.

At the outset, I would like to address the issue of small community service. I know that a number of Members are concerned that bus companies may eliminate a great deal of service to small communities and rural areas. I want to assure these Members that the committee bill addresses this problem and builds in a number of important safeguards for small communities.

I would like to take a few moments to address the small community issue in detail and to, hopefully, allay the fears of the Members:

First, the exit provisions (section 16) of the bill are far from automatic, and are not a sure out. A carrier can be turned down for either of two reasons. It can be turned down if the State or other protestant shows that abandoning the service is not consistent with the public interest; or continuing the transportation is not an unreasonable burden on interstate commerce.

Second, in making its decision on whether to preempt the State, the ICC must consider: whether the transportation is the last bus service to a community; and whether a reasonable alternative to such service is available.

Third, the exit provisions of the bill recognize the legitimate and useful role for State and local governments to play when a community is threatened with loss of service, a role which calls on their particular knowledge and experience with local conditions. The carrier must apply to the State first, and the State has 120 days in which to act. The carrier must notify the State and affected communities if it appeals the State's decision to the ICC. The State and local governments can argue their case before the ICC. Exit is not automatic. The ICC can require the carrier to continue the service for up to 180 days from the time the appeal is filed in order to allow State or local groups to make alternative arrangements to insure that service is not abandoned. Thus, there will be up to 300 days notice to the State and local communities of the possible abandonment of the service. This should be enough time to make alternative arrangements. And even then, the ICC may have turned the carrier down. Section 24 allows the ICC to provide administrative assistance to local governments in preemption cases.

Fourth, the limited, case-by-case preemption in H.R. 3663 falls far short of the extensive preemption that Congress approved for airlines and railroads in the Airline Deregulation Act, the Staggers Rail Act.

Fifth, the limited, case-by-case preemption in H.R. 3663 does not go as far as most witnesses that appeared before the committee wanted. Industry, obviously, wanted total preemption. They argued for a guaranteed right of exit. The ICC testified in favor of automatic exit. The Transportation Consumer Action Project (representing 15 consumer groups) testified in favor of extensive Federal preemption along the lines of the provision in the Airline Deregulation Act. The Reagan administration (DOT and Justice) recognized the need for Federal preemption. Justice stated:

> Intercity bus transportation is a line of commerce where substantial Federal preemption would be appropriate.

Sixth, the Transportation Consumer Action Project and Congress Watch support the bill.

Seventh, the committee anticipates that other provisions of the bill which encourage market and service experimentation will improve service to small communities and rural areas. The relaxed entry standards in section 6 will make it easier for new companies to get into the business and for existing companies to expand their operation. In entry cases, the ICC must give special consideration to proposals that will improve small community service. The restriction removal section of the bill (section 7) will give existing carriers greater flexibility in serving intermediate and off-route points. Carriers will be given greater flexibility in using their vehicles, for example, they will be allowed to mix regular route and charter passengers. There are streamlined entry provisions (fitness only) for carriers who want to serve communities not regularly served and communities which are losing bus service as a result of the exit provisions of the act. Greater rate flexibility will allow carriers to turn some unprofitable routes into profitable ones, thereby eliminating the need for abandonment. Section 15 of the bill will allow carriers to quickly experiment with new service and, thus, serve the public's need.

Eighth, it is important to recognize that the intercity bus industry is part of a national transportation system and to the degree it is regulated, it should be treated as such. Such a notion was inherent in the recent Supreme Court decision which struck down as a burden on interstate commerce an Iowa law which limited twin trailers in that State, even though all surrounding States permitted the larger trucks to operate. An emphasis on the national transportation system and the need for uniformity must guide Congress in this area as well. Otherwise, transportation service becomes balkanized, with States controlling intrastate routes and rates according to their own standards, for example, refusing to let interstate carriers transport intrastate passengers, and retaining a veto over a carrier's leaving a particular market.

Ninth, the exit provisions must be viewed in light of the historically declining financial position of the bus industry. Many interstate bus companies, including the two largest, operate at discouragingly low-profit levels, making the future of interstate bus service a questionable enterprise. We simply cannot afford to continue the practice of forcing bus companies to provide too much service with larger than necessary vehicles on little-traveled routes.

Tenth, if we are serious about reducing government regulation of American business, then we must stop requiring a carrier to continue operating over certain routes regardless of whether such service is in its business interest. In effect, Congress must put up or shut up.

Eleventh, the less service argument has not been proven true by the intrastate deregulation experience of Florida. On the whole, bus service in Florida has improved, including service to small communities.

Twelfth, currently, bus companies are at the mercy of unrealistically low intrastate fares. The bill provides a procedure for raising intrastate rates to a more reasonable level. This should turn many unprofitable routes to profitable ones, thereby obviating the need for a carrier to abandon the route.

Thirteenth, while restrictive State exit policies may be convenient for some passengers, other riders (normally interstate passengers) end up subsidizing the uneconomical service with higher ticket prices. It is unfair to allow this type of cross-subsidization to continue on a large scale.

Fourteenth, unfortunately, some smaller communities with few passen-

gers may initially lose their bus service, but hopefully new entrants will step in or more efficient bus service would be available only a short distance away.

Fifteenth, we don't expect the exit problems from this bill to be anywhere near as severe as they were under the Airline Deregulation Act. The cost to start up a new bus service is much less than the cost to start up a commuter airline.

Sixteenth, the bill contains a mandatory oversight provision requiring annual oversight until 1985. The committee will be looking for problems, especially with respect to small community service.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. CLAUSEN. I will be happy to yield.

Mr. KAZEN. Mr. Chairman, I appreciate what the gentleman is saying, and since this bill was just printed this morning and I did not know what is in it, I have been trying to decipher this thing.

On the fact that there is no automatic exit, my understanding is that ICC argued before the committee for an automatic exit; am I correct?

Mr. CLAUSEN. The answer to that is a qualified yes. The ICC has been in the process of attempting to implement this administratively, and as a consequence the committee decided on its own that they ought to be holding the hearings. I will yield to the gentleman from Pennsylvania, the ranking minority member on the subcommittee, to expand on the gentleman's question.

Mr. KAZEN. The only reason I asked that question is because I have got a synopsis of the bill before me, and it says,

The limited, case-by-case preemption in H.R. 3663 does not go as far as most witnesses that appeared before the Committee wanted.

A. Industry, obviously, wanted total preemption. They argued for a guaranteed right of exit.

B. The ICC testified in favor of automatic exit.

Mr. CLAUSEN. That is correct.

Mr. KAZEN. So, you know, two strikes against the States when they come up on appeal arguing against exit if the ICC has already made up its mind and has argued and has the position that they favor automatic exit. It creates a doubt in my mind as to whether or not, whether we say it in law or not, whether the ICC will kind of lean toward their position because they have made their position known.

Mr. CLAUSEN. But by the same token, the committee went into depth to make certain that the States and the local government have input to counter any presumption favoring Federal preemption to insure that local interests are in fact protected.

Mr. KAZEN. I thank the gentleman.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. CLAUSEN. I will be happy to yield.

Mr. ANDERSON. Was not the ICC recommendation rejected by our committee. And did not we in a sense, adopt something which will now be the law, and which the ICC then, will have to administer, when carrying out the law?

Mr. CLAUSEN. The gentleman is correct, and I concur in his comment.

In addressing the issue of regulatory reform of motor carriers of passengers, our intent has been to modernize the economic regulation of the intercity bus industry in order to enhance new competition. Our effort has been directed to encourage new entrants into the bus industry, while insuring that the industry does not become the exclusive domain of two giants. We have, therefore, revised the public convenience and necessity requirement of new applicants so that new applications will be granted unless the Interstate Commerce Commission finds on the basis of any evidence presented by any protestant that the transportation to be provided would be inconsistent with the public interest. This revised test should insure more competition and still protect small carriers from being competed out of existence. This new entry test will be somewhat easier for bus operators than for motor common carriers of property under the Motor Carrier Act of 1980. For one thing, the formal need test will be eliminated. Further, the revised public convenience and necessity test is much more analogous to a public interest test. This is consistent with the hearings conducted by the Committee on Public Works and Transportation which demonstrated that certain characteristics of the intercity bus industry are different from the overall motor carrier industry and need to be addressed separately from trucks and in a slightly different manner.

In order to promote a more competitive and efficient intercity bus industry, it is the intention of this bill to prohibit closed door intrastate restrictions by the States which apply to carriers operating under interstate certificates and to remove unnecessarily narrow restrictions from the operating certificates of interstate carriers. If a carrier has interstate authority and wishes to provide intrastate service along the same route, he will be able, under section 6 of this act, to seek ultimate recourse from the Interstate Commerce Commission if a State unreasonably denies his request to provide the service or if that State unreasonably delays making a decision on his request. If the route is strictly interstate, however, and merely requires the Interstate Commerce Commission removing an intermediate interstate point restriction, the restriction removal provisions under section 7 of this bill will apply. Both of these provisions are intended to maximize bus use along particular routes.

Other provisions aimed at maximizing utilization of buses are also included in this bill. For example, carriers could serve regular route and charter passengers in the same vehicle and at the same time. They would also be allowed to transport up to three groups of interstate charter passengers in the same motor vehicle and at the same time.

We are including a zone of rate freedom for carriers of passengers similar to the zone of rate freedom included in the Motor Carrier Act of 1980. Under the provisions of this bill, a carrier could increase its prices by 10 percent and reduce them by 20 percent in any given year without ICC approval. The Commission could increase the zone upward by 10 percent on an annual basis if it found that there was adequate competiton in the bus industry or that the increase was necessary to take into account the impact of inflation. Both single and joint line rate changes could be made through the zone of rate freedom. In addition, the bill formalizes the rule of ratemaking which must be considered by the ICC in proceedings to determine the reasonableness of passenger carrier rate levels. The objective of the rule would be to compel the Commission to authorize revenue levels for passenger carriers that are adequate to allow well-managed carriers to cover their costs and to earn a fair return. It is our hope that through the implementation of the rule of ratemaking, significant capital formation will occur in the intercity bus industry.

Consistent with the rate changes is the eventual withdrawal of antitrust immunity for voting upon or discussion of single line rates by January 1, 1984. Up to the 1984 date, only carriers who participate in the rates would be free to discuss them in rate bureau deliberations.

We have eased the entry requirements for charter operators and have removed the round trip requirement for charter operators who interface with other modal carriers. Likewise, under the restriction removal procedures, the limitation of one-way authority has been removed to promote round trip authority for regular route and special operators.

We have given special emphasis to the impact of intercity bus regulatory reform on small communities who depend on bus transportation as their only link of intercity passenger transportation. Many of us recall the difficulties some small communities have faced during the early years of airline deregulation. Our intention is to minimize similar disruptions from occurring with the modernization of inter-

city bus regulation. We have addressed this problem in two ways. First, we have eased entry requirements for those communities which lose bus service or transportation from other modes. Second, we are instituting exit procedures intended both to encourage new entrants into the market and to try and maintain an adequate service level for our small communities.

We are also giving special consideration to meshing our regulatory reform of the intercity bus industry with other Government programs which have been used over the past decade to encourage both public and private commuter operations. The commuter bus industry is given special status within this bill and certain rights to protest competition from new entrants which may have an adverse impact on their operations. It is presumed that the commuter operations presently being provided are in the public interest. Every reasonable effort should be made to insure that new entrants do not come in to skim off the profitable portions of commuter operations, thus causing greater subsidies by State or local government.

Finally, through this legislation we hope to clarify and simplify the Federal-State relationship with regard to regulation of the intercity bus industry. During the past 30 years, the bus industry has been transformed from one enjoying relative financial prosperity to an industry currently best described as financially weak. Thirty years ago, regular route service was the principal source of revenues for this industry. Today, more than 50 percent of the total intercity bus passenger traffic revenues come from special operations and charter service. Earnings of the intercity bus industry peaked out in 1971. At that time, the operating ratio in the industry was below 90 percent. Today, the operating ratio exceeds 95 percent. And, of course, the higher the operating ratio, the less profitable the activity. Although several factors can be viewed as contributors to the poor performance in operating ratio, a strong argument can be made that a contributing factor has been the current regulatory framework in which they operate.

However, the industry's total reliance on the marketplace would be somewhat paradoxical. Many of the proponents of total deregulation are also strict adherents to the philosophy of State's rights. Carried to its logical extreme, however, total deregulation without total preemption of State law would lead to an unregulated interstate system and a patchwork form of regulation with each of the 50 States having their own regulatory schemes for intrastate traffic. Through this legislation, we have developed what I believe is a very reasonable approach retaining the minimum form of Federal regulation necessary and a minimum level of preemption of State authority in three areas: entry; exit; and rates. The two-tiered approach used in this legislation regarding areas previously controlled by the States still gives the States the first bite of the apple. We strongly believe that this two-tiered approach will lead to more efficient regulation by both the State and the Federal Government. And that efficiency is consistent with our national transportation policy.

It is my belief that the reforms contained in this legislation will introduce the benefits of competition to the intercity bus market and help reduce the cost of intercity bus operations by simplifying the regulatory process. At the same time, the balanced approach contained in H.R. 3663 will insure that bus transportation, which in many cases is the only available, affordable means of intercity transportation for people who are either too young, too old or too poor to drive an automobile, remains in existence. For many years, we as a nation have been able to afford the luxury of running a transportation system at less than its maximum efficiency. But those days are gone. As we prepare for the entry into a new century, we have to make sure that our regulatory systems contribute, rather than hinder, our national objectives. H.R. 3663, the Bus Regulatory Reform Act of 1981, is one part of that effort, I urge my colleagues to join with me in voting for its adoption.

Mr. SHUSTER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I think the basic questions are: What is the point of this legislation? What is the purpose? What is the intent?

The purpose and the intent is to bring about increased competition in the intercity bus industry, and thereby do at least two things; first, increase the service to the consumers of this particular transportation service, and second, to assure a healthy intercity bus industry which is capable of serving the people of this Nation.

It is no secret that the intercity bus industry has not been among the more healthy industries in America. It is no secret that their return on investment has been inadequate, and it has been very difficut in many respects for them to grow and provide the flexibility, the growth necessary to provide the services to the people across America.

So, this legislation does several things aiming in the direction of improving service and providing a healthy industry capable of providing that service. It eases the entry so that more competition can get into this particular business.

Now, we cannot have it both ways. If we say on the one hand that we want to open it up, ease the entry, let more competition come in and compete for the business available, we cannot then turn around and say, however, we are going to make it impossible for the industry to get out of providing services no matter what, even if the demand is not there, regardless of the cost, regardless of the losses. We are going to say on the one hand, "You can compete," but on the other hand, "You have got to stay forever, once you have a route."

That simply does not make sense. That is not equity, and we have got to provide at least in a guarded way for the industry to be able to come forth and present its case and show where it is not in the public interest that a service be provided. It is only in that sense that the so-called exit provision is provided in this legislation.

This is not deregulation. In fact, it is a misnomer that I think perhaps many of us are guilty of when we talk about bus deregulation. This is a far cry from deregulation. In fact, this is a far cry from the extent to which Federal preemption was provided in the airline regulatory reform bill.

□ 1345

My colleagues have already outlined the steps which must be taken by a bus company before it can exit a particular route on which it has provided service. I think the points previously made deserve to be reinforced. A carrier must go to his State and present the case for giving up a route. The carrier then can appeal to the ICC, but the law is very clear that the ICC can require the carrier to continue the service for up to 180 days from the time of the appeal, and indeed the service will be required to be continued if it is shown by a protestant that it is not consistent with the public interest to abandon service, or, that requiring continuing of the transportation would not constitute an unreasonable burden on interstate commerce.

So this is not a blank check. This is not a free ride. There are very clear and compelling requirements which must be met before a bus company can exit a particular route.

Last, Mr. Chairman, I think it is important to focus on the testimony our committee had with regard to the experience in the State of Florida. The State of Florida went far beyond what we are proposing in this legislation today. Indeed, they did enact deregulation of the intrastate bus industry, and the experience there was very positive. The experience there, according to the testimony before our committee—by State legislators, I might add—was that it did improve service, and that it did increase competition. It made it possible, where, for example, large buses were uneconomical and the large bus companies wanted to get out of service, that instead smaller companies were able to move in with smaller

buses and many more buses and provide better service.

So I think the experience in Florida is very significant, and indeed I emphasize that they went far beyond what we are trying to do in this bill today.

This is simply a modest step in the direction of letting the marketplace work; this is not complete deregulation by a far stretch.

I believe we should support this bill if indeed we believe that there should be restraint exercised on the part of Government regulation. If we really believe there should be less Government regulation, then we should support this bill. If, on the other hand, we believe that the heavy hand of the Federal Government should continue to regulate and overregulate, then we should oppose this bill.

If you are against the free market system, if you are against competition working, if you are against freedom in setting rates—at least within reasonable zones of rate-setting—then oppose this bill. But if you want to see the marketplace have a greater chance to work, then support this bill, recognizing that there are very substantial restraints and constraints, particularly in the area of a bus company being able to get out of providing service. In that situation, the case must be made first at the State level and then at the Federal level.

So, Mr. Chairman, I urge support of this legislation.

Mr. ANDERSON. Mr. Chairman, I yield 6 minutes to the gentleman from West Virginia (Mr. RAHALL) for a colloquy.

Mr. RAHALL. Mr. Chairman, when this body first considered airline deregulation, I opposed the initial effort until I thought an effective compromise was reached that took into consideration the effects of airline deregulation on the small communities across our country.

When trucking deregulation approached this body, I had much of the same concerns about its effect on small communities.

So it was, therefore, with a little bit of queasiness that I first approached bus deregulation as it came before our Committee on Public Works and Transportation.

West Virginia and many rural parts of our Nation have indeed been impacted by airline deregulation, trucking deregulation, or loss of train service through elimination of many Amtrak routes, and in many parts of this country roads are very difficult and very expensive, if not downright impossible to build.

So for much of rural America the bus company is the only game in town. For many of our 14,000 small towns across America, this is the only game left in town.

I was initially queasy about this legislation because I felt it might result in diminished, if not zero, bus service at increased rates for rural America. But much of this queasiness has been dispelled because of my further examination of the legislation.

I might also add, Mr. Chairman, that aside from being the only game in town, the bus terminal in many small cities across America is the only place in town to drink coffee and eat food and settle the queasy stomach with coffee and scrambled eggs at all hours of the night and early in the morning.

This queasiness that I felt has subsided because there are in my opinion adequate assurances in this bill that the effects on small rural communities across America will be taken into account before buses are allowed to enter or exit certain markets.

I would like to enter into a colloquy with the distinguished chairman of the Subcommittee on Surface Transportation, a member whom I do commend for the efforts and the diligent work he has put forth into this legislation, and I commend as well the distinguished minority member, the gentleman from Pennsylvania (Mr. SHUSTER).

I would like to ask the subcommittee chairman about the concerns that I have in regard to the small communities. I am concerned and many in this House—and I know it has been expressed during debate on the rule—are concerned about the effects on small communities and the impact this regulatory reform bill will have on bus service to smalltowns and communities.

I know, Mr. Chairman, that the Committee on Public Works and Transportation has had this problem at the forefront of its deliberations, and I would hope the gentleman could tell me and my colleagues from rural America what is included in this bill to address these concerns.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. RAHALL. I am glad to yield to the subcommittee chairman.

Mr. ANDERSON. Mr. Chairman, I can appreciate the gentleman from West Virginia's concern. The committee has addressed those concerns in the bill.

(1) First, the National Transportation Policy directs the ICC to promote a competitive and efficient bus industry in order to maintain and to provide service to small communities.

(2) The bill provides for freer entry into the marketplace (sec. 6) and for experimental (sec. 15) service to communities not having service.

(3) Entry policies have to take into consideration service to small communities. In other words, entry policies are to have a positive effect for small community service, not a negative one.

(4) In removing any restrictions from interstate operating authorities of the carriers, the effect on small communities must be considered.

(5) In any exit proceeding where the ICC has appellate jurisdiction over an exit request, the ICC must look at the national transportation policy, which I have already indicated contains a requirement to provide and to maintain service to small communities.

Additionally, the ICC must look at whether or not it is the last service to a community, whether it is large or small, and whether or not there is reasonable alternative service. This must be calculated into its decisions as to whether or not exit should be permitted. It was put into the bill to give the ICC specific direction from the Congress as to our concern for the service requirements of small towns and for policy guidance in its public interest determinations.

Mr. RAHALL. Under the entry provisions, there is a specific criteria for the ICC to consider the effect of the issuance of a certificate on small communities. Would it not enhance the exit public interest test by including a similar provision in this bill?

Mr. ANDERSON. Mr. Chairman, the test under exit is somewhat tighter. As I said earlier, the ICC as a policy guideline must look at the national transportation policy. This policy specifically has as a goal the providing and maintaining of service to small communities. That particular goal is set forth in section 10101(a)(7)(E). Therefore, rather than include the same type of provision as in entry, we included a more specific provision. The exit policy requires that in exit, the ICC must determine whether the exit being sought is the last bus and, in addition, whether or not there is a reasonable alternate service. This is a stricter test. I think that the question is addressed in a more direct manner in section 16 and therefore is not needed. It is a policy directive already and the ICC will have to examine that concern. In the mandatory oversight hearings mandated by the bill, the committee will scrutinize the positive or negative effects of this legislation on small communities, and if this provision is not carried out properly, we will be even more specific.

Mr. RAHALL. Mr. Chairman, I do have one last question.

Will the "public interest" criterion contained in the exit provisions of H.R. 3663 carry as much weight with the ICC as economic considerations?

Mr. ANDERSON. Mr. Chairman, the intent of this bill is to insure that the public interest test has an equal emphasis with economic considerations and the ICC interpreting otherwise would be a regulatory charade. The act does not create, and the Public Works and Transportation Committee

would not condone, such a charade. In addition, I am certain that will be one of the areas we will be monitoring closely in oversight hearings.

Mr. RAHALL. Mr. Speaker, the State of West Virginia has been hit especially hard over the last couple of years by airline deregulation and recently, the loss of the Cardinal and Shenandoah Amtrak train lines. Since deregulated air service began, West Virginia has experienced a 29-percent decline in daily seat departures, 13-percent decline in daily aircraft departures and a 21-percent decline in daily jet departures. Overall, many small communities in this predominantly rural State have lost air service. This, along with the loss of Amtrak service, has limited the availability of public mass transportation for the people of the State.

With this in mind, I viewed H.R. 3663, the "Bus Regulatory Reform Act of 1981" with a certain amount of trepidation. Of specific concern were the exit provisions of this legislation which preempted the State regulatory agency under certain circumstances. It seemed to me that if the Interstate Commerce Commission, in making an exit decision, did not put enough weight on the public interest test contained in the bill, the bus industry would drop service to many rural areas which by their nature have lower ridership than in more populated regions of the country.

However, after having entered into a colloquy with the distinguished chairman of the Committee on Public Works and Transportation today on this matter, it appears there are reasonable safeguards built into this legislation which protect small communities and rural areas. These safeguards are found in the list of criteria the ICC must consider before acting on an exit application which is the subject of protest by a State. Among these criteria are the national transportation policy of section 10101 of title 49, U.S.C. which makes numerable mentions of the desirability of service to small communities and the criterion that in the case of a petition to discontinue service to any point the Commission must consider whether it is the last service to that point and whether a reasonable alternative is available.

These provisions, which constitute part of the public interest test of this legislation, are most important to the people of West Virginia in light of their limited access to public transportation since airline deregulation and the elimination of Amtrak service. It should be remembered that the people who use intercity bus service the most are the elderly, the very young and the economically disadvantaged. While efforts to free the bus industry from burdensome regulation by placing it within the context of the free market are certainly commendable, it should not be done at the expense of those who depend on this service as their only means of transportation.

I am further assured that service will continue to the small communities of my district through meetings with representatives of Greyhound and Trailways—both of which serve the southern part of West Virginia. According to a letter sent to me by William L. McCracken, senior vice president of Greyhound Lines, Inc., and dated November 17, 1981, "While an absolute guarantee with respect to future service is not possible, we feel very comfortable in assuring you that we have no present plans to change our service nor can we foresee any reason to significantly change that service in the coming years." Among the communities Greyhound serves in my district are Bluefield, Princeton, Beckley, and Huntington with connecting service to Charleston. This service not only allows people to travel within the State, but to points in Kentucky and Virginia.

During a meeting I had with representatives of Trailways yesterday, I was given similar assurances. However, a different situation exists with Trailways. The company has already obtained permission to transfer its lines in southern West Virginia to another carrier with the intention that service continue uninterrupted. The communities now served by Trailways in my district include Huntington, Chapmanville, Logan, Gilbert, Iaeger, Welch, Man, Pineville and Bluefield. Even though service to these communities will be transferred to another carrier, Trailways informs me it will still provide service from Roanoke, Va. to Bluefield, W. Va.

Mr. Chairman, there is one other item which should be addressed at this time. There is a certain degree of discretion given to the ICC in this bill in making exit, entry and rate determinations. As in most laws, while Congress can explain its intent in passing a bill, it is the regulatory body which implements it under its own interpretation. For this reason, while it is the intent of Congress that bus service to small communities be protected under this bill, it is important to know the opinion of those at the ICC who will eventually implement the Act. Fortunately, my fears over the loss of service to these communities have been further put to rest by the remarks of ICC Chairman Reese H. Taylor, Jr., before the Annual Meeting of the American Bus Association on October 28, 1981. According to Chairman Taylor, "Another area of concern should be the continuation of scheduled, regular route service to small or rural communities. We simply must not allow an energy efficient alternative to the private car to vanish from our small or rural communities, particularly when local air and rail passenger service is disappearing to the extent that intercity bus service is the only remaining link with the outside world in many areas. Consequently, reform legislation must contemplate the delicate balancing necessary to preserve scheduled service to small or rural communities."

It would appear Chairman Taylor had southern West Virginia in mind when making that statement, and I commend him for taking such a position.

Mr. SHUSTER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Pennsylvania (Mr. CLINGER), a member of the committee.

Mr. CLINGER. Mr. Chairman, I thank the gentleman for yielding this time to me for purposes of a colloquy.

I have been impressed by the statements that have been made here that reemphasize the protections that have been built into this bill for rural and small communities. In our close review of these, we find there are many protections, but I think, at the risk of being repetitious, it is important to stress that we have or the committee has been careful to protect those concerns.

I know that some communities have expressed concerns because perhaps unfortunately, with airline deregulation, they have found themselves with less service. I think there are real differences between this bill and the airline deregulation bill.

So I would like to address a few questions to the gentleman from Pennsylvania (Mr. SHUSTER), the ranking minority member. Last year, in the trucking regulatory reform bill, I, along with others, was successful in instituting provisions calling for a study, which, by the way, is due September 1 of next year. In that bill and in this legislation I shared the concern of the gentleman from Pennsylvania and others who represent rural areas that regulatory reform does not mean mass abandonment of transportation to and from small towns.

In this legislation it is my understanding we have safeguards which have been mentioned here and which have been inserted directly into the statute to address this concern.

Mr. Chairman, I would ask the gentleman if he would please describe some of those provisions to us.

Mr. SHUSTER. Mr. Chairman, if the gentleman will yield, I would be happy to do that, and I would say to the gentleman that this issue is so important that it does bear emphasis and repeating, in my judgment.

In the national transportation policy it is explicitly—not implicitly, but explicitly—stated that the ICC have as a goal providing and maintaining service to small communities; also that the entry, exit, and regulation removal provisions thereby direct the ICC to

consider the effect on small communities.

In regard to H.R. 3663, it provides for a very easy entry test for new service, that is, expanded service to a community that is not regularly served by a motor carrier or where such service is being dropped.

Also section 15 provides that the Commission may grant emergency temporary authority for 210 days, which is longer than the existing law, to a carrier or passengers to a town which is not presently served.

In regard to exit, the bill specifically requires that the ICC shall consider whether a community is losing its last bus service to that particular area.

Mr. Chairman, I believe these specific sections of the legislation very substantially address the concerns expressed by my friend and colleague, the gentleman from Pennsylvania (Mr. CLINGER).

□ 1400

Mr. CLINGER. I appreciate that explanation and agree with the gentleman that these safeguards should be enough.

I would point out that we will in the Public Works and Transportation Committee retain oversight of this bill in the future. I think our record on oversight with regard to truck deregulation and airline deregulation has been exemplary, and I would anticipate if problems do arise with any of these provisions as they relate to small communities, and we do see a diminution of service to the small communities, that through the oversight process, which as I say, we have been diligent at, we would be able to address those problems.

I appreciate the gentleman yielding and thank the gentleman.

Mr. SHUSTER. I thank the gentleman.

Mr. ANDERSON. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Chairman, I would like to take this opportunity to engage in a brief discussion with the distinguished chairman of the Subcommittee on Surface Transportation, the gentleman from California, on H.R. 3663, the Bus Regulatory Reform Act.

In view of some of the problems that were brought to the Public Works Committee's attention, is it not the intent of the House that safety enforcement be increased as embodied in sections 22 and 23 so that the ICC will be more active in making sure that unsafe buses do not operate on our Nation's highways?

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. ALBOSTA. I yield to the gentleman.

Mr. ANDERSON. Yes; that is the intent of this legislation that we are considering today.

Mr. ALBOSTA. I thank the gentleman and want to commend him for his fine leadership on this important bill.

I also would like to thank the chairman of the full Committee on Public Works and Transportation.

Mr. ANDERSON. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. ECKART).

Mr. ECKART. Mr. Chairman, I would first like to commend the committee for bringing this legislation to the floor because I am fully aware of the problem that needs to be addressed by some type of legislation.

However, unlike a number of previous speakers who have stated that this bill is balanced in its approach, I would like to draw several reasons to the Members' attention why I believe that, in fact, this bill bears a little more close scrutiny and perhaps a no vote.

My first reason is that I am deeply concerned about the provisions of the legislation which would allow "cream-skimming" to occur over certain transit lines, particularly as it may relate to municipal transit systems. Under this bill charters could operate and remove from the municipal transit systems those most lucrative public routes financed by public taxpayer dollars which really provide the main sustenance for publicly supported mass transit systems in our urban areas. By allowing private companies to come in and to remove the most lucrative of the routes of the public transit system we may, in fact, force on local transit systems tax increases to help make up lost revenue. Coupled with severe Federal budget cuts for urban mass transit systems I am afraid that this bill, if passed, may make it more difficult for public transportation to survive.

I would also draw to the attention of Members, as my second reason, page 38 of the bill. I am deeply concerned, as I have heard many Members speak about the need of getting Government off the backs of the people. But I would draw Members' attention to the language of the bill which says:

> The Commission shall prescribe any rate, rule, or practice applicable to transportation provided entirely in one State.

I submit to the members of the committee today that this is not getting Government off the backs of the people but, in fact, shifts the focus from the locally elected representatives, from the State capital and local public service commissions, to Washington. A shift which runs counter to the philosophy of local control.

I wonder which one of us is prepared to tell the township trustee or the city solicitor that instead of having to go to the State capital to press their cause they now will have to come to Washington to plead their case.

The next reason I would draw to the Members' attention is the impact on America of airline deregulation, truck deregulation, and cutbacks in Amtrak and Conrail which only are going to further exacerbate a difficult transportation system crisis that we already face.

I would draw the Members' attention to pages 58 and 59 of the committee report which shows dramatic fare increases that will result with the passage of this legislation.

Only the biggest will survive as a result of the adoption of this bill. So far all we have talked about is the impact of this bill on bus companies, but who is concerned about the consumer or those who use public transportation. If we really care about reasonable cost public transportation for all people then I urge a no vote.

Mr. SHUSTER. Mr. Chairman, I yield 3 minutes to the gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to H.R. 3663. I think this change is too serious to proceed without giving the Congress an opportunity to study. I understand that this report was only printed this morning. The subcommittee reported the bill on Monday; the full committee reported the bill on Tuesday; the Rules Committee reported the bill on Wednesday; and here it is Thursday and we have it up before us for consideration.

I have grave reservations as to whether this whole procedure is going to be good for our country. I think this Congress would better serve our Nation by taking time for the Members to have a chance to study the report and be aware of just what we are doing.

I come from rural America, 62 counties in my district, and 307 towns.

I see that the bill will permit the Interstate Commerce Commission to preempt State decisions on rates and rules. This is an unwise move in the wrong direction. The Nebraska Public Service Commission, which regulates bus transportation in my State, wrote to the Public Works and Transportation Committee when it considered this bill. The Chairman of the Commission stated that this provision allowing ICC preemption would restrict citizen imput on rate and route changes and would not be in the best interest of the public. The State regulatory commissions have the best interest of the traveling public in mind, he wrote, and the decisions of the Public Service Commission are subject to review by the Supreme Court of Nebraska. The Chairman further told the Committee that his Commission had never turned down a rate increase proposed by a busline. He knows that bus companies need to make a profit if they are to continue to serve our area. In addition, he pointed out that this

legislation would create an imbalance between State and Federal regulatory interests.

If airline deregulation is the model for this legislation, then rural Nebraska has nothing to hope for in terms of adequate and reasonably priced transportation.

Already, certain bus lines that have served my State in the past are abandoning service to small communities. In most cases, these bus companies were the sole source of public transportation.

One bus line has abandoned service from Ogallala, Nebr., though Lodgepole, Chappell, Big Springs, and Kimball, to Cheyenne, Wyo. Even though they have already stopped providing service, a public hearing will not be held on this until December of this year. This action is against the law. I make this point to show how eager these bus companies are to abandon service to small communities and to show how inadequate the so-called protection for small communities provisions in this bill will be if they ever become law.

Too many people in this Nation, especially in rural areas that are isolated from big population centers and small towns between major population centers, rely on a well-regulated bus transportation system. Most of these people, by the way, are senior citizens living on fixed incomes and others unable to pay the high cost of airline travel.

Mr. Chairman, let us not leave the people of rural America in the lurch with regard to transportation I urge defeat of this ill-conceived, hastily considered legislation.

Mr. KAZEN. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentlewoman for yielding. I want to associate myself with the gentlewoman's remarks. This is the reason that I asked for a vote on the rule and a vote on going into the committee, to give us enough time to see what provisions this bill makes, for us to be able to study it, and to intelligently vote on it.

This is one of the reasons that I am inclined to vote against this bill, simply because I do not know what is in it and how it is going to affect my rural cities.

I agree with the gentlewoman. This bill should have been slowed down a little bit to allow us an opportunity to thoroughly study it and possibly amend it. This way we do not have that opportunity.

Mrs. SMITH of Nebraska. I thank the gentleman. I agree with the gentleman's assessment that we should have delayed this action.

We were assured that rail deregulation was all taken care of with full protection for communities that already had air service. But it has not worked out that way. We have had no end of trouble. We have had hearings. We have had hearings on subsidies. We have small airlines that have gone out of business, they have gone broke. We have had delays in getting answers. We have much poorer service than we did before.

I am now very much afraid that we will have less and less bus service. We do not have air service and we do not have Amtrak. We cannot leave rural America without service.

We have an isolated population. It is composed largely of older people. They depend on a well-regulated bus service.

I think there is real danger to rural America with this procedure, in spite of the efforts that have been made by the committee to take care of what they see as problems. I think we should give it very close scrutiny and, since it is going to be voted on today, I urge a "no" vote.

● Mr. FARY. Mr. Chairman, I request permission to revise and extend my remarks.

Mr. Chairman, I rise in support of H.R. 3663, the Bus Regulatory Reform Act of 1981. This worthwhile legislation has been brought to the floor after many hearings and much work by the distinguished chairman of the Surface Transportation Subcommittee, Congressman GLENN ANDERSON, and the chairman of the full Public Works and Transportation Committee, Congressman JIM HOWARD.

The deregulation of the intercity bus passenger system is the final step in the deregulation of our transportation system in this country. Since coming to Congress in 1975, I have had the privilege of serving on the Public Works Committee. Our committee has passed bills that deregulated the airline and trucking industries. These laws have helped these industries by lessening burdensome Government regulations and allowed them to operate in a competitive and healthy environment. Less regulation has spawned new and improved services for the consumer in both industries.

In addition, H.R. 3663, addresses a pressing problem that is facing the trucking industry. At the present time American trucking companies are being discriminated against in their operations in Canada. They are not granted the same operating authority rights that Canadian trucking firms enjoy. A new subsection in H.R. 3663 will grant the Interstate Commerce Commission the discretion to deny an application of a Mexican or Canadian company if the Commission determines that Mexico or Canada does not treat American companies at least as favorably as it treats its own companies. This provision is needed and fair, since Canadian firms have the privilege of operating unhindered in the United States.●

● Mr. ALBOSTA. Mr. Chairman, as a Member from the State of Michigan, I have become increasingly concerned about the problem that American truckers are facing in gaining operating rights in Canada as well as in Mexico. These two countries are applying much more stringent tests than the United States applies in granting operating authority to foreign owned or controlled trucking companies.

Therefore I am pleased that H.R. 3663 contains language that is intended to deal with motor common carriers domiciled in Canada or Mexico, or which are owned or controlled by persons domiciled in these two countries, which seek operating authority from the ICC. The language in H.R. 3663 makes it very clear that the Congress believes reciprocity is a vital factor to be considered when the ICC makes a decision on granting operating authority to a Mexican or Canadian owned or controlled trucking company.

While the Commission has the authority under existing statute to consider the issue of reciprocity in granting operating authority, I strongly believe that the language in H.R. 3663 will encourage the Commission to seriously consider the issue of reciprocity when granting authority to foreign trucking companies. Everyone should have to play by the same rules.

As a member of both the Subcommittee on Surface Transportation and the full Public Works and Transportation Committee I intend to closely follow this legislation and the ICC's actions in the area of considering reciprocity. This is a matter of equity that needs to be resolved.●

● Mr. ROBERTS of South Dakota. Mr. Speaker, I have severe reservations about the deregulation of the intercity bus industry. I agree that the industry has been overregulated and I support easing this problem. Complete deregulation though is detrimental to the well-being of rural America.

H.R. 3663 permits the Interstate Commerce Commission to preempt State decisions on rates, rules, and routes. This is an unwise move that reduces local control of a local matter. The State regulatory commissions have the best interests of the traveling public in mind and can better determine the local needs, especially in rural areas.

If airline deregulation is the model for this legislation, then rural South Dakota has nothing to hope for in terms of adequate and reasonably priced transportation. In many cases bus companies are the sole source of public transportation.

Too many people in this Nation, especially in rural areas that are isolated from big population centers and small towns between major urban centers,

rely on a well-regulated bus transportation system. Most of these people, by the way, are senior citizens living on fixed incomes and others unable to pay the high cost of airline travel.

Mr. Speaker, we should not leave the people of rural America in the lurch with regard to transportation, and I feel that this bill, H.R. 3663, is a hastily considered proposition. South Dakota has areas of isolated population, composed largely of older people. Those South Dakotans depend on a well-regulated intrastate bus service, and H.R. 3663 threatens this service.

I think there is a real danger to rural America with this bill, in spite of the efforts that have been made by the committee to take care of what they see as problems. These problems need further scrutiny, and with this in mind, I oppose H.R. 3663.●

● Mr. FRENZEL. Mr. Chairman, I have no objection to the general intent of this bill. I believe in deregulation and I believe that bus companies should be allowed to be liberated from unprofitable routes.

However, I am concerned about section 27, the labor protection section, which seems to me to be more sweeping in coverage and longer in duration than is necessary. I am troubled by a bill which deregulates in one direction and reregulates in another.

Therefore, even though I like the general idea of this bill, I shall vote against it because of section 27.●

Mr. SHUSTER. Mr. Chairman, I yield myself as much time as I might consume.

Mr. Chairman, I simply would make the point that this legislation is compromise legislation which has the support of the various groups which are interested legitimately in the bus industry and bus service to the American people. I would emphasize that this legislation not only is supported by the intercity bus industry, large and small, but it is supported by labor, and most significantly it is supported by consumer groups. In fact, the Transportation Consumer Action Project, which represents 15 different consumer groups, have all come out in support of this legislation.

More interestingly, those consumer groups say that they believe that this bill will improve service to small communities.

Beyond the opinion, the judgment of those consumer groups that this legislation will improve service to small communities, we have the empirical experience. We have the evidence from the State of Florida where as a result of regulatory reform, in fact deregulation that goes far beyond the modest efforts in this bill, in Florida they actually did have increased service, flexibility, minibuses, to large and small communities alike. It worked well and it provided better intercity bus service.

So for all of those reasons, although I would be quick to add no particular group gets everything it wants in this legislation, these various groups have come forward to support this legislation because, on balance, it is a good compromise which does provide for increased competition and flexibility in this important industry while at the same time providing substantial safeguards, particularly for the small communities involved.

I have no further requests for time, Mr. Chairman, and I yield back the balance of my time.

Mr. ANDERSON. Mr. Chairman, I yield myself such time as I may consume.

I would just like to comment on a couple of remarks made a moment ago. I want to point out that our committee was very concerned about the same points that were raised, and indeed, have properly addressed them in the bill which is before us.

The committee was very careful and we said that the ICC must specifically look at the impact on commuter operations in considering entry applications and we also directed, the Commission to deny entry if it results in cream-skimming or cherry-picking that will result in a substantial reduction of any carrier's operation, whether public or private, contrary to the public interest.

We tried to be very specific. We said in here:

For purposes of paragraphs (1) and (2) of this subsection, transportation to be authorized by issuance of a certificate under this subsection shall not be consistent with the public interest if the Commission finds, on the basis of evidence presented by persons objecting to such issuance, that such issuance would impair, contrary to the public interest, the ability of any other motor common carrier of passengers to provide a substantial portion of the regular-route passenger service which such carrier provides.

We have tried to be specific throughout the bill in protecting commuter operations because we are just as concerned as anybody about this, and I might say that it was a particular concern of mine during the drafting process.

Mr. ECKART. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Ohio.

Mr. ECKART. I appreciate the gentleman yielding.

The point I wish to make and would like to make as an inquiry to the gentleman is simply this: Under the current provisions of the law, a municipality that feels they may have been adversely affected by a determination can do so at their State level. Now that requirement is for them to come to Washington, to the Interstate Commerce Commission, to have a hearing here, far away from the affected area, far away from the municipality that is directly affected and, in fact, may complicate the rulemaking process.

Mr. ANDERSON. The gentleman is incorrect. The State acts first. A carrier goes before its State commission, and that commission has the authority. If an interstate route matter is in question, a carrier may appeal a State decision, on a case-by-case basis to the ICC. But if a State decision pertains only to intrastate transportation, the State has the final authority. The ICC may only be involved in those matters that are interstate in nature, including intrastate segments of interstate routes.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will now read the substitute committee amendment recommended by the Committee on Public Works and Transportation, now printed in the reported bill as an original bill for purposes of amendment.

The Clerk read as follows:

H.R. 3663

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

That this Act may be cited as the "Bus Regulatory Reform Act of 1981".

PURPOSE OF THE ACT

SEC. 2. This Act is part of the continuing effort by Congress to reduce unnecessary and burdensome Government regulation.

CONGRESSIONAL FINDINGS

SEC. 3. The Congress hereby finds that a safe, sound, competitive, and fuel-efficient motor bus system contributes to the maintenance of a strong national economy and a strong national defense and is vital to the transportation needs of the elderly, handicapped, and the poor; that the statutes governing Federal regulation of the motor bus industry are outdated and must be revised to reflect the future transportation needs and realities; that historically the existing Federal and State regulatory structure has tended in certain circumstances to inhibit market entry, carrier growth, maximum utilization of equipment and energy resources, and opportunities for minorities and others to enter the motor bus industry; that State regulation of the motor bus industry has tended, in certain circumstances, to unreasonably burden interstate commerce; that overly protective regulation has resulted in operating inefficiencies in the motor bus industry; that in order to reduce the uncertainty felt by the Nation's motor bus industry and those persons and communities that rely on its services, the Interstate Commerce Commission should be given explicit direction for regulation of the motor bus industry and well-defined limits within which it may act pursuant to congressional policy; that the Interstate Commerce Commission should not attempt to go beyond the powers vested in it by subtitle IV of title 49 of the United States Code, and other legislation enacted by Congress; and that legislative and resulting changes should be implemented with the least amount of disruption to the transportation system consistent with the scope of the reforms enacted.

CONGRESSIONAL OVERSIGHT

SEC. 4. The appropriate authorizing committees of Congress shall conduct periodic oversight hearings on the effects of this legislation, not less than annually until July 1, 1985, to ensure that this Act is being implemented according to congressional intent and purpose.

NATIONAL TRANSPORTATION POLICY

SEC. 5. Subsection (a) of section 10101 of title 49, United States Code, is amended by striking out "and in regulating those modes" and all that follows through the period at the end of such subsection and inserting in lieu thereof the following: "and—

"(1) in regulating those modes—

"(A) to recognize and preserve the inherent advantage of each mode of transportation;

"(B) to promote safe, adequate, economical, and efficient transportation;

"(C) to encourage sound economic conditions in transportation, including sound economic conditions among carriers;

"(D) to encourage the establishment and maintenance of reasonable rates for transportation without unreasonable discrimination or unfair or destructive competitive practices;

"(E) to cooperate with each State and the officials of each State on transportation matters; and

"(F) to encourage fair wages and working conditions in the transportation industry;

"(2) in regulating transportation by motor carrier, to promote competitive and efficient transportation services in order to (A) meet the needs of shippers, receivers, passengers, and consumers; (B) allow a variety of quality and price options to meet changing market demands and the diverse requirements of the shipping and traveling public; (C) allow the most productive use of equipment and energy resources; (D) enable efficient and well-managed carriers to earn adequate profits, attract capital, and maintain fair wages and working conditions; (E) provide and maintain service to small communities and small shippers; (F) improve and maintain a sound, safe, and competitive privately owned motor carrier system; (G) promote greater participation by minorities in the motor carrier system; and (H) promote intermodal transportation; and

"(3) in regulating transportation by motor carrier of passengers (A) to cooperate with the States on transportation matters for the purpose of encouraging the States to exercise intrastate regulatory jurisdiction in accordance with the objectives of this subtitle; (B) to provide Federal procedures which ensure that intrastate regulation is exercised in accordance with this subtitle; and (C) to ensure that Federal reform initiatives enacted by the Bus Regulatory Reform Act of 1981 are not nullified by State regulatory actions.".

MOTOR CARRIER OF PASSENGERS ENTRY POLICY

SEC. 6. (a) Subsection (a) of section 10922 of title 49, United States Code, is amended (1) by striking out "II or", and (2) by striking out "motor common carrier of passengers or water common carrier, respectively," and inserting in lieu thereof "water common carrier".

(b)(1) Section 10922 of title 49, United States Code, is amended by redesignating subsections (c), (d), (e), (f), (g), (h), (i), and (j) (and any references thereto) as subsections (d), (e), (f), (g), (h), (i), (j), and (k), respectively, and by inserting after subsection (b) the following new subsection:

"(c)(1) Except as provided in this section, the Commission shall issue a certificate to a person authorizing that person to provide transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers if the Commission finds that the person is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission, unless the Commission finds, on the basis of evidence presented by any person objecting to the issuance of the certificate, that the transportation to be authorized by issuance of the certificate is not consistent with the public interest.

"(2)(A) Except as provided in this section, the Commission shall issue a certificate to a person authorizing that person to provide regular-route transportation entirely in one State as a motor common carrier of passengers if the Commission finds that—

"(i) the person is fit, willing, and able to provide the intrastate transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission;

"(ii) such intrastate transportation is to be provided on a route over which the carrier has authority under this section to provide interstate transportation of passengers; and

"(iii) the person has requested the department, agency, or instrumentality of such State having jurisdiction over the granting of such authority for permission to provide such intrastate transportation and the request has been denied (in whole or in part) or such department, agency, or instrumentality has not acted finally (in whole or in part) on the request by the 150th day after the person made the request, in the case of a request made in the 2-year period beginning on the effective date of the Bus Regulatory Reform Act of 1981, or by the 120th day after the person made the request, in the case of a request made after the end of such 2-year period;

unless the Commission finds, on the basis of evidence presented by any person (including any department, agency, or instrumentality of a State or local government) objecting to the issuance of the certificate, that the intrastate transportation to be authorized by issuance of the certificate is not consistent with the public interest or that such denial or failure to act is not an unreasonable burden on interstate commerce.

"(B) Subject to subparagraph (D) of this paragraph, any intrastate transportation authorized by issuance of a certificate under this paragraph shall be deemed to be transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this subtitle. Upon issuance of such certificate, the carrier shall establish initial rates, rules, and practices applicable to such transportation to the same extent and in the same manner as a motor common carrier of passengers providing transportation subject to the jurisdiction of the Commission under such subchapter establishes rates, rules, and practices applicable to such interstate transportation. Any such initial rate, rule, or practice shall be subject to the provisions of chapter 107 of this subtitle as if such rate, rule, or practice were related to interstate transportation.

"(C) Not later than 30 days after the date on which a motor common carrier of passengers first begins providing transportation entirely in one State pursuant to a certificate issued under this paragraph, the carrier shall take all action necessary to establish under the laws of such State rates, rules, and practices applicable to such transportation.

"(D) Transportation entirely in one State authorized by issuance of a certificate under this paragraph shall remain subject to the jurisdiction of the Commission, and initial rates, rules, and practices applicable to such transportation established under subparagraph (B) of this paragraph shall remain in effect, until permanent rates, rules, and practices applicable to such transportation are established under the laws of such State.

"(E) The Commission shall take final action upon an application filed under this subsection for authority to provide regular-route transportation entirely in one State not later than 90 days after the date the application is filed with the Commission.

"(F) This paragraph shall not apply to any regular-route transportation of passengers provided entirely in one State which is in the nature of a special operation.

"(G) Notwithstanding subparagraph (D) of this paragraph, intrastate transportation authorized under this paragraph may be suspended or revoked by the Commission under section 10925 of this title.

"(3) For purposes of paragraphs (1) and (2) of this subsection, transportation to be authorized by issuance of a certificate under this subsection shall not be consistent with the public interest if the Commission finds, on the basis of evidence presented by persons objecting to such issuance, that such issuance would impair, contrary to the public interest, the ability of any other motor common carrier of passengers to provide a substantial portion of the regular-route passenger service which such carrier provides. Diversion of revenue or traffic from a motor common carrier of passengers in and of itself shall not be sufficient to support a finding that issuance of the certificate would impair, contrary to the public interest, the ability of the carrier to provide a substantial portion of the regular-route passenger service which the carrier provides.

"(4) In making any findings relating to public interest under paragraphs (1) and (2) of this subsection, the Commission shall consider, to the extent applicable, at least the following:

"(A) the transportation policy of section 10101(a) of this title;

"(B) the effect of issuance of the certificate on motor carrier of passenger service to small communities;

"(C) in the case of a certificate for authority to provide special or charter transportation, whether any party to the proceeding with respect to issuance of the certificate is receiving transportation-related financial assistance from any governmental department, agency, or instrumentality;

"(D) the cumulative effect on any other motor common carrier of passengers if the Commission were to approve (i) the application for the certificate, and (ii) any other pending applications for authority to provide transportation as motor common carriers of passengers; and

"(E) any significant adverse effect of issuance of the certificate on commuter bus operations.

"(5) The provisions of paragraph (1) of this subsection relating to the Commission finding that transportation to be authorized by issuance of a certificate is not consistent with the public interest shall not apply to any application under this subsection for authority to provide—

"(A) interstate transportation service to any community not regularly served by a

motor common carrier of passengers under this section;

"(B) interstate transportation service which will be a direct substitute for discontinued rail or commercial-air passenger service to a community if such discontinuance results in such community not having any rail and commercial-air passenger service and if such application is filed within 120 days after such discontinuance becomes effective; and

"(C) interstate transportation service to any community with respect to which the only motor common carrier of passengers providing interstate transportation service to such community applies for authority to discontinue providing such interstate service under section 10925(b) of this subchapter or applies for permission to reduce its level of intrastate service to such community under section 10935 of this subchapter.

"(6) The Commission may not make any finding under paragraphs (1) and (2) of this subsection which is based upon general findings developed in rulemaking proceedings.

"(7) The requirement that persons issued certificates under this subsection be fit, willing, and able includes, among other things, financial fitness, operational fitness, and safety fitness.

"(8) No motor common carrier of passengers may protest an application to provide transportation filed under this subsection unless—

"(A)(i) it possesses authority to handle, in whole or in part, the traffic for which authority is applied;

"(ii) it is willing and able to provide service that meets the reasonable needs of the traveling public; and

"(iii) it has performed service within the scope of the application during the previous 12-month period or has, actively in good faith, solicited service within the scope of the application during such period;

"(B) it has pending before the Commission an application filed prior in time to the application being considered for substantially the same traffic; or

"(C) the Commission grants leave to intervene upon a showing of other interests that are not contrary to the transportation policy set forth in section 10101(a) of this title.

"(9) No motor contract carrier of passengers may protest an application to provide transportation filed under this subsection.

"(10) For purposes of this section, authority under this subsection to provide special or charter transportation of passengers by motor vehicle includes authority to provide such transportation as round-trip service and as one-way service if such one-way service is provided as part of a round-trip movement involving the same passengers and air, rail, or water transportation or any combination of air, rail, or water transportation.".

(2) The Interstate Commerce Commission may preempt the laws of a State and issue a certificate in accordance with the requirements of subsection (c)(2) of section 10922 of title 49, United States Code, as amended by paragraph (1) of this subsection, authorizing a person to provide regular-route transportation entirely in such State (A) if a request was made by such person to the department, agency, or instrumentality of such State having jurisdiction over the granting of such authority for permission to provide such transportation before the effective date of this Act, and (B)(i) if such department, agency, or instrumentality denied (in whole or in part) such request on or after January 1, 1981, or (ii) if such department, agency, or instrumentality does not act finally (in whole or in part) on such request by the one hundred and twentieth day after such effective date.

(c) Paragraph (4) of subsection (e) of section 10922 of title 49, United States Code, as redesignated by subsection (b)(1) of this section, is amended to read as follows:

"(4) Upon request of a motor common carrier of passengers, a certificate of such carrier to transport passengers—

"(A) shall include authority to transport newspapers, baggage of passengers, or mail in the same motor vehicle with the passengers;

"(B) shall include authority to transport express packages unless the Commission finds, on the basis of evidence presented by any person objecting, that the granting of such authority is not consistent with the public interest; and

"(C) may include authority to transport baggage of passengers in a separate motor vehicle.".

(d) Section 10922 of title 49, United States Code, is amended by adding at the end thereof the following new subsection:

"(l)(1) If, in the case of an application by a person from a political subdivision of a foreign country for issuance under this section of a certificate to provide transportation as a motor common carrier, the Commission finds that, under the policies of such political subdivision or of such country, persons from the United States are not treated as favorably as persons from such political subdivision or country, the Commission, in its discretion, may elect not to issue the certificate.

"(2) No certificate to provide transportation as a motor common carrier shall be issued under this section to any person from a political subdivision of a foreign country unless such political subdivision or such country grants authority to persons from the United States to provide transportation of passengers by motor vehicle for compensation in such political subdivision or country.

"(3) This subsection shall only apply to foreign persons who are from countries contiguous to the United States.".

(e)(1) Section 10102 of title 49, United States Code, is amended by redesignating paragraphs (5) through (29), and any references thereto, as paragraphs (6) through (30), respectively, and by inserting after paragraph (4) the following new paragraph:

"(5) 'commuter bus operations' means short-haul scheduled passenger service provided by motor vehicle in metropolitan and suburban areas, whether within or across the geographical boundaries of a State, and utilized primarily by passengers using reduced fare, multiple-ride, or commutation tickets during morning and evening peak period operations.".

(2) Section 11711(f) of such title is amended by striking out "10102(10)(A)" and inserting in lieu thereof "10102(11)(A)".

(3) Section 250(a)(1) of the Internal Revenue Code of 1954 is amended by striking out "10102(18)" and inserting in lieu thereof "10102(19)".

(4)(A) Section 5201(5) of title 39, United States Code, is amended by striking out "10102(12)" and inserting in lieu thereof "10102(13)".

(B) Section 5201(6) of title 39, United States Code, is amended by striking out "10102(7)" and inserting in lieu thereof "10102(8) of title 49".

(f) Section 10322(a) of title 49, United States Code, is amended by striking out "10922(h)(2)" and inserting in lieu thereof "10922(i)(3)" and by adding at the end thereof the following new sentence: "In addition, the deadlines set forth in this section do not apply to any application filed under section 10922(c) of this subtitle for authority to provide regular-route transportation entirely in one State as a motor common carrier of passengers.".

(g) Section 10521(b) of title 49, United States Code, is amended—

(1) in clause (1) by inserting "except as provided in sections 10922(c)(2), 10935, and 11501(e) of this title," before "affect";

(2) in clause (2) by inserting "except as provided in sections 10922(c)(2) and 11501(e)," before "authorize"; and

(3) in clause (3) by inserting "except as provided in section 10922(c)(2) of this title," before "allow".

RESTRICTION REMOVAL

SEC. 7. Section 10922(i) of title 49, United States Code, as redesignated by section 6(b)(1) of this Act, is amended—

(1) by redesignating paragraph (2) as paragraph (3) and by inserting after paragraph (1) the following new paragraph:

"(2) Not later than 180 days after the effective date of this paragraph, the Commission shall implement, by regulation, procedures to process expeditiously any application of a motor carrier of passengers who holds a certificate issued under this section (other than subsections (c)(5)(A) and (c)(5)(B)) to provide interstate transportation and who seeks to remove any operating restriction imposed by the Commission on the certificate in order to—

"(A) authorize transportation or service to intermediate points on any route covered by the certificate;

"(B) reasonably broaden regular-route service covered by the certificate to off-route points;

"(C) provide under the certificate round-trip authority where only one-way authority exists; or

"(D) authorize special and charter transportation from all points in a political subdivision of a State in any case in which special and charter transportation authority is limited by the certificate to one or more points of origin in such political subdivision.";

(2) by striking out "paragraph (1)(B)" each place it appears in paragraph (3), as redesignated by clause (1) of this subsection, and inserting in lieu thereof "paragraphs (1)(B) and (2)"; and

(3) by adding at the end of paragraph (3), as so redesignated, the following new sentence: "In granting or denying applications under paragraph (2) of this subsection, the Commission shall consider any significant adverse effect of the proposed restriction removal on commuter bus operations.".

MIXING OF REGULAR AND CHARTER PASSENGERS

SEC. 8. Subsection (j) of section 10922 of title 49, United States Code, as redesignated by section 6(b)(1) of this Act, is amended by redesignating clauses (1) and (2) as clauses (A) and (B), respectively, by inserting "(1)" before "A person holding", and by adding at the end of such subsection the following new paragraphs:

"(2)(A) Subject to the provisions of this paragraph, a motor common carrier of passengers who has authority under this section to provide special or charter transportation of passengers and to provide regular-route transportation of passengers may transport the special or charter passengers in the same motor vehicle with regular-route passengers.

"(B) Subparagraph (A) of this paragraph shall only apply to transportation of passengers entirely in a State if the motor common carrier of passengers has authority under the laws of such State to provide within such State special or charter transportation of passengers and regular-route transportation of passengers and if the laws of such State and the certificate, permit, or other authority under which such carrier provides intrastate transportation in such State authorizes such carrier to transport special or charter passengers in the same motor vehicle with regular-route passengers.

"(C) Special or charter transportation of passengers may only be provided under subparagraph (A) of this paragraph in the same motor vehicle as regular-route transportation of passengers if the mixing of such passengers does not interfere with the obligation of the carrier to comply with section 11101 of this subtitle.

"(3) Subject to such regulations as the Commission may issue, a person who has authority under this section to provide charter transportation of passengers may transport not to exceed three groups of charter passengers in the same motor vehicle at the same time.".

RULE OF RATEMAKING

SEC. 9. (a) Section 10701(e) of title 49, United States Code, is amended by striking out "of property" each place it appears.

(b) Section 10704(b)(2)(B) of title 49, United States Code, is amended by striking out "of property".

RATE BUREAUS

SEC. 10. (a) Paragraphs (1) and (2) of section 10706(b) of title 49, United States Code, are amended by striking out "of property" each place it appears.

(b)(1) Section 10706(b)(3)(B)(i) of title 49, United States Code, is amended by striking out "and (D)" and inserting in lieu thereof ", (D), (E), and (F)".

(2) Section 10706(b)(3)(B)(iii) of such title is amended by striking out "of property".

(3) Section 10706(b)(3)(D) of such title is amended by inserting after the first sentence the following new sentence: "This subparagraph shall not apply to any single-line rate proposed by a motor common carrier of passengers.".

(4) Section 10706(b)(3) of such title is amended by redesignating subparagraphs (E) and (F), and any references thereto, as subparagraphs (G) and (H), respectively, and by inserting after subparagraph (D) the following new subparagraphs:

"(E) On and after January 1, 1984, no agreement approved under this subsection may provide for discussion of or voting upon any single-line rate proposed by a motor common carrier of passengers. On and after January 1, 1984, no agreement approved under this subsection may permit a motor common carrier of passengers to discuss or to vote on any joint rate related to any interline movement unless the carrier can practicably participate in such movement. This subparagraph shall not apply to any rate applicable to special or charter transportation. This subparagraph and subparagraph (B)(i)(II) of this paragraph shall not apply to the following:

"(i) any general rate increase or decrease as defined by the Commission and subject to such notice requirements as the Commission may specify by regulation if discussion of such increase or decrease is limited to industry average carrier costs and, after January 1, 1984, does not include discussion of individual markets or particular single-line rates or joint rates;

"(ii) changes in tariff structures if discussion of such changes is limited to industry average carrier costs and, after January 1, 1984, does not include discussion of individual markets or particular single-line rates or joint rates;

"(iii) publishing of tariffs, filing of independent actions for individual member carriers, providing of support services for members, and changes in rules or regulations which are of at least substantially general application throughout the area in which such changes will apply;

"(iv) discussion of and voting on rates for unlimited passenger travel.

"(F) After the effective date of the Bus Regulatory Reform Act of 1981, no agreement approved under this subsection may provide for discussion of or voting upon any rate applicable to special or charter transportation proposed by a motor common carrier of passengers. This subparagraph shall not apply to publication of such rate.".

(c) Subsection (b) of section 10706 of title 49, United States Code, is amended by adding at the end thereof the following new paragraph:

"(5) Notwithstanding any provision of this subtitle (other than paragraph (3)(F) of this subsection, relating to special and charter transportation of passengers), before January 1, 1984, the Commission may not take any action which would, on the basis of the type of carrier service involved (including service by carriers singly or in combination with other carriers), result in the exclusion of one or more motor common carriers of passengers from discussion or voting under agreements authorized by this subsection on matters concerning rates, allowances, or divisions, except that before January 1, 1984, the Commission may issue regulations which take effect on or after January 1, 1984, to carry out the provisions of paragraph (3)(E) of this subsection.".

(d) The first sentence of section 10706(c) of title 49, United States Code, is amended by striking out "of property".

(e)(1) Paragraph (2) of section 14(b) of the Motor Carrier Act of 1980 (94 Stat. 806) is amended to read as follows:

"(2) The Study Commission shall make (A) a full and complete investigation and study of the collective ratemaking process for all rates of motor common carriers of property and upon the need or lack of need for continued antitrust immunity therefor, and (B) a full and complete investigation and study of the collective ratemaking process for all rates of motor common carriers of passengers and upon the need or lack of need for continued antitrust immunity therefor. Each such study shall estimate the impact of the elimination of such immunity upon rate levels and rate structures and describe the impact of the elimination of such immunity upon the Interstate Commerce Commission and its staff. Each such study shall give special consideration to the effect of the elimination of such immunity upon rural areas and small communities.".

(2) Paragraph (3) of such section 14(b) is amended—

(A) by striking out "ten members" and inserting in lieu thereof "thirteen members";

(B) by striking out "and" at the end of clause (B); and

(C) by striking out the period at the end of such paragraph and inserting in lieu thereof a semicolon and the following:

"(D) three members of the public appointed by the President, one who is a motor common carrier of passengers receiving $3,000,000 or more per year in revenues from motor common carrier of passengers operations, one who is a motor common carrier of passengers receiving less than $3,000,000 per year from motor common carrier of passengers operations, and one who is not affiliated with the motor common carrier industry.

No member of the Study Commission who is appointed under clause (C) of this paragraph shall vote on any matter before the Commission related to motor common carriers of passengers, and no member of the Study Commission who is appointed under clause (D) of this paragraph shall vote on any matter before the Study Commission related to motor common carriers of property.".

(3) Paragraph (4) of such section 14(b) is amended by striking out the first two sentences and inserting in lieu thereof the following:

"(4) The Study Commission shall submit to the President and the Congress its final report on the collective ratemaking process applicable to motor common carriers of property not later than January 1, 1983, and its final report on the collective ratemaking process applicable to motor common carriers of passengers not later than January 1, 1984. Such reports shall include, but not be limited to, the findings and recommendations of the Study Commission. The Study Commission shall cease to exist 6 months after submission of the last of such reports.".

(f) Any organization established pursuant to an agreement entered into by motor common carriers of passengers and approved by the Commission prior to the effective date of this Act under section 10706(b) of title 49, United States Code, may continue to function pursuant to such agreement until a new or amended agreement is finally disposed of by the Commission under section 10706 of title 49, United States Code, as amended by this section, so long as (1) such new or amended agreement is submitted to the Commission for approval within one hundred and twenty days of such effective date, and (2) such organization complies with this section (including amendments made by this section and regulations issued under such amendments) during the period such new or amended agreement is being prepared, submitted to, and considered by the Commission.

ZONE OF RATE FREEDOM

SEC. 11. (a) Subsection (d) of section 10708 of title 49, United States Code, is amended by redesignating paragraph (4) of such subsection, and any references thereto, as paragraph (6) and inserting after paragraph (3) the following new paragraphs:

"(4) Notwithstanding any other provision of this title, the Commission may not investigate, suspend, revise, or revoke any single-line rate proposed by a motor common carrier of passengers, or joint rate proposed by one or more such carriers, applicable to any transportation (other than special or charter transportation) on the grounds that such rate is unreasonable on the basis that it is too high or too low if—

"(A) the carrier or carriers notify the Commission that they wish to have the rate considered pursuant to this subsection; and

"(B) the aggregate of increases and decreases in any such rate is not more than 10 percent above the rate in effect one year prior to the effective date of the proposed rate, nor more than 20 percent below the lesser of the rate in effect on the effective date of the Bus Regulatory Reform Act of 1981 (or, in the case of any rate which the

carrier or carriers first establish after such date for a service not provided by the carrier or carriers on such date, such rate on the date such rate first becomes effective), or the rate in effect one year prior to the effective date of the proposed rate.

"(5) The Commission, by rule, may increase the percentage which first appears in paragraph (4)(B) of this subsection (relating to the upper limit of the zone of ratemaking freedom) if it finds that—

"(A) there is sufficient actual and potential competition to regulate rates and there are benefits to the traveling public from further rate flexibility; or

"(B) such increase is necessary to allow motor common carriers of passengers to meet the costs of inflation;

except that the Commission may not increase such percentage by more than 10 percentage points during any 1-year period.".

(b) Paragraph (6) of section 10708(d) of title 49, United States Code, as redesignated by subsection (a) of this section, is amended by inserting after the first sentence the following new sentence: "Evidence that any motor common carrier of passengers established pursuant to this subsection a joint or single-line rate applicable to transportation over any route which is the same as or similar to a joint rate applicable to transportation over such route which such carrier together with one or more other motor common carriers of passengers established pursuant to this subsection shall not be in and of itself sufficient to establish a violation of any such antitrust law.".

RATES FOR SPECIAL AND CHARTER TRANSPORTATION

SEC. 12. (a) Section 10708 of title 49, United States Code, is amended by adding at the end thereof the following new subsection:

"(e) Notwithstanding any other provision of this title, the Commission may not investigate, suspend, revise, or revoke any rate proposed by a motor common carrier of passengers applicable to special or charter transportation on the grounds that such rate is unreasonable. Nothing in this subsection shall limit the Commission's authority to suspend and investigate proposed rates on the basis that such rates may violate the provisions of section 10741 of this title or constitute predatory practices in contravention of the transportation policy set forth in section 10101(a) of this title.".

(b) Section 10762(c)(3) of title 49, United States Code, is amended—

(1) in the second sentence by inserting "and motor common carrier of passengers with respect to special or charter transportation" after "a rail carrier"; and

(2) by adding at the end thereof the following new sentence: "In the case of a motor common carrier of passengers, a proposed rate change resulting in an increased rate or a new rate applicable to special or charter transportation shall not become effective for 30 days after the notice is published and a proposed rate change resulting in a reduced rate applicable to special or charter transportation shall not become effective for ten days after the notice is published.".

MOTOR CONTRACT CARRIERS

SEC. 13. (a) Section 10923 of title 49, United States Code, is amended—

(1) in subsection (b) by striking out paragraph (2) and inserting in lieu thereof the following new paragraph:

"(2) The provisions of paragraph (2) of subsection (a) of this section shall not apply to applications under this section for authority to provide transportation as a motor contract carrier of passengers. The requirement that persons issued permits under this section as motor contract carriers of passengers be fit, willing, and able includes, among other things, financial fitness, operational fitness, and safety fitness."; and

(2) by adding at the end thereof the following new subsection:

"(f)(1) If, in the case of an application by a person from a political subdivision of a foreign country for issuance under this section of a permit to provide transportation as a motor contract carrier, the Commission finds that, under the policies of such political subdivision or of such country, persons from the United States are not treated as favorably as persons from such political subdivision or country, the Commission, in its discretion, may elect not to issue the permit.

"(2) No permit to provide transportation as a motor contract carrier shall be issued under this section to any person from a political subdivision of a foreign country unless such political subdivision or such country grants authority to persons from the United States to provide transportation of passengers by motor vehicle under continuing agreements in such political subdivision or country.

"(3) This subsection shall only apply to foreign persons who are from countries contiguous to the United States.".

(b) Subsection (e) of section 10925 of title 49, United States Code, is amended—

(1) by striking out "of property" each place it appears;

(2) by striking out "section 10922(b)" each place it appears and inserting in lieu thereof "section 10922"; and

(3) in paragraph (2)—

(A) by striking out "transportation"; and

(B) by striking out "of the same property" and inserting in lieu thereof "the same type of transportation".

BROKERS

SEC. 14. (a) Subsection (a) of section 10924 of title 49, United States Code, is amended by striking out "passengers or".

(b) Subsection (b) of section 10924 of title 49, United States Code, is amended—

(1) by inserting "passengers or" before "property (other than household goods)";

(2) by redesignating clauses (1) and (2), and any references thereto, as clauses (A) and (B), respectively;

(3) by inserting "(1)" before "The Interstate Commerce Commission"; and

(4) by adding at the end thereof the following new paragraphs:

"(2) The requirement that persons issued licenses to be brokers for transportation of passengers under this subsection be fit, willing, and able includes, among other things, financial fitness, operational fitness, and safety fitness.

"(3) With respect to an application for a license to authorize a person to be a broker for transportation of passengers, the Commission may not make any finding under paragraph (1) of this subsection which is based upon general findings developed in rulemaking proceedings.".

(c) Section 10922 of title 49, United States Code, is further amended by adding at the end thereof the following new subsection:

"(m) A motor common carrier of passengers providing transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title shall not provide transportation through a broker who does not hold a license issued under section 10924 of this title.".

(d) Section 10923 of title 49, United States Code, is further amended by adding at the end thereof the following new subsection:

"(g) A motor contract carrier of passengers providing transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title shall not provide transportation through a broker who does not hold a license under section 10924 of this title.".

TEMPORARY AND EMERGENCY TEMPORARY AUTHORITY

SEC. 15. Section 10928 of title 49, United States Code, is amended—

(1) in subsection (a) by striking out "motor carrier of passengers or" each place it appears;

(2) in subsection (b)(1) by striking out "of property" each place it appears; and

(3) in subsection (c)(1) by striking out "of property" each place it appears and by inserting after "not more than 90 days" the following: "and, in addition, in the case of a motor carrier of passengers, the Commission may extend such authority for a period of more than 90 days but not more than 180 days if no other motor carrier of passengers is providing transportation to the place or in the area".

EXIT POLICY

SEC. 16. (a) Subchapter II of chapter 109 of title 49, United States Code, is amended by adding at the end thereof the following new section:

"§10935. Discontinuing bus transportation in one State

"(a) When a motor common carrier of passengers having intrastate authority under the laws of a State, and interstate authority under a certificate issued under section 10922 of this subchapter, to provide transportation over any route to any point in such State has proposed to discontinue providing transportation over such route to such point or to reduce its level of service over such route to such point to a level which is less than one trip per day (excluding Saturdays and Sundays) and the carrier has requested the department, agency, or instrumentality of such State having jurisdiction over granting such discontinuance or reduction for permission to discontinue such intrastate transportation or to reduce its level of service to a level which is less than one trip per day (excluding Saturdays and Sundays) and the request has been denied (in whole or in part) or such department, agency, or instrumentality has not acted finally (in whole or in part) on the request by the 120th day after the carrier made the request, the carrier may petition the Commission for such permission.

"(b) When a petition is filed under subsection (a) of this section, the carrier shall certify that he has notified (1) the Governor of the State in which such transportation is provided, (2) the State authority having jurisdiction over granting discontinuances of transportation by motor common carriers of passengers and reductions in levels of service by such carriers, (3) local governments having jurisdiction over areas which would be affected if such petition is granted, and (4) such other interested persons as the Commission may specify by regulation.

"(c) Any person (including a department, agency, or instrumentality of a State or local government) may object to the Commission to the granting of permission to any motor common carrier of passengers to discontinue or reduce transportation under this section.

"(d) If no person objects under subsection (c) of this section to the granting of permission to discontinue or reduce transportation under this section within 20 days after the carrier files with the Commission the petition for such discontinuance or reduction, the Commission shall grant such permission at the end of such 20-day period.

"(e)(1) Subject to paragraph (2) of this subsection, if, within 20 days after a carrier files a petition for permission to discontinue providing intrastate transportation over any route to any point or to reduce its level of service over such route to such point to a level which is less than one trip per day (excluding Saturdays and Sundays), any person objects under subsection (c) of this section to the Commission to the granting of such permission, the Commission shall grant such permission unless the Commission finds, on the basis of evidence presented by the person objecting to the granting of such permission, that such discontinuance or reduction is not consistent with the public interest or that continuing the transportation, without the proposed discontinuance or reduction, will not constitute an unreasonable burden on interstate commerce.

"(2) The Commission shall only grant permission to a carrier to discontinue intrastate transportation over any route to any point under this subsection if such carrier has applied for authority to discontinue its interstate transportation over such route to such point under section 10925(b) of this subchapter and the Commission has granted or will grant such authority.

"(3) If any person objects under subsection (c) of this section to the granting of permission to discontinue or reduce transportation under this section within 20 days after the carrier files with the Commission the petition for such discontinuance or reduction, the carrier, within 15 days after the filing of such objection with the Commission, shall furnish to the Commission and to objecting persons—

"(A) an estimate of the annual subsidy required, if any, to continue the service;

"(B) traffic, revenue, and other data necessary to determine the amount of annual financial assistance, if any, which would be required to continue the service; and

"(C) such other information as the Commission may require by regulation.

The Commission shall take final action upon such petition not later than 90 days after the date the carrier files such petition.

"(f) Before a discontinuance or reduction in level of service proposed in a petition filed by a carrier under subsection (a) of this section has become effective, the Commission may order the carrier to continue any part of the intrastate transportation for not to exceed the 180-day period beginning on the date the carrier files such petition with the Commission.

"(g) In making a finding under subsection (e)(1) of this section, the Commission shall consider, to the extent applicable, at least the following:

"(1) the national transportation policy of section 10101 of this title;

"(2) whether the motor common carrier of passengers has received an offer of, or is receiving, financial assistance to provide the transportation to be discontinued or reduced from a financially responsible person (including a governmental authority);

"(3) in the case of a petition to discontinue transportation to any point, whether the transportation is the last motor carrier of passenger service to such point and whether a reasonable alternative to such service is available;

"(4) whether granting such petition will have a significant adverse effect on commuter bus operations.

"(h) This section shall not apply to any carrier owned or controlled by a State or local government.".

(b) The analysis for subchapter II of chapter 109 of title 49, United States Code, is amended by inserting

"10935. Discontinuing bus transportation in one State."

after

"10934. Household goods agents.".

(c) Section 10322(a) of title 49, United States Code, is amended by inserting "10935," after "10934(c),".

DISCRIMINATORY STATE REGULATION OF RATES AND PRACTICES

SEC. 17. (a)(1) Section 11501 of title 49, United States Code, is amended by redesignating subsection (e), and any references thereto, as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e)(1) The Commission shall prescribe any rate, rule, or practice applicable to transportation provided entirely in one State by a motor common carrier of passengers providing transportation subject to jurisdiction of the Commission under subchapter II of chapter 105 of this title—

"(A) if the carrier has requested the department, agency, or instrumentality of such State having jurisdiction over such rate, rule, or practice for permission to establish such rate, rule, or practice and the request has been denied (in whole or in part) or the State authority has not acted finally (in whole or in part) on the request by the 120th day (or, in the case of a practice related to scheduling of such transportation, by the 60th day) after the carrier made the request; and

"(B) if the Commission finds that the rate, rule, or practice in effect and applicable to such intrastate transportation causes unreasonable discrimination against or imposes an unreasonable burden on interstate or foreign commerce.

"(2) For purposes of paragraph (1)(B) of this subsection, there shall be a rebuttable presumption that—

"(A) any rate, rule, or practice applicable to transportation provided by a motor common carrier of passengers entirely in one State imposes an unreasonable burden on interstate commerce if the Commission finds that—

"(i) such rate, rule, or practice results in the carrier charging a rate for such transportation which is lower than the rate such carrier charges for comparable interstate transportation of passengers;

"(ii) on the basis of evidence presented by the carrier, that as a result of such rate, rule, or practice such carrier does not receive revenues from such transportation which exceed the variable costs of providing such transportation; or

"(iii) the department, agency, or instrumentality of such State having jurisdiction over such rate, rule, or practice failed to act finally (in whole or in part) on the request of the carrier to establish such rate, rule, or practice by the 120th day (or, in the case of a practice related to scheduling of such transportation, by the 60th day) after the date the carrier made the request;

"(B) any rate applicable to transportation entirely in one State imposes an unreasonable burden on interstate commerce if the Commission finds that the most recent general rate increase applicable to transportation provided by motor common carriers of passengers in such State is less than the most recent general rate increase applicable to interstate transportation provided by motor common carriers of passengers under this subtitle; and

"(C) any practice related to scheduling of transportation provided by a motor common carrier of passengers entirely in one State on any route imposes an unreasonable burden on interstate commerce if the Commission finds that the practice which the carrier proposes to establish would conform the schedule applicable to such transportation on such route to the schedule applicable to interstate transportation provided by the carrier on such route.

"(3)(A) A motor common carrier of passengers must file an application with the Commission for prescription under this subsection of a rate, rule, or practice applicable to transportation provided entirely in one State by such carrier. When such application is filed with the Commission, the carrier shall certify that he has notified (i) the Governor of such State, (ii) the department, agency, or instrumentality of such State which denied, or failed to take action on, the request of such carrier related to such rate, rule, or practice, and (iii) such other interested persons as the Commission may specify by regulation. The Commission shall take final action on any such application not later than 60 days after such application is filed with the Commission; except that, in the case of an application for prescription of a practice related to the schedule applicable to intrastate transportation provided by such carrier, the Commission shall take final action on such application not later than 30 days after such application is filed.

"(B) The Commission shall establish, by regulation, procedures for processing applications under this section.

"(4) This subsection shall not apply to any carrier owned or controlled by a State or local government.".

(2) Subsection (f) of section 11501 of title 49, United States Code, as redesignated by paragraph (1) of this subsection, is amended by inserting "(1)" after "take action" and by inserting ", or (2) with respect to a rate, rule, or practice of a motor common carrier of passengers, in accordance with the procedures established by the Commission under subsection (e)(3)(B) of this section" after "a full hearing".

(b) Section 10322(a) of title 49, United States Code, is amended by inserting "or 11501(e)" after "section 10934".

(c) The Interstate Commerce Commission, in consultation with each national association representing State departments, agencies, and instrumentalities having jurisdiction over motor common carrier transportation of passengers, shall cooperate with each such department, agency, or instrumentality of a State for the purpose of establishing standards and procedures (including timing requirements) for rates, rules, and practices applicable to intrastate transportation provided by motor common carriers of passengers who provide transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of subtitle IV of title 49, United States Code, which are—

(1) to the extent feasible, uniform among the States; and

(2) consistent with the standards and procedures established by the Interstate Commerce Commission under such subtitle for regulation of interstate transportation pro-

vided by motor common carriers of passengers.

(d) It is the sense of Congress that each State should revise its standards and procedures (including timing requirements) for rates, rules, and practices applicable to intrastate transportation provided by motor common carriers of passengers to conform such standards and procedures to the standards and procedures for rates, rules, and practices applicable to interstate transportation provided by motor carriers of passengers not later than two years after the effective date of this Act.

(e) Not later than thirty months after the effective date of this Act, the Interstate Commerce Commission shall report to the Congress on the results of its efforts to establish uniform standards and procedures applicable to motor common carrier of passengers rates, rules, and practices.

FINANCIAL RESPONSIBILITY

SEC. 18. (a) The Secretary of Transportation shall establish regulations to require minimal levels of financial responsibility sufficient to satisfy liability amounts to be determined by the Secretary covering public liability and property damage for the transportation of passengers for hire by motor vehicle in the United States from a place in a State to a place in another State, from a place in a State to another place in such State through a place outside of such State, and between a place in a State and a place outside of the United States.

(b) The minimal level of financial responsibility established by the Secretary under subsection (a) of this section—

(1) for any vehicle with a seating capacity of more than fifteen passengers shall not be less than $5,000,000, except that the Secretary, by regulation, may reduce such amount (but not to an amount less than $2,500,000) for any class of such vehicles or operations for the two-year period beginning on the effective date of the regulations issued under such subsection or any part of such period if the Secretary finds that such reduction will not adversely affect public safety and will prevent a serious disruption in transportation service; and

(2) for any vehicle with a seating capacity of fifteen passengers or less shall not be less than $1,500,000, except that the Secretary, by regulation, may reduce such amount (but not to an amount less than $750,000) for any class of such vehicles or operations for the two-year period beginning on the effective date of the regulations issued under such subsection or any part of such period if the Secretary finds that such reduction will not adversely affect public safety and will prevent a serious disruption in transportation service.

(c)(1) If, at the end of the one-year period beginning on the effective date of this Act, the Secretary has not established regulations to require minimal levels of financial responsibility as required by subsection (a) of this section for any class of transportation of passengers, the levels of financial responsibility for such class of transportation shall be the $5,000,000 amount set forth in subsection (b)(1) of this section in the case of motor vehicles with a seating capacity of more than fifteen passengers and the $1,500,000 amount set forth in subsection (b)(2) of this section in the case of motor vehicles having a seating capacity of fifteen passengers or less, until such time as the Secretary, by regulation, changes such amount under this section.

(2) Notwithstanding the provisions of subsection (b) of this section, the Secretary may only make reductions in the $5,000,000 and $1,500,000 amounts set forth in such subsection for the two-year period beginning on the three hundred and sixty-sixth day following the effective date of this Act or any part of such period.

(d) Financial responsibility may be established under this section by any one or combination of the following methods acceptable to the Secretary: evidence of insurance, guarantee, surety bond, or qualification as a self-insurer. Any bond filed shall be issued by a bonding company authorized to do business in the United States. The Secretary shall establish, by regulation, methods and procedures to assure compliance with this section.

(e)(1) Any person (except an employee who acts without knowledge) who is determined by the Secretary, after notice and opportunity for a hearing, to have knowingly violated this section or a regulation issued under this section shall be liable to the United States for a civil penalty of not more than $10,000 for each violation, and if any such violation is a continuing one, each day of violation constitutes a separate offense. The amount of any such penalty shall be assessed by the Secretary by written notice. In determining the amount of such penalty, the Secretary shall take into account the nature, circumstances, extent, and gravity of the violation committed and, with respect to the person found to have committed such violation, the degree of culpability, any history of prior offenses, ability to pay, effect on ability to continue to do business, and such other matters as justice may require.

(2) Such civil penalty may be recovered in an action brought by the Attorney General on behalf of the United States in the appropriate district court of the United States or, prior to referral to the Attorney General, such civil penalty may be compromised by the Secretary. The amount of such penalty, when finally determined (or agreed upon in compromise), may be deducted from any sums owed by the United States to the person charged. All penalties collected under this subsection shall be deposited in the Treasury of the United States as miscellaneous receipts.

(f) This section shall not apply—

(1) to a motor vehicle transporting only school children and teachers to or from school;

(2) to a motor vehicle providing taxicab service and having a seating capacity of less than seven passengers and not operated on a regular route or between specified points; and

(3) to a motor vehicle carrying less than sixteen individuals in a single, daily round-trip to commute to and from work.

(g) For purposes of this section, the term—

(1) "Secretary" means the Secretary of Transportation; and

(2) "State" means a State of the United States and the District of Columbia.

(h) Section 10927(a)(1) of title 49, United States Code, is amended by inserting after "Motor Carrier Act of 1980" the following: ", in the case of a motor carrier of property, or section 18 of the Bus Regulatory Reform Act of 1981, in the case of a motor carrier of passengers".

SECURITIES

SEC. 19. (a)(1) Subsection (a) of section 11302 of title 49, United States Code, is amended in clauses (1) and (2) by inserting "of property" after "carriers" each place it appears.

(2) Subsection (b) of such section is amended by inserting "(1)" before "Section 11301" and by adding at the end thereof the following new paragraph:

"(2) Section 11301 of this title shall not apply to any corporation authorized by the Commission to acquire control of one or more motor carriers if the revenues of such corporation from motor carrier operations are derived principally from motor carrier of passenger operations.".

(b) The amendments made by this section shall not be construed to effect the authority of the Commission under sections 11343 and 11344 of title 49, United States Code, to impose conditions on any transaction referred to in section 11343 of such title involving a motor common carrier of passengers.

TAX DISCRIMINATION

SEC. 20. Section 11503a(a)(3) of title 49, United States Code, is amended by striking out "of property".

MERGER PROCEDURE

SEC. 21. (a) Section 11345a of title 49, United States Code, is amended by striking out

"§11345a. Consolidation, merger, and acquisition of control: motor carrier of property procedure"

and inserting in lieu thereof

"§11345a. Consolidation, merger, and acquisition of control: motor carrier procedure".

(b) Subsection (a) of such section is amended by striking out "of property".

(c) The analysis for subchapter III of chapter 113 of title 49, United States Code, is amended by striking out

"11345a. Consolidation, merger, and acquisition of control: motor carrier of property procedure."

and inserting in lieu thereof

"11345a. Consolidation, merger, and acquisition of control: motor carrier procedure.".

(d) Section 11344(b) of title 49, United States Code, is amended by redesignating paragraphs (1), (2), (3), (4), and (5) (and references thereto) as subparagraphs (A), (B), (C), (D), and (E), respectively, by inserting "(1)" before "In a proceeding", and by adding at the end of such section the following new paragraph:

"(2) In a proceeding under this section which involves only carriers providing transportation subject to the jurisdiction of the Interstate Commerce Commission under subchapter II or III of chapter 105 of this title, the Commission shall consider at least the following:

"(A) the effect of the proposed transaction on the adequacy of transportation to the public.

"(B) the effect on the public interest of including, or failing to include, other rail carriers in the area involved in the proposed transaction.

"(C) the total fixed charges that result from the proposed transaction.

"(D) the interest of carrier employees affected by the proposed transaction.".

(e) Section 11344(d) of title 49, United States Code, is amended by adding at the end thereof the following new sentence: "The provisions of this subsection do not apply to any proceeding under this section which involves only carriers providing transportation subject to the jurisdiction of the Commission under subchapter II or III of chapter 105 of this title.".

SAFETY ENFORCEMENT

SEC. 22. (a) Section 10925(d) of title 49, United States Code, is amended by redesignating paragraph (2) (and any references thereto) as paragraph (3) and by inserting after paragraph (1) the following new paragraph:

"(2) Without regard to subchapter II of chapter 103 of this title and subchapter II of chapter 5 of title 5, upon petition by the Secretary of Transportation, the Commission may suspend a certificate or permit of a motor carrier of passengers if the Commission finds that such carrier has been conducting unsafe operations which are an imminent hazard to public health or property.".

(b) Paragraph (3) of section 10925(d) of title 49, United States Code, as redesignated by subsection (a) of this section, is amended by inserting before the period at the end thereof the following: "or, in the case of a suspension under paragraph (2) of this subsection, until the Commission revokes such suspension".

ILLEGAL OPERATIONS

SEC. 23. Section 11901(g) of title 49, United States Code, is amended by inserting before the period at the end of the first sentence the following: "; except that, in the case of a person who does not have authority under this subtitle to provide transportation of passengers, or an officer, agent, or employee of such person, that does not comply with section 10921 of this title with respect to providing transportation of passengers, the amount of the civil penalty shall not be more than $1,000 for each violation and $500 for each additional day the violation continues".

ADMINISTRATIVE ASSISTANCE

SEC. 24. Section 10321(b) of title 49, United States Code, is amended—

(1) by striking out "and" at the end of clause (2);

(2) by striking out the period at the end of such section and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new clause:

"(4) consistent with the transportation policy of section 10101 of this title, provide administrative assistance to small motor common carriers of passengers and local governments preparing for proceedings under sections 10922(c)(2), 10935, and 11501(e) of this title.".

STUDY OF CITIZEN BAND RADIOS ON BUSES

SEC. 25. (a) The Secretary of Transportation shall undertake to enter into appropriate arrangements with the National Academy of Sciences to conduct a study of the use of citizen band radios on motor vehicles providing transportation of passengers subject to the jurisdiction of the Interstate Commerce Commission under subchapter II of chapter 105 of title 49, United States Code, by the operators of such vehicles. Such study shall determine, at a minimum, the following:

(1) the effect on safety if such operators are authorized to use such radios; and

(2) the effect on safety, health, and convenience of the passengers of such vehicles if such operators are authorized to use such radios.

(b) The Secretary of Transportation shall request the National Academy of Sciences to submit to the Secretary and the Congress, within six months after entering into arrangements with the National Academy of Sciences for conducting the study under subsection (a) of this section but in no case later than one year after the effective date of this Act, a report on the results of such study along with its recommendations concerning whether operators of motor vehicles providing transportation of passengers should be allowed to use citizen band radios. The Secretary shall furnish to such Academy, at its request, any information which such Academy deems necessary for the purpose of conducting such study.

(c) Not later than sixty days after the National Academy of Sciences submits its report to the Secretary of Transportation under subsection (b) of this section, the Secretary of Transportation shall initiate a rulemaking proceeding to determine whether operators of motor vehicles providing transportation of passengers subject to the jurisdiction of the Interstate Commerce Commission under subchapter II of chapter 105 of title 49, United States Code, should be allowed to use citizen band radios in such vehicles. In making such determination, the Secretary of Transportation shall give substantial weight to the recommendations and conclusions of the National Academy of Sciences. Such rulemaking proceeding shall be completed not later than one hundred and twenty days after such proceeding is commenced. If the Secretary issues a rule or regulation which recommends that operators of such vehicles be allowed to temporarily install and operate citizen band radios in such vehicles, the Secretary of Transportation shall issue regulations establishing guidelines for the use of such radios in such vehicles in order to ensure that the public safety is adequately protected.

(d)(1) Subchapter I of chapter 111 of title 49, United States Code, is amended by adding at the end thereof the following new section:

"§11111. Use of citizen band radios on buses

"(a)(1) A motor carrier of passengers providing transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title shall allow the operator of any motor vehicle providing such transportation to temporarily install and operate a citizen band radio in such vehicle if the Secretary of Transportation issues a rule or regulation which recommends that operators of such vehicles be allowed to temporarily install and operate such radios in such vehicles.

"(2) Citizen band radios installed and operated in motor vehicles providing transportation of passengers subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title shall be installed and operated in accordance with the guidelines established by the Secretary of Transportation under section 25(c) of the Bus Regulatory Reform Act of 1981.

"(b) The Commission shall issue such regulations as it considers necessary to carry out this section.".

(2) The analysis for subchapter I of chapter 111 of title 49, United States Code, is amended by inserting

"11111. Use of citizen band radios on buses."

after

"11110. Household goods carrier operations.".

(e) Section 11702(a)(2) of title 49, United States Code, is amended by inserting "or 11111" after "11109".

(f) This section shall not be construed to provide new spending authority within the meaning of section 401(c)(2)(A) of the Congressional Budget Act of 1974.

BUS TERMINAL STUDY

SEC. 26. (a) The Secretary of Transportation and the Interstate Commerce Commission shall conduct a full investigation and study of the ownership, location, and adequacy of bus terminals and their capacity to provide passenger service in accordance with the transportation policy set forth in section 10101 of title 49, United States Code. A report on the results of such investigation and study, including legislative recommendations, shall be submitted to the President and Congress not later than December 31, 1982.

(b) The report under this section shall include an analysis of at least the following:

(1) the pattern of ownership of bus terminals, including public and private ownership;

(2) the desirability of terminals for more than one mode of transportation and their impact on urban development;

(3) the desirability of governmental assistance in the construction of nonurban bus terminals.

EMPLOYEE PROTECTION

SEC. 27. (a)(1) Each individual who is eligible for protection under this section and whose employment is terminated by a motor common carrier of passengers (other than for cause) prior to the last day of the ten-year period beginning on the date of enactment of this Act shall have a right of priority reemployment, in his or her occupational specialty, by such carrier at such time as such carrier is hiring additional employees.

(2) Any motor common carrier of passengers hiring additional employees shall have a duty to hire an individual eligible for protection under this section, in his or her occupational specialty, before hiring any other individual if such individual—

(A) was terminated previously by such carrier;

(B) has applied for a vacant position for which such carrier is accepting applications; and

(C) at the time the application is filed, has notified such carrier that he or she is eligible for protection under this section.

(b)(1) Each individual who is eligible for protection under this section and whose employment is terminated by a motor common carrier of passengers (other than for cause) prior to the last day of the ten-year period beginning on the date of enactment of this Act shall have a right of consideration for employment, in his or her occupational specialty, by any other motor common carrier of passengers who is hiring additional employees.

(2) Each motor common carrier of passengers who is hiring additional employees shall have a duty to consider for employment, in his or her occupational specialty, an individual who is eligible for protection under this section if such individual—

(A) has applied for a vacant position for which such carrier is accepting applications; and

(B) at the time the application is filed, has notified such carrier that he or she is eligible for protection under this section.

(c) An individual (other than a member of a board of directors or an officer of a corporation) who was employed by a motor common carrier of passengers for the two-year period ending on the date of enactment of this Act shall be eligible for protection under this section if, upon application of such individual, the Commission determines that the employment of such individual has been terminated by a motor common carrier

of passengers having intrastate authority under the laws of a State, and interstate authority under a certificate issued under section 10922 of title 49, United States Code, to provide transportation over any route to any point in such State as a result of such carrier—

(1) discontinuing (A) interstate service over such route under section 10925(b) of such title, and (B) intrastate service over such route (i) under section 10935 of such title, or (ii) under the laws of such State;

(2) reducing (A) interstate service over such route under subtitle IV of such title, and (B) intrastate service over such route (i) under section 10935 of such title, or (ii) under the laws of such State; or

(3) substantially reducing (A) interstate service over such route under subtitle IV of such title, and (B) intrastate service over such route (i) under section 11501(e) of such title, or (ii) under the laws of such State.

In a proceeding to determine whether an individual is eligible for protection under this section, it shall be the obligation of the individual whose employment has been terminated by a motor common carrier of passengers to identify to the Commission the discontinuance or reduction which such individual alleges resulted in such termination and to specify the pertinent facts; and it shall be the obligation of any carrier contesting the eligibility of the individual for protection under this section to prove that the discontinuance or reduction was not a contributing factor causing such termination.

(d) The Commission shall establish, maintain, and periodically publish a comprehensive list of jobs available with class I motor carriers of passengers. Such list shall include that information and detail, such as job descriptions and required skills, the Commission deems relevant and necessary. In addition to publishing the list, the Commission shall make every effort to assist individuals eligible for protection under this section in finding other available employment. The Commission may require each class I motor carrier of passengers to file with the Commission the reports, data, and other information necessary to fulfill the duties of the Commission under this subsection.

(e) For the purposes of this section:

(1) A motor common carrier of passengers shall not be considered to be hiring additional employees when it recalls any of its own furloughed employees.

(2) An individual who is furloughed by a motor common carrier of passengers and who still has a right of recall by such carrier shall not be considered to be terminated.

(3) The term "Commission" means the Interstate Commerce Commission.

(4) The term "motor common carrier of passengers" means a person who has authority under section 10922 of title 49, United States Code, to provide transportation of passengers subject to the jurisdiction of the Commission under subchapter II of chapter 105 of such title.

(5) The term "class I motor carrier of passengers" means a motor common carrier of passengers having annual gross revenues from motor common carrier of passengers operations in excess of $3,000,000.

(f) Nothing in this section shall be construed to affect (1) an affirmative action plan or a hiring plan designed to eliminate discrimination, that is required by Federal or State statute, regulation, or Executive order, or by the order of a Federal court or agency, or (2) a permissible voluntary affirmative action plan.

(g) This section shall not apply (1) to any carrier owned or controlled by a State or local government, and (2) to any periodic discontinuance of or reduction in motor carrier of passenger service which is seasonal in nature.

(h) The Commission shall issue such rules and regulations as are necessary to carry out this section. Initial rules and regulations shall be promulgated within six months after the effective date of this Act.

(i) The provisions of this section shall terminate on the last day of the twelve-year period beginning on the effective date of this Act.

NEW BUDGET AUTHORITY

SEC. 28. This Act (including the amendments made by this Act) shall not be construed to authorize the enactment of new budget authority or new spending authority for the fiscal year ending September 30, 1982.

EFFECTIVE DATE

SEC. 29. This Act shall take effect on the sixtieth day after the date of enactment of this Act.

Mr. ANDERSON (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

AMENDMENTS OFFERED BY MR. ANDERSON

Mr. ANDERSON. Mr. Chairman, I offer a series of technical amendments and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. ANDERSON: Page 14, line 12, insert "in the same motor vehicle with the passengers" after "packages".

Page 15, line 10, strike out "of passengers".

Page 18, line 10, strike out "subsection" and insert in lieu thereof "section".

Page 22, line 22, insert "other" before "provision".

Page 25, line 21, strike out "10706(b)" and insert in lieu thereof "10706(c)".

Page 30, lines 17 and 18, strike out "of passengers".

Page 41, line 24, strike out "section" and insert in lieu thereof "subsection".

Page 48, after line 15, insert the following:

(b) Section 3(a)(6) of the Securities Act of 1933 (15 U.S.C. 77c(a)(6)) is amended by inserting "of property" after "motor carrier".

Page 48, line 16, strike out "(b)" and insert in lieu thereof "(c)".

Mr. ANDERSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ANDERSON. Mr. Chairman, I will give a brief explanation of these technical amendments. There are eight in all. The first one clarifies that express packages under a motor carrier of passengers certificate are to be transported in the same vehicle with passengers. (These words were inadvertently omitted from the provision.)

The second is a technical amendment to delete two words that were inadvertently included.

The third amendment corrects a cross reference in the bill.

The fourth is a technical amendment which inserts the word "other" which was inadvertently omitted.

The fifth is a technical amendment which corrects a cross reference in the bill.

The sixth is a technical amendment to delete two words that were inadvertently included.

The seventh is a technical amendment to correct a cross reference.

The eighth is a technical amendment which clarifies that the Securities and Exchange Commission will have jurisdiction over securities issued by motor carriers of passengers.

□ 1415

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I would associate myself with the gentleman's remarks. These are simply technical amendments and should be adopted.

The CHAIRMAN. The question is on the amendments offered by the gentleman from California (Mr. ANDERSON).

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read a third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ECKART. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 305, nays 83, not voting 45, as follows:

□ 1430

The Clerk announced the following pairs:

On this vote:

Mr. Florio for, with Mr. McDonald against.

Mr. Young of Missouri for, with Mrs. Chisholm against.

Until further notice:

Mr. Pepper with Mr. Dougherty.
Mr. Reuss with Mr. Railsback.
Mr. Biaggi with Mr. McCloskey.
Mr. Long of Louisiana with Mr. Rhodes.
Mr. Breaux with Mr. Solomon.
Mr. Dixon with Mr. Martin of New York.
Mr. AuCoin with Mr. Edwards of Alabama.
Mr. Clay with Mr. Hagedorn.
Mr. Fountain with Mr. Dickinson.
Mr. Jones of North Carolina with Mr. Goodling.
Mr. Bowen with Mr. Dornan of California.
Mr. Richmond with Mr. Paul.
Mr. Rosenthal with Mr. Quillen.
Mr. Santini with Mr. Pritchard.
Mr. Dicks with Mr. Grisham.
Mr. Barnard with Mr. Goldwater.
Mr. Simon with Mr. Duncan.
Mr. Volkmer with Mr. Myers.
Mr. Shannon with Mr. Dymally.
Mr. Mattox with Mr. Bedell.

Messrs. OTTINGER, SAVAGE, TRAXLER, STOKES, FISH, and DELLUMS changed their votes from "yea" to "nay".

Messrs. CHENEY, MORRISON, DOWDY, STENHOLM, WHITE, and EDWARDS of California changed their votes from "nay" to "yea".

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANDERSON of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore (Mr. DANIELSON). Is there objection to the request of the gentleman from California?

There was no objection.

MULTINATIONAL FORCE AND OBSERVERS PARTICIPATION RESOLUTION

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 272 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 272

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 349) to authorize the participation of the United States in a multinational force and observers to implement the Treaty of Peace between Egypt and Israel, and the first reading of the joint resolution shall be dispensed with. After general debate, which shall be confined to the joint resolution and

shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the joint resolution shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendment as may have been adopted, and the previous question shall be considered as ordered on the joint resolution and amendments thereto to final passage without intervening motion except one motion to recommit. After the passage of H.J. Res. 349, the House shall proceed, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to the consideration of the joint resolution (S.J. Res. 100), and it shall then be in order in the House to move to strike out all after the resolving clause of the said Senate joint resolution and to insert in lieu thereof the provisions contanied in H.J. Res. 349 as passed by the House. It shall then be in order in the House to move to insist on the House amendment to S.J. Res. 100 and to request a conference with the Senate.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Mississippi (Mr. LOTT) for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 272 is an open rule providing for the consideration of House Joint Resolution 349, multinational force and observers participation resolution.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs.

The joint resolution shall be read for amendment under the 5-minute rule, and House Resolution 272 provides for one motion to recommit.

It should be noted that the rule waives a point of order against the joint resolution under section 402(a) of the Congressional Budget Act. Section 402(a) provides that it shall not be in order to consider any bill which authorizes the enactment of new budget authority for a fiscal year unless that bill has been reported on or before May 15 preceding the beginning of such fiscal year.

Section 4(b) of House Joint Resolution 349 authorizes the enactment of new budget authority for fiscal year 1982. This is the $125 million in fiscal 1982 to cover the U.S. commitment to the startup costs for the multinational force and observers.

Since the joint resolution was not reported on or before May 15, it would be subject to a point of order under section 402(a) of the Budget Act. The Rules Committee has been advised that the House Budget Committee met on November 12 and supported a waiver of section 402(a) due to the importance of the peacekeeping force.

The rule further provides that upon the passage of House Joint Resolution 349, the House shall proceed to the consideration of Senate Joint Resolution 100. It shall then be in order in the House to move to strike everything after the resolving clause and insert in lieu thereof the text of House Joint Resolution 349 as passed by the House. It then shall be in order to move to insist on the House amendment to Senate Joint Resolution 100 and to request a conference with the other body.

In order to bring Senate Joint Resolution 100 to the floor to facilitate a conference, the rule waives section 402(a) of the Budget Act against the consideration of Senate Joint Resolution 100. The House Budget Committee has informed the Rules Committee that it supports this waiver in order to bring about a conference with the other body.

Mr. Speaker, the purpose of House Joint Resolution 349 is to give congressional authorization to the President to allow the participation of the United States in the multinational force and observers to implement the treaty of peace between Egypt and Israel.

The peace treaty between Egypt and Israel provided for a United Nations peacekeeping force to supervise final Israeli withdrawal from the Sinai on April 25, 1982, and compliance with the treaty by both parties thereafter. However, in response to a formal request from Egypt, the President of the Security Council on May 18, 1981, reported that the members of the Security Council were unable to reach the agreement necessary for the United Nations to provide a force and observers as envisioned in the treaty.

In connection with the signing of the treaty, President Carter provided each party with a letter of March 26, 1979, assuring them that, in the event the United Nations failed to provide a force:

> The President will be prepared to take those steps necessary to insure the establishment and maintenance of an acceptable alternative multinational force.

Pursuant to that assurance, a U.S. delegation took part in negotiations with Egypt and Israel which led to the protocol which established the multinational force and observers. On August 3, 1981, the U.S. role in the MFO was set forth in an exchange of letter among the parties.

Under House Joint Resolution 349, the President is authorized to commit to the MFO up to 1,200 members of the U.S. Armed Forces and, at the President's discretion, a number of civilian observers. The joint resolution further authorizes $125 million to cover the U.S. commitment to pay 10 percent of the MFO startup costs through fiscal 1982. Beginning in fiscal 1983, the United States has agreed to share maintenance costs for the force equally with Egypt and Israel. The measure limits, but does not authorize, the U.S. contribution in each outyear to one-third of the maintenance cost.

The resolution also requires the President to report to Congress about his continuing efforts to obtain troop contributions to the MFO. At this time, Colombia and Fiji have each agreed to provide battalions, Uruguay has agreed to participate, and several of our allies have expressed interest in providing support elements for the MFO.

Through its reporting provisions and its 1 year authorization, House Joint Resolution 349 should insure congressional oversight of U.S. participation in the MFO. It also should be noted that introduction of U.S. combat troops in the Sinai will be governed by the reporting requirements of the war powers resolution and that the administration has agreed that all provisions of the war powers resolution will apply to U.S. participation in the MFO.

Mr. Speaker, I am not aware of any opposition to the rule on House Joint Resolution 349, and I urge my colleagues to adopt it.

□ 1445

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the adoption of this rule and the passage of the legislation which it makes in order. This joint resolution is significant in that it provides for U.S. assistance in the implementation of the 1979 peace treaty between Egypt and Israel and particularly because it authorizes the stationing of American troops in that very volatile region of the globe. Specifically, this legislation authorizes the President to assign no more than 1,200 U.S. military personnel to be part of a multinational force located in the Sinai Peninsula. In addition, the President is authorized to agree to a U.S. share amounting to 60 percent of the initial cost of the force in fiscal year 1982 and one-third of the costs in future years. To that end the bill authorizes an appropriation of $125 million for fiscal year 1982. The Congressional Budget Office estimates that additional outlays of $35 million in fiscal year 1983 and $37 million in each of fiscal year 1984, 1985, and 1986 will be necessary.

Because this legislation provides for new budget authority which was not reported by May 15 prior to the beginning of the fiscal year, section 402(a) of the Congressional Budget Act of 1974 must be waived in order for the bill to be considered.

The rule further provides that, after the Committee of the Whole has acted

on this resolution, the version already adopted in the other body will then be in order. Section 402(a) of the Budget Act must also be waived against that resolution. The rule before us then makes in order a motion to insist on the House language and to request a conference with the other body.

Mr. Speaker, I would emphasize that this is an open rule which will permit amendments under the 5-minute rule. One motion to recommit will also be allowed.

This joint resolution is far-reaching and should be adopted only after thorough and careful consideration. This open rule will facilitate such a process, and I urge its adoption.

Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Speaker, I am glad to note that a number of my colleagues are here on the House floor at this time. I asked for the 2 minutes simply to implore my colleagues to stay during the debate on this resolution.

The decision we are asked to make is a momentous decision. Never before in American history has the Congress ever engaged in an authorization of this nature. We have troops to be stationed in Korea, to be sure, and have for many years, but that is a consequence of a treaty. No treaty presently exists to justify the stationing of troops in the Middle East.

We have troops in Europe, but they are there, too, in consequence of the NATO treaty.

We had troops in South Vietnam for a number of years. That, too, was in consequence of a treaty in which our Government was engaged.

Here we have no treaty obligation that we are seeking to carry out. We are authorizing our President to place military forces of the United States in a very volatile part of the world.

Now, I have come to the conclusion that it is in the interests of the United States that we do this; but I hope that all of my colleagues will take very seriously the question that is now before us.

Mr. LOTT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. ZABLOCKI. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 349) to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution, House Joint Resolution 349, with Mr. MURTHA in the chair.

The Clerk read the title of the joint resolution.

The CHAIRMAN. Pursuant to the rule, the first reading of the joint resolution is dispensed with.

Under the rule, the gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 30 minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, House Joint Resolution 349 was adopted after careful and due consideration by a unanimous 37-to-0 bipartisan vote of the Committee on Foreign Affairs.

The purpose of House Joint Resolution 349 is to provide congressional authorization to the President to allow the participation of the United States in the multinational force and observers, MFO, the peacekeeping force in the Sinai.

The creation of the MFO was the result of the Egyptian-Israeli peace treaty which represented a major achievement for U.S. foreign policy and national security interests. That treaty envisioned the creation of a U.N. peacekeeping force to monitor Israeli withdrawal from the Sinai, as well as to perform other functions designed to enhance the mutual confidence of Israel and Egypt. However, because of a threatened veto by the Soviet Union the Security Council was unable to form such a U.N. force.

During the treaty negotiations, President Carter, anticipating the possibility of a Soviet veto, provided each party, the Israelis and the Egyptians, with assurances that the United States would be prepared "to take those steps necessary to insure the establishment and maintenance of an acceptable multinational force."

House Joint Resolution 349 represents the culmination of that assurance. It is consistent with and supportive of commitments undertaken by the Reagan administration to implement President Carter's assurances regarding a peacekeeping force and has the support of the administration.

Mr. Chairman, the resolution provides authority for the President to assign U.S. military and civilian personnel to participate in the MFO.

It also provides a contribution of 60 percent of the MFO budget through fiscal year 1982, and 33⅓ percent for each fiscal year thereafter. This amounts to a U.S. contribution for the first year of $135 million in fiscal year 1982 for starting costs.

Further, it is expected that the annual U.S. contribution thereafter will be about $35 million for operating costs.

The resolution also provides authority for administrative and technical support and services to the MFO.

Mr. Chairman, because the authority to be granted to the President involves the commitment of U.S. armed personnel to serve in a peacekeeping function for an indefinite period, the Committee on Foreign Affairs has incorporated a number of safeguards on U.S. participation in this MFO.

Specifically, House Joint Resolution 349 stipulates that no more than 1,200 U.S. troops can be a part of the MFO at any one time. There is an important background to the placement of that ceiling on the number of U.S. troops that could participate. When this measure was first proposed by the executive only one country was willing to participate that was Fiji, with approximately 500 men. There was speculation as to whether other countries would take part. Our commitment to making this peacemaking operation work involved the belief it would be successful to the extent that other countries participated. In keeping with that view the committee did not feel that the United States should provide the bulk of forces there and certainly not all of the forces. Accordingly, we established this ceiling, to which of course the administration agrees.

As a safeguard the resolution therefore requires the President to notify the Congress of the number of countries participating in the MFO and to make every effort to have at least four other countries participating in the MFO.

I am pleased to announce that there are currently more than four countries considering participation in the MFO. The final commitment of these states is, of course, subject to their constitutional procedures and the ratification of their parliaments. But at the present time we do have Italy, England, Denmark, and the Netherlands, and I understand Australia and New Zealand are also considering it. In effect, the MFO will hopefully have participation from other European countries, which is very important.

I believe that we should have as many countries as possible and that our country not be the only country contributing to this peacekeeping operation.

The resolution, Mr. Chairman, also limits the activities of the MFO to the

peacekeeping functions specified in the Egyptian-Israeli peace treaty.

In addition, it requires the President to provide Congress with an annual report on the activities, composition, responsibilities, and deployment of the MFO, as well as all costs incurred by the U.S. Government as a result of our participation.

Finally, the measure stipulates that nothing in the joint resolution signifies congressional approval of any other agreement, understanding, or commitment made by the United States to participate in the MFO.

So I submit, Mr. Chairman, that the House Foreign Affairs Committee has established meaningful and reasonable limitations and safeguards.

In addition, House Joint Resolution 349 contains various provisions that assure and enhance effective congressional oversight of the U.S. role, participation, and commitment to the MFO in the future.

Under this legislation, Congress will be able to enact legislation terminating American participation or we can refuse in the annual authorization process for such participation.

The measure also provides Congress the opportunity to review the status of the MFO and American participation in it through the annual report it requires.

Finally, we will also have the chance to give approval or disapproval to other agreements which may be made in the Middle East for which the administration will have to request authority or funds in the future.

As I said earlier, the full committee unanimously adopted House Joint Resolution 349 with the understanding that U.S. policy in the Middle East is clearly directed to fostering conditions which will help to strengthen the peaceful relations between Egypt and Israel, and thus contribute to the creation of conditions in which the MFO will no longer be required, thereby confirming the temporary and interim role of the peacekeeping force.

□ 1500

Mr. Chairman, the establishment of the MFO represents an important step in the implementation of the Egyptian-Israeli treaty which, in turn, is the first step toward peace in the Middle East.

The agreements leading to the establishment of this force represent a major step in our search for a just and lasting peace in that troubled region.

In acting on the creation of this force, the United States remains fully committed to moving forward to carry out the second major undertaking of the Camp David process, the attainment of an acceptable agreement for the West Bank and Gaza consistent with the Camp David accords.

Mr. Chairman, in conclusion, the legislation is critical to the continuation and ultimate completion of the peacekeeping process in the Middle East. In the wake of the tragic assassination of President Sadat of Egypt, it becomes even more important for us to recommit our efforts to the full implementation of the treaty of peace.

House Joint Resolution 349 embodies that necessary next step which will hopefully culminate in permanent peace in the Middle East. Accordingly, I urge favorable adoption of this resolution.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I am delighted to yield to my colleague, the gentleman from Florida.

Mr. FASCELL. I thank the chairman for yielding.

Mr. Chairman, I just want to ask a couple of questions on the record.

First, let me say that I fully support the statement of the distinguished chairman of the Foreign Affairs Committee. I strongly support this resolution because I believe it will help carry out the peace process, but I want to get clear on the record the relationship between this resolution and the War Powers Act.

Am I correct that after all the aggravations and the excitement that the Congress has had about being in on the takeoffs rather than the landings with respect to foreign policy, that this is the first time that the Congress has legislated with respect to the positioning of troops abroad not actually engaged in combat?

Mr. ZABLOCKI. That is true. And I commend and applaud this administration for following to the letter the provisions of the War Powers Act by asking authority to send troops in a peacekeeping operation and, therefore, the answer to the gentleman is yes.

Mr. FASCELL. I understand from that, Mr. Chairman, that in supporting this legislation, the administration is complying with the spirit of the War Powers Act, making it possible to station U.S. troops abroad.

Mr. ZABLOCKI. Not only the spirit, but actually in fact.

Mr. FASCELL. It is also clear, then, is it not, that if the troops were to engage in combat because of some hostility that arises in the region, that their involvement; that is, the involvement of U.S. troops in those hostilities would be subject to the War Powers Act, and that is explicit in this legislation?

Mr. ZABLOCKI. Yes; as made clear by the report on this measure, Report No. 97-310, the executive branch has assured the committee that it will report under section 4(a)(2) of the War Powers Act (Public Law 93-48) when the U.S. contingent of the MFO is introduced into the Sinai. In addition, the executive branch has agreed that all the provisions of the War Powers Act will be applicable to the U.S. Armed Forces assigned to the MFO.

Mr. FASCELL. Therefore, it seems to me that the safety precautions that the chairman was talking about are threefold: First, you can withhold money.

Mr. ZABLOCKI. The gentleman is correct.

Mr. FASCELL. Second, you can come in and rewrite this legislation.

Mr. ZABLOCKI. The gentleman is absolutely right.

Mr. FASCELL. And third, you could act under the provisions of the War Powers Act.

Mr. ZABLOCKI. That is correct.

Mr. FASCELL. It seems to me there are enough safeguards there for the most cautious person to support this resolution.

Mr. ZABLOCKI. I would say to the gentleman from Florida, if that were not the case I would not be supporting this legislation.

Mr. FASCELL. I thank the chairman.

Mr. ZABLOCKI. Mr. Chairman, I reserve the balance of my time.

Mr. BROOMFIELD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, first I want to compliment our chairman of the Foreign Affairs Committee, Mr. ZABLOCKI, for the expeditious manner in which he has handled this legislation, and also the important colloquy that just took place as far as the war powers legislation is concerned.

Mr. Chairman, the legislation we have before us today represents an important step in the implementation of the Egyptian-Israeli Treaty which, in turn, is contributing to the search for a just and lasting peace in the Middle East. The resolution—which provides congressional authorization to the President to allow the participation of the United States in the multinational force to police the Sinai following Israel's withdrawal from that region next April—is the culmination of months of substantive U.S. negotiations as well as the professional counsel of the Foreign Affairs Committee, which has incorporated a number of safeguards in this resolution regarding U.S. participation in the multinational force.

It had been my hope that some kind of U.N. peacekeeping operation involving countries other than the United States could have been arranged to police the Sinai. However, when it became clear earlier this year that the U.N. Security Council, because of Soviet opposition, would not approve a United Nations peacekeeping arrangement to monitor the Sinai, the United States had to take those necessary steps as initially provided in the Camp David negotiations to establish an alternative multinational peacekeeping

force. In this regard, the present administration is to be commended not only for its intensive and creative diplomatic efforts with Egypt and Israel, but also with our friends in Europe, Latin America, and the South Pacific, who will join the United States in this newly arranged peacekeeping operation.

By approving this legislation today, we in the Congress have an opportunity to further the peace process in the Middle East. This opportunity, however, is not without risks to American participation, since we cannot take lightly the introduction of U.S. combat-equipped troops into such a volatile region of the world. Despite the potential risks which have been carefully and comprehensively considered by our Committee, I believe that it is necessary for the United States to remain a full partner in this endeavor and to put into place another essential building block in the structure of peace in the Middle East. As a result, I urge my colleagues to adopt the resolution before us.

Mr. ZABLOCKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana, the chairman of the Subcommittee on Europe and the Middle East, Mr. HAMILTON.

Mr. HAMILTON. Mr. Chairman, I rise in strong support of House Joint Resolution 349, a resolution to authorize the participation of the United States in a multinational force and observers (MFO) to implement the treaty of peace between Egypt and Israel.

It is critical to U.S. interests in the Middle East that the MFO be established and that it be enabled to carry out its functions efficiently and effectively. The establishment of this force represents an important step in the implementation of the Egypt-Israeli treaty which, in turn, is the first step toward a comprehensive peace in the Middle East. This legislation is clearly essential for the peace process in the Middle East. Without such a multinational force, the likelihood is that the implementation of the Egyptian-Israeli peace treaty would collapse. In the wake of the death of President Sadat of Egypt, this resolution is vital to reinforcing the U.S. commitment to the full implementation of the treaty of peace.

The treaty of peace between Egypt and Israel calls for the presence of a peacekeeping force and observers to monitor the parties' compliance with the terms of the treaty and to perform specified functions designed to enhance the mutual confidence of the parties. The treaty provides that this mission should be carried out by the United Nations. However, in response to a formal request from the Permanent Representative in Egypt, the President of the Security Council on May 18, 1981, reported that the members of the Council were unable to reach the agreement necessary for the United Nations to provide a force and observers as envisioned in the treaty.

This possibility had been foreseen and provided for during the treaty negotiations. In connection with the signing of the treaty, President Carter provided each party with a March 26, 1981, letter assuring them that, in the event the United Nations failed to provide a force:

> The President will be prepared to take those steps necessary to insure the establishment and maintenance of an acceptable alternative multinational force.

Pursuant to that assurance, Mr. Chairman, a U.S. delegation participated in negotiations between the Egyptians and Israelis which led to the protocol which established the MFO as the alternative force and elaborated upon the terms under which it would function. The role of the United States in the MFO was set forth in the exchange of letters of August 3, 1981, between the three parties. The letters are in the committee report.

The mission of the MFO is to undertake the functions and responsibilities stipulated in the Egyptian-Israeli Peace Treaty for the United Nations forces and observers which could not be created. The MFO will supervise the implementation of annex I of the Treaty and employ its best efforts to prevent any violation of its terms. Those duties will include operation of checkpoints, reconnaissance patrols, and observation posts, periodic verifications, usually every 60 days, of the implementation of the provisions of annex I of the treaty, additional verifications within 48 hours of a request from either party, and insuring freedom of navigation through the Strait of Tiran. Operation memoranda are now being prepared by the Commander of the MFO and the Department of State will be consulting with Congress on them.

OBLIGATIONS

The principal obligations of the United States in this arrangement are the following:

First, the United States agreed, subject to congressional approval, to contribute to the MFO a roughly 800-man infantry battalion, a 350-person logistics support unit, and a group of roughly 50 civilian observers. The light infantry battalion which the United States will provide will have normal equipment except it will not have heavy mortars, TOW missiles, tanks, APC's or artillery pieces. The number of civilian and military personnel provided by the United States will be approximately 1,214, slightly less than one-half the total complement of the MFO, which may approach 2,500 persons.

Second, the United States undertook certain financial commitments, subject to congressional approval. Beginning in fiscal year 1983, Egypt, Israel, and the United States will each provide one-third of the annual costs of the MFO, approximately $35 million for each country. During the period prior to September 30, 1982, there will be startup costs associated largely with necessary construction activities. The United States undertook, again subject to congressional authorization, to provide 60 percent of those costs, or $135 million, with Egypt and Israel dividing the remainder equally.

Third, the United States assured Egypt and Israel that it will take certain additional actions as required, and as appropriate, subject to congressional authorization. These include: Proposing a U.S. civilian to serve as Director-General of the MFO which has been done; a commitment to use our best efforts to find acceptable replacements for any contingents that withdraw from the MFO; and a commitment to take the steps necessary to insure the maintenance of an acceptable MFO.

Fourth, the United States, pursuant to a request from Egypt and Israel, has assumed a substantial role in approaching other countries about making troop contributions to the MFO. There have been encouraging developments. Colombia and Fiji have each agreed to provide a roughly 500-man battalion. Uruguay has agreed to participate and several of our allies are expressing strong interest in providing small support elements for the MFO such as air support, coastal patrol, and communications units. The composition of the force is expected to be finalized soon. Several of our allies, including France, Britain, the Netherlands, and Italy, have agreed to participate but the details on announcement of participation have not been worked out. It is essential that the multinational character of this force be maintained.

OVERSIGHT AND CONSTRAINTS

Mr. Chairman, House Joint Resolution 349 also assures adequate congressional oversight of the U.S. role, participation, and commitment to the MFO in the future:

Congress will have an annual opportunity through the authorizing legislation, to examine the MFO and approve American participation and financial support of the MFO;

As Commander in Chief, the President can order the immediate withdrawal of the American contingent from the MFO if he so desires. The President's ultimate ability to withdraw U.S. forces from the MFO can serve to deter unwise deployments of American personnel and can assure their removal if necessary. This right of withdrawal is recognized in para-

graph 3 of the Annex to the Protocol establishing the MFO. It was clearly understood by Egypt and Israel during the negotiating process that no state would surrender its ultimate sovereign right to direct the members of its armed forces;

The resolution limits U.S. military involvement to 1,200 individuals out of a total force of close to 2,500;

Congress will be able to review the status of the MFO and American participation in it carefully through the annual report required by the resolution; and

Congress will be able to give its approval or disapproval to other agreements which may be made in the Middle East for which the administration will have to request authority or funds in the future.

Mr. Chairman, in addition, it should be recognized that U.S. policy in the Middle East is clearly directed to fostering conditions which will help to strengthen the peaceful relations between Egypt and Israel, and thus contribute to the creation of conditions in which the MFO will no longer be required. Such circumstances could be created if Egypt and Israel and the United Nations are able to reach an agreement permitting the United Nations to assume the peacekeeping responsibilities as contemplated in the Treaty of Peace and that agreement is implemented, or if alternative arrangements acceptable to both Egypt and Israel are devised and implemented.

CONCLUSION

Mr. Chairman, I urge my colleagues to support this resolution, and to support efforts to insure that the force be truly multinational in character.

A vote for House Joint Resolution 349 is a vote for peacekeeping and peacemaking in the Middle East. I urge your support.

Mr. BROOMFIELD. Mr. Chairman, before I introduce the next speaker, I would wish to take a moment just to compliment the chairman of the Subcommittee on Europe and the Middle East, the gentleman from Indiana (Mr. HAMILTON), for the work that he has done on this legislation, because he has worked with both sides, the Republicans as well as the Democrats, to develop safeguards. I just want the gentleman to know that we deeply appreciate the excellent work he has done on this legislation. He has improved it very much.

Mr. Chairman, I yield 2 minutes to the ranking Republican on the subcommittee, the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Chairman, I am supporting this resolution because despite risks and hazards, it strengthens the peace between Egypt and Israel. The establishment of the multinational peacekeeping force and observers and U.S. participation in the MFO will enable Israel to return the Sinai to Egypt in April 1982 and will permit both Israel and Egypt to fulfill commitments made in their treaty of peace.

I am also supporting this resolution in the belief and expectation that it will stimulate further progress in the peace process. The next step, according to the Camp David framework, is the establishment of a self-governing authority to provide full autonomy in the West Bank and Gaza. The Egyptian-Israeli peace treaty is a milestone in the Middle East peace process; it should not be the final destination. The next step is toward full self-determination for the people who live in the West Bank and Gaza.

It is important to recognize, however, that this is a momentous undertaking which imposes on the United States grave new responsibilities and risks in the Middle East. The United States has committed the participation of its military personnel to the MFO whose duration is uncertain. Although the presence of U.S. Armed Forces in the Sinai is not to function as a "tripwire" or security guarantee in the event of renewed conflict in the Middle East, the fact that we are providing soldiers, not civilians, could create a certain presumption. Moreover, it could serve as a precedent for other borders and future agreements in the Middle East.

Such a commitment of U.S. armed military personnel for an indefinite time period to serve a peacekeeping function—in the absence of a security pact—is unprecedented in American history. Congress should authorize such a momentous and unprecedented undertaking only after serious consideration and with the understanding that there are significant responsibilities and potential risks involved for the United States.

For example, the Soviet Union, which blocked the creation of a United Nations peacekeeping force to monitor the treaty arrangements in the Sinai, will now certainly try to exploit the presence of U.S. military personnel in the Sinai as a sign of U.S. imperialism. And, although the prospect of war in the Middle East has diminished with the Egyptian-Israeli peace treaty, the region remains volatile and dangerous. The risks involved for the United States may well be less than were we not to participate in the MFO, but they exist nonetheless.

The United States is unwise to assume alone any peacekeeping responsibilities in the Middle East, and I am therefore heartened by the prospect that several of our historic allies, notably Britain and France, as well as others will join our forces.

I regret that Congress is authorizing U.S. participation in the MFO in the absence of widespread public discussion of this issue. It is not clear that the U.S. Government is taking this step with the full awareness of the country at large.

However, funds to support U.S. participation in the MFO must be authorized annually. This will afford the Congress the opportunity to review the contribution the MFO is making to the peace process and to encourage that process to move forward, and, if such is deemed advisable to terminate the U.S. preserve. To facilitate the congressional review, the committee has written into the legislation a provision which requires the executive branch, by January 15 of each year, to report to Congress on the activities, and composition, and deployment of the military personnel from each country participating in the MFO.

The report also requires the President to inform Congress of any U.S. discussions with Egypt and Israel regarding the possible reduction or elimination of the MFO. Another section of the report requires a full account of the costs incurred by the United States in supporting the MFO.

The bill before us seeks to protect U.S. interests with respect to MFO financial matters.

The United States, like other developed countries, will be fully reimbursed by the MFO for those expenses actually incurred. This will include such things as overseas allowances for the personnel and the costs of train transportation to the Sinai. At the same time, it is intended that the United States and other participating countries will exercise restraint in seeking reimbursement. For example, expenses incurred by a participating government primarily for its own convenience rather than to meet a requirement imposed by the MFO should not be charged to the MFO. We do not want participating military forces bringing more expensive equipment or using more expensive means for transportation than is reasonably required and then charging these costs to the MFO.

The bill includes extensive reporting requirements which will assure that the Congress is fully informed of all aspects of the finances involved. This will allow us to insure that the U.S. Armed Forces are reimbursed for the additional expenses they actually incur due to requirements imposed on them by the MFO. At that same time, our access to cost information will help to insure that the MFO is not being charged by any participating state for speculative costs or expenses it incurred at its own initiative.

Similarly, we have sought to insure that when the MFO purchases items from the U.S. Government, the United States will be reimbursed except where there is no significant incremental cost. Thus, if we buy trucks or food to supply to the MFO, we will be paid back for the full amount those

items cost. At the same time, we would expect the United States and other governments which may supply the MFO to forego administrative surcharges and similar add-ons. We must avoid implication that the United States or any other government is profitting at the expense of the MFO.

Mr. Chairman, I would like to join in expressing appreciation to the gentleman from Indiana (Mr. HAMILTON) for the leadership he has provided in the development of this legislation.

If I may, I would like to raise a question with the gentleman from Indiana based on the hearings that our subcommittee has had on this resolution.

I think it is well for our colleagues to be aware of the risks that are entailed by this mission. During the hearings, as I recall, questions were raised of administration witnesses as to what would happen in certain contingencies. For example, suppose military conflict on a rather large scale would break out? What would happen then? Would our forces as a part of the peacekeeping mission be expected to remain and fight, or would they have the opportunity and responsibility to withdraw from the field of battle in that event?

As I recall the hearings, that question could not be answered. Is that the gentleman's recollection?

Mr. HAMILTON. I think the key point is that in any deployment, the U.S. troop commander will always have recourse to the U.S. chain of command. And, of course, the ultimate safeguard is the power of the President to withdraw those troops.

Let us take the case where hostilities might break out, and perhaps a worst case situation, which we really would not expect to happen, where the commander of the MFO would try to commit the MFO to some kind of hostile action. In that event, the American commander of the American unit would have recourse to the U.S. chain of command, and that, of course, would include the President.

Mr. FINDLEY. And so far as the gentleman can recall from hearings, the administration did not present this as an obligation on the part of our forces to remain and fight in the event of general conflict; is that correct?

□1515

Mr. HAMILTON. That is correct. These troops are committed only for the purpose of carrying out the terms of the protocol and the treaty. That really is a police function. It is a monitoring function. They are not committed for purposes of any combat or any hostilities.

Mr. FINDLEY. I thank the gentleman.

The CHAIRMAN. The gentleman from Wisconsin has 13 minutes remaining.

Mr. ZABLOCKI. Mr. Chairman, I would request that as each speaker finishes, we could be advised of the time so that we know how much time we have left.

Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. SOLARZ).

Mr. SOLARZ. I thank the Chairman very much.

Mr. Chairman, I doubt that I will take the entire 5 minutes, but I did want to rise on behalf of this legislation because I think that it is critically important that it receive the approval of the House. Let me first of all pay tribute to the very distinguished chairman and ranking minority member of the full committee, as well as our extraordinarily able chairman of the Subcommittee on Europe and the Middle East, for the real thought and care and consideration which they have given to this legislation. It was potentially divisive legislation. It was the kind of resolution which could have aroused a good deal of concern, not only in the Congress but throughout the country. But, I think as a result of the effort that they put into it, thoughtfully addressing a wide variety of potential problems that may have arisen, we have been able to come forward to the House with a resolution that is relatively noncontroversial.

Let me just say that I think it is fairly clear that the Camp David agreement is the cornerstone of our foreign policy in the Middle East. I think it is probably fair to say that if this resolution were not adopted, it would significantly undermine the Camp David agreement and the peace treaty between Israel and Egypt.

As we all know, in April 1982 Israel will be obligated, pursuant to the terms of the peace treaty with Egypt, to withdraw from the rest of the Sinai, and following the assassination of President Sadat there is a good deal of probably ineradicable concern on the part of the Israelis over what will happen in terms of their relationship with Egypt once they have withdrawn from all of the Sinai. To the extent that the implementation of the Camp David agreement requires, following the withdrawal by Israel from the Sinai, the establishment of a multinational force in that area in order to make sure that both Israel and Egypt live up to their commitments and obligations under the terms of the treaty, if the United States were to refrain from participating in that force, the force would never be established at all.

Originally, we had hoped that a United Nations force could be established, but unfortunately the Soviet Union vetoed the resolution in the Security Council, and that alternate came to nought. The only way is, if a peace keeping force could be established on an ad hoc multinational basis, with the United States taking the lead in bringing about the formation of that force. We have done that, and now we have a resolution before us which would authorize the appropriation of the resources which will be necessary to fund it.

It seems to me that the Camp David agreement and the peace treaty between Israel and Egypt are the one ray of light down a long tunnel of darkness and despair. Nobody can possibly be optimistic about a comprehensive solution of the conflict between Israel and the Arabs in the Middle East in the foreseeable future, but to the extent that there is any possibility whatsoever of achieving progress in resolving the differences between Israel and its Arab neighbors with respect not only to the future of the Palestinians, but with respect to the territorial status of Golan and the West Bank, Gaza and East Jerusalem and the question of the Palestinian refugees, that hope, that prospect, that possibility lies in continuing progress and implementing the terms of the Camp David agreement.

Other countries, like Saudi Arabia, can come forward with plans of their own, but any deviation from the Camp David process is virtually guaranteed to fail. If we did not authorize this resolution today, if we walk away from the commitments we made to Israel and Egypt at the time of the Camp David agreement, then the whole peace process would fall apart.

I say to those Members of the House who are concerned that American troops might somehow or other, willy-nilly, get involved in fighting in the future in the Sinai if we send American soldiers to participate in this peacekeeping force, that the prospect for American participation in any future conflict in the Middle East will be substantially diminished if the Camp David agreement is carried out and we send our troops pursuant to this resolution, than if we do not, because if the peacekeeping force were never established and the peace treaty between Israel and Egypt collapses, the chances are that there would be another war in the Middle East in the relatively near future.

We all know what happened in 1973 at the time of the Yom Kippur War between Israel and the Arabs. There was a stage in that conflict when the Soviet Union mobilized six airborne divisions so that they could be sent at a moment's notice into the Sinai to rescue the Egyptian 3d Army which had been surrounded by Israeli troops. President Nixon put our own forces on a nuclear alert. We went to the very brink of conflict with the Soviet Union.

I think most of us would probably accept the fact that if a Third World war breaks in our lifetime, it is much more likely to break out from a regional conflict that escalates into confron-

tation between the superpowers than it would from some kind of sudden surprise bolt from the blue attack. In that sense, if another world war is going to erupt from any regional conflict in the world, it is likely to emerge from a conflict in the Middle East. That is why this resolution, the Camp David agreement and the peace treaty, and the peace process to which we have invested so much and to which we have lent so much momentum, is at stake when the House takes up this resolution today, and I am confident that it will be approved.

Mr. BROOMFIELD. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, I want to compliment my friend from New York (Mr. SOLARZ), as well as the distinguished chairman of the committee and my friend from Michigan (Mr. BROOMFIELD), and particularly identify myself with the remarks that were made by Mr. SOLARZ, my colleague from New York. In an articulate a fashion as we have ever heard in this body, he explained that the best hope for a just resolution of the problems facing the nations of the Middle East does not reside in some theoretical comprehensive settlement that is off somewhere in the clouds, on the drawing board of some third-party nation trying to interject itself into the Middle East peace process. It resides in the Camp David accords—negotiated in large part by the previous President, Mr. Carter, to whom I give great credit—and wholly and properly supported by this administration.

The peace process embodied in Camp David offers the only hope for a just resolution of the troubles that have beset the Middle East for so many years. The longing of all people in that region to live in peace and freedom within secure and recognized boundaries hinges upon the continuing success of the Camp David framework. And the interests of the United States in maintaining the stability and security of our friends and allies in the region mandate our unwavering commitment to the peace process begun by the late President Sadat's historic visit to Jerusalem.

We are a mere 5 months from the major performance required by the peace treaty: Israeli withdrawal from the Sinai, scheduled to be completed by April 25, 1982. Under the terms of the peace treaty, a peacekeeping force must be in place prior to that date.

Early on in President Reagan's term in office it became clear that the Soviet Union would block U.N. forces from fulfilling the peacekeeping role mandated by Camp David. Rather than let Soviet obstructionism undercut Camp David, the administration has formulated with Israel and Egypt a new avenue for meeting the peacekeeping requirements: a multinational force and observers.

The United States participation in the multinational force and observers in the Sinai is a sine qua non to the implementation of the Camp David accords, and thus to strengthening the prospects for a just peace.

Of course, there is a risk involved in placing U.S. personnel in the Sinai in this manner. But, what is the risk of not doing it? We face a greater risk should those accords break down as the gentleman from New York pointed out, and give rise to the hostilities that have beset that particularly troubled area of the world too often in the past.

The gentleman from New York, as I said before, put his finger on I think the most important reason why the United States should participate and why the United States is participating in this MFO force. We have a heavy investment in Camp David as a step-by-step process toward peace in the Middle East, and that investment and all the capital that we put into the Camp David accords must not by cast aside here today by our reluctance to take the hard steps necessary to support the continuation of the Camp David process.

Let me say one other thing that has not been said by the gentleman from New York, and which he perhaps could have more eloquently phrased: Israel has taken a tremendous risk in the Camp David accords. In large part, Israel is moving back to the 1967 border. Not only are they giving up the Sinai, they are giving up the oilfields, they are giving up Etam, the Etzion Air Base, they are giving up the communications base at Sharm el Sheikh. They are giving up three of the single most important military bases in all the Middle East.

Now, I personally would prefer to see the United States take up a ground presence somewhere in the Sinai. We have forced Israel back into the Negev Desert, sharply constraining their ability to maneuver in their own defense. Their air bases, in which the United States invested so much, are going to be in the Negev, which, as I said before, reduces Israel's ability to defend its territory. Nevertheless they have agreed to relinquish the Sinai. Not only have they moved back to the 1967 southern border absent the Gaza Strip, but as I mentioned, they are also giving up rich oilfields. Name any other nation anywhere in the world today that would be willing to give up that precious resource of oil.

I think we ought to stand fast in supporting this MFO concept. And I am hopeful that other nations in the region—such as Jordan and Saudi Arabia—may come to appreciate that their security and stability is best served by joining forces to promote peace, rather than pursuing separate solutions which in reality are no solution at all.

Mr. SOLARZ. Mr. Chairman, will the gentleman yield?

Mr. KEMP. I yield to my colleague.

Mr. SOLARZ. Mr. Chairman, I thank the gentleman for yielding. I do not think there is any Member of the House who has done more to support the peace process from his position in Congress than the gentleman from New York, and I have seen him not only on the floor but in the Budget Committee, on which we both serve, take positions which have been most helpful in that respect.

I think the point the gentleman made concerning the extent of the sacrifices and concessions which Israel has already made in the context of the Camp David agreement is very well taken, but I think there is one additional point that needs to be made; that is what President Sadat demonstrated when he made his historic journey to Jerusalem and the subsequent negotiations between Israel and Egypt, is that even from the Arab point of view much more can be achieved in the relationship with Israel in the context of conciliation than in the context of confrontation, because he was the first Arab leader in three decades who was willing to say publicly from the podium of the Knesset, no less, that Israel was entitled to exist and that he was prepared to enter into diplomatic relations with it. Once he said that, it facilitated a real breakthrough in resolving the real differences between Israel and Egypt.

If only King Hussein of Jordan and President Assad of Syria and Saudi Arabia would come to Jerusalem——

Mr. KEMP. I am going to take my time back, not because I do wish to interrupt my friend, but simply because my time has expired, and I do not want to impose upon my colleagues. My friend, Mr. SOLARZ, has just hit upon my closing thought: That this is a symbol of what can be done on the West Bank.

The Israelis are willing to take a risk for peace, but not at the expense of their survival and security, and they should not. I hope that other nations in the Arab world will join the process, such as the Sudan and Morocco, including the Saudis and the Jordanians, so that we can have a true and lasting peace in the Middle East.

I appreciate my friend from Michigan for his progressive leadership in this area.

The CHAIRMAN pro tempore. The Chair will announce that the gentleman from Wisconsin (Mr. ZABLOCKI) has 8 minutes remaining, and the gentleman from Michigan (Mr. BROOMFIELD) has 20 minutes remaining.

□ 1530

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Chairman, obviously what I am going to say will not be remembered by any of the Members after the exchange just a moment ago between the two intellectual giants from the State of New York, but I would like to at least express my personal views on this subject.

I rise in support of House Joint Resolution 349, authorizing the United States to take part in a multinational force and observers (MFO) to help carry out the treaty of peace between Egypt and Israel. Camp David was the result of U.S. diplomatic initiative and the peacekeeping force is a necessary part of the ongoing peace process.

First, let me say that the repeated references by some Members to the risks involved, intrigue me. I do not think there are any risks whatsoever. I think, as a matter of fact, that for many U.S. servicemen who are assigned to this duty it will probably be the best assignment outside of Hawaii. Why? Because the Egyptians and Israelis have developed a degree of cooperation that is unparalled. They trust each other; their militarys respect each other. The reason they want the U.S. presence is because they respect and trust us. We could not have a better deal.

It is the leadership of the United States which is being demonstrated, with the understanding that the Israelis and the Egyptians have reached that they are going to progress far better in trade, in communications, and in peace, which they are doing. I see absolutely no danger whatsoever.

In fact, in my personal opinion, the biggest problem facing our troops in that tour of duty will probably be possible exposure to the Sun. Beyond that they are not going to have any military or personal dangers involved at all.

Furthermore, I see this as an absolutely necessary step to keep up the peace momentum. We still have that peace momentum. Despite their massive presence via military hardware in Syria and Iraq, the Soviets are not the key to peace in that area. In fact, they are the key to trouble.

It is the moderate Arab countries that will eventually come over and join Egypt, and with everybody working with what I think is a very progressive, innovative, and courageous Israeli regime, which was willing to take the risk involved in Camp David accords that is producing the peace, our role, which gives the leverage and the leadership, is necessary.

The main purpose of this resolution is to provide for congressional authorization for the participation of the United States in the MFO to implement the Egyptian-Israeli Peace Treaty.

Under the terms of this authorization, the United States will provide 1,200 troops to take part in the MFO. Together with members of the armed forces of Fiji, Colombia, and other countries, U.S. military personnel will help supervise the implementation of the treaty of peace dealing with final Israeli withdrawal from the Sinai on April 25, 1982, and to help monitor compliance with the treaty after that time.

The MFO will assume its duties on April 25, 1982, the date of the final withdrawal of Israeli forces and the return of the Egyptians to the area.

Mr. Chairman, it is critical to the interests of the United States in the Middle East that the multinational force and observers be established. This entity is a major step in the implementation of the Egyptian-Israeli Treaty which, in turn, is a major step toward peace in the Middle East. The agreements leading to the establishment of this force represent an important initiative in our search for a just and lasting peace in that troubled region.

The legislation is essential for the peace process in the Middle East. Without such a multinational force, it is probable that the implementation of the peace treaty would collapse. Therefore, the MFO reinforces the U.S. commitment to the full implementation of the Egyptian-Israeli Treaty of Peace.

I fervently hope that the MFO will foster the conditions that will strengthen the peaceful relationship between Egypt and Israel. The United States remains fully committed to carrying out the second major undertaking of the Camp David process—the attainment of an acceptable agreement for the West Bank and Gaza consistent with the Camp David accords.

Mr. Chairman, I would think that all of us should be anxious to support this very progressive foreign policy step.

Mr. ZABLOCKI. Mr. Chairman, I yield 2 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Chairman, I thank the committee chairman for yielding me this time.

I would like to associate myself with the remarks of the distinguished gentleman from Illinois (Mr. DERWINSKI), who just spoke, because he spoke of the momentum for peace. There is only one process that has produced that momentum in that region in recent history, and that is the Camp David process. Even the small hint that we might be backing off that process or abandoning it in some way is, I think, very alarming to many of us on both sides of the aisle and to a good chunk of the American public which applauded and has applauded that process and the principles involved in it.

But, of course, it is even more frightening to people in the region who believe in the process, the people in Egypt and the people in Israel.

Some of us, through the fine auspices of the distinguished chairman of the committee, the gentleman from Wisconsin (Mr. ZABLOCKI), had the opportunity to meet with Moshe Nissim and Ambassador Herzog this past week, and I think my colleagues will support me on this statement that their description of the arms buildup in some of the states such as Saudi Arabia and Iraq was absolutely horrifying in its dimensions. We must as Americans, despite our apprehension about American involvement in conflict, be willing to take a small step to bring peace through a process which has shown such great promise.

Mr. Chairman, I applaud the committee, its distinguished chairman and ranking minority member, and all the members of the committee for bringing this legislation to the floor, and I urge strong support for it.

Mr. BROOMFIELD. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. LAGOMARSINO), a member of the committee.S0679

Mr. LAGOMARSINO. Mr. Chairman, I rise in strong support of House Joint Resolution 349, to authorize U.S. participation in the Sinai peace force.

I join in commending the Chairman and Ranking Member of the Full Committee and those of the Subcommittee.

As a co-sponsor of this measure, I wish to emphasize the vital importance of the U.S. participation in the Sinai peace force as a continuing step in the Camp David process. There has been a great deal of speculation recently as to the U.S. commitment to Camp David. The administration affirms the United States has not backed away from full support for the terms of Camp David. Our passage of this resolution will demonstrate that we the Congress as well as the administration have not lessened our resolve to promote a just and lasting peace in the Middle East.

While it is not clear at this point what the exact makeup will be for the multilateral force, there are firm commitments from Fiji, Colombia, and Uruguay to sent troops and from Norway to provide the commander of the force, The participation of the Common Market countries, Great Britain, France, Italy, and the Netherlands—when they actually commit troops to the Sinai force—will mark a small but significant step in European acceptance of the Camp David process.

It would be a very positive move supporting Egypt's and Israel's efforts to

achieve a peace settlement in the Middle East.

Australia has also agreed to participate, and I would like to commend the chairman of the full committee, the gentleman from Wisconsin (Mr. ZABLOCKI), for the efforts he made in encouraging the Australians to make that decision. I would commend the administration for their successful efforts in getting other countries to participate and, as I said, special commendation is due the committee chairman in encouraging the Australian Government to join the effort.

Mr. Chairman, I would also like to quote to the Members some things that Prime Minister Malcolm Fraser said in announcing his support of this process.

He said the following:

The Australian Government believes that this multinational peacekeeping force is a significant step for peace. It is not a decision which is pro-Arab or pro-Israeli. It is a decision which is pro-peace. It is a decision which could never have been made had President Sadat not taken his historic initiatives.

Prime Minister Fraser went on to say this:

President Sadat took great political risks in initiating and persevering with the peace process and it is vital for his successors who have committed themselves to support that peace process that the remaining third of Sinai still under Israeli control be regained by Egypt in April 1982;

The failure of Australia and other Western countries to participate would require the United States to bear the burden itself and would be seen as a failure by the West to support the United States' policies in the Middle East. This would risk giving propaganda opportunities to the Soviet Union, whereas participation in peacekeeping would encourage constructive United States involvement in efforts to bring about a lasting settlement of Arab/Israeli differences;

Mr. Chairman, I commend these two Middle East nations, Israel and Egypt, for their unflagging effort to arrive at a negotiated settlement, and I urge my colleagues to give their support to Egypt and Israel by approving this measure today.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from North Carolina (Mr. HARTNETT).

Mr. HARTNETT. Mr. Chairman, perhaps my fellow colleagues think perhaps it is strange for this deep-rooted conservative from South Carolina to rise and ask these questions, but we have said to Americans, poor Americans, elderly Americans, aging and sick Americans, American students, and American veterans, that we have to tighten up; we have not got the money that we had. We have told them that we have got to cutback and we have got to slash the budget. Yet we still raise and continue to raise money for foreign aid.

We continue to send millions and millions of dollars to foreign countries, and we deprive our own people of the necessities of life.

How long are we committing this peace-keeping force to this area of the world? I wish the chairman and the ranking minority member of the committee would perhaps listen, and maybe in their remarks they could answer these questions.

How long are we committing these U.S. troops? If hostilities break out, who do we fight, Israel or Egypt, or do we fight both?

If Israel refuses to withdraw, do we make them withdraw, or do we withdraw?

If there is no need for this, if these countries are getting along full well, maybe we ought to reexamine this agreement to send this force over there.

What other countries are going to participate? Uruguay, Fiji, and Colombia. What staying power do these other countires have?

Suppose two countries withdraw; do we have to then, under this agreement, have the duty to go out and recruit two other countries?

Suppose we decide to withdraw. Is that an indication of America's lack of will to stay and see that the peace accord is carried out? How can we graciously withdraw from this area of the world?

By this resolution we are committing young men and women not necessarily as my distinguished colleague, the gentleman from Illinois (Mr. DERWINSKI), said; we are committing young men and women to a potentially hostile military zone. But if they are not going to fight, why send them? If they do have to fight, who will they fight?

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. HARTNETT) has expired.

Mr. BROOMFIELD. Mr. Chairman, I yield 1 additional minute to the gentleman from South Carolina (Mr. HARTNETT).

Mr. HARTNETT. Mr. Chairman, I thank the gentleman for this time. After all, this is the only side we have heard from in regard to any position other than all the glorious reasons for this particular resolution.

I am concerned that if the United States finds it necessary to withdraw her troops, will that be an indication of our withdrawing our support for this Israeli-Egyptian peace agreement? If not, how long do we have to leave them, and what is going to be the cost in foreign aid to that area of the world?

Mr. Chairman, when we have told our own people we cannot afford to do for them what we would like to do any longer, I have to raise these questions. We have said that we have to cut our budget and tighten our belts.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Chairman, I thank my colleague for yielding me this time.

There are many points of view, and it is time that all should be expressed in this House. But I think it is a fairly simple proposal that comes before us today for decision.

I think we all know that two Presidents now have indicated as much, that we could not remain totally indifferent to real trouble in that area, that Japan and all of Europe and a great deal of our own interests would be involved. We could not stay apart from that and just say, "too bad" and move away. And if we should become involved, the cost that would be incurred would be tremendous, as compared to this—I think it is $20 or $30 million we would be incurring, as the gentleman said, year after year.

But the problem here is that Sadat is dead. The problem here is that we have not anything that is reassuring in that whole area, now that that solid, gracious man has left the scene. And under these conditions, for the United States not to live up to that which she has committed herself to would be a disgrace for us and, I think, a danger to the world.

We should not withdraw from the promises that we have made, and when you think of the vacuum that the departure of Sadat has left, certainly it is impossible to imagine another departure from the same scene. I think Sadat's death is one of the serious things that has happened to the world. I do not know how we can repair it, but we should not add to the damage.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Colorado (Mr. BROWN).

Mr. BROWN of Colorado. Mr. Chairman, I rise in opposition to this measure.

It was 16 years age that this Nation of ours asked for volunteers in its Armed Forces to volunteer for service in Vietnam. Our country's leaders called on the youth of this Nation, and our youth responded by the hundreds of thousands. They interrupted their education, they took up to a year away from their families, and, yes, who were willing to risk their lives as well.

Those young people who served in our Armed Forces made a commitment to this country. A commitment that this country and its leaders expected them to make. And what kind of a commitment did our leaders make to those who served?

The facts are clear that our leadership was never able to decide whether to win the war or pull out. Faced with two unpleasant alternatives, this country's leaders, both in the Congress and the various Presidents who served during this period refused to make a decision. They watched Americans die

in Vietnam while they were unable to select a course of action.

□ 1545

I believe this country has a responsibility to those who are willing to serve in the Armed Forces.

Drawing on the lessons of Vietnam, the President has pledged not to send American troops into combat without a commitment to win.

We find ourselves, with this measure, sending American Armed Forces to a potential theater of military conflict. It would be tragic for this body to risk American lives where Congress is unwilling to meet our responsibilities to those who wear our countries uniform.

The CHAIRMAN pro tempore. The time of the gentleman from Colorado has expired.

Mr. ZABLOCKI. Mr. Chairman, I yield the gentleman from Colorado (Mr. BROWN) 1 additional minute.

Mr. PHILLIP BURTON. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Colorado. I am glad to yield to the gentleman from California.

Mr. PHILLIP BURTON. I respect our distinguished colleague in the well as I respected his distinguished predecessor. However, I do not think that the gentleman's observations are justified by the situation.

I yield virtually to no one in this House or in the other body for the hopefully consistent and persistent opposition I had to the war in Vietnam when there were few or virtually none in this body or the other body that held that point of view.

This particular situation is the mirror image, if you will, if I am using the right analogy, to that we had in Vietnam. The American presence there, in fact is going to serve the cause of peace. Our presence there is requested by these two nations who previously had been hostiles, who are groping to improve on their current peaceful relationship, both of whom believed our presence serves a positive purpose in that respect.

I applaud the judgment that produced this resolution.

Mr. WEISS. Mr. Chairman, I rise in strong support of House Joint Resolution 349, which authorizes our Nation's participation in a multinational force of observers helping to implement the Israeli-Egyptian peace treaty. U.S. participation can help make this step in the Mideast peace process go smoothly and effectively.

The peace treaty requires the final withdrawal of Israel from the Sinai Peninsula no later than April 25, 1982. The presence of a multinational force of observers overseeing the transition following Israel's withdrawal will insure compliance with provisions of the treaty and help foster peaceful relations between the people of Israel and Egypt.

The resolution limits the number of American servicemen in this force to 1,200, which is sufficient to guarantee that the force will be able to complete its mission but which also requires other nations to participate. This authorization for American participation was necessitated by the fact that the United Nations was unable to appoint a force for this project. I believe it is commendable that this Congress sees fit to step in to fill what might be a dangerous gap. By making certain that the Israeli-Egyptian peace treaty will be met at this important juncture, the United States really is supporting and protecting our Nation's greatest goal—peace.

Achieving real and lasting peace in the Mideast is one of our Nation's highest priorities, as it has been historically. House Joint Resolution 349 marks an important step forward in following through in our commitment to Mideast peace. I urge support for this legislation.

● Ms. FIEDLER. Mr. Chairman, in approving the deployment and funding of the U.S. participation in the multinational force in the Sinai, we are giving notice to the world that we are prepared to offer something more than rhetoric in the service of continuing the Middle East peace process. We are willing to send troops as part of this multinational force at the request of both Israel and Egypt, to monitor the progress of the implementation of the Camp David accords. In doing so, we are recognizing our responsibilities toward the peace of the world. For better or—more often—for worse, we live in a world whose geopolitics are dominated by the two superpowers. If we have become one of these superpowers, then we must use our power, our prestige, and position to try, with whatever skill we may have, to benefit our citizens and our allies. It remains a fact that peace and stability in the world benefits the United States. It hurts the other superpower. It hurts those who would infect with their ideology every people who would strive for land and bread. It hurts the terrorist, the ideologue, the militatist. The multinational force will be very much soldiers for peace.

That this force is to be sent into Sinai is a sign that lines on a map must not become uncrossable barriers to peace. In 1973, thousands of Egyptians and Israelis died to decide which nation should control Sinai. Today, our multinational force shall see that it shall change hands with nothing more than ink flowing. I do not think I am foolishly optimistic that the Middle East peace process can continue because I now see the lines on the map being redrawn in Sinai. In an area of peoples and cities half as old as time itself, borders and boundaries can be the thing of a summer's afternoon. How many lives should, or must, be lost because a nation insists on boundary line A rather than boundary line B? How long should those who profit through hatred and instability be given carte blanche? I say, no more.

I am not here to argue about the 1948 boundaries, the 1967 boundaries, the 1973 boundaries, partition lines, the Allon lines, or any other lines. I believe that we do have the foundations for a settlement that can embrace other Arab nations while insuring the security of Israel. Israel has already taken risks for peace. We cannot ask that nation to take on more risks without showing that it can count on the full support of the United States. But with this support comes the responsibility to take real and genuine steps to fully implement the Camp David accords, to show the world that the United States does not have the patent on peace.

In approving the U.S. participation in this mutinational force, the House of Representatives has shown itself to be aware of its responsibilities as a part of the foreign policy process. From this responsibility comes our further—and greater—responsibility toward peace in the Middle East.●

● Mr. SMITH of Alabama. Mr. Chairman, earlier today I cast my vote in support of House Joint Resolution 349, legislation authorizing U.S. participation in the implementation of the Israeli-Egyptian treaty. Under the terms of this bill, the United States will oblige itself to contribute American troops and operating costs for the creation of the peace keeping "multinational force and observers" agreed to freely by both Israel and Egypt, and provided for specifically in their 1979 treaty.

I cast this vote after much serious deliberation, as is fitting when committing Americans to participation in such a project. We are not committing troops to combat; that would require separate congressional action. Nevertheless, the Middle East is a volatile area and this vote required a serious sense of purpose.

I regret that the Soviet Union has used its power in the United Nation's Security Council to block the United Nations from accepting its proper role in the development of peace keeping forces. Nevertheless, it is essential the burgeoning peace between Israel and Egypt be nurtured and permitted the opportunity for permanence.

The Camp David agreement is a viable solution—our best option. The United States remains firmly dedicated to the Camp David accords and considers it the principal vehicle for achieving peace in the Middle East.

We are helping nations keep peace—a worthy goal. Let us pray that peace, permanent peace, becomes a reality.●

● Mr. GILMAN. Mr. Chairman, I rise in strong support of House Joint Reso-

lution 349, a resolution to authorize U.S. participation in a multinational force and observers (MFO) to help carry out the treaty of peace between Egypt and Israel.

The creation of the MFO is a major step in the implementation of the Egyptian-Israeli Peace Treaty. U.S. participation is crucial to the success of this effort which represents the only viable and ongoing initiative in our search for a just and lasting peace.

Without the MFO, the future of the peace treaty is in doubt. The attainment of further agreements including an acceptable resolution for the key areas of the Judea and Samaria will be in doubt. This resolution is vital to reinforce the U.S. commitment and that of other parties who are supporting the full implementation of the Egyptian-Israeli Treaty of Peace.

Our Nation's support of this effort will have a significant impact in the broader efforts to encourage other nations to participate in MFO as well as the peace process. I hope and believe that this important step will strengthen the peace process and thereby bring closer the day when the MFO will no longer be needed.

As a cosponsor of House Joint Resolution 349, I urge all of my colleagues to join with me in support of this important resolution.●

● Mr. SMITH of Oregon. Mr. Chairman, I submit that those who forget the past are condemned to repeat it.

Before entering office, I assured my constituents that I would not vote to commit our youth to keep the peace in another jungle like the one I faced in Vietnam.

While I realize the importance of a Mideast peace, I also know that providing an infantry battalion, a logistical support unit, and a group of civilian observers only makes the sands of the Middle East look more and more like a jungle with every dollar thrown at the effort. The $125 million committed to a multinational force could be better spent to bolster our own ailing economy here at home.

When the Egyptian-Israel Peace Treaty was signed in 1978, it was understood that a United Nations peacekeeping force would be installed to monitor compliance of the two nations with the treaty. But because the Soviet Union was successful in its attempt to block the authorization of this peacekeeping force in the U.N. Security Council, we are being asked to foot 60 percent of the bill, 1,200 young men, and the majority of the responsibility for the maintenance of another multinational force (the President will be responsible for replacing any member nations when the total drops below four) whose effectiveness might be accepted as being questionable at best.

I joined with 12 other Representatives who refused to vote to support the sending of dollars and men to guard foreign soil because of a strong Soviet effort to thwart a weak U.N. If such a force must be fielded, the dollars used to support it should more appropriately come from the United Nations of which we fund by 25 percent.●

Mr. BROOMFIELD. Mr. Chairman, I have no further requests for time.

Mr. ZABLOCKI. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk read as follows:

H.J. RES 349

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This joint resolution may be cited as the "Multinational Force and Observers Participation Resolution".

STATEMENT OF POLICY

SEC. 2. The Congress considers the establishment of the Multinational Force and Observers to be an essential stage in the development of a comprehensive settlement in the Middle East. The Congress enacts this resolution with the hope and expectation that establishment of the Multinational Force and Observers will assist Egypt and Israel in fulfilling the Camp David accords and bringing about the establishment of a self-governing authority in order to provide full autonomy in the West Bank and Gaza.

PARTICIPATION OF UNITED STATES PERSONNEL IN THE MULTINATIONAL FORCE AND OBSERVERS

SEC. 3. (a)(1) Subject to the limitations contained in this resolution, the President is authorized to assign, under such terms and conditions as he may determine, members of the United States Armed Forces to participate in the Multinational Force and Observers.

(2) The Congress declares that the participation of the military personnel of other countries in the Multinational Force and Observers is essential to maintain the international character of the peacekeeping function in the Sinai. Accordingly—

(A) before the President assigns or details members of the United States Armed Forces to the Multinational Force and Observers, he shall notify the Congress of the names of the other countries that have agreed to provide military personnel for the Multinational Force and Observers, the number of military personnel to be provided by each country, and the functions to be performed by such personnel; and

(B) if a country withdraws from the Multinational Force and Observers with the result that the military personnel of less than four foreign countries remain, every possible effort must be made by the United States to find promptly a country to replace that country.

(3) Members of the United States Armed Forces assigned or detailed to the Multinational Force and Observers may perform only those functions or responsibilities which are specified for United Nations Forces and Observers in the Treaty of Peace and in accordance with the Protocol.

(4) The number of members of the United States Armed Forces who are assigned or detailed by the United States Government to the Multinational Force and Observers may not exceed one thousand two hundred at any one time.

(b) Subject to the limitations contained in this resolution, the President is authorized to provide, under such terms and conditions as he may determine, United States civilian personnel to participate as observers in the Multinational Force and Observers.

(c) The status of United States Government personnel assigned to the Multinational Force and Observers under subsection (a)(1) or (b) of this section shall be as provided in section 629 of the Foreign Assistance Act of 1961.

UNITED STATES CONTRIBUTIONS TO SHARED COSTS

SEC. 4. (a) In accordance with the agreement set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981, the United States share of the costs of the Multinational Force and Observers—

(1) shall not exceed 60 per centum of the budget for the expenses connected with the establishment and initial operation of the Multinational Force and Observers during the period ending September 30, 1982; and

(2) shall not exceed 33⅓ per centum of the budget for the annual operating expenses of the Multinational Force and Observers for each financial year beginning after that date.

(b)(1) There are authorized to be appropriated to the President to carry out chapter 6 of part II of the Foreign Assistance Act of 1961, in addition to amounts otherwise available to carry out that chapter, $125,000,000 for the fiscal year 1982 for use in paying the United States contribution to the budget of the Multinational Force and Observers. Amounts appropriated under this subsection are authorized to remain available until expended.

(2) Expenditures made pursuant to section 138 of the joint resolution entitled "Joint resolution making continuing appropriations for the fiscal year 1982, and for other purposes", approved October 1, 1981 (Public Law 97-51), or pursuant to any subsequent corresponding provision applicable to the fiscal year 1982, shall be charged to the appropriation authorized by this subsection.

NONREIMBURSED COSTS

SEC. 5. (a) Any agency of the United States Government is authorized to provide administrative and technical support and services to the Multinational Force and Observers, without reimbursement and upon such terms and conditions as the President may direct, when the provision of such support or services would not result in significant incremental costs to the United States.

(b) The provision by the United States to the Multinational Force and Observers under the authority of this resolution or any other law of any property, support, or services, including the provision of military and civilian personnel under section 3 of this resolution, on other than a reimbursable basis shall be kept to a minimum.

REPORTS TO THE CONGRESS

SEC. 6. (a) Not later than April 30, 1982, the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a detailed written report with respect to the period ending two weeks prior to that date which contains the information specified in subsection (b).

(b) Not later than January 15 of each year (beginning in 1983), the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the

Committee on Foreign Relations of the Senate, a written report which describes—

(1) the activities performed by the Multinational Force and Observers during the preceding year;

(2) the composition of the Multinational Force and Observers, including a description of the responsibilities and deployment of the military personnel of each participating country;

(3) all costs associated with United States participation in the Multinational Force and Observers which were incurred during the preceding fiscal year and for which the United States was not fully reimbursed, with an explanation of why the United States was not fully reimbursed for each category of cost;

(4) all such costs for which the United States was fully reimbursed; and

(5) the results of any discussions with Egypt and Israel regarding the future of the Multinational Force and Observers and its possible reduction or elimination.

(c) The reports required by this section shall be as detailed as possible. The information with respect to any administrative and technical support and services provided on a nonreimbursed basis under section 5(a) of this resolution shall include a description of the types of support and services which have been provided and an estimate of both the total costs of such support and services and the incremental costs incurred by the United States with respect to such support and services.

(d) For purposes of the reports required by this section, the term "costs" means any costs, whether normal or incremental, which are incurred by the United States Government, including—

(1) contributions to the budget of the Multinational Force and Observers;

(2) the costs associated with the members of the United States Armed Forces or the United States civilian personnel who are assigned, detailed, or otherwise provided to the Multinational Force and Observers, including pay, retirement and other benefits, transportation, and housing; and

(3) the costs associated with any other property, support, or services of any kind made available (by means of grant, sale, loan, lease, or any other means) by the United States Government to the Multinational Force and Observers.

STATEMENTS OR CONGRESSIONAL INTENT

SEC. 7. (a) Nothing in this resolution is intended to signify approval by the Congress of any agreement, understanding, or commitment made by the executive branch other than the agreement to participate in the Multinational Force and Observers as set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981.

(b) The limitations contained in this resolution with respect to United States participation in the Multinational Force and Observers apply to the exercise of the authorities provided by this resolution or provided by any other provision of law. No funds appropriated by the Congress may be obligated or expended for any activity which is contrary to the limitations contained in this resolution.

DEFINITIONS

SEC. 8. As used in this resolution—

(1) the term "Multinational Force and Observers" means the Multinational Force and Observers established in accordance with the Protocol between Egypt and Israel signed on August 3, 1981, relating to the implementation of the security arrangements of the Treaty of Peace; and

(2) the term "Treaty of Peace" means the Treaty of Peace between the Arab Republic of Egypt and the State of Israel signed on March 26, 1979, including the Annexes thereto.

Mr. ZABLOCKI (during the reading). Mr. Chairman, I ask unanimous consent that the joint resolution be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AMENDMENT OFFERED BY MR. GONZALEZ

Mr. GONZALEZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GONZALEZ: Page 9, line 18, after line 17, add *"Provided, moreover,* That no member of the United States Armed Forces personnel shall be assigned as a conscript or draftee."

Mr. GONZALEZ. Mr. Chairman, I rise in pursuance of this point because my amendment is addressed to section 7 which is labeled "Congressional Intent." The congressional intent discussed by way of addendum to the bill's provisions talks about congressional intent as to limitation of commitment, but only in terms of money. It says nothing about manpower.

In 1975, when the resolution on the Sinai was offered, I got up and rather, I do not know if it was bold or brazen, asked the question of the then chairman, Dr. Morgan, in the same direction as the distinguished colleague from Illinois, Mr. FINDLEY, has brought out in his additional views, in which he does make a very important point that what we are doing today is unprecedented, it is a very serious step. Since that first venture in 1975 raised some questions in my mind, I have entered forth and asked the chairman, and instead of getting the chairman's response I got a violent reaction from the then chairman of the subcommittee, the distinguished gentleman from Ohio, Mr. Wayne Hays, who, instead of answering, vituperated me. I am of such a build that if you ever want to get me going forever until I die, well, just do that.

Anyway, the question then is about the same as this one, and that is that it does no good, no matter how well intentioned and how proper—incidentally, I am not against this resolution, though I have just as many doubts as those expressed—but I do think that if we enter and continue to make commitments that we are not going to keep or that we do not intend to go that far in keeping, that that is worse than doing this in a way to show that we are behind our commitments and the like.

I think this is America's big problem since so-called World War II, and that is that we are either overcommitted or do not quite understand what it is we are getting into.

In this case here it seems to me that if we are going to avoid those aspects that brought us such travail during Vietnam, that we ought to make it clear that the limitations, as far as congressional intent is concerned, since we are to deploy armed services personnel for the first time that we do not intend to use conscripts, draftees, that is unwilling personnel, into this specified area of activity.

It is true, and it is for this reason that I am not going to insist on the particular amendment here hardheadedly, that, as has been pointed out to me by the distinguished chairman, that this calls for annual reconsideration and that in the event you do have the passage of a draft act that this would come up. But the truth is, and we all know that reality comes to us in a myriad of ways and not in that orderly and chronological a fashion.

I think that we ought to know that if this was discussed in the committee proceedings during the hearings of consideration on this matter that the RECORD ought to reflect it so that we have taken into consideration that we will not hereby be committing an unlimited supply of manpower, unrestricted. This is a contention I have made since John Kennedy in May of 1965. And the gentleman spoke before, a while ago, in opposition to the amendment, and said that Vietnam was voluntary. It was not. By 1965, in the summer of 1965, in the frontline actions of activity over 45 percent of the personnel involved were draftees. They were not career military. They were draftees. The first draft bill did not pass until the Congress had an amendment that said that no person under the terms of the act could be compelled to serve pursuant to that act outside of the continental United States.

The CHAIRMAN pro tempore. The time of the gentleman from Texas has expired.

(At the request of Mr. ZABLOCKI and by unanimous consent Mr. GONZALEZ was allowed to proceed for 3 additional minutes.)

Mr. ZABLOCKI. Will the gentleman yield?

Mr. GONZALEZ. I will be delighted to yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. The gentleman stated that the only restrictions or limitations were on funds.

Mr. GONZALEZ. More or less.

Mr. ZABLOCKI. The gentleman should understand that the committee has placed a limitation or a cap on the number of troops. We have, indeed, discussed, and I must say to the gentleman from Texas, my very good friend, that the gentleman's idea was

discussed between serveral members of the committee that wanted to modify the draft legislation that we received from the executive branch. The use of all-volunteer troops was taken into consideration in the discussions and the limitations that members of the Foreign Affairs Committee conducted. The gentleman from Illinois, Mr. FINDLEY, was a member of that group, as was the very able chairman of the Subcommittee on Europe and the Middle East, the gentleman from Indiana, Mr. HAMILTON.

But in discussing these points I might advise my colleagues first of all we do not have selective service at this time.

But in discussing this among ourselves, at least I came to the conclusion that a requirement of the kind the gentleman proposes would place unreasonable inhibitions on the President's ability to exercise his constitutional responsibilities as Commander in Chief.

If every military person sent to the Sinai in a particular unit would volunteer and another would not, it would create a chaotic situation. In fact, it would also have the effect of allowing an individual soldier a veto power over the President as Commander in Chief.

As the gentleman from Texas knows, and we also took this under consideration in the committee when we were thinking about this proposal the gentleman has suggested, all troops to be assigned are already volunteers in that they have volunteered for service in the armed services.

Then in discussing this with the executive branch we came to the conclusion that the Department of Defense would make every effort possible to assign troops consistent with their interests and the military mission to be achieved. This assurance I can give to the gentleman from Texas.

The gentleman's proposal, therefore, really does not strike at something new. We have thought about it deeply, thoroughly, and in our good judgment we felt it was not practical. So I would hope the gentleman would not pursue his amendment.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

(At the request of Mr. ZABLOCKI and by unanimous consent Mr. GONZALEZ was allowed to proceed for 2 additional minutes.)

Mr. GONZALEZ. Mr. Chairman, first I certainly want to thank the very distinguished chairman of the full committee. I think he does bring out things that though they are not reflected in the report accompanying the resolution, they are now an integral part of the legislative record.

I assume from what the gentleman said that certainly the congressional intent is that if the duty called upon on the part of our armed services personnel in this particular case were to reach the proportions where you would have to call resources in in any event, you would have to come back to Congress.

Mr. ZABLOCKI. The gentleman is correct.

Mr. GONZALEZ. Mr. Chairman, I ask unanimous consent that I may be permitted to withdraw my amendment.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN pro tempore. Are there other amendments to the resolution?

If not, under the rule the Committee rises.

□ 1600

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the joint resolution (H.J. Res. 349) to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel, pursuant to House Resolution 272, he reported the joint resolution back to the House.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the joint resolution.

Mr. BROOMFIELD. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant-at-Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 368, nays 13, not voting 52, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Richmond for, with Mr. McDonald against.

Mr. Rhodes for, with Mr. Dickinson against.

Mr. Pritchard for, with Mr. Paul against.

Until further notice:

Mr. Peyser with Mr. Goldwater.

Mr. Florio with Mr. Grisham.

Mr. Biaggi with Mr. Porter.

Mr. Long of Louisiana with Mr. Roth.

Mr. Simon with Mr. Trible.

Mr. Whitley with Mr. Ashbrook.

Mr. Reuss with Mr. Duncan.

Mr. Ginn with Mr. DeNardis.

Mr. Santini with Mr. Brown of Ohio.

Mr. Shannon with Mr. Hagedorn.

Mr. AuCoin with Mr. Edwards of Alabama.

Mr. Barnard with Mr. Quillen.

Mrs. Chisholm with Mr. Rudd.

Mr. Breaux with Mr. Emerson.

Mr. Clay with Mr. Martin of New York.

Mr. Jones of North Carolina with Mr. Dornan of California.

Mr. Volkmer with Mr. McCloskey.

Mr. Young of Missouri with Mr. Bedell.

Mr. Shelby with Mr. Edwards of Oklahoma.

Mr. Dicks with Mr. Dixon.

Mr. Murphy with Mr. Jenkins.

Mr. Dymally with Mr. Bowen.

Mr. SAM B. HALL, JR., changed his vote from "yea" to "nay."

Mr. PURSELL changed his vote from "nay" to "yea."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the joint resolution just passed.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ZABLOCKI. Mr. Speaker, pursuant to the provisions of House Resolution 272, I call up from the Speaker's table the Senate joint resolution (S.J. Res. 100) "to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel," and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. ZABLOCKI

Mr. ZABLOCKI. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ZABLOCKI moves to strike out all after the resolving clause of the Senate joint resolution (S.J. Res. 100), and to insert in lieu thereof the text of the House joint resolution (H.J. Res. 349), as passed, as follows:

SHORT TITLE

SECTION 1. This joint resolution may be cited as the "Multinational Force and Observers Participation Resolution".

STATEMENT OF POLICY

SEC. 2. The Congress considers the establishment of the Multinational Force and Observers to be an essential stage in the development of a comprehensive settlement in the Middle East. The Congress enacts this resolution with the hope and expectation that establishment of the Multinational Force and Observers will assist Egypt and Israel in fulfilling the Camp David accords and bringing about the establishment of a self-governing authority in order to provide full autonomy in the West Bank and Gaza.

PARTICIPATION OF UNITED STATES PERSONNEL IN THE MULTINATIONAL FORCE AND OBSERVERS

SEC. 3. (a)(1) Subject to the limitations contained in this resolution, the President is authorized to assign, under such terms and conditions as he may determine, members of the United States Armed Forces to participate in the Multinational Force and Observers.

(2) The Congress declares that the participation of the military personnel of other countries in the Multinational Force and Observers is essential to maintain the international character of the peacekeeping function in the Sinai. Accordingly—

(A) before the President assigns or details members of the United States Armed Forces to the Multinational Force and Observers, he shall notify the Congress of the names of the other countries that have agreed to provide military personnel for the Multinational Force and Observers, the number of military personnel to be provided by each country, and the functions to be performed by such personnel; and

(B) if a country withdraws from the Multinational Force and Observers with the result that the military personnel of less than four foreign countries remain, every possible effort must be made by the United States to find promptly a country to replace that country.

(3) Members of the United States Armed Forces assigned or detailed to the Multinational Force and Observers may perform only those functions or responsibilities which are specified for United Nations Forces and Observers in the Treaty of Peace and in accordance with the Protocol.

(4) The number of members of the United States Armed Forces who are assigned or detailed by the United States Government to the Multinational Force and Observers may not exceed one thousand two hundred at any one time.

(b) Subject to the limitations contained in this resolution, the President is authorized to provide, under such terms and conditions as he may determine, United States civilian personnel to participate as observers in the Multinational Force and Observers.

(c) The status of United States Government personnel assigned to the Multinational Force and Observers under subsection (a)(1) or (b) of this section shall be as provided in section 629 of the Foreign Assistance Act of 1961.

UNITED STATES CONTRIBUTIONS TO SHARED COSTS

SEC. 4. (a) In accordance with the agreement set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981, the United States share of the costs of the Multinational Force and Observers—

(1) shall not exceed 60 per centum of the budget for the expenses connected with the establishment and initial operation of the Multinational Force and Observers during the period ending September 30, 1982; and

(2) shall not exceed 33⅓ per centum of the budget for the annual operating expenses of the Multinational Force and Observers for each financial year beginning after that date.

(b)(1) There are authorized to be appropriated to the President to carry out chapter 6 of Part II of the Foreign Assistance Act of 1961, in addition to amounts otherwise available to carry out that chapter $125,000,000 for the fiscal year 1982 for use in paying the United States contribution to the budget of the Multinational Force and Observers. Amounts appropriated under this subsection are authorized to remain available until expended.

(2) Expenditures made pursuant to section 138 of the joint resolution entitled "Joint resolution making continuing appropriations for the fiscal year 1982, and for other purposes", approved October 1, 1981 (Public Law 97-51), or pursuant to any subsequent corresponding provision applicable to the fiscal year 1982, shall be charged to the appropriation authorized by this subsection.

NONREIMBURSED COSTS

SEC. 5. (a) Any agency of the United States Government is authorized to provide administrative and technical support and services to the Multinational Force and Observers, without reimbursement and upon such terms and conditions as the President may direct, when the provision of such support or services would not result in significant incremental costs to the United States.

(b) The provision by the United States to the Multinational Force and Observers under the authority of this resolution or any other law of any property, support, or services, including the provision of military and civilian personnel under section 3 of this resolution, on other than a reimbursable basis shall be kept to a minimum.

REPORTS TO THE CONGRESS

SEC. 6. (a) Not later than April 30, 1982, the President shall transmit to the Speaker

of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a detailed written report with respect to the period ending two weeks prior to that date which contains the information specified in subsection (b).

(b) Not later than January 15 of each year (beginning in 1983), the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a written report which describes—

(1) the activities performed by the Multinational Force and Observers during the preceding year;

(2) the composition of the Multinational Force and Observers, including a description of the responsibilities and deployment of the military personnel of each participating country;

(3) all costs associated with United States participation in the Multinational Force and Observers which were incurred during the preceding fiscal year and for which the United States was not fully reimbursed, with an explanation of why the United States was not fully reimbursed for each category of cost;

(4) all such costs for which the United States was fully reimbursed; and

(5) the results of any discussions with Egypt and Israel regarding the future of the Multinational Force and Observers and its possible reduction or elimination.

(c) The reports required by this section shall be as detailed as possible. The information with respect to any administrative and technical support and services provided on a nonreimbursed basis under section 5(a) of this resolution shall include a description of the types of support and services which have been provided and an estimate of both the total costs of such support and services and the incremental costs incurred by the United States with respect to such support and services.

(d) For purposes of the reports required by this section, the term "costs" means any costs, whether normal or incremental, which are incurred by the United States Government, including—

(1) contributions to the budget of the Multinational Force and Observers;

(2) the costs associated with the members of the United States Armed Forces or the United States civilian personnel who are assigned, detailed, or otherwise provided to the Multinational Force and Observers, including pay, retirement and other benefits, transportation, and housing; and

(3) the costs associated with any other property, support, or services of any kind made available (by means of grant, sale, loan, lease, or any other means) by the United States Government to the Multinational Force and Observers.

STATEMENTS OF CONGRESSIONAL INTENT

SEC. 7. (a) Nothing in this resolution is intended to signify approval by the Congress of any agreement, understanding, or commitment made by the executive branch other than the agreement to participate in the Multinational Force and Observers as set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981.

(b) The limitations contained in this resolution with respect to United States participation in the Multinational Force and Observers apply to the exercise of the authorities provided by this resolution or provided by any other provision of law. No funds appropriated by the Congress may be obligated or expended for any activity which is contrary to the limitations contained in this resolution.

DEFINITIONS

SEC. 8. As used in this resolution—

(1) the term "Multinational Force and Observers" means the Multinational Force and Observers established in accordance with the Protocol between Egypt and Israel signed on August 3, 1981, relating to the implementation of the security arrangements of the Treaty of Peace; and

(2) the term "Treaty of Peace" means the Treaty of Peace between the Arab Republic of Egypt and the State of Israel signed on March 26, 1979, including the Annexes thereto.

The motion was agreed to.

AMENDMENT TO THE PREAMBLE

Mr. ZABLOCKI. Mr. Speaker, I offer an amendment to the preamble of the Senate joint resolution (S.J. Res. 100).

The Clerk read the preamble of the Senate joint resolution.

The SPEAKER. The Clerk will report the amendment to the preamble.

The Clerk read as follows:

Amendment to the preamble: In the second paragraph, immediately after "responsibilities" insert "at this time".

In the third paragraph, strike out "initialed on July 17, 1981," and insert in lieu thereof "signed on August 3, 1981,".

The amendment to the preamble was agreed to.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of the its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4522) entitled "An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House of Representatives to the amendments of the Senate numbered 7, 11, 12, and 22 to the above-entitled bill.

The message also announced that the Senate recedes from its amendment numbered 42 to the above-entitled bill.

The message also announced that the Senate had passed joint resolutions of the following titles, in which the concurrence of the House is requested:

S.J. Res. 57. Joint resolution to provide for the designation of February 7 through 13, 1982, as "National Scleroderma Week"; and

S.J. Res. 115. Joint resolution to approve the President's recommendation for a waiver of law pursuant to the Alaska Natural Gas Transportation Act of 1976.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER laid before the House the following communication from the chairman of the Committee on Public Works and Transportation, which was read and referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, D.C., November 17, 1981.

Hon. THOMAS P. O'NEILL,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved the following projects on November 17, 1981:

LEASES

Washington, D.C.: Professional Building, 2100 K Street, N.W.

Washington, D.C.: Logan Building, 1111 18th Street, N.W.

The original and one copy of the authorizing resolutions are enclosed.

Sincerely,

JAMES J. HOWARD,
Chairman.

LEGISLATIVE PROGRAM

(By unanimous consent, Mr. WRIGHT was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I have asked for the time to respond to a question on the legislative program which I expect to be propounded to me by the distinguished minority leader.

I yield to the gentleman.

Mr. MICHEL. Mr. Speaker, I appreciate the majority leader yielding and, of course, what I would appreciate knowing and I am sure the Members would, too, is what the program might look like for tomorrow and the balance of this week.

There were some indications earlier that in view of the other body now debating the continuing resolution that we might want to go on a recess until some late hour tonight, at which time we would be free then to appoint conferees.

It is my understanding in a conversation with the Speaker that he would prefer that we not go on a recess

today, but rather come in tomorrow morning.

Now, the majority leader may want to build upon what I have just said and correct me if I am wrong.

□ 1630

Mr. WRIGHT. The distinguished minority leader is right, as usual. Unless the distinguished minority leader knows something that I do not know, a possibility which I readily concede at this juncture, there would be no point in our staying on late tonight.

It is my understanding that the other body is acting on the continuing resolution and probably will not conclude its action until very late this evening. It would be at the earliest, an hour and a half after they had concluded before we could receive the papers physically and move formally to the appointment of conferees. Therefore, there seems no advantage to be gained by our staying in session and, therefore, it would be our purpose to wrap up the business of the House for the day and adjourn until 10 o'clock tomorrow morning.

When we reconvene at 10 o'clock tomorrow morning, we would hope that the Senate would have completed its action on the continuing appropriation and that it would be timely for conferees to be appointed. That would be our first order of business under those circumstances.

While those conferees were working their will, we would expect to take up two pieces of legislation, the conference report on H.R. 4144, the energy and water appropriations bill, and H.R. 3046, the Older American Act, which has an open rule, 1 hour of general debate.

We would hope that at any time the conference committee completed its labors and made available to us a piece of legislation on which we could vote up or down that we could take that up at that time.

But this is the program for the remainder of this week. Once again, unless the distinguished gentleman from Illinois (Mr. MICHEL) is aware of some knowledge to which I am not privy, I must suggest the possibility that we might have to be here Saturday, conceivably even Sunday, depending upon the possibility of a Presidential veto.

So all I can say is that any further program is going to be announced later. But when the House has completed its scheduled business for this week, including, of course, action on the continuing appropriation, then we will adjourn for the Thanksgiving recess and district work period, and will reconvene on Monday, November 30. But there will be pro forma sessions only during the week of November 30, no legislative business during that week.

Therefore, regular sesssions with legislative business would resume for the week of December 7, and the legislative program for that week would just have to be announced later.

Mr. MICHEL. I thank the gentleman.

In a conversation that this Member had with the Senate majority leader earlier on in the day, I think maybe even yesterday, there was some suggestion that that date of December 18 for an adjournment might be moved up to the December 11. I am wondering if the majority leader has any indication that we might be able to comply with that kind of date.

If we are doing nothing significant in a legislative way in that first week in December, would there be conference reports of appropriation bills, for example, that could be clustered together during that week of December 7 to be disposed of? I am thinking in terms of a continuing resolution, which has a number of bills, appropriation bills, which have not been finalized. But if there were to be conferences on those measures and they were enacted into law, those individual department bills would supersede the terms of the continuing resolution, and there might be an inclination on the part of those respective committee members to see that those individual department bills were finalized to get whatever better figures they might feel were warranted. I wonder if the majority leader would have any feeling with respect to that.

And then, of course, the second budget resolution, having just noticed the chairman of the Budget Committee coming on the floor, when would we be addressing ourselves to that issue?

Mr. WRIGHT. Well, let me respond to the questions as they were propounded.

First, as to the likelihood of our adjourning earlier than December 18, that would be a consummation devoutly to be wished, but I am afraid that to count on it would be wishful thinking, because there remain several things that have to be done.

The gentleman is correct that there quite possibly may come some conference committee reports and some Senate action on additional appropriations bills, in which event I think it likely that we would want to take them up following December 7. Also, the budget resolution, the second budget resolution for the year, under the law must be adopted before we can adjourn. So that must be considered following December 7.

There is one other piece of business that I, for one, would be unwilling to adjourn before we have resolved, and that is the social security restoration, the bill which the House passed and sent to the Senate many weeks ago, restoring the minimum benefit to those 3 million elderly Americans who have lost it as a result of our adoption of the Gramm-Latta reconciliation bill. That piece of legislation is still in conference, and I would hate to think in terms of adjourning for the year until that bill is cleared and we have passed it and restored those benefits to those people.

There may be other pieces of legislation, too, that need to be acted upon. But those, I think, are of vital importance. I think it is probably unrealistic for us to assume that all that can be done much prior to the 18th of December.

Mr. MICHEL. I thank the gentleman.

The SPEAKER. The gentleman will agree we will try for the 11th.

Mr. WRIGHT. I was just about to say that the 11th is also on the same day of the week as the 18th, and comes a week earlier and, therefore, would be a much better date preferable, if possible.

Mr. MICHEL. I am happy to note that the Speaker is getting with it, and that it will not be ruled out as a possibility.

I would hope that the other body would complete action on that continuing resolution so that we might really go to conference tomorrow. There are some significant differences between specific figures that would have to be resolved in conference. While I earlier in the day might have given indication to some Members that there would be a distinct possibility of our accepting the Senate-passed bill and sending it on down to be accepted and signed into law, it occurs to me that maybe those differences will be so widespread that there would be the need for conference. I understand the chairman of the Appropriations Committee would feel somewhat undermined if he were not given that prerogative of having his committee deal with it in conference, so we are prepared for that. I hope we can move along expeditiously and pledge ourselves to do just that tomorrow.

Mr. PEYSER. Will the majority leader yield for a question?

Mr. WRIGHT. I yield to the gentleman from New York.

Mr. PEYSER. I thank the gentleman.

I would like to come back to the question dealing with tomorrow and Saturday. It is my understanding that if they go to conference tomorrow with the Senate on the continuing resolution and the House has a couple of pieces of legislation to work on, that if we get into the late afternoon tomorrow and the conference is still continuing, as I imagine it will be, based on the differences that are going on, is it the intention of the House to remain in session, for instance, tomorrow night to wait to act on this measure,

or at what point will we be able to make a decision as to the Saturday session, so we either know that we ought to be canceling out our Saturday engagement, which I would believe we would have to do, but it would be very helpful, I think, for Members to know that in all likelihood we either will be here Saturday or we will not be.

Mr. WRIGHT. Well, I think we should plan to be here. I see relatively little likelihood of our not being here. The only way it seems to me we could avoid a Saturday session would be if the President of the United States would sign the bill. If we were to complete action on the conference committee report on the continuing resolution tomorrow, send it to the President, and he signed it, then we would not have to come back Saturday. But the gentleman's guess on that is as good as mine.

I would expect that Members would want to make their plans sufficiently flexible as to let them be here Saturday, and if necessary, Sunday. After all, this game of brinksmanship is not a very pleasant game for the American people. The existing continuing appropriation expires tomorrow night. Obviously, the Government would be without any authority to continue to operate if we were not able this weekend to complete action. By that I mean getting the President's signature on the bill. Therefore, I think the responsible thing for those of us who do not want the Government to fall on its face to do is to plan, if necessary, to be here on Saturday and, if necessary, on Sunday.

□ 1640

Mr. PEYSER. If the gentleman will yield further, then am I safe in the assumption that if the President should veto this bill, it will then be brought back to the House for a vote on either sustaining or overriding, and if the President is sustained, then would the majority leader outline the action that is going to be at that point? If the President were to be sustained, are we going to stay and then pass another bill? Or what is the aim?

Mr. WRIGHT. Well, of course if the President of the United States is determined to veto the bill, and it is unlikely that we would have two-thirds votes to override the veto, then I think the gentleman would recognize the necessity of our producing another bill and hoping that the President would sign that bill. How long that would take is beyond my ability to predict, but I think it is our responsibility to try to do that under those circumstances. I still am not certain the President is going to veto the bill, of course.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield.

Mr. CONTE. Mr. Speaker, I just want to let the House be aware that we passed a very clean, a very simple continuing resolution here in the House of Representatives. They have some 44 amendments already adopted on the floor of the Senate on the HUD section of the bill. By the time they get through that bill tonight, it will be the biggest Christmas tree—it will make that Christmas tree they are going to put on the lawn of the White House look anemic by contrast.

The gentleman mentioned getting the papers over here. He will need a front end loader to bring the papers over here.

The SPEAKER. Is there any objection to the Chair getting into this dialog?

The Chair has to presume, in view of the fact that we have knowledge of some of the amendments that have passed by the other body, for example, the defense bill is $11 billion higher than the House continuing resolution and the HHS is approximately $1.1 billion lower than the House passed, and the HUD bill has 44 amendments which they have attached to it. The defense procurement is $1 billion more, it appears. The last time, as the Members will recall, there were some 400 some odd disagreements between the two continuing resolutions.

It would appear that we would be in the same position.

It is the Chair's understanding from the minority leader that the other body is going to press all night, and so by 10 o'clock tomorrow morning we ought to be able to notify the conferees. The conferees presumably will take some length of time, and when they do come to a conclusion it would take some 2 or 3, possibly 5 hours to put the bill in order so that we may bring it on the floor. For that reason, it appears that we should be bringing the conference report to the floor on Saturday afternoon, whether it is agreement or disagreement.

The Chair must say to any Members who have plans, we have to plan very definitely to be here on Saturday and possibly on Sunday, because it costs the Federal Government a tremendous amount of money to stop its operations and then to get it operating again, regardless of whether the bill is vetoed or not.

Members should stay here and see if they can prevent this Government from stopping and see if the Government can continue on a money basis. If it does stop, Members are aware of the fact, from the ruling of the Attorney General last year, that defense stays in place and the Federal Government property is protected, but the rest of the employees are laid off, and it will cost a tremendous amount of money, checks will stop, things of that nature. It is our duty to be here on Saturday and Sunday and see if we can get through this entire matter before Monday morning.

AUTHORIZING SPEAKER TO DECLARE RECESSES

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that it shall be in order for the Speaker to declare recesses at any time on the legislative days of Friday and Saturday, and if it be necessary for us to be in session, also on Sunday of the week.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

RESIGNATION OF MEMBER AND APPOINTMENT AS MEMBER OF NATIONAL COMMISSION ON STUDENT FINANCIAL ASSISTANCE

The SPEAKER laid before the House the following resignation as a member of the National Commission on Student Financial Assistance:

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 19, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: I am, effective today, November 19, 1981, resigning from my position on the National Commission on Student Financial Assistance.

I appreciate very much the honor of having been appointed by you to serve on this Commission.

Best wishes,

Sincerely,

DAVID R. OBEY,
U.S. Congressman.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

The SPEAKER. Pursuant to section 451(a) of Public Law 96-374, the Chair appoints the gentleman from Michigan (Mr. FORD) as a member of the National Commission on Student Financial Assistance on the part of the House to fill the existing vacancy thereon.

MINIMUM SOCIAL SECURITY BENEFIT MUST NOT BE REDUCED

(Mr. JACOBS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JACOBS. Mr. Speaker, I take this time to inform my colleagues on the status of the conference committee meeting on H.R. 4331, legislation designed to restore the social security minimum benefit.

As everyone knows, the House passed a bill that simply would restore the minimum benefit for both current and future beneficiaries, correcting a mistake that was forced upon the Nation by the Gramm-Latta reconcili-

ation measure. The Senate amendment to the same bill would restore the minimum benefit only for some of those currently receiving it with serious limitations on those with some type of Government pensions. In other words, the House has voted overwhelmingly and unconditionally against taking the minimum benefit away from our senior citizens. But, as the crucial days dwindle down the House conferees are facing a point of view from the other body which can be summed up in the long-ago words of Herblock, "Give them some day their daily bread on certain conditions."

The conferees of the other body have argued that if the minimum benefit is restored for current beneficiaries, other corresponding reductions in social security benefits or raises in social security taxes must be made. Obviously, any conference committee process involves some compromise. Mr. Speaker, as the majority leader has said, there is nothing complicated at all about this conference. The House has taken the action that the President of the United States advocated. The President made no conditions on the rescission on the repeal of the minimum benefit. That is the position of the House conferees. It is up to the other body and its relationship with the Nation as to whether the least of the little ones will receive their daily bread. The conferees of the other body have argued that if the minimum benefit is restored for current beneficiaries, other corresponding reductions in social security benefits or raises in social security taxes must be made.

Obviously, any conference committee process involves some compromise. At present, the conferees seem willing to compromise on the minimum benefit and restore it for all current beneficiaries without limitation. This would mean that no current recipient of a social security check would suffer a reduction in that check.

The House conferees, in addition, may be compelled to accept an amendment initiated in the other body which would eliminate the current exclusion from the social security tax for certain types of sick pay wages. However, a majority of the House conferees remain resolute in their position against the proposal by conferees from the other body to reduce the family maximum benefit in the old-age and survivors' program as a price for restoration of the minimum benefit for current recipients.

Mr. Speaker, the position of the House conferees is at least reasonable. We have gone more than half way toward the other body's conferees on the substantive issues in the conference and almost three-fourths of the way toward their position that in the short run the trust funds should remain as unaffected as possible. In fact, the House conference position would reduce the unified budget deficit by some $1 billion over a 5-year period. However, a majority of the House conferees do not believe it is fair or just to correct the minimum benefit mistake made in Gramm-Latta by imposing new reductions of up to 20 percent in the benefits of other social security recipients—primarily widows with several children who would be affected by reduction in the family maximum benefit.

In the next major social security financing bill, House Ways and Means members may well have to make some very difficult long-range decisions in these areas. We do not think, however, that such changes are necessary at this time as a political price for correcting an ill-conceived proposition thrust into law by the administration in the confusion of the Gramm-Latta debate.

BILL INTRODUCED TO TRANSFER CRIME-FIGHTING WORK FROM BATF TO DEPARTMENT OF THE TREASURY

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, last Thursday I outlined for the House the important crime-fighting work of the Bureau of Alcohol, Tobacco, and Firearms to keep guns out of the hands of criminals and to track down bombers and arsonists.

Today, I am introducing a two-part bill to fight violent crime and especially arson, by transferring the firearms, explosives, and arson jurisdiction of BATF from the Department of the Treasury to the Department of Justice.

My bill would transfer personnel, laboratories, and other facilities as well as the great fund of experience of BATF agents to the Department of Justice, the major crime fighting agency of the Federal Government.

This bill would eliminate some of the overlap between the explosives and bombing jurisdiction of the FBI and BATF. This measure would improve the joint investigations by BATF and DEA of drug traffickers who use machineguns and silencers. This measure is designed to free BATF from the limitations that have been imposed on investigating new cases. This transfer was recommended by the Attorney General's Task Force on Violent Crime.

The second major feature of the bill amends chapter 40 of title 18 relating to explosives to clearly give Federal law enforcement jurisdiction over interstate arson offenses. This change was also recommended by the Task Force on Violent Crime and has been adopted by the Attorney General. Currently prosecution of the Federal offense requires proof of the explosive nature of the device or chemical used to start the fire. My bill clarifies the law and eliminates an extremely complex question of evidence that was an unintended loophole of the 1968 Organized Crime Control Act. This approach was adopted by the House Judiciary Committee in the Criminal Code Revision Act last year, as well as by the Brown Commission in 1970. This change passed the Senate in January 1978 in S. 1437. It is a change which is long overdue.

This bill follows the recommendations of the witnesses who testified before the Subcommittee on Crime last month that we not lose BATF's expertise.

The administration's proposal to combine BATF with the Secret Service, with its first priority on protection of the President and our Nation's leaders and guests, would downgrade the firearms and arson enforcement. That activity is too important to be shelved every Presidential election year.

My bill provides an inexpensive way to improve law enforcement coordination. It improves our Nation's fight against the organized crime element that is burning down homes and businesses all over the country.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I thank the gentleman for yielding. I have asked to be a cosponsor of this legislation in order that we might, if possible, discourage the decimation of the Bureau of Alcohol, Tobacco, and Firearms, and in lieu thereof to see that it is transferred to the Department of Justice where it could carry out those important duties and to have its authority over crime and arson expanded, as I believe the gentleman's bill would do.

So, I am proud to support the gentleman's bill and be a cosponsor of the measure.

Mr. HUGHES. I thank the distinguished gentleman from Illinois, the ranking minority member of the full Committee on the Judiciary.

Mr. SAWYER. Mr. Speaker, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Michigan.

Mr. SAWYER. Mr. Speaker, I want to congratulate the gentleman in the well on the initiative on this bill, and I as ranking Republican on the subcommittee of which the gentleman in the well is chairman, am in total agreement with him. I think it is the right thing to do.

Mr. HUGHES. I thank the gentleman from Michigan.

PERSONAL EXPLANATION

Mr. DUNN. Mr. Speaker, I am recorded during yesterday's debate on H.R. 4995, Department of Defense appropriation bill for fiscal 1982, as having voted "yea" on the Murtha amendment and "present" for the Addabbo amendment regarding the B-1 bomber. These actions were inadvertent; my intention was to vote nay on both the Murtha and the Addabbo amendments.

Mr. Speaker, I ask that this explantation be printed in the permanent RECORD. EXT. 354 ...HOUSE... 19NO #75420 RAMIREZ, Luis A. 11/19/81 folio 450-452 %00.0

□ 1650

AND SO WE CONTINUE TO CONTINUE

(Mr. LOWERY of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOWERY of California. Mr. Speaker, when I came to Congress in January, I was fairly confident that I understood the budgetary process. I did my homework. I read the Congressional Budget Act, learned the authorization and appropriation process, and memorized deadlines. Now I do not know why I bothered. Over the past few months I have watched the House leadership totally subvert established budgetary procedures. Legislation has been delayed, deadlines have been ignored, and the Congressional Budget Act all but abandoned.

Earlier this week House Democrats pushed through an open-ended continuing resolution funding the operations of the entire Federal Government through fiscal year 1982. Perhaps I should call it a "continued" continuing resolution, since the measure extends a previous continuing resolution passed in September. Passage of such a measure, without opportunity for amendment or proper debate, is absolutely outrageous. It is an outright surrender to irresponsible spending. It removes any incentive for the full House and Senate to complete action on the regular appropriations bills, leaving us with the budget-busting recommendations of the same Appropriations Committee that has taken us overbudget, year after year, and gotten us into this financial mess in the first place.

What we have here is not government by established laws and procedures. What we have here is government by continuing resolution. And so we continue to continue.

THE PLIGHT OF VLADIMIR TSUKERMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. DOUGHERTY) is recognized for 45 minutes.

Mr. DOUGHERTY. Mr. Speaker, I have asked for this special order this evening to call to the attention of the U.S. Congress the plight of Vladimir Tsukerman, a young man who has sought for the past 7 years to obtain an exit visa from the Soviet Union.

Three years ago, Mr. Speaker, Vladimir's wife, Faina, and her 3-year-old son, Aleksandr, were permitted to emigrate from the Soviet Union to Israel, but as is too often the case, Vladimir has been denied his exit visa so that he may join his family in Israel.

Mr. Speaker, I first met Faina Tsukerman last summer in Jerusalem while I was on a visit to that country with members of the Committee on Armed Services. She had previously written me a letter which explained the tragic circumstances surrounding her husband's permission or nonpermission to leave the Soviet Union, and I would like to read that letter as background for this special order. It is dated June 25, 1981.

I, Faina Tsukerman, appeal to you hoping to receive your assistance in my efforts to save my husband residing in the USSR from a cruel and unjustified sentence that is now endangering his life.

My husband, Vladimir (Leonidovich) Tsukerman, born in 1947, residing in Kishinev-27, Gagarina blvd. 9/3, was arrested in Kishinev at the end of May 1981, and is now awaiting trial. He has arrested for his attempts to realize his legal right to emigrate to Israel in order to join me, his wife, and our son. I have been living in Israel since 1978 together with our son. He was three years old when we left the U.S.S.R. and is now six; he spent half of his childhood without seeing his father.

My husband was not granted the permit to emigrate to Israel in order to join us and the refusal of the Soviet authorities to grant him the exit visa was based on the fact that he had in the past served in the Navy. He was discharged from the Navy in 1975 and after so many years the pretext used by the authorities can hardly seem justified.

In recent years following our separation my husband found himself in a difficult moral and material position: he was, on one hand, deprived of all means of livelihood be being unable to find a job and, on the other hand, he was subjected to harrassment and was thrown into prison several times for his struggle to obtain an exit visa. Seeing his determination to join his family the authorities have finally removed the security consideration applied to his case and promised to let him leave the U.S.S.R. at the 20th of April 1981. This promise, however, turned out to be a cruel joke. When he came to the OVIR office to receive the emigration permit he was told that his application for emigration was rejected once again.

On the 30th of May 1981, he staged a peaceful demonstration of protest against the heartless refusal of the authorities to grant him the emigration permit. For that he was arrested and charged with "disturbing public order". He was informed that he will be put on trial and according to the Soviet law this charge automatically leads to a 3 year term in labour camps with the possibility of being sent into exile afterwards. Such a sentence would ruin our lives.

I therefore appeal to you now, while there is still time to prevent the tragedy. I realize that there is so much suffering in the world and that the fate of our family is one amongst many, many others. Yet, the circumstances are pressing, there is still some time left and our situation is really desperate. I cannot bear the thought that our child would be deprived of his father's love and care for so many years. There must be some way to put an end to this act of cruelty committed by the Soviet authorities, to this violation of the Helsinki Accords signed and ratified by the Soviet government.

I plead with you to use all your influence and authorities, to do everything possible to help my husband, to stop the trial, to avert the verdict and to secure his right to live with his wife and child in Israel.

Placing all my hopes in your kindness and help and thanking you in advance,

Respectfully yours.

Mr. Speaker, the tragedy of the letter that I received in June is that indeed Vladimir Tsukerman was sentenced to 3 years in a slave labor camp in the Soviet Union for the crime of having gone against the social order in that he dared to want to join his wife and 3-year-old child—his 6-year-old child now—in Israel.

Mr. Speaker, we frequently hear of the plights of human rights cases throughout the world. In so many instances the evidence of the plight is that of a picture in a paper that is sent to us or a letter that we receive. Let me tell the Members that the human experience of meeting a young woman who was born in the Soviet Union and who had to leave the Soviet Union with her child and emigrate to Israel, a young woman whose husband could not join her because of the arrogance and because of the sense of destruction which is so common with Soviet authorities, is indeed tragic.

□ 1700

This evening, Mr. Speaker, I am pleased to advise Members of this body that the wife of Vladimir Tsukerman is in the gallery, having been with us for these past 2 days in Washington.

Mr. TAUKE. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. At this time, Mr. Speaker, I recognize my colleague from Iowa, (Mr. TAUKE).

Mr. TAUKE. I thank the gentleman from Pennsylvania for yielding to me. I want to commend the gentleman for his outstanding work in bringing to the attention of the Members of this body the plight of Vladimir Tsukerman and the plight of some others like him.

I know many of the Members must have had experiences similar to mine over the last 3 years. A year ago or 2 years ago it seemed like almost every day we received letters in our offices asking us to join in signing petitions to the Soviet Union and to other officials

around the world expressing our concerns about Soviet dissidents. After awhile so many of these letters came, frankly, that they seemed to be a little bothersome, and I think that they received less and less attention in the offices of Members of Congress.

Now this year we have not been receiving as many requests, not because there are not people suffering, but simply because some of us have not had the proper interest. It is because of the effort of our colleague from Pennsylvania, and because of his work in bringing Mrs. Tsukerman to my office that I have renewed interest in the specific case of Mr. Tsukerman, but also in the cases of thousands of other dissidents in the Soviet Union.

We need to recognize that we in this body have an opportunity to do something about the outrageous conduct that is so much a part of everyday life in the Soviet Union. We need to recognize that if we speak out we can improve the lives of those who are being tortured and are being oppressed by Soviet officials.

But it is only if we stand up and are counted from time to time that we are going to be able to end this kind of activity and then be able to restore some sense of human rights in the Soviet Union. We cannot let the human rights issue just die because it has been with us for such a long time.

I think perhaps the gentleman from Pennsylvania (Mr. DOUGHERTY) has performed a great service not only for Mr. Tsukerman by bringing his case to our attention, but to all of those in the Soviet Union who suffer from similar fates by once again pointing out to us the need for us to stand up and be counted. So I want to join with the gentleman in expressing my strong concern and outrage about the way that Vladimir Tsukerman has been treated by Soviet authorities and to plead with Soviet authorities to release him from prison, from the labor camp, and also to permit him to leave the country, to leave the Soviet Union.

I also want to commend the gentleman in the well for his efforts and leadership in bringing this case to our attention.

Mr. DOUGHERTY. I thank my colleague from Iowa for his comments.

Mr. MAVROULES. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. At this time I would like to recognize my colleague from Massachusetts (Mr. MAVROULES), who joined with me on that trip to Jerusalem last summer where we met Mrs. Tsukerman for the first time.

Mr. MAVROULES. Mr. Speaker, I rise in the name of justice, on behalf of a man falsely imprisoned, whose only offense was that he wished to live in peace with his family in the land of their ancestors.

Vladimir Tsukerman was born in 1947, in the Soviet Union. His wife and son were allowed to emigrate in 1978, and have been living in Israel since that time. Vladimir, however, was not allowed to join his family. Refusal of his application for an exit visa was based on the fact that he had served in the Soviet Navy. Mr. Speaker, Vladimir Tsukerman ended his naval career in 1975. How can the Soviet Government claim that this man would present a security risk, should he be allowed to emigrate? It is clear that this claim has no real basis in fact. It is instead another in a series of falsehoods, an attempt by a government to justify its cruel and callous actions.

In the years following the separation from his wife and child, Vladimir Tsukermen found himself an outcast in his native land. He was unable to find work. He was hounded by Soviet authorities, and imprisoned several times for his continued efforts to obtain an exit visa.

Finally, Mr. Speaker, Soviet authorities informed Vladimir Tsukerman that they had reviewed his case, and decided that he would not, after all, be a significant security risk. He was told he would be granted an exit visa on April 20, 1981.

This promise, however, was nothing but an elaborate exercise in mental torture. When Vladimir applied for his emigration permit, he was once again told that his application had been rejected.

After his hopes and dreams had been crushed by this inexplicable decision, Vladimir Tsukerman staged a peaceful demonstration on May 30, protesting the cruelty of Soviet authorities. He was, as a result, charged with disturbing public order. He has been sentenced to 3 years in a Soviet labor camp, and he may face internal exile after his release.

Meanwhile, his son, now 6 years old, has lived half his life without seeing his father, whom he scarcely remembers. What kind of government, Mr. Speaker, can, without any hesitation, attempt to destroy an innocent family? What twisted purpose can this possibly serve?

The Soviet Union willingly signed the Helsinki human rights accords in 1975. And yet, with every additional case of this kind, we are reminded that, to the Soviets, the accords are obviously not worth the paper they were printed on.

Some may ask how important the fate of this single family is with all the pain and suffering in the world today. Others may ask why those of us in this House should pause in considering the major issues we face to discuss this matter of seeming insignificance.

The answer, Mr. Speaker, is simple. It is not enough for us to believe in freedom. We must, by our own conduct, hold out hope to those who do not share our advantages. It is not enough for us to proclaim our devotion to liberty. We must transform our words into action.

We have a responsibility, to ourselves and to all the peoples of the world, to speak out in the name of those who have been silenced. I call upon the administration to use every means necessary to secure the release of Vladimir Tsukerman, and all others like him. As long as Vladimir Tsukerman remains imprisoned, none of us is truly free.

Mrs. SNOWE. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I am happy to yield to my colleague from Maine.

Mrs. SNOWE. Mr. Speaker, I want to first commend my colleague, Congressman DOUGHERTY, for bringing this important issue to the attention of the House. Sometimes, it is easy for us in this country to overlook the problems of those abroad, Congressman DOUGHERTY does not want to see this happen. Neither do I. I am glad to join him in this effort, and I will do all that I can to insure that it is a successful one.

We are talking about the most basic human right—freedom. We often take it for granted here, but imagine if you were separated from your wife and son—for 3 years. That is the plight of Vladimir Tsukerman. Why? Because he is a Soviet dissident. His wife, Faina, and his son were allowed to emigrate to Israel in 1978, Vladimir was not. He was recently arrested for participating in a peaceful demonstration, and sentenced to the maximum term of 3 years in a labor camp for a "violation of the social order." If nothing is done, he and his family are now confronted with at least 6 years of separation. That is why we in this Congress must act, we need to speak out as we are doing today, we need to publicize the plight of literally thousands of Soviet dissidents in similar situations, we need to write, we need to call. We must fight, we must keep the pressure on.

It is easy to give up, to say what is the use. But make no mistake, these calls, these letters, make a difference. We cannot forget these people who have been denied the most basic human right by a reprehensible totalitarian regime. They are not just faceless numbers overseas. Today, I met with Faina Tsukerman in my office, I listened to her story, I saw pictures of her son and husband. I was touched by the sadness of her story, angered at those responsible, but impressed by her courage. We in this Congress can be no less courageous, for her sake, for the thousands like her, and for our sake.

So I commend the gentleman for speaking out and taking the leadership and bringing this issue to our attention.

Mr. DOUGHERTY. I thank my colleague from Maine for those comments.

Mr. FOGLIETTA. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I yield to my colleague from Philadelphia.

Mr. FOGLIETTA. Mr. speaker, I rise today, as I have in the past, to speak out against the persecution of Jews in the Soviet Union who seek to emigrate to Israel.

The case of Vladimir Tsukerman, like the cases of so many Soviet Jews, is a story of harsh and unjust treatment, of callous disregard for the rights of Soviet Jews, and of distressing disrespect for a family's need to be together.

Because he wanted to join his family—who had emigrated to Israel—because he had exhausted every means at his disposal to seek emigration, Vladimir Tsukerman staged a peaceful protest against the authorities. He broke no law, committed no crime, and hurt no one. But today, Vladimir Tsukerman is in prison, sentenced to 3 years in a labor camp for "disturbing public order."

The Soviet Union, as everyone knows, was a signatory of the Helsinki accords. Yet here, once more, they have broken the spirit of those accords. Vladimir Tsukerman was denied a visa because he served in the navy. But he was discharged in 1975. He knew no state secrets. He did not seek to violate any element of Soviet security. Vladimir Tsukerman sought simply to join with his family in leaving a land where he was not welcome, and moving to one where he and his family would be free from persecution. I call upon the leaders of the Soviet Union to speed his release, and to allow him to join his family in Israel.

The injustice done to Tsukerman is not unique—there are all too many examples of such violations of basic human rights and dignity by the Soviet Union toward their Jewish population. If we are to one day reach a condition in the world where justice is a reality, and not just rhetoric, then Vladimir Tsukerman, and all those like him, in the Soviet Union and around the world, must be allowed to follow the path that leads to freedom and to the dignity to which they are entitled.

□ 1710

I commend the gentleman from Philadelphia for his efforts in this particular case and pledge to him my cooperation in the future in trying to work out this problem.

Mr. DOUGHERTY. I thank my colleague, the gentleman from Philadelphia, for his comments.

Mr. SMITH of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I yield to my colleague from Philadelphia, Mr. SMITH.

Mr. SMITH of Pennsylvania. I thank the gentleman for yielding.

Mr. Speaker, I rise today to bring to the attention of my colleagues the plight of Vladimir Tsukerman.

It has been said before me and it will be said long after this day that if we engage in the battle to alleviate the suffering of enslaved people anywhere, it is the noblest endeavor of all.

Today, we address a situation wherein we pray in this hallowed Chamber for justice of a single individual—Vladimir Tsukerman. A Soviet citizen who has been denied the right to employment, denied the right to socialize, denied the right of self-expression, denied the right to live with his loved ones, denied the right to exile.

Vladimir Tsukerman was arrested for his legal right to emigrate to Israel in order to join his wife and son. This individual has been stripped of his personal dignity by an oppressive state.

In this great country of ours, we are drawn together by our unselfish devotion to a common cause, which is preserving individual liberty. It is our duty and responsibility as Americans to show the other people of the world the way to human freedom and dignity. Admittedly, by freeing Vladimir Tsukerman from the Soviet Union is not going to stop human oppression or settle the world's disputes. But any movement that teaches the value of human freedom is bound to help create attitudes favorable to securing individual liberty.

Vladimir Tsukerman and his wife, Faina Tsukerman, and their son deserve to be supported in their endeavor to be united. The cruel mistreatment and imprisonment of Vladimir Tsukerman is in direct violation of the Helsinki accords signed and ratified by the Soviet Government.

As Americans we have a tremendous responsibility to lead the way to human liberty. We cannot shirk our responsibility by allowing individuals to be grossly and unjustly deprived of their fundamental human freedom. Therefore, in order to promote progress in the pursuit of individual and national liberty, we must take action by combating the Soviet authorities; blatant violations of the Helsinki accords. I believe that by uniting in our support for Vladimir Tsukerman, we can help to achieve the ideal of living in a world that is free from oppression.

It is important for the Congress to go on record as opposing this inhumane treatment of Vladimir Tsukerman and to urge the Soviet Government to bring about a speedy resolution of this deplorable situation.

Mr. DOUGHERTY. I thank my colleague for his comments.

Mr. HYDE. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I yield to my colleague, the gentleman from Illinois.

Mr. HYDE. I thank the gentleman for yielding.

Mr. Speaker, notwithstanding the fact that I am not from Philadelphia, I would like to associate myself with the remarks of my dear colleagues who have so adequately and so articulately expressed the sense of outrage and disgust that we feel toward the Soviet Union for keeping people who want to emigrate, who want to leave the country. Freedom to do so is one of the hallmarks of a free society and, I might say, a civilized society. One wonders what they have to fear. One wonders why they do not want people to leave the country. I suppose the contrast to be expected would be so great. But, of course, we know why the wall was erected in Berlin—to keep people from leaving Soviet states, the countries that are dominated by the Communist regimes. It is a sad commentary on this world that people are still kept in national prisons when they want to emigrate and join their families.

Mr. Speaker, we can stand here and talk and write letters, and sometimes we wonder whether anything good is being accomplished. But for this Member, when I understand what the Helsinki accords promised and the expectations, and then when I see the performance, I find it impossible to confine my distrust for the Soviet Union living up to its word of honor, its signed word on a treaty, in matters of nuclear disarmament, in matters involving international undertakings. How can you trust them? How can you believe them? Is their word any good?

And it is this suspicion, premised and based on the history of ignoring their sworn undertakings and promises and international pledges that diminishes the possibility of meaningful, lasting trust between great superpowers.

So it is not an empty gesture that we stand here and talk about these things. I think we must express our dismay, our displeasure, our disgust, at the fact that people, who yearn to join their families and to leave a country that is unbearable to them, are denied that civilized privilege, and it makes us question whether it is possible, on the basis of mutuality and trust, to ever reach an accord with their prisoners.

So I salute the gentleman from Pennsylvania (Mr. DOUGHERTY) for his initiative, and I certainly want to associate myself with his views and those of the other Members who have spoken on this issue.

Mr. DOUGHERTY. I thank my colleague, the gentleman from Illinois, and I think the point he makes is very well taken. If indeed the Soviet Union is so afraid of one young man who wants to join his family and his 6-year-old son in Israel, that they would in effect violate the Helsinki accords,

how can we realistically be expected to trust the Soviet Union on any other thing that they would like to engage in, particularly when we get into these serious areas of disarmament and the like?

Mr. Speaker, 50 Members of the Congress have joined with me in sending a letter to President Reagan, which I would now like to read in the RECORD. I would also like to ask other Members of the Congress who might want to cosign this letter to contact my office today or tomorrow.

The letter reads as follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., November 18, 1981.

President RONALD REAGAN,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Recently your administration has begun reestablishing diplomatic channels between our country and the Soviet Union. We, as United States Senators and Members of Congress, urge you to make known our concern for the thousands of Soviet Jews who have been victims of flagrant denials of human rights on the part of the Soviets.

More specifically, we would like to bring to your attention the case of Mr. Vladimir Tsukerman who since 1974 has applied for an emigration visa and has repeatedly been denied. His wife and son were permitted to leave in 1978, but he was not permitted to emigrate. After seven years of frustration and disappointment, Vladimir chose to lead a march through his home town of Kishinev to protest not only his denial of emigration, but the denial of all Jews in Kishinev who have tried to exercise their basic human rights. On May 30th of this year he was arrested. He was recently sentenced to the maximum term of three years in a labor camp for a "violation of the social order."

This past summer several of us traveled to Israel and met with Faina Tsukerman, Vladimir's wife. She lives in Israel with their son. We pledged to help her in her struggle to reunite with her husband and we believe, Mr. President, that you could greatly add to the weight of our message. For some time now, emigration levels from the Soviet Union have been kept very low. We understand that the issues involved in relations with the Soviets are complicated; however, we wish to stress the importance of world wide respect for human rights, and specifically the case of Vladimir Tsukerman.

With best regards

Sincerely,

ARLEN SPECTER,
U.S. Senator.
CHARLES F. DOUGHERTY,
Member of Congress.

As I said, Mr. Speaker, this letter has been co-signed by 50 Members of the Congress, and we would invite others, who would so choose, to contact my office this afternoon or tomorrow.

Mr. Speaker, I would also like to thank those Members of the Congress who have met with Mrs. Tsukerman on these past 2 days and have agreed to write individual letters to Mr. Brezhnev, President of the Soviet Union, to express to him personally their outrage at this tragedy.

I would like to close by saying, Mr. Speaker, that we in Congress get very busy all the time, we are frequently on the go. We are running from issue to issue, from place to place. It is the moments that we share with those who are less fortunate than we that I think bring home to us the real meaning of what it is be an American, what a privilege it is to serve in the U.S. Congress. On too many times we read newspapers, we get letters, but we never meet the people. Having had the privilege now of meeting Mrs. Tsukerman, both in Jerusalem and here in Washington, it has brought home to me a very human factor that is involved in what is called the human rights struggle.

When you come down to the bottom line, it is such a tragedy and such an indictment of the Soviet Government that they would go to such extremes as to deny a young man the right to leave that country so that he could be with his wife and son. Indeed, if we need a better commentary on the Soviet Union, there can be none, that they are so afraid, that they are so unsure, that they are so distrusting that they would dare to deny one human being the right to join his family.

Mr. Speaker, I want to thank my colleagues who have joined with us today.

● Mr. ASHBROOK. Mr. Speaker, the story of Vladimir Leonidovich Tsukerman is yet another classic case of flagrant violation of human and civil rights in the Soviet Union.

Arrested in Kishinev at the end of May this year and now awaiting trial, Tsukerman's only crime was his attempt to exercise his legal right to emigrate to Israel where his wife and son have been living since 1978. The Soviet authorities' refusal to grant Tsukerman a visa to emigrate was based on the shallow excuse that he had served in the Soviet Navy, from which he was in fact discharged in 1975, well before he applied to emigrate.

After a long period of being deprived of a job and being subjected to constant harassment, including imprisonment, Tsukerman was finally notified that, due to removal of the security consideration applied to his case, he would be granted an emigration visa in April of this year. At the last minute, however, it became apparent that the Soviet authorities were playing a cruel joke on Tsukerman. When he went to pick up the permit, he was told that his application was again rejected.

Several days later, Tsukerman staged a peaceful protest demonstration in Kishinev for which he was arrested on the charge of "disturbing public order," a charge which, if he is convicted, means a minimum of 3 years in labor camps and possible later exile.

Vladimir Tsukerman's tragedy, compounded by the fact that he was forced to divorce his wife so that she and their son could emigrate to Israel, underscores the problem of human rights violations in the Soviet Union. This week President Reagan indicated profound resolve to reduce United States-Soviet tensions by commencing serious arms control talks. An appropriate response or the Soviet Union would be to evidence the seriousness of the commitments to international treaties such as the Helsinki accords, by making a humanitarian gesture and allowing Vladimir Tsukerman and other similarly situated Soviet Jews to emigrate.●

GENERAL LEAVE

Mr. DOUGHERTY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order on today.

Mr. SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

VIOLENCE CONTROL ACT OF 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. STOKES) is recognized for 60 minutes.

Mr. STOKES. Mr. Speaker, in July 1979, the Select Committee on Assassinations, which I was privileged to chair, filed its final report on the deaths of President John F. Kennedy and Dr. Martin Luther King, Jr. At the time, most people's attention was focused on our conclusions that these two men most likely died as a result of conspiracies. In fact, our work went well beyond the conspiracy question, and we made a series of important legislative and administrative recommendations. It is in light of those recommendations that I now rise to introduce, along with my colleagues, Mr. EDGAR, Mr. FORD of Tennessee, Mr. FITHIAN, Mr. MCKINNEY, and Mr. FAUNTROY, the Violence Control Act of 1982.

I

Mr. Speaker, I know that you do not need to be reminded that this Sunday will mark the 18th anniversary of President Kennedy's assassination, sorely a pivotal event in American history. More than any single murder since, that event changed our world and our perception of it. Though others were victims of brutal homicides in the following years, that murder uniquely made America seem less green, less full of promise, less full of hope, for it seemed as if America

lost its youth when the young President died.

It is ironic, too, that a child born on that tragic day in Dallas would be 18 years old this Sunday—an adult in America's eyes—old enough to vote and participate in a responsible way in the public aspects of our life in common.

In what sort of world has that child become an adult?

Sadly, it is increasingly a world more violent than the day on which he was born.

In 1960, this Nation suffered 9,000 murders.

By 1980, that figure had risen to 23,000—an increase of more than 156 percent, though our general population had grown but 22 percent.

While it is, of course, true that the violence prone age bracket—15 to 24—increased faster than the general population over those years, the increase was only 72 percent.

Mr. Speaker, the increase in violence that our society has experienced over the past 20 years is not some statistical mirage, as some editorial writers or academicians would have us believe. It is all to real for all too many people.

In fact, the data showing an increase—obtained independently from police and coroner records—understate the true extent of violence, for a remarkable improvement has taken place over these years in the quality of emergency medical treatment and facilities, particularly in urban areas. Many attacks that would have been murders yesterday go down as aggravated assaults today. Witness only one recent example—the shooting of Presidential Press Secretary, James Brady. Twenty years ago it is unlikely that he would have survived.

These homicide statistics, therefore, document only part of the tragedy of violence in our society today.

In 1960, this Nation saw 150,000 aggravated assaults.

By 1980, the figure had risen to 650,000—an increase of more than 330 percent.

The impact of this rise in personal violence has been repeatedly documented. A recent national survey found that 4 out of 10 Americans were "highly fearful" and felt "unsafe" in their own homes. At about the time of the assassination attempt on President Reagan's life, a Harris survey showed a dramatic rise in the number of Americans who felt that the crime rate in their area was increasing, with 68 percent saying that crime was on the upswing compared to only 46 percent saying so in 1978. Additionally, 48 percent of the adult population reported that they personally feel uneasy, not only in their homes, but on the public streets, up from 40 percent who felt that way in 1978.

The American people, too, express a sense of futility with law enforcement. They feel, according to the Harris survey, a growing sense that the present system of law enforcement does not discourage criminal activity, a view now held by a shocking 79 percent of adults nationwide.

And the people's perception is not wholly wrong. The statistics show a steady decline in the percentage of all offenses that the police feel they solve through arrest that parallels the increase in the volume of offenses. Murder clearance rates, for example, have dropped from 92 percent in 1960 to 73 percent in 1973; aggravated assault rates from 76 to 59 percent. The police are, in short, being overwhelmed by volume, and the people are being left helpless and frustrated.

There are other, more personal ways of stating the stark facts:

An American male born today is more likely to die by murder than an American soldier in World War II was to die in combat.

In fact, 1 out of 186 live born white males are expected to be murder victims in their lifetime.

Murder is the leading cause of death for black males age 15 to 24.

In fact, 1 out of 29 live born nonwhite males will be murdered in their lifetime.

II

Mr. Speaker, a particularly disturbing aspect of the violence that has characterized our society in recent years is assassinations, not only of political leaders, but also of public figures. In the 150 years since 1835 when Richard Lawrence's pistol misfired as he shot at President Andrew Jackson, there were 12 attacks on Presidents or Presidential candidates. Four Presidents were killed—Lincoln, Garfield, McKinley, and Kennedy—1 out of every 10 men to have held that high office.

In the first 100 years, there were five attacks. In the past 50 years, there were 8 attacks. Since 1963, there were six attacks. Indeed, three out of the last six Presidents have been the targets of assassins, and one—President Ford—was attacked twice.

If we look beyond the Office of the Presidency and include attacks on public figures—men such as Dr. Martin Luther King, Jr., Malcolm X, John Lennon, and most recently, Vernon Jordan, Jr., it appears that we are running an assassination attempt rate of at least one per year.

Mr. Speaker, how long our social fabric can withstand the pressures that these attacks create, only history will tell. What I do know is that assassination is more than a deadly assault on another human being. As our final report observed of an assassination:

It is an attack on the foundations of Democracy—majority rule, due process of law, consensual decisionmaking, individual rights and liberties. It undermines the political system by deterring qualified people from seeking public office or exercising leadership. It produces fear among the citizenry. A "Seige Mentality" and often leads to the creation of vigilante groups, civil disorder and other counterterrorist activities.

III

Mr. Speaker, we must be frank with one another and with our constituents. There is not a great deal that law enforcement can do directly to control personal violence. Murder and aggravated assault are largely societal problems beyond the direct control of governments. Fifty-two percent of the victims of murder in 1979 were acquainted with their assailants, and 1 out of 5 were related by blood or marriage to the offender. Forty-two percent of the murders grew out of arguments over romantic triangles, alcohol or drug, property or money, or similar issues. Only 22.2 percent of the murders were, in fact, felony homicides, that is, murders committed, usually between strangers, during the course of other crimes, such as robbery, narcotic dealings, or sex offenses. No system of law enforcement can protect individuals from their family and friends. We know, too, that high murder rates are significantly correlated with the presence of illiteracy, young males without education, broken homes with female heads of households, and poverty. Increased education, more stable family life, and increased and more meaningful jobs will, in short, do more to lower the murder rate than criminal legislation of any kind. That, too, is a fact.

We must be frank on another score. The Federal Government does not and cannot be expected to play a large role in controlling that part of violence on which law enforcement can have a direct impact. Historically, the Federal Government has not had jurisdiction over common-law type offenses—murder, aggravated assault, rape, robbery and the like. And the Federal Government does not have the personnel to do much more than it is doing now. Currently, it employs 75,000 persons and spends $1.9 billion in the law enforcement, prosecution, courts, and correction areas. Yet State and local governments employ more than 620,000 persons and spend more than $11.1 billion in similar efforts. Were all of the Federal effort, in short, focused in this area, and none of its uniquely Federal responsibilities were met, it is doubtful, therefore, that its impact would significantly increase the level of public safety.

IV

Mr. Speaker, recognizing our limits (and the limits of law itself) is not to counsel despair or inaction. We must do what we can. Dean Roscoe Pound of the Harvard Law School identified the four chief factors influencing the quality of American justice as personnel, administration, procedure, and the substantive law. It is evident, too,

as Pound conlcuded, that these factors must be ranked in that same order of relative importance. Personnel and administration have been left to others. Our job, therefore, must be to guarantee that procedural and substantive law are the best that can be fashioned by the minds and hands of creative men and women. It is in that spirit that my colleagues and I are introducing today the Violence Control Act of 1982.

Mr. Speaker, my colleagues and I are introducing this legislation as a "study bill." None of us are necessarily committed to any provision of the bill as presently drafted. It is introduced to serve as a vehicle on which to hold hearings. I am hopeful, however, that when hearings are held that a consensus will emerge on the issues raised by the bill and that legislation will quickly reach President Reagan's desk for his signature.

Following the recommendations of the select committee, title I of the proposed legislation codifies and reforms the law of federally cognizable personal violence. Title I draws on the work of a number of distinguished groups, including the American Law Institute and the National Commission on the Reform of Federal Criminal Law. In addition, it draws on the able work already done in the House and Senate in the past 10 years or more to codify, revise, and reform the Federal criminal law.

Mr. Speaker, it has long been suggested that the Federal criminal law is in need of a thorough reorganization. Unfortunately, our criminal statutes are currently spread in haphazard fashion through most of the 50 titles of the United States Code, and in many cases, they are conflicting, contradictory, and imprecise. The result is that there is not only confusion, but there are illogical, and often unfair discrepancies present in the application of the law. Over 10 years ago, Congress called for a complete reexamination of the Federal criminal justice system. And after years of hearings, studies, and successive bills, this Congress is again working on revising the criminal code with S. 1630, which has the administration's support, H.R. 4711, introduced by Congressman CONYERS, and H.R. 1647. I am hopeful that the legislation I introduce today with my colleagues can be considered along with, or in addition to, the major codification efforts. For if the general codification effort again becomes mired in controversy, I would hope this much needed legislation can be processed separately.

Title I of the proposed act also faces the delicate issue of capital punishment and resolves it, not by increasing the level of violence in our society by State sanctioned deaths, but by authorizing a new concept of imprisonment in Federal law: "Life without release." Only the President's constitutional power to pardon could serve as an avenue of release for a person convicted of murder.

Title II draws on other recommendations of the select committee, some of its more important provisions would—

Mandate contingency planning by the Department of Justice to deal with assassinations;

Authorize Federal autopsies; and

Create trusts for victims of federally cognizable violence.

Mr. Speaker, this last provision requires particularly close study. Testimony before the select committee indicated that efforts were made to insulate the widow of Dr. Martin Luther King, Jr., from the funds James Earl Ray hoped to realize from the sale of media rights to the facts around the assassination. To deal with just that sort of reprehensible conduct, a number of States—12 at last count—have moved in the last 4 years or so to discourage profiteering by criminals through the sale of their life stories. They have taken as their lead the principle followed in Riggs against Palmer, an 1889 New York decision, in which the court observed:

> No one * * * (should) be permitted to profit by his own fraud or to take advantage of his own wrong * * * or to acquire property by his own crime. These maxims are dictated by public policy and have their foundation in universal law administered by all civilized countries.

I recognize, of course, that criticisms have been leveled at these laws on the first amendment grounds that they are an impermissible burden on the free speech rights of criminals. Nevertheless, I am hopeful that the hearing process will be able to develop some workable compromise in this area between the rights of the wrongdoer and his victims.

Mr. Speaker, title III of the proposed legislation goes beyond the recommendations of the select committee. The need for it, however, is dramatically illustrated by the attack on President Reagan.

On March 30 here in Washington, John Hinckley, Jr., shot at the President, gravely wounding the President's Press Secretary, and seriously wounding Mr. Reagan and others. As I previously noted, it was only good luck and a fine hospital facility so close at hand that prevented the Nation from losing another President to the bullets of an assassin. John W. Hinckley is, of course, now standing trial in the District of Columbia, and his attorneys have been seeking to have him found not guilty by reason of insanity. Nothing that I say here today should be construed as an effort to affect those proceedings. But should Hinckley go free, I note that, he will still have to receive, under Federal law applicable to the District of Columbia, medical treatment in the form of therapy. But—and this is my point—had Hinckley shot at President Reagan in Alexandria, Va., and been found not guilty by reason of insanity in a Federal trial for the attack, he could have just walked out of the door of the courtroom and never have to receive therapy. As hard as it might seem to believe, there is, in fact, no general provision of Federal law applicable outside of the District of Columbia requiring that those found not guilty by reason of insanity in Federal courts undergo medical treatment. Richard Lawrence, as I noted earlier, fired at Andrew Jackson in 1835, and was committed to a hospital, where he remained until his death in 1881. John Schrank, a saloon keeper, shot Theodore Roosevelt during a campaign visit to Milwaukee in 1912, and was committed to a hospital, where he remained until his death in 1943. Nevertheless, Congress had never moved to guarantee that this procedure must be followed in all cases. I believe we have waited too long to remedy this defect.

Mr. Speaker, title IV of the proposed legislation also goes beyond the recommendations of the select committee. I expect, too, that it will be controversial, for it makes provisions for the registration and licensing of handguns. While this provision—modeled after legislation supported in the Senate by Senator TED KENNEDY—was not considered by the select committee, it may well be the most significant part of the proposed legislation.

Over the past two decades firearms have consistently been the weapon of choice in more than 60 percent of the homicides. Handguns have been the weapon of choice in more than 50 percent of the killings.

Presidential or other Federal groups or commissions—at least seven in number—have repeatedly called for strict handgun control—the National Commission for Criminal Justice Standards and Goals. The Commission on Crime in the District of Columbia, the Commission on Law Enforcement and Administration of Justice, the Commission on Cause and Prevention of Violence, the National Advisory Commission on Civil Disorders, the National Commission on the Reform of Federal Criminal Law, and, most recently, the Attorney General's task force on violent crime.

Mr. Speaker, those who oppose meaningful restraints on the use of handguns rely on six tired arguments that are almost as old as the Republic:

First, opponents of handgun control insist "their right to bear arms" is rooted in the Constitution. The argument is then extended to claim that gun control deprives them of their right to pursue happiness with guns free of Government limits. But, in fact, the courts have said that the Constitution does not interfere with

the power of the Government to regulate deadly weapons.

Since we mean to enact legislation that will halt the abuse of the handguns of those who find happiness in such weapons, they will just have to subordinate that pleasure to the right of all Americans to live free from the death and violence that the American gun mania has brought us.

Second, many people make the argument that because lawless citizens will feel no obligation to be bound by gun laws, gun controls will simply disarm those who abide by the law. I am convinced, however, that strict enforcement of licensing and registration laws will serve to isolate precisely those individuals who flaunt the law and subject them to prosecution for gun violations before they commit other crimes with their guns.

Third, critics of gun control insist that laws cannot control access to guns. Yet, the records show that even the limited provisions of the 1968 Gun Control Act have severely altered the flow of one kind of weapon—the imported handgun. In addition, the National Firearms Act of 1934 essentially eliminated civilian access to machineguns, sawed off rifles and shotguns, mufflers, and silencers. Gun control, in short, is, in fact, possible.

Fourth, a common refrain against handgun control is that "guns don't kill, people do." But a careful examination of the statistics tells us that it is when guns are in hand that two-thirds of the people who attack each other act in a deadly fashion, for rarely does an attacker make a deliberate choice of a gun over a knife. Because the fatality rate of knife wounds is about one-fifth that of gun wounds, using a knife instead of a gun might well cause 80 percent fewer deaths. Attacks may not decline, but deadly attacks surely will.

Fifth, modern critics of gun control express outrage at the vaulting gun crime rate, insisting that we do not need more gun laws. Instead, they say, we should enact long-term mandatory penalties for crimes committed with guns. Even if our penal system were not already overcrowded, this proposal could be counted upon to produce undesirable results. Penalties do not deter an angry person from reaching for a gun, and if penalties were in fact made much stronger, the extra punishment might well encourage the armed robber "to leave no witnesses." Thus, it is likely that high mandatory penalties would, in fact, cause more gun deaths than they would prevent.

Sixth, the greatest number of those who protect gun control legislation apparently believe that the administrative requirements for registration would be too cumbersome and inconvenient. Such requirements are thought to be "unfair and punitive" in that the persons really affected so adversely are law abiding citizens who pursue shooting as a hobby or as a form of recreation. To these people, I can only say how thoughtless you are, when you value your own inconvenience over the lives of others.

Mr. Speaker, this recitation of the arguments on handgun control includes the core of the objections vehemently raised and expertly used by the National Rifle Association and other gun advocates to force the Justice Department and the Department of the Treasury to turn the current administration's attention away from serious efforts to do something about violence.

But I say that if there is any issue that Congress understands, it is the matter of strong handgun laws. Each Member of the House is aware—or ought to be aware—that seven commissions or national study groups have recommended stronger gun laws to reduce gun killing.

In 1966, the Commission on Civil Disorders recommended "that all State and local governments should enact gun control legislation." The final report asserted that—we believe that Federal legislation is essential in order to make State and local laws fully effective, and to regulate areas beyond the reach of State government.

In February 1967, the Commission on Law Enforcement and Administration of Justice reported that strict controls by State or city are nullified when a potential criminal can secure a firearm merely by going into a neighboring jurisdiction with few controls, or none at all.

In 1968, the Commission on the Causes and Prevention of Violence concluded that: The only sure way to reduce gun violence is to reduce sharply the number of handguns in civilian hands in this country. We recognize this will be a massive and expensive task. But, the price is one that we should be prepared to pay.

In 1971, the Commission on Reform of Federal Criminal Laws called for—a ban on the production and possession of, and trafficking in, handguns, with exceptions only for military, police, and similar official activities; and registration of all firearms.

In 1973, in its report to President Nixon, the National Advisory Commission on Criminal Standards and Goals recommended that each State take the following action: The private possession of handguns should be prohibited for all persons other than law enforcement and military personnel. Manufacture and sale of handguns should be terminated. Existing handguns should be acquired by States. Handguns held by private citizens as collector's items should be modified and rendered inoperative.

Most recently, the Attorney General's task force on violent crime called for stricter handgun controls.

Mr. Speaker, how long are we going to lack the courage to do in that we know is right?

I hope—not long.

Mr. Speaker, I ask unanimous consent to include the following materials in the RECORD at this point:

First. A section-by-section analysis of the act.

Second. Four charts presenting data on personal violence in the United States.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The material follows:

SECTION-BY-SECTION ANALYSIS—(THE VIOLENCE CONTROL ACT OF 1982 (H.R. 5057))

FINDINGS

1. Personal violence over past two decades has been increasing at an intolerable rate.
2. Assassinations are a particularly disturbing aspect of personal violence.
3. Assassinations impact on the foundations of a free society.
4. Other forms of personal violence similarly impact on the basis of community life.
5. Handguns, the special weapons of personal violence, must be controlled if violence is to be curtailed.

Title I: Federally cognizable personal violence

Codification and reform of federal law of:
1. Murder;
2. Manslaughter;
3. Negligent Homicide;
4. Maiming;
5. Aggravated Battery;
6. Battery;
7. Menacing;
8. Terrorizing;
9. Communicating a Threat;
10. Kidnapping;
11. Aggravated Criminal Restraint; and
12. Criminal Restraint.

Notable Features: Protected persons include federal officials and foreign leaders. Murder and kidnapping where death results are punishable by "life without release" imposed after special sentencing hearings that includes appellate review by prosecution and defense to correct error and undue severity or leniency.

Title II: Provisions related to federally cognizable personal violence

Section 201: Codification of power of Secret Service to protect national figures.

Section 202: Codification and extension of power of Secret Service to create zone of protection around national figures.

Section 203: Attorney General mandated to prepare contingency plans for assassinations and related violence for review by Congress.

Section 204: Attorney General authorized to preempt investigative jurisdiction over attacks on national figures.

Section 205: Attorney General authorized to conduct investigation of kidnappings after 24 hours if victim not released.

Section 206: Attorney General authorized to pay rewards not to exceed $500,000 in investigations of federally cognizable violence.

Section 207: Attorney General authorized to forfeit property used in acts of federally

cognizable violence. See *United States* v. *One 6.5 mm. Mannlicker-Carcano Military Rifle*, 250 F. Supp. 410 (N.D. Tex. 1966), *rev'd, King* v. *United States*, 364 F2d 235 (5th Cir. 1966) (assassination weapon used against President Kennedy not subject to forfeiture).

Section 208: Attorney General authorized to use military services in federal cognizable violence notwithstanding 18 U.S.C. 1385 ("posse comitatus"), where victim is federal public official or foreign guest. See 18 U.S.C. §§ 351, 1751.

Section 209: Attorney General authorized to perform autopsies to determine the circumstances, manner, and cause of federally cognizable deaths.

Section 210: Attorney General authorized to institute condemnation proceedings with provision for just compensation for property related to federally cognizable violence. See *Porter* v. *United States*, 335 F. Supp. 498 (N.D. Tex. 1971), *rev'd*, 473 F.2d 1329 (5th Cir. 1973) (condemnation under special statute of Oswald's effects). Provision made for acceptance by General Services Administration of historical preservation agreements. See *Nichols* v. *United States*, 325 F. Supp. 130 (D. Kan. 1971), *aff'd*, 460 F.2d 671 (10th Cir. 1972) (validity of deed of transfer to GSA of Kennedy autopsy materials).

Section 211: Provision made for Trust to compensate loss for victims of federally cognizable violence for proceeds of media rights sold by perpetrator.

Section 212: Provision made for special prosecutor in death by criminal means of President.

Section 213: Provision for consideration of danger to community and to accused in extraordinary situations in setting or denying bail involving federally cognizable violence.

Section 214: Provision for consideration of careful preparation as factor for reasonable delay in speedy trial of federally cognizable violence where President or high public official is the victim.

Title III: Provisions relating to mental disease or defect

Codification and reform of federal law relating to:

1. Determination of mental competency to stand trial;
2. Determination of insanity at time of offense;
3. Hospitalization of person acquitted by reason of insanity;
4. Hospitalization of person convicted, but suffering from mental disease or defect;
5. Hospitalization of imprisoned person suffering from mental disease or defect; and
6. Hospitalization of imprisoned person suffering from mental disease or defect, but due to be released.

Notable Feature: Current federal procedure not including provision for hospitalization of persons acquitted or otherwise released because of insanity rectified.

Title IV: Provisions relating to principal instruments of personal violence

Provision made for:

1. Registration of handguns;
2. Licensing of handguns;
3. Restriction of possession of handguns by:
   1. Age;
   2. Mental disease or defect;
   3. Drug use; and
   4. Criminal record; and
5. Exemption for:
   1. Law enforcement;
   2. Sports; and
   3. Self protection.

Title V: Provisions relating to congressional investigations

Provision made for Counsel for House of Representatives to enforce process and represent constitutional powers.

Title VI: General provisions, conforming amendments, and repealers

PART A.—PERCENT OF VIOLENT CRIMES CLEARED

Year	Murder	Forcible rape	Robbery	Aggravated assault

Mr. STOKES. Mr. Speaker, before I yield to my distinguished colleague from Indiana, a former member of the Select Committee on Assassinations and a very active and valuable member of that committee, I would just like to make one additional comment.

We completed the work of the Assassinations Committee in December 1979. In making our recommendations to the House, our committee felt that we had a responsibility to the House of Representatives that had invested more than $5 million in this investigation to do something about the recommendations we made to the House at that time. During the period from December 1979 until now, Prof. Robert Blakey and I have worked on this legislation. Professor Blakey, who is currently at the Notre Dame Law School and formerly at Cornell Law School, when he was chief counsel and staff director for our committee, has since that time devoted an enormous amount of his personal time, not being an employee of the House, to drafting this major piece of legislation.

I just want to take time to commend him not only for the excellent bill he has brought forth, but also for demonstrating that as a former employee of the House he is willing to give this kind of devotion and time as a contribution to the Congress and to his country. Mr. Blakey has pledged to continue aiding and assisting me and my cosponsors in the development of this legislation. Mr. Speaker, earlier today at a press conference attended by myself, Senator CHRIS DODD, my colleagues FLOYD FITHIAN and BOB EDGAR we were joined by Chairman PETER RODINO and Chairman JOHN CONYERS. Both of these distinguished Members of the House expressed their interest in seeing hearings conducted on this legislation and we are grateful to both of them for their attendance at the press conference and the interest and concern they have demonstrated.

Mr. Speaker, I am pleased to yield to my distinguished colleague from Indiana (Mr. FITHIAN).

Mr. FITHIAN. I thank the gentleman from Ohio for yielding.

Mr. Speaker, I want to join with the gentleman in commending our former chief counsel for his tireless work on this legislation.

I also would like to say to the Members of the House that our colleague, the gentleman from Ohio (Mr. STOKES) did a remarkable job throughout the tenure of the Assassinations Committee. While I do not agree, and I will speak to that in just a moment, with some aspects of the legislation, still I would commend its careful review to all of my colleagues in the House, for as the chairman has said, we spent some $5 million of taxpayers' money. There was some very, very careful research, many, many experts were brought together in the fields of law enforcement and investigative work.

The work on organized crime, the work on process, the work on so many things that did not become a part of the media blitz on the Assassinations Committee, but in many ways could well be more long-lasting, ought to be the legacy of that committee to the House.

I regret to report, however, that some of the recommendations, and there were some very, very excellent recommendations that went forward, some of the recommendations, most of them, in fact, have been treated the way so many of our conference, so many of our committee reports and investigative reports are treated. They collect dust on a shelf somewhere.

There is much good that is in that report. There is much provocative good that is in this bill.

□ 1750

For there are fields in law enforcement and there are fields in criminal justice and there are fields in acoustics and all of those things that we could profit a great deal from. I commend the gentleman from Ohio for engineering and recruiting Professor Blakey's tireless efforts in the drafting of the bill.

Let me wholeheartedly recommend it to the House with one exception, and I know how strongly my colleague from Ohio feels about handgun control. There are those of us who feel very much on the other side of that particular issue, but I would not want the rather lengthy and eloquent statement by my colleague from Ohio on handgun control to in any way—and it was not intended that way—obstruct the many, many segments of the bill

which address themselves to the whole bulk of work that was done by the Assassination Committee. So, what I have come to join in this special order to say is that even those of us who do not support handgun control, who believe that we ought to have a system of justice that says if you use a firearm in a commission of a crime, then you ought to automatically go to jail with a prescribed minimum sentence as an alternative to handgun control, even those of us on that side of the issue can, I think, because of the merits of the rest of the proposals in the bill, can wholeheartedly join in while indicating our personal reservation about this particular section.

Again, let me commend my colleague for his excellent work on this, and let me commend to the serious consideration of the Judiciary Committee and those who have responsibility for this area in the House a very careful review of the outstanding recommendations in this piece of legislation.

Mr. STOKES. I thank my colleague for his remarks, and I certainly understand the reservations that the gentleman has about that particular section of the bill which he spoke to. I did say earlier in my remarks that I think all of the other sponsors of this legislation have some serious concerns about certain sections of the bill, and indeed, reservations about certain provisions in the bill, but we have offered the bill in the spirit of a study bill so that we might at least bring these issues to the fore and have hearings on them, and in that way be able to eventually arrive at a bill which we can all support.

GENERAL LEAVE

Mr. STOKES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject matter of the special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

THE REAL MEANING OF DAVID STOCKMAN'S ATLANTIC MONTHLY ARTICLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. OBEY) is recognized for 60 minutes.

Mr. OBEY. Mr. Speaker, I would like to take a few minutes to discuss what David Stockman's article in the Atlantic Monthly really means.

Mr. Speaker, democracy does not work if politicians do not make decisions on the basis of their honest judgment about the needs of the country and then honestly state their views to the people they are both supposed to represent and lead.

If politicians do anything else, if they allow political decisions to warp policy decisions in major ways, policy gets screwed up.

If they don't state their views honestly the American people have no basis on which to judge those views and the country's politics get screwed up because the public decides after a while that it does not trust anybody.

I remember a senior Democrat speaking to a class of incoming freshmen Congressmen in 1974.

After answering several questions he said to one of the questioners "Oh, now I understand—you think this place is on the level."

That makes a funny story.

And the man who said it was a good man with a wicked sense of humor.

But there is nothing funny about what happens to this country's capacity to preserve a democratic system which makes our political liberties mean something to its families if the system and the people who run it are not on the level.

Over the last year, the Reagan administration generated a historic debate in Washington and around the country about the economic direction America should take.

That debate has been healthy. Out of it has come broad bipartisan agreement in and out of Congress on the need to do four things: Cut wasteful spending; shrink Government deficits; provide greater incentives for savings, investment, and modernization of an industrial base; and stimulate more competition and self reliance on the part of both business and individuals.

The now famous Atlantic Monthly article which revealed David Stockman's behind the scenes thoughts all through the conduct on that debate shows that he began with two premises which were right on target:

First, he said that liberal politics in its later stages had lost the ability to judge claims on the Government and so yielded to all of them creating a "constituency based choice making" which could no longer address larger national interests including fiscal control.

Second, he said the way to change that was to curtail "weak claims rather than weak clients."

He correctly observed that the key to political and economic success was to demonstrate that the administration would not just attack weak clients. "We have to show that we are willing to attack powerful clients with weak claims" as well.

He was right.

So we debated the President's plan, designed and promoted principally by Mr. Stockman and Treasury Secretary Regan.

The debate was not over whether we needed economic change but how we would get it.

On Government spending, Congress had three alternatives. It chose the one backed by the President.

On taxes, it had three alternatives. It chose the President's.

So the President's economic policy is now in place.

A number of us tried to achieve significant changes in the plan. We took the position that there were three things wrong with it. First, it was inflationary and would create huge deficits; second, it would damage productivity; and third, it was unfair.

How could it be inflationary? How could a program that had big cuts in social spending cause deficits?

Because while it was advertised and sold to the American people as being something radically new it was, at least in one sense carbon copy Lyndon Johnson.

Why do I say that?

In the sixties Johnson tried to fight a war without paying for it. He concealed, first from himself through wishful thinking and then from the public the economic cost of that war.

Because he wouldn't raise the taxes to pay for the big military buildup that war required, inflation went from 2 percent before the war to 6 percent at its end.

That inflation was built into the economy. It is still with us. And it has grown even worse in the wake of two oil price shocks and other forces at work in the economy.

Today this administration is doing the same thing.

Look at the three numbers that sum up its program.

Over the next 5 years, the program calls for increasing the military budget by $180 billion. It will double in 5 years.

It cuts from current services on the civilian side about $140 billion. Well, that does not seem too bad, you might say. That only adds to the deficit by $40 billion.

But when you add a $750-billion tax cut to the mix, how do you get anything other than record deficits?

I mean how do you do it without changing the computer results, as Mr. Stockman said he did in the Atlantic article.

For the last 8 months, in unpopular speech after unpopular speech, a number of us have been trying to raise that question.

But, whenever we did, we were told by the administration in Washington and its political soulmates at home that we were just being obstructive and partisan.

But, now we have the admission of the principal architect and spokesman for the program that for 6 months he had been explaining to "the West

Wing guys" that these numbers just did not add.

He explained that he got his budget deficit projections for the administration-backed Gramm-Latta budget "down to $31 billion by hook or by crook, mostly the latter."

We did not think it all the way through. Mr. Stockman has said in his Atlantic interview:

> We didn't add up all the numbers * * * we should have designed those pieces to be more compatible. But the pieces were moving on independent tracks * * * it didn't quite mesh. That's what happened. But, you see, for about a month and half we got away with that because of the novelty * * *

So now the administration admits that even with their own numbers their program will produce 4-year, back-to-back deficits larger than Jimmy Carter's.

To put it in perspective, consider the following: It took this country from 1776 to 1968 to run up a national debt of $340 billion—192 years. The Reagan administration will show us how it can be done in 4.

Projected deficits that large have created an inflationary mind set in the Nation's money markets and they are responsible for the excruciating interest rates that are continuing to choke the economy.

The Federal Reserve has seen those coming deficits. It has been trying to compensate for them in fighting inflation by imposing tight money and those high interest rates themselves add unnecessary inflation to economic sectors like the housing market.

Why do I say it is unfair? Putting aside for the moment the question of how evenly the budget cuts fall on the poor and the well off, let us look at what happened on the tax bill.

The great tax debate began as a legitimate effort to reform the economy by encouraging savings, and stimulating investments to modernize our industrial base. But economic policy quickly took a back seat to politics.

As the Atlantic Monthly article describes it:

> The tax lobbyists of Washington, when they saw the outlines of the Reagan tax bill, mobilized the business community, the influential economic sectors from oil to real estate. In a matter of days, they created the political environment in which they flourish best—a bidding war between the two parties.

At that point, to restore the original goal of economic reform, Congressmen MORRIS UDALL, HENRY REUSS, and I offered our own alternative. It provided major assistance to business and individuals. But it stripped away the expensive gimmicks which had been added to both other plans to gain votes.

We provided over $300 billion in tax relief for business and individuals but we had no artificial sweeteners.

Our alternative was limited to the amount that could be provided without borrowing money.

We got 144 votes—a majority of Democrats and 5 courageous Republicans. The President won.

The bill provided $120 billion in basic business tax relief over 5 years to modernize plants and equipment. There was not much argument about that.

But the goodies added along the way were expensive. For instance:

A new $17 billion tax gift to the oil industry:

A new $27 billion welfare program for corporations. Above and beyond basic depreciation reform, the bill allowed corporations like Ford Motor Co., to sell excess tax credits to corporations like IBM for cash.

The individual tax cuts were so big they added astronomically to the deficit and they were grossly skewed to favor the rich.

Some examples: A family of four making $15,000 a year will get a tax cut in 1982 of $2 to $3 per week. The same family making $100,000 a year will get back about $2,200. They make 7 times as much but gets back 14 times as much and by 1984 will get back 21 times as much.

It was a new demonstration of something an old colleague of mine from my State legislative days, Harvey Dueholm, had often observed. "The trouble with government," Harvey said, "is that all too often the poor and the rich get the same amount of ice but the poor get theirs in the wintertime."

People making $50,000 per year make up 5.6 percent of the population. They are 1 in 20 people but they will get back $1 in $3 of tax relief. That difference: The cost of giving a tax cut to those making $50,000 or more a year which is larger than the cut given the average taxpayer will add $160 billion in red ink over the next 5 years.

When some of us said that was unfair and too expensive, the administration said that the Kemp-Roth tax cut was necessary to stimulate the economy.

But what does Mr. Stockman say now about supply-side economics:

> Kemp-Roth was always a Trojan horse to being down the top rate * * * it's kind of hard to see trickle down so the supply side formula was the only way to get a tax policy that was really trickle down. Supply side is trickle down theory.

It seems that Harvey Dueholm was right once again. And what did Mr. Stockman say about the tax bill produced by the bidding war we warned about: "The hogs were really feeding. The greed level, the level of opportunism just got out of control."

And what of Mr. Stockman's original goal of curtailing weak claims rather than weak clients. Did the tax and budget changes really result in attacking powerlful clients with weak claims or did it wind up shooting the sick?

As the Atlantic Monthly article states:

> What had changed fundamentally were the list of winning clients, not the nature of the game.

I ask you if it is decent public policy:

To wipe out subsidies for unemployed black teenagers while protecting export subsidies for truly needy corporations like Boeing, Westinghouse, and GE.

To slash nutrition programs for pregnant mothers and double-dipping third graders who receive both food stamps and school lunch benefits while not laying a glove on the tax deductible business lunch.

To continue millions of dollars of subsidized water for irrigation to landholders like Tenneco Corp., while the average Wisconsin dairy farmer with 40 cows faces huge interest payments and frozen milk checks.

Another divinty school graduate, John the XXIII, give us quite a different version of how economic policy is supposed to be designed. He said:

> Economic prosperity is to be assessed not so much from the sum total of goods and wealth possessed, as from the distribution of goods according to the norms of justice.

Some might say, with some legitimacy, that if we can expand productivity to achieve economic growth there will be more for everyone to share.

True; but Pope John Paul II had a fitting observation:

> The present economic difficulties * * * must not become a pretext for giving in to the temptation to make the poor pay for the solutions to the problems of the rich.

And I would further suggest that this budget will hurt, not help the productivity of our economy.

How? Let me demonstrate by describing budget choices the administration has made: The budget for fiscal year 1982 is about $700 billion. One-fourth is for military spending. Under administration plans that will double in 5 years. Another one-fourth is for retirement programs. And even with administration plans for social security cutbacks, that portion of the budget will rise over the next 5 years because our population is aging rapidly.

Interest on the debt is another 15 percent. This year it will go up from $80 billion to $110 billion. In addition, the President has put a number of programs off limits for budget cuts—the Immigration Service, the FBI, and so forth.

So far we have covered about 75 percent of the budget and that 75 percent under the administration plan will go up not down the next 5 years.

That means the lion's share of the budget cuts has been concentrated in two areas:

First, support for the nonelderly poor make up 6 percent of the budget. One-third goes for the support of blind and disabled people. Even if you totally eliminate all direct support for able-bodied nonelderly poor, you

would not offset the increases for 1 year in the military budget because that increase is so huge. And that will not happen because cuts here have already been severe. That means that most of the cuts will be focused in the remaining 20 percent of the budget.

And that is the portion of the budget that is directed at investment. It contains human investment items like education, worker training, science, research and development, and physical investment such as: soil conservation and bridge construction and sewage treatment.

We all remember sputnik. I can remember the day it went up. Across the Country the cry went up. "We have to beef up education. We have to beef up math and science education. We have to beef up our investment in science."

So what has happened to U.S. basic science research since sputnik? It has declined as a percentage of our national income by 20 percent: In Germany, it has gone up 20 percent; in France, it has gone up 30 percent; in Japan, it has gone up 40 percent. I suspect that difference has as much to do with our inability to compete in international markets as any other set of numbers you can find.

But what does the administration budget do to basic science research? It cuts basic science R. & D. for health, for education, for energy, and for food growth technology by 13 percent.

And what is happening to physical investment in our local communities—investment in sewage treatment systems, bridges, and highways—without which we cannot have new housing or successful commerce?

According to Business Week, there is a backlog of $41 billion to replace or repair two out of every five bridges in the country that are defective, $31 billion in sewer and water systems—without which new housing construction will not occur in many areas of the country, $100 billion just to maintain water systems for the 756 urban areas with populations over 50,000.

Without adequate investment in water and sewage and transportation systems industry cannot expand or compete. But the new tax policies, with gimmicks like the all savers certificate, are crippling the ability of local governments to borrow at reasonable interest rates.

And, while as business week points out, grants to cities and States represent only 14 percent of the Federal budget, they are the target of one-third of the administration's sweeping budget cuts.

Next to cuts in research, the most crippling of the cuts in terms of future economic productivity is in education. I do not understand people who recognize the need to increase capital investment in machines, but do not understand the need to accompany that investment with capital investment in people.

The key to social stability and economic progress in this country has always been the belief that individuals had an opportunity to better their lot in life if they were willing to work hard enough. We have never guaranteed equality of outcome, but we have always tried to guarantee equality of opportunity; that is what has held our society together. It is what has prevented class divisions and class welfare—upward mobility based on effort and merit was the idea.

The key to that opportunity has always been education. We have always believed that educational opportunity should be based on how much talent and brains you have in your head and how much determination you have in your heart and not how much money your old man has in his bank account. This administration has retreated from that commitment and has embraced a crude economic Darwinism. That is stupid in economic terms because it wastes talent. It is immoral in human terms because it shortchanges human potential for growth. It is not sustainable politically, because it runs counter to the basically decent instincts of our people. It puts at risk the emerging national consensus for true economic reform.

In the Atlantic Monthly article, Mr. Stockman describes a $20 billion package of tax and subsidy changes he was promoting inside the White House to provide a greater degree of equity in the administration's program as equity ornaments.

But in my 19 years of public service, I have seen demonstrated time and time again that equity is not an ornament in the American system. It is a core ingredient, and if the American people do not perceive the policies you are promoting as equitable and fair they will not support or sustain those policies very long. So what do we need to do now? We need to have further cuts in budget and tax subsidy items that escaped the ax in the last round: Cost ineffective water projects, the Clinch River breeder boondoggle, and many others.

We need to attack the $10 to $30 billion swamp of waste Mr. Stockman admits is at the Pentagon. We need to strip the recently passed tax cuts of special interest ripoffs that erode public support for economic reform every bit as surely as they erode the Nation's tax base. We need to limit the size of the tax cut for high-income people to the amount we can afford without borrowing money. We must have a comprehensive across-the-board investment policy that truly meets the Nation's needs.

We need to get beyond slogans to deal with some of the basic cultural attitudes in this country which stand in the way of real economic progress. Most of all, we need an honest presentation of our problems by the elected leaders and representatives of the American people. We cannot be a prisoner of political theory or dogma, and above all we must have a debate on economic policy this time that is truly on the level. We have to discard a lot of slogans and ask two questions: What works? What is fair? And then do our best to find and support the honest answers.

This I submit is a far cry from what happened this year and what is happening yet today.

□ 1810

THE NEW STEEL WAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. GAYDOS) is recognized for 60 minutes.

Mr. GAYDOS. Mr. Speaker, at this time, let me establish for the record the fact that the Steel Caucus, having been in existence now for 5 years, and consisting of approximately 150 Members from the House side, once again appears today in this special order pursuant to the established policy of the Steel Caucus to activate ourselves as a caucus in every matter that directly or indirectly affects steel domestically or internationally. That is the framework in which we have made numerous appearances before many committees of the House as well as public appearances. It is the basis of our formal organization and has done much in the area of steel and its problems, and on this, I think the record will speak for itself.

Mr. Speaker, foreign producers of steel sold in the United States last August an amount of steel that equaled 25 percent of our domestic consumption, and this week the American companies that are being bled by this situation were warned that they could start a trade war if they assert rights guaranteed by the General Agreement on Tariffs and Trade, rights held and exercised by every participating country, and by U.S. law.

This warning did not come from a pure-thinking editorial writer or a think tank or a consumer group in conjunction with the epithet protectionist.

It came from members of the administration charged with seeing that our trading partners adhere to the agreements they have made not to engage in unfair trade.

Basically, our producers complain they are being mugged by a gang.

The police want to discourage the muggers by arresting a couple of pickpockets working the crowd of onlookers.

The victims tell the police that official help is not necessary. They say

they will go to court and swear out a warrant on their own.

And the police response is, we will repeal the antimugging law if you do. We want to keep these muggers happy.

Meanwhile, some in the crowd—maybe some of the police—want the punishment to go to the victims.

That, Mr. Speaker, is the nontechnical explanation of the trigger price mechanism which was designed to expedite the provisions that GATT and U.S. law make for remedy when harm is caused to any participating nation by dumping or subsidized trade.

Requests for official action—for unstated reasons, probably of foreign policy—drew little response until just this afternoon.

The Commerce Department today initiated cases against Canadian and Spanish firms and monitoring in four categories involving steel imported from the United Kingdom and Spain.

Meanwhile, at least one major U.S. producer is planning independent legal action to remedy the effect of steel sold here at less than the cost of production and of steel that is subsidized.

The summer-fall surge—no; call it a flood, because it has reached the highest levels ever—of dumped and subsidized steel is the second crisis in recent years. Something like it also happened in the late 1960's and the mid-1970's.

Obviously, we have found no way to deal with the problem.

Just as war is planned physical violence to achieve a goal, these periodic surges appear to be planned economic violence to achieve a goal.

Because we are the world's biggest, most open, and richest market for anything, it is a situation we face every time the free world's steel markets turn seriously sluggish.

It is too late to warn of trade war.

I think we already have it.

I think we already have it, whether our leaders from administration to administration are willing to recognize it or not.

We certainly have casualties and casualty lists.

Kaiser Steel this month quit the production of steel and will eliminate 3,000 workers in California, for example.

It is common these days to read of layoffs of 300 or 400 and short workweeks for thousands.

In this first crisis of the 1980's, we have 52,000 steelworkers out of work and 17,000 on short workweeks.

The Department of Justice keeps and publicizes a crime clock that shows there is one murder every 23 minutes in the United States.

Maybe the Department of Commerce or the Special Trade Representative's Office should have to keep an import clock.

It would show 1 steelworker out of work every 9 minutes of every day of 1981, Sundays and holidays included, 160 a day, through today.

Imports from the European Community are up 55 percent and imports from Canada are up 41 percent. Imports from Japan are down 2.7 percent.

Whatever the case, a painful but unavoidable result of free trade or the continuation of a trade war, the field is prepared for a domestic battle royal.

The earliest casualty could be the hoped-for industrial and economic recovery this Congress has just finished moving heaven and Earth to conceive—the Tax Code and the Federal budget.

We face a big problem—a basic problem—in steel.

And it is part of a bigger problem.

It is a problem of politics and political forces—ours and those of our trading partners—and of Government policies and goals, ours and theirs.

The Congressional Steel Caucus is not holding these special orders to accuse anyone and is not ready at this point to propose a solution. Our purpose is to bring notice of the crisis to the Congress and begin a discussion that this time will be more than one automatic word processor spouting theology and epithets at another.

On issues of great importance, America's great policy debates in the press and among the politicians and the people are filled with the kind of knowledge that C. Northcote Parkinson saw as responsible for much muddling in the world.

Mr. Parkinson said, "The chief obstacle to progress is not ignorance but knowledge, and just such knowledge as medieval physicians had of medicine.

"They were stuffed with information," he said. "They knew all there was to know about the unicorn and dragon; the importance of the horoscope and the peculiarities of the salamander. They had piles of books.

"But," he continued, "medical progress dates from the moment the physician stopped looking at books and started looking at the patient."

I propose a look at the patient—this time.

The United States, more than any nation in the world, tends to follow trade policies based on the classic theories set forth by Adam Smith in the "Wealth of Nations" and David Riccardo in "The Principle of Comparative Advantage."

Canada is one of our trading partners and, truly, a very good neighbor in some respects.

We are in a joint natural gas pipeline venture with the Canadians. They are to build half. We are to build half. The agreement stated that it would be built in each country on mutually competitive terms, which meant steel producers from each country would have a shot at the business.

But the Canadian Government rigged the specifications on a major part of their work. They chose to use a pipe size only Canadian producers make.

U.S. producers make pipe that could have been used in what remained of the Canadian share. But the Government refused to lower its 15 percent duty on that kind of pipe. Our duty on Canadian pipe of that size is 2.2 percent.

Canadian steel accounted for about 16 percent of our imports in 1980, and reached almost 2.4 million tons, the equivalent of more than 10,000 steelworking jobs here, in the recent surge.

Is it not strange? The Canadian steel industry is the only one to maintain growth in the worldwide decline in steel demand.

Fordham University's respected steel economist, Father William Hogan, has just published a study of the world steel industry in the 1980's.

Father Hogan says of Canada, "The future looks bright, given its management policies and a continued state of understanding with its Government."

The Government does large and small things to foster and protect.

We misunderstood the Canadians.

We thought the pipeline deal meant competition between producers.

They knew it was a competition between the Canadian Government and private American producers.

The caucus may propose a Buy-American resolution to cover the remaining work in Alaska if current assurances begin to look shaky.

The Canadians won that one and win countless little ones by using tariff and nontariff barriers against us—classic techniques that would be called trade war and protectionist if attempted by the United States.

This Nation has tried to practice free trade as outlined by Smith—in the late 1700's—and Riccardo—in the early 1800's—since 1945. We have practiced and practiced and we have not got it right yet.

Our negotiators have not mastered the idea that you get something when you give something. They have only mastered the giving part.

While two great men wrote on economics and trade during that intellectually fertile time, nobody wrote on trade war. However, Gen. Carl Von Clausewitz wrote extensively on the principles of real war and points of his work also are held to be valid today.

One frequently quoted Clausewitz maxim is that "war is merely the continuation of politics by another means."

The general also said, "war is a conflict of human interests; trade also is a conflict of human interests."

I will return in a short while to the general and the similarities between

real war and trade war and free trade as it is practiced.

The entry on international trade in one highly respected standard reference work says the most warlike, predatory kind of trade is mercantilism.

In practicing this, governments use policies to encourage exports and discourage imports and the mercantile nations grow fat on the surplus.

Mr. Speaker, does this sound like any nation with which we trade? Or does it sound like all of them?

The entry goes on to say that regardless of what the comparative advantage theory may say about the virtues of unrestricted international trade, all nations interfere with international exchanges to some degree. They use tariffs, quotas, standards, subsidized exports, restriction of capital export, and restriction of foreign investment.

These are practices designed to compel one party to submit to the interests of the other.

General Clausewitz summarizes by saying, "War is an act of force to compel our enemy to do our will."

The foundation of our current trade policy was laid following World War II.

We were whole—the rest of the free world was not.

We had to trade or face the return of a depressed economy. We had nobody to trade with because our potential partners were exhausted or defeated, or both.

So we helped them rebuild and we traded; and we winked at and maybe even encouraged a well-meant trade barrier here and there.

After all, the United States was—and still is for that matter—the largest and most open market in the world, and we all knew that to get a little you've got to give a little.

Thus, we encouraged them to build state-of-the-art industries and plants with which we grew less and less able to compete as our plants and industries aged.

That is true, but it does not go far enough.

The Japanese looked out on the world and decided they needed a steel industry to be an industrial nation.

And they built with Government, industry, labor, and the banks all pulling together. They built with debt amounting to over 80 percent of capital investment, which could not be done in a nation working on the practices that evolved from Adam Smith's theories.

They built much more capacity than they could have reasonably needed. They grew from a 5-million-ton capacity to one of about 140 million tons.

Steel imports into Japan were never allowed to reach three-tenths of 1 percent during the growth years.

Routinely, since 1976, the United States has taken about 20 percent of Japan's direct steel exports, which can be demonstrated by matching Father Hogan's estimates of total Japanese exports against the American Iron and Steel Institute's yearly reports on Japanese steel coming here.

Father Hogan reports that an estimated 50 percent of Japanese steel production finds its way into foreign markets.

He notes that:

> The large seacoast plants with large blast furnaces were constructed to establish Japan in the export market and never could have been justified on the basis of Japan's domestic demand.
>
> Having constructed this capacity, the industry must export in order to survive.

Add Japanese-made automobiles to our steel imports and the figure goes up. At the voluntary restraint level of 1.7 million automobiles, we have a loss in American steel production of about 1.5 million tons based on the average weight of U.S.-made cars in 1980.

By the way, the Japanese made 500,000 cars in 1960. Last year, they made about 10 million. The United States took around 2 million.

Again, they targeted collective resources for maximum effect.

The general put it this way: Produce relative superiority at a decisive point by skillful use of what you have, concentrate force, and attack the sum at any of the parts that are vulnerable.

Meanwhile, Chrysler Corp. Chairman Lee Iacocca can complain with proof that a Japanese-made car selling for $8,000 in Japan sells for $600 less in this country on the basis of a Japanese export incentive.

And Chairman Iacocca noted, we allow it to happen in the name of free trade.

He could have mentioned, but did not, the high duties on American cars going into Japan and the required modifications and the endless haggling and processing.

American automobile men tell me that a compact car that would sell here for $6,500 will sell in Japan for $12,000 to $13,000.

Meanwhile, the Europeans have almost their own trade sub-war going on inside the EEC.

With the EEC, you can almost see cause and effect.

Things get bad for steel in Europe; exports into the U.S. market rise.

Conditions have been bad for steel in general and particularly in Europe where steel is more a matter of domestic social policy than trade or economics.

German producers are not subsidized and they are ready to begin the same kinds of actions in Europe under their GATT rights that American producers are being scolded for considering. The Germans estimate that their subsidized trading partners in an 8-year period ending in 1983 will have received government support totaling $30 billion. Steel executives in the United States estimate that in the last crisis the losses of subsidized European companies totaled $15 billion, yet the losers remain in business.

As National Steel Chairman William Delancey recently noted:

> The fact that they are still in existence, still exporting steel, indicates the basic difference between their economic system and ours.

No one company, no matter how modern, can beat that kind of government competition.

Meanwhile, a member of the European Community's Parliament Committee on External Economic Affairs was quoted, in a recent edition of Dun's Business Month, on the subject of free trade.

"Let us have no silly or extreme talk of free trade for the sake of free trade," said Michael Welsh. "Let us see what we have to do for our own industry."

A few years ago, Wolfgang Jensen, the former president of a foreign-owned, U.S.-based steel company was quoted in a speech by an American executive.

Jensen was quoted as saying:

> Foreign governments target basic steel industries. Mills will be kept running regardless of cost, priced to sell even at a loss.

Mr. Speaker, I want to draw on only one more outside authority on free trade before I redirect my comments to the steel situation.

This authority is Paul Lyet, who is chairman of the Sperry Corp. and Chairman of the President's Export Council.

Well-versed in trade by the successful practice of it, Mr. Lyet held a press conference on the subject last summer before his appointment, and some of his remarks were reprinted in the Financier magazine.

Free international trade is largely a myth, said Mr. Lyet.

There is a great need to reduce foreign barriers to U.S. exports, he went on.

The United States needs an aggressive export strategy, he added.

It should recognize that other nations promote favorable trade balances through very active policies that range from simple subsidies to complex financing, he said.

And they are masters of the hidden barrier technique, he warned.

Smith and Riccardo, were they alive today, would be dismayed to see how confused things have become.

But General Clausewitz would merely reissue his warning against "making the sword we bear blunter and blunter by degrees from feelings of humanity until someone once again steps in with a sword that is sharper and hews away the arms from our body."

Mr. Lyet put it this way:

We have to enforce U.S. and GATT laws against unfair and disruptive imports.

I find myself in sympathy with those who feel we must protect the core industries.

But the core industry of steel wants only what the free trade laws and agreements recognize is proper—a truce in the trade war.

If the TPM dispute cannot be settled, the caucus may well recommend and support recreating it through legislation.

If a trigger price based on the most efficient Japanese producer can be circumvented, perhaps the situation calls for one based on the most efficient producer in each country with which we trade for country-by-country application.

Questions about the viability of any steel industry and about protectionism and trade war will be raised as the current trigger price controversy comes to a head.

One group raising such questions will be the Consumers for World Trade. Its representatives appear on trade matters before the appropriate Govenment agencies and the Congress to represent the interest of the consumer and wide open trade.

That, like the Japanese economic miracle, is true as far as it goes, but it does not go far enough.

The major portion of financing for consumers for world trade comes from corporate contributions, American corporations engaged in export and import and U.S. affiliates of foreign corporations engaged in automobile and other import activities.

The group will frankly acknowledge this if asked, but it makes no attempt to disclose the connection in its newsletter, which does list officers and directors heavily slanted to consumer consultants, professors, and former diplomats.

Consumer President Doreen Brown notes that no foreign corporations are contributors and that corporate givers do not set policy. They are not members. They are only supporters.

They obviously share common interests, she acknowledges, because "you don't give your money to people who don't share your interests."

The consumer group has about 3,000 individual members. Many of them are employees of the corporations that support the group.

President Brown sits as the consumer representative on the International Steel Advisory Committee of the U.S. Trade Representative.

I do not suggest anything is wrong in the arrangement by mentioning these previously unknown connections. I raise them only as useful background for weighing points in committee and on the floor.

Trade is important and upright exporters and importers are economic heroes in my philosophy, and nobody wants to do anything to harm them. We all realize that you win some and you lose some.

My concern is that we quit losing as a matter of policy.

For example, employment in steel production has fallen by about 24 percent between 1958 and 1980—102,000 jobs gone.

Since the crisis of the late 1970's, eight companies have closed at 20 locations with a loss of 32,000 jobs. The United Steelworkers note this is only a partial listing.

We have tried voluntary restraints. They worked but other developments pushed them into history.

We have tried specialty quotas. They did not last.

We have tried the trigger price mechanism one way. It broke under pressure.

We now have an adjusted trigger price mechanism that is under stress.

Why did these measures fail?

United States Steel Chairman David Roderick testified to the caucus that—

Europeans and others have staged a massive assault on this market, and they have decided they will ship dumped or subsidized steel in complete disregard of the TPM.

The very people who wanted the TPM so as to avoid being found guilty of dumping now completely disregard it—have clearly demonstrated they are unwilling to abide by the TPM and apparently view it as an administrative procedure they will respect or ignore as they see fit.

Three major questions are left for discussion in this early exploration of steel.

Do we need a steel industry?

The short answer is, emphatically, yes. The longer answer is that a nation with the responsibilities of the United States cannot survive as a colony that ships only agricultural goods and raw materials, importing the basics, or by specializing in watches and chocolates.

We have got to hang in with a fully diversified economy—heavy industry, diversified manufacturing, agriculture, service, high technology, whatever it takes.

Steel, literally, holds the modern world together and supports it and moves it.

This is the only industrialized nation that cannot, absent some imports, meet full steel demand on present capacity.

Clearly there could be difficulty answering the demands of the planned defense buildup.

And a mobilization surge would find us with serious weakness.

Yet we are the political and economic mainstay of the free world.

This alone is reason enough to modernize and make more efficient the fundamental industry.

Additionally, the Nation will have to give attention fairly soon to a crumbling infrastructure, rebuilidng things that require steel.

On top of that, there is the problem of how foreign suppliers treat U.S. customers in times of high demand, which would be aggravated by deeper erosion of domestic capacity.

General Clausewitz advises that in considering how someone will act in the future, you have to be familiar with their past. He said, "The will is never a wholly unknown quantity; what it has been today, it will be tomorrow."

During the steel boom of the early 1970's, some foreign suppliers jacked up prices on longtime U.S. customers by more than $100 a ton above domestic prices—demanded and got premiums of 40 percent and more.

Dependency, particularly planned dependency, on possibly capricious foreign suppliers for something as basic as steel is as foolish as seeking no break in dependency on a foreign cartel for petroleum.

Why hasn't Big Steel done something to help itself? How did it get so behind the times and unproductive?

American steelworkers are highly efficient. Producing a ton of steel in the United States requires 7.7 man-hours, according to the most recent statistics available. The Japanese do it in 7.3 The Germans require 9.4 man-hours, the French 11.9, and the British 16.5.

Those bad efficiency figures for the Europeans are part of the dumping controversy.

But the need is to become more efficient by installing technology developed in America, such as the continuous caster, and plans are to spend $5.5 billion modernizing if profitability can be established and capital raised.

But dumping prohibits profitability, the lack of which drives away capital.

Mr. Roderick told the Steel Caucus:

The whole effort to revitalize and modernize the domestic steel industry—those improvements already announced and those planned—is in grave jeopardy.

Why has steel not worried about modernizing before now?

It has, but it could not because it has been whipsawed by episodes of Government intimidation and foreign dumping in times of steel recession.

They could not take capital-attracting profit in good times because of one Government regulation or another, or the limited capital available was diverted to environmental protection rather than production. In slow times, times of heavy dumping, there was little profit to be found.

No profit, no capital, no investment in productivity. The present dumping cycle threatens to impose the same straitjacket at the most promising time for steel in the last 20 years.

And that is why it is important to take a good look at the patient rather than those unicorns and dragons I mentioned earlier.

As General Clausewitz said:

The greatest and most decisive act a statesman performs is that he correctly un-

derstand the kind of war that involves him—of not taking it for or wishing to make it something it cannot be.

● Mr. NOWAK. Mr. Speaker, once again the executive committee of the Congressional Steel Caucus comes to the floor of the House to draw attention to and seek remedial action on a serious problem confronting our Nation's steel producers.

Indeed the problem—the invasion of our domestic market by predatory, unfairly priced foreign imports—is a serious one. In this case, the numbers speak for themselves.

In the first 9 months of this year, steel imports totaled 14,493,000 tons, an increase of 24.6 percent over the 11,636,000 tons imported during the first three quarters of 1980.

As the American Iron and Steel Institute noted:

If present trends continue, the market penetration of imported steel will set a new record for 1981. Imports took an estimated 20.5 percent of the market in September.

Even during booming economic times in this country, those statistics would be alarming. Adding severity to the current flood of steel imports, however, are the debilitating effects of the current recession and high interest rates our Nation is confronting.

This, of course, translates into reduced demand and reduced production in the steel and auto industries. This translates into shrunken payrolls across the Nation, with thousands of workers in these two vital industries either laid off indefinitely or on reduced work schedules.

That has been the experience in the 37th Congressional District of New York, which I am privileged to represent. The current crisis exacerbates what has been a long-term downward trend in steel employment in my district. In the late fifties, for example, employment at Bethlehem Steel's Lackawanna, N.Y., complex averaged 19,500. Last month, that payroll was about 7,200.

Similar shrinkage has occurred at Republic Steel's facility in South Buffalo where employment dipped from a historic high of 3,600 in the fifties to the current 1,660 level.

Imports have been a major culprit in this decline of employment in this major industry in western New York, an industry that is an important element in maintaining the health of our local economy. The current surge of imports and unemployment, thus, adds to the very genuine concern of the remaining workers at these Buffalo area steel-making facilities as to their long-term employment and the very future of these plants.

European steel producers have been the major source of the increase in imports this year. Certainly one thing we hope to accomplish here today is to signal our European allies that we in the Congress are deeply concerned about the current crisis and want these apparent violations of fair trade principles to stop.

As the following editorial from the November 11, 1980, edition of the Buffalo Evening News pointed out—and I would like it inserted at this point in the RECORD—in addition to exporting steel to this country, in effect the European Economic Community is also exporting its unemployment to this side of the Atlantic.

[From the Buffalo Evening News, Nov. 10, 1981]

STEEL DUMPING IS UNFAIR

As it did last year, the American steel industry is clamoring for action against unfair competition from foreign steel, and this time the government is giving strong backing. Commerce Secretary Malcolm Baldrige has filed a complaint against several European and other foreign governments, charging unfair subsidization of steel exports.

Last year's anti-dumping complaint by the United States Steel Corp. was withdrawn after the Carter administration reinstated the trigger-price system, which is supposed to set a floor price for steel imports. But much imported steel still seems to escape the trigger system.

Steel imports were up 25 percent in the first nine months of this year and now gobble up a quarter of the market.

The steel complaint is expected, after lengthy hearing and adjudication, to result in the imposition of countervailing duties to end unfair advantage of the foreign steel. U.S. trade officials are concerned that the move may result in European retaliation against American exports, but the United States is strictly within its rights to insist that competition for the steel market be fair. The Tokyo Round of trade talks specifically barred the kind of governmental subsidies—such as cheap credit and tax breaks—that the American steel industry is now complaining about.

The European Economic Community has warned that it would consider an anti-dumping move a hostile gesture, but it has no right to break the international rules at our expense—in effect, *exporting its unemployment to this side of the Atlantic.* If Europe or other countries can make a case of unfair competition against any American exports, they, of course, have a right to do so.

The slump in the steel industry has a worrisome effect on the ability of the industry to rebuild its aging facilities. The new profit incentives under the Reagan tax program were designed to encourage this, but the low operating rate and the comparatively low profits will make it harder to accomplish. Bethlehem Steel, for example, last July announced a $750 million modernization program (not, unfortunately, including Buffalo). Bethlehem, with 6,500 workers now laid off, says that "badly needed modernization is now threatened by a flood of imports on top of a lagging economy."

It is in the interest of the United States that international trade be free from high tariffs and other protectionist devices. But it is not in U.S. interests when both sides do not abide by the agreed rules. Trade should be not only free, but fair.

Mr. Speaker, this Nation will not tolerate, cannot tolerate, such behavior from our allies. Our domestic industry cannot compete against foreign plants that are unfairly subsidized by their governments. Nor can it compete against steel products that are dumped into our markets at prices below the cost of production abroad.

Commerce Secretary Malcolm Baldrige and the administration have already sent a signal of our national concern by beginning investigations of alleged unfairly priced imports from Romania, Belgium, Brazil, South Africa, and France. The Secretary further has said the Department is considering initiating additional investigations and those decisions will be announced within 2 weeks.

I hope this indicates that the administration is committed to vigorously enforcing our own existing trade laws. The alternative could be increasing pressures for protectionist legislation, such as fixed import quotas, which go against the grain of the administration's free trade policies. Again, as so many of us have said so often, and as the Buffalo Evening News editorial ended: "Trade should be not only free, but fair."

I hope the administration's investigations also alert the foreign producers that it would be in our mutual interest for them to come to the bargaining table or exercise some voluntary restraint in the steel sector.

I hope the administration would also take another in-depth look at the trigger price mechanism—TPM—to determine how it could be refined or revised to fashion it into the effective buffer against unfairly priced imports that it was intended to be. With the data from the first 9 months of this year, it is obvious the TPM is not working as it was designed to. Unless the TPM is developed into a more effective tool, congressional action may be our only alternative.

Yet, imperfect as it may be, I believe the TPM should remain in place, functioning, while these unfair trade practice proceedings are underway.

Of concern, for instance, is Secretary Baldrige's comment recently that, "We do not have the manpower to bring 100 suits and run the trigger price mechanism too."

That is of particular concern, in light of United States Steel's anticipated filing December 1 of suits against nine foreign countries.

It would, however, seem most logical to retain the enforcement of the TPM while these investigations are going on or if additional suits are filed. That would not only keep the pressure on as many fronts as possible to protect our markets from unfair imports but it would strongly signal foreign producers of the depth of our resolve to halt any illegal practices.

We must maintain a concerted effort to halt the erosion of employment and production in our steel industry. That is vital to our national defense and to a healthy national economy.●

□ 1820

Mr. BENJAMIN. Mr. Speaker, will the gentleman yield?

Mr. GAYDOS. At this time, I would like to recognize my good friend and colleague, the chairman of the executive committee, one who has dedicated his efforts during the last 5 years since we organized the Steel Caucus, to preserve this basic industry. He has been a most effective and most active member of the caucus, the gentleman from Indiana (Mr. BENJAMIN).

Mr. BENJAMIN. I thank the gentleman for yielding.

I have spoken with my friend from Pennsylvania and my friend from Ohio (Mr. REGULA), and those who appear by statement this evening to apprise this body and the Nation that its steel industry, steel communities, and steelworkers need their understanding, support, and assistance.

Six weeks ago, we asked that the President understand and assist in this dilemma. We asked that the President meet with us. To date, the President has been too busy to meet or otherwise discuss steel imports and resolution of the growing steel import menace.

Therefore, I now publicly urge that the President recognize, understand, and help resolve the plight of the American steel industry and its workers by convening a White House summit meeting on steel by mid-December while immediately moving to obtain voluntary restraints on imports or quantitative controls if negotiations fail on voluntary restraints.

Excluding raw materials and fabricating operations, there are 53,000 steelworkers laid off and 17,000 working short weeks within 26 companies producing 85 percent of the Nation's raw steel. This projects to more than one-half of a million American workers in related industries and businesses that are adversely affected by the steel industry operating at 65 percent of capacity.

Mr. Speaker, 14½ million tons of steel were imported into the United States during the first three quarters of 1981—up 24.6 percent or 2.9 million tons over the comparable period in 1980. The September figure was 64 percent higher than September 1980, and August set a record high of 2¼ million tons of imports.

I appreciate the President's earlier action in regard to the import of automobiles from Japan. After the dislocation of 200,000 autoworkers and imports from Japan increasing from 11 to 26 percent, the U.S. Government urged and received a 3-year voluntary restraint. While the domestic automobile market continues to be depressed, the voluntary restraint has been of some relief.

I urge that identical consideration be given to the steel industry. The economy of the Midwest is sufficiently predicated on steel to warrant relief without delay or excuse.

Four years ago, my colleagues and I asked the previous President to address an import problem which ranged between 14 and 18 percent, not nearly 25 percent of domestic consumption. In response, President Carter convened a White House summit which produced the Solomon report and the trigger price mechanism as well as a tax blueprint which has generally been incorporated in the 1981 Economic Recovery Act. It also produced the steel stretchout bill signed into law this summer by President Reagan.

The plan agreed to then, which remains valid today, is that the U.S. steel industry could become competitive in the world marketplace if provided tax relief encouraging capital formation for modernization, environmental cost relief to reduce capital and operating costs, and finally, relief from imports representing dumped or subsidized steel. The proper enforcement of U.S. trade laws for at least 3 to 5 years after the start of modernization is absolutely necessary to enable the industry to bring new equipment and systems online.

Mr. Speaker, the program of modernization was to begin, and in fact, has partially begun. The steel industry announced $5½ billion of modernization and improvement. Then the bottom fell out of the economy. The industry would probably have proceeded if their domestic market, although reduced by the economy, was not absolutely squeezed by a record-high import avalanche. In other words, as the economy contracted, foreign steel companies, through subsidization and dumping, proceeded to administer the coup de grace. This has effectively halted the long-sought modernization of the U.S. steel industry, disrupted communities and ruined families who have little relief because of previous program reductions by this Congress.

I began by urging a White House summit meeting and immediate voluntary restraints or quantitative control of imported steel. Mr. Speaker, I renew this request and trust that the President will be convinced of the necessity of meeting and restraining now.

I also urge:

First, that the appropriate divisions of the Department of Commerce and International Trade Commission be maintained at sufficient strength to handle the investigations and resulting complaints prepared and filed by the Secretary of Commerce. This would mean that sufficient funds be provided by the Congress and used by the administration to prevent further importation of dumped and subsidized products and to proceed against those nations and firms who have chosen to ignore and flaunt our laws.

Second, that the domestic steel manufacturers withhold their import complaints, now proposed to be filed on December 1, if the President agrees to meet and act on the steel crisis. If the President does not so agree, that the complaints be filed but the administration retain and improve the trigger price mechanism rather than discard or discontinue it because American producers choose to exercise their rights under law. Finally, if the steel company complaints are filed, that the administration process those complaints expeditiously and fairly and that the results of the complaints be limited to the merit of the evidence and not affected by supposed foreign policy considerations.

Third, that the administration and Congress cooperate to:

Improve the trigger price mechanism and incorporate it in statutory law;

Review U.S. trade laws and improve them with respect to changing world conditions;

Establish a quantitative restriction which would be correlated to the growth or contraction of the American economy thereby protecting domestic companies and workers during recessionary periods;

Evaluate and determine necessary actions to assist the steel fabrication industry, specialty steel industry and steel marketing firms, all adversely affected by the inadequacies of the present trigger price mechanism and offshore marketing entities;

Encourage a new export program to promote overseas sales of American steel and steel products.

Mr. Speaker, the President can turn the economy around today with appropriate emphasis on interest rates, automobile production, housing starts, and steel manufacturing. We, of the House Steel Caucus, know that we can help. We ask that the President immediately act to restrain imports—and find time to meet with us and the industry, its work force, and those of his administration who would work to implement his program. I believe that the five-point program just outlined is a base from which we could commence our partnership for the improvement of the economy. I trust that the President will agree. I look forward to a joint venture that will improve the economy, revitalize the steel industry and put steelworkers back to work on a full-time basis.

Mr. GAYDOS. I want to thank the chairman of the executive committee.

At this time, Mr. Speaker, I would like to reserve the balance of my time, pending a presentation by one of my colleagues who had been skipped over.

The SPEAKER pro tempore. The gentleman from Pennsylvania.

Mr. GAYDOS. I thank the Speaker.

At this time I would like to yield to the gentleman from Ohio, a member of the Steel Caucus executive committee, Mr. REGULA.

Mr. REGULA. Mr. Speaker, I want to thank the gentleman from Pennsylvania the distinguished chairman of the Steel Caucus for reserving this time to discuss an issue of importance not only to the steel industry, but to the entire domestic economy—the problem of unfair foreign trade practices.

For the past 7 years, the steel industry, worldwide, has been in a severe depression. The post-World War II era was a period of enormous increase in steel output, but the boom came to an abrupt end in 1975. The U.S. steel industry has not been spared.

Mr. Speaker, I cannot emphasize enough that a strong American steel industry is essential for a strong American economy. No economy can develop and grow without it. It is a key material in the revitalization of American industry. It is vital for national defense, energy production, construction, manufacturing, transportation, mining, and agriculture.

For some time, however, the American steel industry has been losing its competitive edge in world markets. If the domestic steel industry continues to decline, our country, our economy and our national security will be jeopardized.

The major problems affecting the industry continue to be inadequate capital formation, unfair international trade practices, and excessive regulation. Although our domestic steel industry is beset by serious difficulties, it has the potential to surmount those difficulties.

On their own, domestic steel companies have been moving forward to improve efficiency and productivity and despite the sharp recession which significantly effected the industry in 1980, progress has been made in this effort.

While the steel industry has taken major steps to modernize, improve efficiency, meet environmental goals, and improve capital availability, public policies must support, not hinder, the industry's modernization efforts. If they do not, the industry's own efforts will be inadequate to the task.

Policies of the Reagan administration have begun addressing the most critical problems facing the industry. Accelerated cost recovery, providing for a faster writeoff of capital expenditures, included in the tax bill, will assist the industry with capital formation to promote modernization efforts.

Federal regulations are under review to determine which have hampered business and not proven cost effective. With the passage of the steel "stretchout" amendment, the industry was given a necessary extension in complying with Clean Air Act deadlines to enable further investment on modernizing existing facilities.

In recent weeks, however, the trade issue has come to the forefront as the Department of Commerce has initiated investigations into low-cost steel imports from five countries. I applaud the Reagan administration's strong commitment to the enforcement of our trade laws and especially the concept of fair trade, but I am distressed by signals from the administration that the trigger price mechanism, the administrative procedure for detecting violations of U.S. trade laws may be destroyed if the industry pursues its own cases against foreign producers.

While the TPM is not perfect, it is currently the best guarantee that our trade laws will be enforced, and I believe that terminating the TPM would be a very unwise policy at this time.

Despite the sharp drop in demand for steel in the United States, steel imports have risen steadily this year. In August imported steel captured a record 25 percent of the U.S. market and represented 22 percent of the market for the third quarter overall.

Mr. Speaker, I strongly support free trade, foreign steel should have the opportunity to compete in American markets so long as it is fairly traded. But I do not believe the United States can be the only open world market for steel and ignore the penetration of dumped or unfairly traded low-cost steel imports without crippling its own domestic steel industry.

Under existing international trade agreements, the United States imposes no restrictions on steel imports. What is in place is the trigger price mechanism which was established in 1978 as a price monitoring system to facilitate enforcement of U.S. antidumping laws.

The need for a TPM-type mechanism is even more critical because of the present depressed state of the world steel industry and because more than half of the steel produced in the world comes from government-controlled or government-subsidized steel companies, including those in Great Britain, Belgium, Italy, and France.

Foreign governments have taken various actions to help reduce production costs for their steel industries including: below market loans, low-cost raw material imports—made possible by subsidies for ore and coal mines and oil imports—market-sharing arrangements, tax abatement, and quotas on imports. Such methods of financial assistance have enabled foreign suppliers to price their steel below cost.

Unfair steel imports transfer to American steel producers and workers the unemployment and adjustment problems that foreign producers and their governments are trying to avoid.

Mr. Speaker, as I have said, the American steel industry can modernize and regain its competitive edge in world markets, improving its ability to produce low-cost steel to the American market. But to do so, the industry must make significant capital expenditures during the next decade.

A closer balance between world supply and demand is expected in the latter half of the eighties than was the case in the seventies. Unless U.S. capacity increases as world demand goes up, the U.S. economy will be seriously affected by tight steel supplies and a growing steel trade deficit. Any increased reliance on foreign sources would, during periods of steel shortages, result in increased world prices that would be borne by American consumers.

The biggest potential impediment facing the steel industry is unfair foreign-priced steel imports. Enforcement of U.S. trade laws through a strong trigger price mechanism is, at present, the most effective answer to the problem and is essential to the industry's revitalization program.

While controlling Federal spending and reducing the excessive rate of inflation are important priorities for the Federal Government, so too should be the problem of reindustrialization. The strength of our Nation is mirrored in the strength of our domestic industries. Government policies must support industry's rebuilding efforts if the Nation is to regain its strength and continue as the leader of the free world.

□ 1850

Mr. GAYDOS. Mr. Speaker, I now yield to my colleague from Alabama (Mr. BEVILL), a member of the executive committee of the steel caucus.

Mr. BEVILL. Mr. Speaker, America's steel industry has earned its position as one of this country's most important economic pillars. It is a pivotal factor in the Nation's continued economic stability.

However, for months now, we have been witnessing a devastating foreign assault on our domestic steel industry, which threatens its future and endangers other major U.S. industrial giants.

In the first 9 months of this year, imported steel has increased its encroachment into the U.S. market, up by nearly 25 percent over last year's levels. In September of this year, for example, imports accounted for more than 20 percent of our country's steel market. If that trend is allowed to continue, this year will set a sad new record for imported steel in this country.

I met several days ago with managers for the Republic Steel plant in Gadsden, Ala., located in the Fourth District of Alabama, which I am privileged to represent. We shared our concerns about the growing amount of imported steel flowing into this country.

As these imports increase, the number of America's steelworkers who are laid off or who are on reduced hours also grows.

Republic's Gadsden plant, which is one of our major steel plate producers, has been hit hard by the growth of imported steel. The plate steel import market has grown from a 19-percent share in the first quarter of this year to 25 percent in the second quarter.

The figures for August of this year were even worse. In that month, imported plates took more than one-third of this country's plate market. Republic's plate mill has suffered corresponding reductions with this increase in imported plates.

The Republic managers asked me how this country could permit foreign steel imports to grow, putting our own steelworkers out of work. They asked me what could be done to stop unfair dumping of foreign steel, at artificially low prices, subsidized by foreign governments.

I must confess that I have asked these same questions, as have my fellow members on the Congressional Steel Caucus. One method to stop this unfair economic attack is to implement strict enforcement of the trigger price mechanism, which was created to stop wholesale dumping of steel in this country by foreign producers.

This country has been richly blessed with the raw materials necessary for the production of steel. We continue to develop our inland waterways and other methods of surface transportation to enable our producers to effectively market their products. But we are neglecting one of the most vital needs of the domestic steel industry—adequate protection from unfair foreign competition. If that competition drives our own producers out of business, we will be at the mercy of foreign governments for our domestic steel needs. The lesson we learned from OPEC should serve as sufficient warning for us to protect our own interests regarding domestic steel production.

Swift, effective implementation of the trigger price mechanism must take place. We owe that to the American steel industry. We owe that to the American economy. We owe that to the American people.

Mr. GAYDOS. Mr. Speaker, I thank the gentleman from Alabama.

At this time I yield to my neighbor and colleague from the city of Pittsburgh (Mr. WILLIAM J. COYNE), a member of the Steel Caucus.

Mr. WILLIAM J. COYNE. Mr. Speaker, I rise to associate myself with the remarks of Congressman GAYDOS and Congressman BENJAMIN.

I also would like to submit for the RECORD the remarks of Mr. Thomas C. Graham, president and chief executive officer of Jones & Laughlin Steel Corp. to a Symposium on American Productivity in Pittsburgh, Pa., on November 4, 1981.

Mr. Speaker, the remarks follow:

REMARKS BY THOMAS C. GRAHAM

Seriously, I hope that when we are finished here today, you don't feel that your misgivings were well founded. We hope that in these sessions we can shed some light that will be of practical help in getting America's productivity curve rising again.

As you know, that curve has been virtually flat in recent years. It has happened despite an enormous investment in new technologies by the private sector in the preceding decades.

I recall the fifties, when computer control of manufacturing processes was beginning to spread. People were saying that before long we would see factories without people . . . that computers and robots would do everything without human help.

Well, we're a long way from that, and in many industries we may never get there. We've found out, if nothing else, that it still takes a lot of people to run the computers and maintain the equipment.

Actually, our fascination with computers and the other elements of automation may have been one of the things that led us into the fix we're in. We have been neglecting the human factor in the productivity equation, perhaps because people are harder to manage than machines.

But now we are really up against it. A continuing high rate of inflation and runaway interest rates are making it very difficult for many industries to accumulate the capital that once was used to buy cost-saving technologies. This has been expecially true in the steel industry, but certainly we are not alone.

By force of circumstance we are looking more closely at the other side of the productivity equation . . . to people. We are beginning to see that people, if properly motivated and effectively directed, can be the key to economic revitalization.

But I think it is worth asking, which people? Who are they, and what would we have them do?

In a modern industrial organization there are, for purposes of this discussion, two groups of people, clearly separate and identifiable. They are the management group on the one hand, and the production workers on the other.

A great deal of activity is underway these days concerning that second group. The thrust of it is to increase the involvement of the production workers in the problem-solving process on the shop floor. It is the American adaptation of the quality circle concept that originated in Japan. And we all know how Japan is eating our lunch in the marketplace.

The concept is that if the employees are given the chance to voice their opinions in decisions involving their workplace:

One, they will come forth with many good suggestions for making the shop run better;

Two, they will become personally committed to shop goals or corporate goals and perform accordingly;

And three, they will derive a sense of satisfaction from their involvement that will help to overcome the worker unrest that is a characteristic of many industrial organizations.

I want to state quickly that I do not quarrel with any of this, in principle. There is no doubt in my mind that the failure to enlist the full contribution and the enthusiastic commitment of the hourly work force is at the root of many of our industrial problems.

But I must also assert that any effort to establish quality circles or participation teams is doomed to failure unless attention is first given to that other group of people in the organization. In much of the theorizing that is going on today about productivity improvement, the role of management is not given the weight it deserves.

In my view it is critical. Any effort to improve productivity with people rather than machines, should begin with the focus on the management organization.

In my company, we arrived at this plateau in our thinking in 1975. I'd like to tell you a little of our history since that time, in the hope that it will give you some new insights into the productivity problem, and how to solve it.

In 1975, J&L was experiencing some very difficult times, as was the rest of the steel industry. When we developed a plan to improve productivity through a better effort by our people, it was more than an academic exercise. It was a matter of dire necessity.

As we looked at the way our company was being operated, we saw a management that was living in the past. We saw operating practices that were carry-overs from the days following the end of World War Two, when the American steel industry was dominant in the world.

We practiced an authoritarian style of management that was, and to a degree still is, common to the steel industry. The boss gave the orders, and the employees carried them out. No questions asked. As I've said on other occasions, this business used to be more totalitarian than the Prussian Army. As we looked deeper into our company, we came to understand why the Prussian Army lost World War One.

I'm sure that in examining any troubled organization you will find managers who consistently put the blame for poor performance on the wrong things. It means either that they have failed to identify the real problems, or having identified them correctly, have been unable to solve them.

Such was the case in our company.

Some of the excuses that were given in those days are amusing in retrospect, although they were not funny at the time.

I remember a manager at one of our integrated steel plants, many years ago, who was being pressed to explain why a new five-stand cold reducing mill could not produce at more than half its designed capability.

He said the engineers had done a poor job of building it, and that it was leaning to one side. Having a nautical turn of mind, he described the mill as "listing to port."

If you have ever seen the mass of heavy machinery that makes up a modern tandem mill, you will realize what a mind-boggling idea that is. It was of course, nonsense, and only reflected that manager's inability to come to grips with his real problems, which were many.

There's another significant point I should mention in connection with this story.

It is this: in implementing changes in management thinking, it helps a heck of a lot if the fellow on top is thoroughly familiar with the production processes, and the equipment.

Professional managers get to where they are in part because of their ability to explain and defend what they are doing. The manager with his leaning tandem mill is an example of how that talent can be misdirected. In the long run, a defense of the status quo can hurt the business.

I spent many of my earlier years as an engineer for J&L, and I've had my hands on

most of the equipment we now operate. That discourages a lot of nonsense when we discuss operating problems.

At any rate, we set about to improve the effectiveness of our management organization with a number of broadly based initiaties, and I'll mention just a few of them.

We reorganized the operating and sales functions into divisional business units. The idea was to give managers more decision-making authority and encourage an entrepreneurial approach to the production and marketing of our various product lines.

We established programs of recruiting, training and development in order to upgrade the quality of personnel in our managerial force, and to improve managers' skills and their knowledge of the business.

We discarded automatic pay increases in favor of a compensation program based on performance. We replaced ineffective managers on one hand, and established programs of rewards and recognition for superior performers on the other.

And we sought to open channels of communication that would facilitate the flow of information and ideas from the top down, and from the bottom up. The intent of all this was to establish a climate of change throughout the company that would open the way for new ideas and innovative problem solving.

The need for new approaches was nowhere more apparent than in the management's relationship with the United Steelworkers union and the hourly work force.

Across the ranks of management there was an institutionalized practice of blaming shortfalls in operating performance on the attitudes of the hourly employees, or on established work rules or labor practices, none of which could be changed.

Time and time again management discussions would lapse into a dialogue in which the operating people would agree, yes, we do have this labor relations problem, and we have asked the labor relations department to solve it, and that's where it stands.

And the labor relations people would reply that it was not really a labor relations problem. It was really an operating problem perpetuated by contractual limitations that we can do nothing about. The matter would be left hanging there, and the problem would remain unsolved.

This defeatist attitude resulted in a generalized management failure to address many critical problems that were affecting our business. We had many managers who for years had been using supposedly insoluble employee relations problems as an excuse for poor performance. The cumulative effect was to put the very life of the enterprise at stake.

Negative attitudes were also reflected in a serious lack of communication between supervisors and their hourly workers, and in the entrenched hostility between the two groups that was a legacy of an earlier time.

There was the inflexibility that characterized many of the legalistic aspects of the labor-management relationship.

And finally, there was a generalized fear of change, and the more specific fear of many managers that a change in the relationship with employees would threaten their livelihood. You'll hear more about this in one of the workshops this afternoon.

I should point out that these impediments were not universal. In some areas in the company, highly skilled managers were dealing forthrightly and successfully with their employees. Their performance reinforced our conviction that change was not only necessary, but also that it was possible.

Overcoming these impediments was not something that could be done overnight. The first challenge was to change the attitudes and supervisory habits of hundreds of managers throughout the company, and students of human nature will recognize that this is no easy task.

To do this we adopted a stick-and-carrot approach. The stick was to let the managers clearly understand that blaming the workers or an intransigent union for shortfalls in performance was no longer an acceptable excuse. We began to publicly identify these shortfalls as management failures.

It came as a shock to many managers that what had been appropriate and accepted for many years was suddenly being rejected out of hand. This made for some unpleasant dialogue, but we coupled it with the carrot. We indicated that dealing successfully with the employees and their union representatives would be regarded as a management skill that could advance their careers. We began to single out effective people managers for special monetary rewards and recognition.

In doing these things we relied on the conviction that dedicated managers want to know what they are being measured against. When the criterion is clearly understood and accepted, good people will put forth their best efforts to measure up.

Meantime, we were also taking some organizational steps to support attitudinal change. The industrial relations department was reorganized to bring together the three functions that deal with the human resources of the company, that is, personnel relations, labor relations and industrial engineering.

I think it is worth noting that one of the most productive moves was bringing the labor relations people and the industrial engineers together in one department.

Under the old order they had been separate kingdoms, and they were constantly at war. Now they are working hand in hand, and the I.E.'s have been able to develop effective production incentives for the hourly employees that have cracked long-standing production bottlenecks. They have also revitalized the long-standing employee suggestion plan, which pays cash awards for cost-saving ideas.

These efforts are consistent with our view that monetary rewards for hourly employees can be just as effective as they are for the managerial force in encouraging better performance.

The primary mission of the new industrial relations organization is to change the labor-managment relationship from one of confrontation to one of problem solving. Efforts at all levels are being made to achieve this goal.

The relationship with the United Steelworkers' union both at the international and the plant level has been consciously turned from one of adversarial posturing to a serious and determined effort to solve operating problems.

And we are committed to maintaining extensive communication with union representatives. We believe that each side must understand the other's problems if a joint problem-solving effort is to be successful.

We have also introduced into this relationship a recognition of employee concerns that might arise from management efforts to improve productivity.

The very word productivity has come to have bad connotations. This is because industrial managements often have ignored the employees' fear that productivity improvement means a loss of jobs.

We have been successful in negotiating agreements with several local unions which accommodate the company's need for more productive use of people, while at the same time recognizing the employee concerns for job security.

And finally, with these management strategies in place, we began to introduce our hourly employees to the problem-solving process. We took our first step several years ago, at one of our smaller plants, where we felt the prospects for success were good. Hourly employees and their union representatives were invited to participate in the meetings of a task force charged with solving a productivity problem. The results were very positive, and we have been encouraged to try similar approaches in other plants, on a very selective basis.

In addition, we are now working diligently to put labor-management participation teams in place in a number of our major plants.

LMPT's as they are called, are being established in accordance with an agreement negotiated last year with the United Steelworkers. They are a counterpart to quality circles so prominently used in Japan and in our automotive industry.

We have endorsed LMPT's from the beginning because they clearly offer an important tool in our effort to secure the full participation of all our employees and their commitment to the vitality of our company.

Thus, in many ways we have set an evolutionary process in motion, and we can see it gaining momentum. Managers throughout the company have accepted the idea that progress in employee relations is possible, and that in itself is real progress. Long-standing problems that were once considered insoluble are being attacked with enthusiasm by both parties to our labor agreement. A more participative style of management is emerging at J&L, and effective problem solving is taking place on the shop floor.

As to the results of all this, it is no overstatement to say that J&L is experiencing significant productive gains. The basic measure of overall productivity, that is, manhours per ton of steel produced, has shown a steady decline since 1978. This occured even in 1980, when steel production dropped sharply during the mid-year market slump. Ordinarily that situation also produces a sharp decline in productivity.

Specific achievements that have contributed to these results include:

Productivity gains of as much as 64 percent on the slabber and hot strip mill at our Indiana Harbor Works, which have in effect added more than a million annual tons of capacity to the plant.

Productivity gains in the iron and steelmaking end of the Cleveland Works, which have added 50-thousand tons a month to the output of that plant.

Productivity gains in our seamless pipe production units which are equal to the output of a whole new seamless mill.

This last improvement is especially significant because it has come at a time when the energy shortage has created a very hot market for oil well pipe and tubing. Our ability to capitalize on this market has resulted in a very substantial improvement in our bottom line.

What had been regarded as an ailing steel company became, during the first half of this year, the most profitable steel company among its comparable competitors in the domestic industry.

I would not try to kid you that every effort at productivity improvement by the means I am advocating will produce results of this magnitude. Most of the gains come in small steps. In fact, even these examples are the result of an accumulation of less spectacular achievements. But we have seen enough of these achievements to convince us that we are on the proper course. J&L is a stronger company today than it was six years ago. The human factor in the productivity equation made the difference.

Mr. GAYDOS. Mr. Speaker, I yield to my colleague from Illinois (Mr. O'BRIEN), a member of the executive committee of the Steel Caucus.

Mr. O'BRIEN. Mr. Speaker, I thank my friend for yielding. He has enjoyed a long and distinguished career in this Congress, and in no period of it has he lent more luminousness to his career than as chairman of the Steel Caucus.

In my view there is no single cause for the problems facing the steel industry. And of course, there is no single simple solution. Certainly within the past year much has been done to stimulate and revitalize the steel industry—such as faster depreciation, tax credits, and environmental extensions. But, this will all be to no avail if we do not take some action in the matters concerning trade.

Unfortunately, we are continually in a crisis-intervention situation. We continue to treat the symptoms rather than the disease. What we must do is clear: We must enforce our own trade laws and trade policies and administer them effectively. We must do this to offer some stability to the business community. If our trade policy continues to be a waffling one how can we expect our business community to function effectively and efficiently without being able to do any long-range planning, the cornerstone of any successful and healthy business. We need a firm, stabilizing trade policy, that we will enforce and one that others can rely upon.

I refer to the trigger price mechanism (TPM) which is a mechanism that was designed in 1977 to help identify and stop dumped steel imports. The TPM, however imperfect, does provide limited benefits for the industry by offering a method for insuring that imports represent fair competition in our domestic market.

The fact of the matter is that steel imports have risen substantially over the last 6 months, a record high of 25 percent import penetration in August, which triggered an investigation by Commerce of those imports sold below set levels.

The Commerce Department has self-initiated complaints, in a massive effort to prevent the domestic industry from filing large numbers on its own and in the meantime to continue to administer the TPM. But, a domestic steel company, as is allowed by law, has since then indicated it will file complaints against other countries in addition to those on the Commerce list.

In turn, it disheartens to read in the newspapers that the Secretary of Commerce predicts that if the U.S. steel companies file their own cases at this time, the downfall of the TPM would be inevitable. Also, it has been indicated that Commerce could not determine beforehand how many suits it could handle without abandoning the TPM.

My friends, this is practically the same situation we found ourselves in over a year ago at which time Commerce abandoned the TPM after a U.S. steel company filed suit.

If we discontinue the TPM, it will be another indication of our Government's unwillingness to enforce its own trade policy. Ironically, this threatens to be done at a time when steel import penetration is extremely high, exactly at a time when the TPM is needed most.

I look to the administration to address this situation immediately and insure that we have a trade policy which is enforced and a policy on which we can rely. If our Government does not follow through, the Congress may want to take legislative action, a course already suggested to us by the steel industry. Our Nation's economic recovery depends on a sound and fair trade position which can be counted on in times such as these—and not the dubious policy which has been our consistent experience in years past.

□ 1900

Mr. GAYDOS. Mr. Speaker, I want to thank my colleague, the gentleman from Illinois (Mr. O'BRIEN).

At this time I yield to my neighbor from the city of Johnstown, the gentleman from Pennsylvania (Mr. MURTHA), who is a member of the executive committee of the Steel Caucus and who was one of the original members, along with the gentleman from Illinois (Mr. O'BRIEN), in the formation of the caucus.

Mr. MURTHA. Mr. Speaker, I want to thank the gentleman from Allegheny County, Pa., for yielding, and I want to commend him for taking this special order for his tremendous interest which has meant so much to the steel interests and to all the other members of the executive board. I wish to commend also the gentleman from Illinois (Mr. O'BRIEN), who has done so much in order to stabilize the steel industry in this country. I would have to say that if it had not been for the gentleman from Pennsylvania (Mr. GAYDOS), the gentleman from Illinois (Mr. O'BRIEN), the gentleman from Ohio (Mr. REGULA), and other members of the executive board of the Steel Caucus, and, of course, the gentleman from Indiana, Mr. Adam Benjamin, the executive committee chairman of the Steel Caucus, the steel situation, as bad as it is, would have been even worse.

I can remember 4 years ago, when we started this caucus, the imports were approximately 17 and 18 percent, and we projected that they could be as high as 30 percent. We talked about the probability of national security being affected by the fact that steel imports were increasing so rapidly.

Now we are moving in that same direction again. Hopefully, the suits that have been brought by the Commerce Department will have some impact, again stabilizing the steel industry. But the very thing we worked on so diligently with the unions, with the companies, and with the Government was trying to avoid these ups and downs that we have had during these past years in the steel industry.

I remember back in 1959 and 1960 the tremendous layoffs we had in the steel industry which affect mining and, of course, all the other industries in the area which I represent. Now we are back again, after having 9 or 10 fairly good years, having years of heavy layoffs, of approximately 45,000 people throughout this country in an industry which is a basic industry in the United States.

So I hope we will be able to continue the meetings and to have cooperation from the present administration, and I hope that they will understand that what we have been trying to do is to bring together all the elements and stress the significance of the need to reduce the imports from foreign countries which subsidize their steel and which give special benefits to their companies and then undersell steel in the United States and put American workers out of work.

It is very clear to me that we need special cooperation in this industry in particular. We modernized the foreign steel industries after World War II. We modernized the foreign countries and companies, and then they undercut us and undersell us and put Americans out of work.

So we have a lot of work to do. I appreciate the dedication and devotion of the chairman in particular. There is nobody who has done more for the steel industry in this country than the gentleman from Pennsylvania, Mr. JOE GAYDOS, and all of us are deeply obligated to this Congressman from Allegheny County for the work he has done.

Mr. Speaker, I express my appreciation and the appreciation of the people who work in the steel industry in my area for all the work he has done.

Mr. GAYDOS. Mr. Speaker, I want to thank my colleague, the gentleman from Pennsylvania (Mr. MURTHA), for those very kind personal remarks as well as those directed to the Steel Caucus.

● Mr. APPLEGATE. Mr. Speaker, I want to thank my friend from Pennsylvania, Mr. GAYDOS, for taking this time to draw attention to the current plight of the steel industry.

After the trouble the industry found itself in, in 1977, the Steel Caucus was created and we pursued and achieved a system in which the main culprit at the time, imported steel, could be controlled. The trigger price mechanism, or TPM as it is referred to, is a sound mechanism which, when actively enforced, works to reduce foreign steel imports.

Once again, however, we find ourselves with a depressed steel industry and again, in spite of the presence of TPM, the primary cause of our problem is high levels of imported steel. Why is this? Frankly, I believe it is a result of a lack of enforcement of the TPM by the Reagan administration and has greatly contributed to the increase in import levels. This uncaring attitude has resulted in massive layoffs throughout many steel-producing communities in this country such as those in my congressional district in southeastern Ohio. Furthermore, the ripple effect of these layoffs results in a very depressed overall economy.

We now find ourselves in a situation in which enforcement of the TPM to any degree is in question due to the filing of antidumping suits by the United States Steel Co. These suits, coupled with the seven suits already promised to be filed by Secretary of Commerce Baldridge, would occupy the time of the Commerce staff people to the point where TPM would cease to function at all. Secretary Baldridge is to be commended for his intended actions as this will slow the rate of imports but will still allow TPM to function. United States Steel's actions, however, will only complicate matters and may not result in any significant change in the future because of the loss of the TPM.

I urge United States Steel officials to reconsider their position and request Secretary Baldridge to work with the firm to make a commitment that action will be taken at a more appropriate time to counter the current import levels. By doing so, proper legal action can be taken and results achieved without jeopardizing the TPM in spite of its weaknesses.

Again, I thank the gentleman from Pennsylvania for taking the time to discuss this very important matter.●

GENERAL LEAVE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

THE PRESIDENT'S PEACE INITIATIVE

The SPEAKER pro tempore. Under a previous order of the house, the gentleman from New York (Mr. WEISS) is recognized for 60 minutes.

Mr. WEISS. Mr. Speaker, the first item of business on this date was the consideration and adoption of House Concurrent Resolution 224, a resolution entitled to express the support of the Congress for the President's initiatives for peace. That resolution was adopted overwhelmingly. There were in fact three Members only, I was one of them, who cast a negative vote.

There were, I believe, 13 Members who voted present.

I can state, Mr. Speaker, that my negative vote was a very reluctant one and I know on the basis of conversations with a number of my colleagues that there were numerous reluctant "yes" votes on the resolution as well.

□ 1830

So I have asked for this special order to discuss why I voted the way that I did and to explore the process by which we arrived at consideration of that resolution this morning and to suggest, perhaps, that there may be a better way of handling matters of such great concern and significance.

The resolution was never considered by the Foreign Relations Committee and, indeed, appeared on the floor for consideration by unanimous consent. Those of us who tried to secure copies of the resolution, having been forewarned very late yesterday evening that the matter would be coming up today, could not receive copies and, indeed, were advised that there were no printed copies available until after 9 o'clock this morning.

Mr. Speaker, that resolution did not have such great urgency to it that it had to be considered in that kind of rush or railroad fashion, if you will, especially when the failure to have it presented to the Foreign Relations Committee to begin with precluded not only understanding to what its "whereas" provisions and its "resolving clause" really meant, but precluded any correction or modification or improvement of the resolution within the committee itself.

Then beyond that, when it came to the floor it came in such a fashion that again amendments were absolutely precluded and so we were faced with a situation where a resolution to which very few Members had been privy appeared on the floor and Members had the choice of voting yea or nay and doing so without there being any exploration either in committee or on the floor in any significant fashion as to what the real substance or ramification of that resolution were.

You know, it just so happens, Mr. Speaker, that yesterday when we were in the process of debating the Defense Department appropriation measure, I took occasion in the course of one of my statements to indicate my approval of the President taking to the airwaves and undertaking a peace initiative. I think that most Members, if not every single Member of this House does, indeed, welcome Ronald Reagan, the President of the United States, moving forward with a thrust toward resuming and having the United States participating in negotiations with representatives of the Soviet Union; but that welcome of the initiative is something quite different from being faced with an up or down vote in a resolution which in its "whereas" clauses implicitly commits this House to the specifics of the President's proposal.

Now, indeed, it may very well be that the specifics of the President's proposal may be perfectly fine and unobjectionable. Unhappily, none of us really knows that because the appropriate committee had no opportunity to question any representative of the administration as to what the President meant by his proposal and the statements that were to be found there.

So we were in a position of being asked to receive a variation of the famous or infamous, if you will, Gulf of Tonkin resolution where another President of the United States in essence had been given a blank check.

I, for one, am not about to give blank checks to anyone, certainly not when it comes to matters relating to nuclear arms or nuclear armament, because the resolution, Mr. Speaker, does not only speak to nuclear disarmament, but implicit in one of the clauses is authorization for deployment by saying that, in fact, the President has expressed his willingness to cancel deployment of the Pershing II and ground-launched missiles if the Soviet Union dismantles its SS-20, SS-4, and SS-5 missiles.

It seems to me that we would have been far better served by having the Foreign Relations Committee explore exactly what the implications of that provision really were.

Then just for another example, as you read the President's speech you find that when he starts talking about verification, he says that he wants verification which will emphasize "openness and creativity rather than secrecy and suspicion"—I close the quote and paraphrase—which had surrounded prior efforts to deal with disarmament, nuclear disarmament.

Well, what does that really mean? Are we talking about as the projections the day before the President's speech had it of demanding that the Soviet Union agree to onsite inspection of nuclear missile sites within the

Soviet Union? If so, then the President's proposals are really nothing more than an attempted propaganda coup, knowing full well in advance that the proposals on the basis of a 30-year or more history have absolutely no chance of being accepted and will be rejected out of hand.

It also, I might say, comes perhaps with some sense of irony, especially when for the last couple of days we have been discussing the racetrack mode for the MX missile that we have been debating over the years where the very basis, the very core, if you will, of that basing mode was to create a system whereby there would be secrecy by the numbers, so that the Russians would never know which of the particular shelters or tracks or home bases our missiles would be in.

So again, I do not think that we have served anyone well by forcing this House to be put into a position of voting up or down a resolution whose ramifications are beyond the ken of most of the Members of the body.

I hope that, in fact, the President has moved from the totally negative attitude that he had evinced and evoked during the campaign for the Presidency for the years prior to it and since then as the resolution of the United States in regard to disarmament.

I think again it is somewhat ironic that here the Democratic Party leadership rushes in great haste to rally round the flag and to rally round the flag holder, if you will, in the person of Ronald Reagan, when Mr. Reagan, if you will, certainly felt under no such mandate to rally round the flag or the flag holder when the President of the United States at that time, Jimmy Carter, had his administration, took the strategic arms limitation talks No. 2, which had been commenced under a prior Republican administration. Indeed, Mr. Reagan went around the countryside raising the alarm as to what a terrible thing this was.

□ 1840

I do not believe that Ronald Reagan had an obligation to support automatically whatever Jimmy Carter agreed to. Nor does this body, nor does the Democratic Party membership or leadership have an obligation to buy a pig in a poke and support whatever it is that Ronald Reagan may be talking about.

It is quite clear that the behavior of the President and his administration toward disarmament talks and toward nuclear warfare over the course of these past 10-plus months has frightened our European allies, both the leaders of the governments of Europe as well as the people of Europe. There are people throughout the capitals of the European nations by the hundreds of thousands marching in opposition to careless, reckless talk about the deployment of neutron bombs and how nuclear war can be limited to Europe. Those are some of the sentiments which the President had expressed himself about early on.

I pray and I hope that, in fact, he has, after this great period of time, concluded that the future of humanity literally hinges on the United States and the Soviet Union continuing the painfully slow discussions about limiting and perhaps reducing nuclear armaments. If so, I think that the speech that the President made yesterday marks a very significant beginning.

I think that if that is his intention, he will have the support of the Members of this body, the American people, certainly I will be supporting him, but I do not think that it is essential or helpful, without knowing what is in his mind, without carefully digesting his statement, to jump to automatic support because he is the President of the United States.

We are on the razor's edge of humanity's survival. And both the United States and the Soviet Union have it within their power to destroy all of civilization. The leaders of both nations, the Soviet Union and the United States, are from time to time capable of demonstrating the kind of paranoia which can unwittingly cause a nuclear war to break out. I think there is an obligation on Americans with regard to their leaders as there is Russians with regard to their leaders to make sure that they are not engaging in oneupmanship or propagandistic advantage, but are genuinely and sincerely concerned about pursuing the paths of disarmament and peace.

A TRIBUTE TO SIDNEY R. RABB

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 15 minutes.

● Mrs. HECKLER. Mr. Speaker, one of the most extraordinary individuals it has been my privilege to know during my years of public service is Sidney R. Rabb of Massachusetts. Now a vigorous and active 81 years young, Mr. Rabb is the founder and still the chairman of the Stop and Shop Co., operators of retail food, clothing, drug, and tobacco stores throughout New England. It is a company that does over $2 billion of business a year, a tribute of Mr. Rabb's vision and leadership.

On November 4, Mr. Rabb addressed a meeting of the Massachusetts Food Association. I want to share his talk with you, for its gives us a rare glimpse into the mind and the attitudes of a man who exemplifies the qualities that we like to consider particularly American—caring, a devotion to family and community, a determination to build on quality and service, and an unbounding faith in the future of this country. How applicable, and how needed, are these attitudes today. Mr. Rabb's remarks follow:

REMARKS OF SIDNEY R. RABB

Some weeks back when Milton called to invite me to be your speaker this evening, I thanked him and told him how appreciative I was. It was a very nice thing to do. But knowing the kind of people who make up this fine organization, who are so knowledgeable about what is going on in this changing world, I thought it would really be like carrying coals to Newcastle to add another layer to the many shades of opinion being offered by experts in just about any field you might select. Every form of the media—newspapers, radio, television, magazines, newsletters, editorials, and what-not—are so profuse on any subject that I hesitated to take on what might be another meal after a sumptuous banquet. Those of you who know Milton well can understand what I mean when I say that he would not take "no" for an answer. Part of his sales pitch was the suggestion that I make the decision, that any subject I wanted to talk about would be suitable as far as he was concerned. I recalled with a good deal of pleasure my get together with you when Paul Cifrino was inaugurated as executive director back in 1974, and being the oldest in years of the membership here and thereby having the deepest roots in this food business—and I assume that this is an accurate statement—I felt I could not refuse long-time, good friends. So, here I am. The topic, not new but always timely, my favorite subject—people and the food business.

One morning Irving, Avram, and I were together discussing what I should say that would be most appropriate and interesting to you folks. They raised a pertinent question: "you have been active in and around the food business from the days of the horse and buggy, more than 60 years, to the present supersonic jet and rocket age. What is there about this business with all its headaches and heartaches that makes you love it so much? What is the peculiar fascination that year after year keeps you so excited and enthusiastic . . . that makes you still want to put in your 40 or 50 or 60 hours a week long after most men have called it quits and left for Florida or the islands or some other warm and comfortable place?

That is not hard for me to answer—in the simplest of terms it's because this is a "people" business. . . . and we love people—we all do or we wouldn't be here. It is a business that is basic and fundamental, that deals in the necessaries of life. Most of the people in it are earthy, hard working, sensitive in their dealings with the public, and as a fact of life have face-to-face contact with almost the entire spectrum of people in our community. No one deals with people more often or more regularly, day after day. No one really knows people better—and that in itself is exciting.

Forgive me if I reminisce a bit—it is one of the privileges of advancing years—and some of my experiences may sound familiar to you. Just about all of us here came to this business from backgrounds with great similarity. Most of you are probably not old enough to remember too much of what went on in the years before we came to our present highly sophisticated way of serving the public. Let me give you a brief vignette

of what took place around the turn of the century.

I was really born into the food business. My paternal grandparents came to Boston from Russia in 1891 and settled in the North End. After a very short period of orientation to a new society and learning the language of their new homeland, to them a land of opportunity, they made a decision to open a little grocery store on the corner of Prince and Salem Streets, which carried a line of ethnic foods that catered to the tastes and pocket books of the immigrants from the Central European countries. My grandmother really ran that store, and who were the clerks? The family, which consisted of 4 sons and 2 daughters, and no 40 hours, no minimum wages, no time and a half for overtime—just work and plenty of it. How many thousands of families started this same way.

My grandfather for a while, also pitched in to help. He traveled to New York with the oldest son to do some buying, particularly ethnic foods like herring, lox, white fish, and pickles. They ran a great show for a small shop and built a fine acceptance and a big volume of business for those days. They took good care of their customers. But, this was not my grandfather's cup of tea. He was too much of a scholar, and had such idealistic dreams of a Jewish homeland that he took two of the younger sons and went to Palestine. Although he came back to America for a visit, his heart was really not here, so he returned in 1897 to rejoin the early pioneers and lived in Palestine until his death in 1903.

In the meantime, my grandmother continued in that little food store and maintained a thriving business until she retired in 1912. It was there that I was exposed to my first taste of food retailing, where I saw how people came not only to buy but to meet one another, to share their problems and to pool their experiences as each in his own way strove to build a new life in this great country. This was much more than a little food store in the North End—this was in fact also a community social center with all that that implies.

My father graduated from this at an early age. At 13, his first new business venture was to fill a basket with notions and go house-to-house part of the week, as far as Roxbury Crossing on one hand and south Boston on the other. On the busy shopping days he would sell from a pushcart on Hanover Street. You can see how enterprising he was. It didn't take him long to accumulate enough money to start what he called a small wholesale grocery business—and then followed a very familiar pattern. He went into partnership with a brother and a brother-in-law and then in 1898, when he was not yet 20, they merged with three enterprising competitors in the same field to form The Standard Grocery Company. A company that has been in continuous operation ever since.

On Saturdays and holidays and vacation days the children of all the partners spent much of their time around the new headquarters, such as they were, an old warehouse at the corner of Richmond and Fulton Streets. For the record we helped with the packing of different kinds of merchandise—that's what families were supposed to do, but usually we raised so much hell that we were sent home early to get us out of the way. But the atmosphere was one that has remained with all of us who have had that particular experience—the way families, young and old, worked together—built together—shared their successes and their failures. Life in America was not only working to make a living. That was priority number one. . . . but a very important by-product probably more important than the main show was the privilege and I call it a privilege, of being exposed to the social and human as well as the economic problems of all those people who contributed so much to community life of this growing democracy.

At about that same time, my father's youngest brother, Julius, was attending law school. As an initiation requirement into a fraternity, he was ordered to stand in front of the United Cigar store and pass out to each customer entering the store one sheet from a roll of toilet paper. He was impressed by the number of customers trading in that chain tobacco store. He was a creative thinker—having been brought up in the atmosphere of that little old grocery store, and putting two and two together, he came up with the thought—"How about chain food stores?" Not a bad idea:

At that time in Boston there were A & P, M. O'Keefe, Ginter, and John T. Conner. So, even though he had all the credentials for practicing law, having graduated from law school and passed the bar, he was a practical guy who also liked to eat. He had the idea—he needed money and merchandise—to make the idea work. He convinced his brother, Jacob—who was then operating The Bay State Wholesale Grocery Co.—to back him in starting at least a couple of stores. Again, a familiar story. That's what family and friends were for. So, Jacob agreed to back Julius in two stores as a start which he in turn staffed with other immigrants who were part of the family. That was really the humble beginning of Economy Grocery Stores—the same company that has evolved over these many years into the Stop & Shop Co.'s.

Having worked in retail food stores during my school years—and I must confess that for a short time A & P was one of them—it became very clear to me that the food business was a fascinating one and had a future. It was a people business, dealing on a one-to-one basis, that was for me—I loved it. So, when I was released from the Marine Corps in December 1918, and had to earn a living, I took advantage of an opportunity to become associated with the then Economy Grocery Stores. It was a good decision. In December it will be 63 years—and I can honestly say that I could not have chosen a more challenging, more interesting, more satisfying, or more rewarding arena in which to spend my business life.

In our kind of business we come to know how people live and work and what they think—we learn to understand them and to share in their problems. And to know them is to like them—for from them we learn another great lesson—people are basically good. It is this knowledge and this understanding that adds so much to the richness in our own lives, and for this as well as for the material rewards, we should all be truly grateful.

The food business has been good to all of us in many ways, and it should also be a source of great pride to us who are in it. No business has made a greater contribution to the American standard of living than we have. Just think back to that little store at the turn of the century—few items—little or no sanitation—low wages—all typical of the period in what was then still essentially an agrarian country—and think of the unbelievable evolution and development of an entire food production and distribution system—the availability of thousands of items from all over the world, fresh, refrigerated, canned, dried, maybe some day irradiated, available in one place in usable form at relatively low prices—in attractive and clean stores—and with wages and salaries and even profits in terms we never dreamt of not too many years ago.

Yes—this is a great business. It has been good to us and will continue to be as long as we concern ourselves with the people in our business—both those who work in it and those whom we serve—our employees, our suppliers, and our customers—those from whom we have learned so much and to whom we owe so much. After over 60 years of working with you, I firmly believe that the food business will present even greater opportunities in the years ahead to those of you who seize them.

It has been a great pleasure to have spent this evening with you. Thank you so much for inviting me.●

LEGISLATION TO CURB DRUG TRAFFICKING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 30 minutes.

● Mr. LAFALCE. Mr. Speaker, drug abuse in our Nation has reached epidemic proportions. The sheer numbers which are used to describe the extent of drug abuse are so enormous that their significance becomes hard to grasp and put into terms with which we can readily identify.

What tragedy do we really experience when we learn that, according to recent figures, over 10 percent of the graduating students in American high schools use marihuana every day? What anguish can be felt by those of us removed from the human incapacitation which is experienced by nearly half a million daily heroin users? Can we comprehend the impact of the importation into the United States of more than 30 metric tons of cocaine per year? We are assaulted with statistics and, not surprisingly, find it difficult to equate those numbers with the human suffering it represents.

In a larger sense, though, the tragedy of drug abuse in our country does not need numbers to be adequately defined. The street corners and schoolyards, the back alleys of ghettos and the backrooms at fashionable parties are the places where the shadow of drug abuse casts its ominous pall. The devastation of health, productive work, and family life, and the specter of personal and property crime to maintain millions of drug habits is the saddest—and most accurate—description of the human havoc wreaked by this cancer within us.

Why then talk at all about statistics? Because some statistics are meaningful and can be made more readily understandable. If human misery cannot, and should not, be put into cold numerical terms, perhaps the billions of dollars of cash transactions which feed

the illegal drug trafficking can be described with raw data.

Recently, the Los Angeles Times reported that some experts estimate that in Dade County, Fla., there may be as much as $7 to $11 billion a year in underground drug-related cash activity. Perhaps, Mr. Speaker, our colleagues recall that when 880 pounds of cocaine was seized in Bogota, Colombia, 2 years ago, over $1.1 million in U.S. currency was also found with the seized dope. Our dollars leave the country at as rapid a pace as the narcotics, which the money buys, come back to our shores.

I am convinced that there is something positive which we can do to crack down on the enormous illegal transfer of money which leaves the country in order to subsidize the international drug trade. Accordingly, today I am introducing a package of five bills designed to help law enforcement officials police the movement of drug-related currency into and out of this country. The bills would amend the Currency and Foreign Transactions Reporting Act—popularly called the Bank Secrecy Act—to fill some serious gaps in the current law which hinders the law enforcement capabilities of U.S. customs agents. These bills are largely the same measures which I introduced in the last Congress after I returned from a factfinding mission to Colombia with the Select Committee on Narcotics. Certain technical and substantive changes have been made to address some of the concerns raised by some Members in the last Congress.

In his state of the Union address in 1979, President Carter stated that it would be the policy of his administration to "stress financial investigations as a means of prosecuting individuals responsible for the drug traffic." The Carter administration, indeed, did commit its wholehearted support for my bills in the 96th Congress, H.R. 4071, 4072, 4073, and the omnibus version combining all three, H.R. 5961, which enjoyed the support of over 50 cosponsors.

At the conclusion of my remarks, Mr. Speaker, I would like to insert in the RECORD letters of support which I received from officials in the previous administration when my bills were under consideration. Notable among these letters are those from the U.S. Department of Justice Drug Enforcement Administration, the Department of Treasury Office for Enforcement and Operations, and the U.S. Customs Service—all providing critiques of my bills and stressing the importance of those measures in combating drug abuse.

Last May, counselor to the President, Edwin Meese, commented that stemming the flow of drug traffic is going to be a priority of the current administration. I am confident that the President and his administration will continue the policy of his predecessor and fully embrace the efforts to use financial investigations as a means of prosecuting individuals responsible for drug traffic.

I would now like to describe the current operation of some of the provisions of the Bank Secrecy Act, and how my bills would address some of the loopholes contained in that law.

Present law makes it illegal to leave the country with more than $5,000 without filing a Customs Service reporting form. However, courts have held that a person cannot be arrested for violating this law until he has actually left the country. But by that time the violator is outside the jurisdiction of the United States and cannot be successfully prosecuted. Tying the hands of our own customs officials in this way is an obvious gaping loophole in the law. Therefore, the first of my five bills would make it illegal to "attempt" to leave the United States with large amounts of currency without filing the reports already required under the Bank Secrecy Act. The bill raises the amount of money being taken out of the country, in order to require a customs report, from $5,000 to $10,000.

The second, third, and fourth bills would allow customs officials to search for unreported amounts of cash—in their presently authorized search for contraband—where cause exists to believe that this currency is leaving the country as a result of illegal activities. Each bill proposes a different standard of cause: First, "reasonable cause"; second, "probable cause"; and third, when the customs official shall "suspect that there are monetary instruments in the process of being transported out of the country" in violation of the Bank Secrecy Act. I encourage the Members who will study these bills at the committee level to help me determine the most appropriate, or, more precisely, the most acceptable standard.

The fifth and final bill would give informants a portion of the recovered currency, thereby giving a further incentive to those who know of cash smuggling to report this to U.S. Government officials. These rewards would prove to be extremely helpful for obtaining information from informants. The Secretary of Treasury would have discretion to determine the amount of award, within a specified ceiling, to be given to informants.

Mr. Speaker, I am encouraged that the Senate is currently involved in a series of hearings to study the international drug trafficking problem. I urge my colleagues in the House to continue and renew their own efforts to combat this pernicious drain on our country, by favorably considering a very simple and very practical series of bills which will help curb the flow of money which is use to feed the drug trade.

The drug abuse problem is one which has permeated our society and, at times, seems totally out of control. My bills will not solve the drug abuse epidemic, nor put a complete halt to the drug trafficking problem. But these bills will help our law enforcement officials to more effectively do their jobs in stopping the flow of money out of the country so that the flood of drugs which comes back to our shores may be abated.

The letters of support for the comparable bills which I introduced in the 96th Congress are inserted in the RECORD at this time.

THE WHITE HOUSE,
Washington, October 22, 1979.

Hon. JOHN J. LAFALCE,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN LAFALCE: I want to express the President's appreciation for your decision to join in leading the effort to pass the financial privacy bills. We look forward to working with you on these important bills in the coming months.

Sincerely,

STUART E. EIZENSTAT,
Assistant to the President
for Domestic Affairs and Policy.

DRUG ENFORCEMENT AGENCY,
Washington, D.C., November 5, 1979.

Hon. JOHN J. LAFALCE,
House of Representatives,
Washington, D.C.

DEAR MR. LAFALCE: I have been monitoring closely the three legislative initiatives you introduced upon your return from Colombia this past May. I refer to H.R. 4071, 4072, and 4073 which still remain pending in the House of Representatives.

As you know, the enactment of these three laws would greatly improve the effectiveness of our law enforcement efforts to curtail the illegal movement of U.S. currency out of the U.S.A. Most of this illegally obtained money is realized as a result of narcotics trafficking. With the enactment of H.R. 4071 there no doubt would be the added incentive for law-abiding citizens to come forward with information relating to currency violations. The impact would greatly improve the effectiveness of the U.S. Customs Service in its enforcement responsibilities.

Present law makes it illegal to leave the country with more than $5,000 without filing a declaration. However, the courts have held that a person cannot be arrested for this violation unless he has actually left the country, thus escaping U.S. jurisdiction. The enactment of H.R. 4072 would remove this loophole by providing that attempting to leave the country is also a violation. This will improve our effectiveness in stemming the flow of illegally obtained currency from leaving the country. H.R. 4073 would give to our brother law enforcement officers of the Customs Service the authority to search for undeclared monetary instruments where reasonable cause exists to believe that these monetary instruments are leaving the country as a result of illegal activities. With today's sophisticated drug trafficking organizations, much of the profits leave the United States for source countries to pur-

chase additional drugs and other smuggling resources.

I understand that the above three legislative initiatives are before the Subcommitte on Financial Institutions and there is a possibility for hearings regarding these measures. As Administrator of the Drug Enforcement Administration, I would welcome the opportunity to participate in these hearings and discuss further with the Subcommittee the importance of this corrective legislation as it relates to effective drug law enforcement.

On behalf of the Drug Enforcement Administration's Special Agents, I thank you for your efforts.

Sincerely,

PETER B. BENSINGER
Administrator.

THE COMMISSIONER OF CUSTOMS,
Washington, D.C., January 21, 1980.

Hon. JOHN LAFALCE,
House of Representatives,
Washington, D.C.

DEAR MR. LAFALCE: I would like to express the appreciation of the U.S. Customs Service for your efforts to amend the Currency and Foreign Transactions Act, popularly known as the Bank Secrecy Act of 1970 (31 U.S.C. 1101-1105). With the passage of the three bills you have introduced—H.R. 4071, 4072, and 4073—we believe that the loopholes in the present law will be eliminated and a more effective and productive enforcement of this Act will result. The views of the Department of Treasury on your legislation have previously been set forth in the Department's report of October 5 and 12, 1979.

As you are well aware, the Customs Service has the primary responsiblity of enforcing that section of the Act which requires that an individual entering or departing from the United States with over $5,000 must file a report with the Customs Service. While a vast majority of those individuals who are aware of the law do comply with it, we believe that most of the money earmarked for marihuana and other narcotics purchases overseas goes unreported. In fiscal year 1978, we estimate that $2.6 billion was exported from the United States in order to purchase illegal drugs, and that figure represents only the wholesale cost. It is quite apparent that the illegal drug trade is an extremely lucrative one, and we believe one way to cut down on the amount of drugs being smuggled in is to stop the flow of unreported currency going out of the country.

In the first decade of the Bank Secrecy Act, we have found the Act to be a useful tool in the law enforcement effort against drug traffickers as well as other international organized crime ventures. However, the Act has glaring deficiencies which severely restrict its effectiveness. Your legislation would remedy these deficiencies.

H.R. 4071 would add a new section to the Act which, by offering as a reward a percentage of any recovery, would encourage people to supply information to the Government about individuals who are about to enter or depart the United States with large sums of currency or other monetary instruments. Since it is extremely difficult to detect monetary instruments in large amounts—for example, it may be a single check—we must acquire as much reliable information as possible. Your bill should encourage people to come forward with this much needed and extremely valuable information.

H.R. 4072 would close the loophole in the Act which creates the most difficulties for Customs. By including an "attempt" provision in the Act, we will be able to prosecute successfully those individuals who are about to leave the country with unreported funds, but decide to "postpone" their journey when confronted by Customs, only to make another attempt later when Customs officers are not present. This very important amendment will stop the merry-go-round.

H.R. 4073 would authorize Customs officers to search suspected individuals at the border for currency and other monetary instruments without a search warrant and with "reasonable suspicion," rather than probable cause. Several Federal courts of both the District (trial) and Appellate level have reviewed the constitutionality of this standard and approved it. It is crucial that we be able to act quickly when we receive information that an individual is about to leave the country within a short period of time with a large amount of money. Where the quality of this information does not meet the probable cause standard, we are powerless to verify a departing individual's claim that he has no money to report, even though we have a strong indication that he is not being entirely truthful. Once he leaves the United States, our opportunity to enforce the Act is lost forever, regardless of how much information we may subsequently acquire. Your bill would give us the lawful tools we need to enforce the Act effectively.

In closing, I want to assure you that we stand ready to assist you in your efforts to amend the Bank Secrecy Act which should enable us to do a better job in the future.

Sincerely,

R. E. CHASEN,
Commissioner of Customs.

DEPARTMENT OF THE TREASURY,
Washington, D.C., April 1, 1980.

Hon. JOHN J. LAFALCE,
House of Representatives,
Washington, D.C.

DEAR MR. LAFALCE: I have recently been informed that your bill to amend the Currency and Foreign Transactions Reporting Act—H.R. 5961—was unanimously reported out of the House Subcommittee on Financial Institutions Supervision, Regulation and Insurance and was referred to the House Committee on Banking, Financing, and Urban Affairs with a recommendation that expeditious action be taken. On behalf of the Department of the Treasury and the U.S. Customs Service, I wish to thank you for your efforts in this matter.

As you are aware, the Department strongly endorses all of the provisions of your bill. It has come to our attention that one point requires clarification. A question has been raised concerning the applicability of the amended Currency and Foreign Transactions Reporting Act provisions to electronic transfers of currency. The current regulations require that reports must be filed with the Customs Service in accordance with 31 U.S.C. 1101 by each person who *"physically* transports, mails, or ships, or causes to be *physically* transported, mailed, or shipped" monetary instruments in excess of $5,000 into or out of the United States. 31 CFR 103.23(a) (emphasis added). It has been the position of the Department that the intentional use of the adjective "physical" means that electronic fund transfers are not covered by the provisions of the Act which your bill will amend. We assure you now that this position will not change. Therefore, your bill would not grant the Department any additional authority to monitor or intercept any electronic fund transfer. There is another section of the Act, 31 U.S.C. 1121 that currently authorizes the Secretary to issue regulations requiring reports of international transactions including electronic transfers if in the Secretary's opinion such reports are necessary.

If we can be of any further assistance, please contact us again.

Sincerely,

RICHARD J. DAVIS,
Assistant Secretary
(Enforcement and Operations).●

ACID PRECIPITATION ACCELERATED REVIEW AND REPORTING ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. RAHALL) is recognized for 10 minutes.

● Mr. RAHALL. Mr Speaker, I rise today to introduce the Acid Precipitation Accelerated Review and Reporting Act which offers a prudent course of action for the Congress to gain the necessary information it needs to address the environmental harm caused by acid deposition. The legislation I and two of my colleagues are introducing does not purport to be the solution to the problems caused by high acidity in rainfall. It does not seek to create new programs or mandate new emission controls. There are no costly technologies nor controversial standards built into this bill. What it does offer is an opportunity for the Congress to take the next step toward mitigating the occurrences of what is commonly called acid rain.

In introducing this measure, the sponsors are not depending on articles appearing in sports magazines or newspaper headlines to substantiate their approach. We are looking toward the scientific community, its expertise and resources, to give us the tools necessary to act wisely.

Most of the original sponsors of this legislation are from coal producing regions. We are equally concerned as our colleagues from New England over the effects acid deposition has on aquatic systems and possibly, on terrestrial systems and on buildings and monuments.

However, during the reauthorization of the Clean Air Act currently taking place—and beginning last year when Congress considered the utility oil backout bill—coal burning has been at the heart of the debate over the causes and effects of acid deposition. This issue has focused attention on the Nation's drive to increase the use of coal as part of its overall effort to gain independence from foreign, often volatile, sources of energy.

Yet, it is the lack of factual information in the area of atmospheric chemistry and solid evidence linking acid deposition to coal burning which

hinders our attempts to alleviate the damage caused by this phenomenon. Indeed, we are not even certain of the extent of this damage. Congress recognized this last year when in passing the Energy Security Act, it included a title creating an acid precipitation task force with the heads of the Department of Agriculture, the Environmental Protection Agency and the National Oceanic and Atmospheric Administration as joint chairmen. Representatives from other Federal agencies have joined in this effort to establish a comprehensive 10-year program to identify the causes and effects of acid deposition. For fiscal year 1982, Congress has given the task force $20 million to begin work on the national acid precipitation plan.

Nonetheless, with the reauthorization of the Clean Air Act, new pressures have come to bear and efforts are underway to take immediate action to reduce emissions of sulfur and nitrogen oxides. Enactment of these measures would be a grave mistake, and could cost the public billions of misspent dollars and could conceivably set back efforts based on sound scientific data to mitigate acid deposition by 10 years or more. Some of the proposals before Congress were borne out of political expediency and do not take into account the basic fact that we just do not have a full understanding of the causes and effects of acid deposition.

For example, one such measure seeks to reduce annual sulfur dioxide loadings within a 31-State acid deposition region by 10 million tons below 1980 levels over a 10-year period. However, while we all recognize that one of the major precursors to acid deposition is indeed sulfur dioxide, of equal importance is the role played by nitrogen oxide. This proposal does not address nitrogen oxide emissions. In addition, it seeks a 45-percent reduction of sulfur dioxide emissions yet there is no firm evidence this will lead to a 40-percent reduction in acid precipitation, or a 20-percent or even a 10-percent reduction. Nor does this measure address the fact that oil burning in New England—especially when Venezuelan crude is used—emits sulfuric acid. Furthermore, this strategy does nothing to control the catalysts in the atmosphere which transform sulfur and nitrogen oxides into acids.

Sulfur dioxide is not the sole precursor to acid deposition. Thus, measures seeking only to reduce these emissions constitute a haphazard approach to the problem. The danger of such premature action is enormous. We would not only lose 10 years by taking this approach if proven inadequate, but some 188,000 mine related jobs would be put in jeopardy with a consumer cost impact of $3.2 billion per year for increased fuel costs alone.

If such a measure is adopted, the Congress would be telling the American people it is spending millions of taxpayers' dollars to gain a basic understanding of the causes and effects of acid deposition while at the same time increase consumer costs billions more through new controls—even though the Nation does not have the answers to the questions it is asking the scientific community to study.

I submit it would be foolhardy for the Congress to embark on a program to immediately reduce only sulfur dioxide emissions, and then 10 years down the road look back at a possible policy fiasco and start all over again. We must not move on such a chaotic course of action based only on unproven hypotheses and overly ambitious conclusions drawn from incomplete data.

Is it not ironic that the Clean Air Act itself has promulgated the acid deposition problem by creating an impetus for industry to build tall smokestacks which now lead to long-range transport of pollutants? Are we to repeat this type of folly during the current reauthorization of the act?

Let us take the facts we know about acid deposition, build upon them, and then take action. There is general agreement in the scientific community that sulfur dioxide and nitrogen oxide are major precursors to this phenomenon. We know that lakes and steams are becoming increasingly acidic in some areas of the country. However, what we do not yet understand is how these precursors combine in the atmosphere and what acts as the catalyst in the transformation to sulfuric and nitric acid. Indeed, there is not even full agreement within the scientific community that the natural pH value of rainfall is 5.6. Why, for example, is the average pH value of rain on the remote island of Samoa 4.7; in Hawaii, 4.2; in Alaska, 4.85; and, in Australia, 5.3.

It seems to me that before any action is taken to control acid deposition all the facts must be in hand. Research is needed into the factors associated with the conversion of sulfur dioxide nitrogen oxides into sulfates and nitrates and the role played by sunlight, humidity, temperature, catalytic particles, and the presence of certain oxidants in this transformation. Also, we need to know what degree are the presence of sulfur and nitrogen oxides in the atmosphere from man-made and anthropogenic sources along with the nature of the transport and diffusion of acid precursors and their deposition in wet and dry forms, the relative contributions of acid precursors from both stationary and mobile sources, and the contribution from long-range and local sources.

Mr. Speaker, the sponsors of the Acid Precipitation Accelerated Review and Reporting Act are seeking to understand and then act on acid deposition in a prudent and logical manner. The bill recognizes that the national acid precipitation plan created by title VII of the Energy Security Act is a viable means to answer questions on the causes and effects of acid deposition, however, it also accelerates the 10-year program to 5 years so that the Congress, the administration, and the American people can begin to address the damage done by this phenomenon. Furthermore, this legislation directs the acid precipitation task force to examine precombustion fuel treatment such as coal washing (which can eliminate between 25 and 40 percent of the sulfur dioxide in coal) and inherently low-polluting combustion technologies such as atmospheric and fluidized bed boilers which may have great value in emission control. Finally, the bill directs the task force to solicit comments and views from State agencies doing work in this field.

Acid rain, we've been told these past few years, is a result of an industrialized civilization. Yet, scientists testing the acidity of ice core samples from the Antarctic and the Himalayan Mountains have found them laden with acid. In addition, volcanic eruptions as exemplified recently by that at Mount St. Helens also create large amounts of sulfuric acid. By the courtesy of Mother Nature, the world has experienced acid precipitation since its creation. It is not a new phenomenon and not one solely attributable to man. With this in mind, a premature course of action is certainly not warranted when we have such a great opportunity to address this problem with sound scientific evidence. Obviously, there have been some gross pollution abuses which need control. And, they are being controlled under existing law. We have yet to measure the effect of the 1977 new source performance standards on coal-fired plants promulgated the EPA in 1979—plants that will not come on line for years to come.

We should not be frightened into action by emotionally induced and generalized proposals to eliminate acid deposition. More and better information is needed before any massive regulatory campaign is launched. It is our hope that the enactment of the Acid Precipitation Accelerated Review and Reporting Act will provide the Nation with this information so that we can continue to achieve energy security through the use of domestic coal in an economical and environmentally sound manner.

Mr. Speaker, following is a 10-point recommendation developed by a group of distinguished experts in the area of acid deposition which I ask to be inserted for the RECORD. In addition, I include the full text of the Acid Pre-

cipitation Accelerated Review and Reporting Act for the RECORD:

TEN-POINT REVIEW

Highlights of the seminar on acid rain, November 18, 1981, Subcommittee on Natural Resources, Agriculture Research and Environment of the Committee on Science and Technology. Participants included Dr. Robert W. Brocksen, Electric Power Research Institute; Dr. Ellis Cowling, EPA acid precipitation program and associate dean at North Carolina State University; Dr. George Hidy, ERT, Inc.; Dr. Jay Jacobson, Cornell University; Dr. Gene Likens, Cornell University; Dr. Orie Loucks, Butler University; Dr. Volner Mohnen, State University of New York; and, Dr. Rudolf Husar, Washington University.

First, the role of ammonia in rainfall acidification must be included in an acid rain assessment.

Second, the role of tall stacks has probably been overrated.

Third, dry deposition plays an exceedingly important role in understanding acid deposition but we have, as yet, inadequate ability to measure it.

Fourth, there may not be a one-to-one relationship between emissions and acid deposition.

Fifth, there is a need to look at the total chemistry of rain—not just the pH.

Sixth, we must have long-term monitoring efforts—including monitoring of dry deposition.

Seventh, for aquatic impacts, the greater the reduction in the level of acid loading the greater the uncertainty in the potential benefits.

Eighth, long-term, whole ecosystem research is needed to understand terrestrial effects.

Ninth, it is biologically naive to consider acid rain apart from other air pollutants, all of which act together.

Tenth, research shouldn't stop after mitigating actions have occurred. There is a need to determine what effects our actions are having.

H.R. 5055

A bill to provide for an accelerated study of the causes and effects of acid rain, to provide for an examination of certain acid precursor control technologies, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Acid Precipitation Accelerated Review and Reporting Act.

FINDINGS AND PURPOSES

SEC. 2. (a) FINDINGS.—The Congress finds and declares that—

(1) the phenomenon known as acid deposition is a problem of both national and international scope and interest;

(2) acid deposition occurs in various parts of the world and has the potential to contribute to higher levels of acidity in aquatic systems, terrestrial systems and the deterioration of buildings and monuments;

(3) acidity in precipitation occurs through both anthropogenic and natural causes;

(4) sulfur dioxide and nitrogen oxides from industrial and transportation sources have been identified as major contributing elements in the creation of acid precipitation;

(5) the atmospheric chemistry relating to the conversion of sulfur dioxide and nitrogen oxides into sulfates and nitrates is enormously complicated since the conversion can be influenced by temperature, sunlight, humidity, catalytic particles in the air and the presence of certain oxidants;

(6) there is widespread agreement in the scientific community that the method by which the precursors to acid precipitation are processed in the atmosphere is poorly understood;

(7) various techniques of reducing emissions from stationary sources of precursors of acid deposition, including increased use of precombustion fuel treatment and the development of inherently low-polluting combustion technologies, may prove to be of significant long-range value in reducing the amount of acid deposition;

(8) the National Acid Precipitation Assessment Plan established under title VII of the Energy Security Act, and its cooperative links to similar State and international programs concerned with acid deposition, provide an established framework for synthesizing existing scientific data, and developing additional scientific data, relating to acid deposition and for making recommendations for strategies to prevent, limit, and remedy the harmful effects of acid deposition; and

(9) the causes and effects of acid deposition, particularly the atmospheric chemistry and of long-range transport of acid deposition precursors, should be more fully understood before undertaking complex and potentially costly efforts to further control sulfur dioxide and nitrogen oxide emissions.

(b) PURPOSES.—It is the purpose of this Act to provide for—

(1) an accelerated effort to understand the causes and effects of acid precipitation; and

(2) examination of the potential and feasibility of various techniques of controlling sulfur dioxide and nitrogen oxide emissions, such as precombustion fuel treatment and inherently low-pollution combustion technologies, which may hold promise of reducing emissions of these pollutants.

SEC. 3. (a)(1) Sections 704(a) and 704(d) of the Energy Security Act (Public Law 96-294) are amended by striking out "ten-year" and substituting "five-year" in each place such term appears.

(2) Section 704(c)(4) of such Act is amended by striking out "nine".

(b) Section 705(a) of such Act is amended by striking out "nine".

(c) Section 706(b) of such Act is amended by striking out "nine" and by striking out "ten-year" and substituting "five-year".

(d) Section 704(e) of such Act is amended by adding the following at the end thereof: "Not later than five years after the date of the enactment of the Energy Security Act, the Task Force shall submit a final report setting forth in detail the recommendations of the Task Force under subsection (b)(14)."

(e) Section 704 of such Act is amended by adding the following at the end thereof:

"(g) In carrying out the program objective set forth in subsection (b)(9)(B), the Task Force shall examine the usefulness of precombustion treatment of fuels in reducing sulfur dioxide and nitrogen oxide emissions and shall also investigate the potential for long-term reduction in such emissions which may be achieved through the implementation of inherently low-polluting combustion processes, such as atmospheric fluidized bed combustion and pressurized fluidized bed combustion.

"(h) In carrying out the program objective set forth in subsection (b)(11), the Task Force shall actively solicit data, views, and comments from State agencies which are carrying out studies and research relating to acid deposition.".●

● Mr. APPLEGATE. Mr. Speaker, as the Congressman for Ohio's 18th Congressional District, which comprises the eastern and southeastern portion of the State as well as the bulk of Ohio's coalfields, I am very aware of the allegations by many who blame Ohio for the formation of acid rain. After all, Ohio burns more coal than any other State in the Union. However, it should be obvious, even to the casual observer, that there is much to be learned about acid rain and its origin; therefore, any statement indicating that acid rain is a direct result of the burning of high sulfur coal is premature, inaccurate and distorted at best.

Because of the great deal of uncertainty of this matter, as brought to light by a variety of studies, I support the Acid Precipitation Accelerated Review and Reporting Act which we are introducing today.

This legislation gives the Congress the vehicle it needs to gain the necessary data on which to build a program to address acid deposition.

Instead of immediately taking action to add new controls on coal-fired powerplants, this bill will allow us to gain the facts on the contribution to acid deposition by auto emissions and oil-fired powerplant emissions.

For example, in a Department of Energy sponsored study, it is shown that auto exhaust fumes and the burning of oil in the Northeast may be the primary source of acid rain in that and surrounding areas. Quoting from the report, which coincides with a National Academy of Sciences report,

Close examination of fuel use information and source emissions characteristics in the Adirondacks, Florida, and California suggest that local oil burning and automotive sources may be the major contributor to the occurrence of acid rain in these areas.

The report goes on to say that 30 percent of the acidity of rainfall in the Northeast is due to nitric acid, which can be produced from auto exhaust and high levels of transportation-related nitrogen oxides can be found in the air over the Adirondacks during the summer months. Further, it is reported that boilers buring residual oil have been reported to produce 3 to 10 times more sulfates per unit of sulfur content than do boilers burning coal. This conclusion, of course, contradicts statements made by several authorities who say acid rain is caused by emissions from coal-fired plants in the Ohio Valley.

Mr. Speaker, there is clearly the need to proceed cautiously on proposals claiming to eliminate acid rain. To do otherwise, I believe, would be irresponsible and could have very adverse economic effects on a large portion of society.●

● Mr. MURPHY. Mr. Speaker, as an original sponsor of the Acid Precipitation Accelerated Review and Reporting Act, I would like to associate myself with the remarks made by Mr. RAHALL. It is indeed the lack of sound scientific data in the area of acid deposition which hinders our efforts to completely understand the causes and effects of this phenomenon. Without this information, it would not be in the national interest to proceed immediately with new controls to alleviate the damage done by high acidity in rainfall.

The basic conflict we are facing is the desire to respond to a potential problem and the need to gather enough scientific information to respond to that desire.

It is with this in mind the sponsors of this legislation believe it to be the best vehicle possible to gather the necessary scientific data to address the issue of acid deposition. We are attempting to expedite the availability of this information by taking the current 10-year research program contained in title VII of the Energy Security Act and accelerating it to 5 years. Funding for this effort has already been increased from $12 million in fiscal year 1981 to $20 million in fiscal year 1982.

In addition, we are asking the acid precipitation task force to examine the benefits of coal washing and inherently low-polluting combustion technologies during its research into control strategies.

Mr. Speaker, recently a number of bills have been introduced which seek only to control emissions of sulfur dioxide as a method to reduce acidity in rainfall. These measures are lacking in that they address only one of the precursors to acid deposition, among many, and deal only with emissions from coal-fired powerplants, not oil-fired plants and auto emissions. I would like to outline some of the potential impacts of these proposals on the consumers of this country to show the damage which could be done by moving on a complex subject like acid deposition without proper scientific data.

One of these measures proposes a 10 million ton reduction in annual sulfur dioxide loadings. The fuel cost impact of this action has been estimated at $3.2 billion per year. Consumers of electricity in some States will be impacted the hardest, with those in Pennsylvania facing an extra cost of $200 million or more yearly to achieve the mandated reductions under this proposal. Furthermore, there would be severe dislocations in coal mine and mine-related jobs under this measure as high and medium-sulfur coal production decreases as utilities scramble to use low-sulfur coal to meet the emission reduction. In Pennsylvania, it has been estimated that the direct loss of jobs in the mining industry due to this measure could be as high as 14,961 with an indirect job loss of 22,442.

In summary, it seems to me that before the Congress jeopardizes these mining jobs and increases consumer costs it should be in the position of knowing all the facts on acid deposition, its causes and effects, and the impact of any control strategies.●

GENERAL LEAVE

Mr. SHAMANSKY. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks and to include therein extraneous material on the subject of the special order speech today by the gentleman from West Virginia (Mr. RAHALL).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

SHAMANSKY COMMENDS OPENING OF McDONALD HOUSE IN COLUMBUS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. SHAMANSKY) is recognized for 5 minutes.

● Mr. SHAMANSKY. Mr. Speaker, I want to bring to the attention of the House the grand opening today in Columbus of a novel and needed facility.

The Ronald McDonald House—named for the clown featured by McDonald's restaurants in their advertising—opens at 574 South 18th Street after 2 years of work. The location stands opposite Children's Hospital and this new facility—the 29th such in the country—will serve as a home away from home for parents and families of youngters receiving treatment.

Parents and families who accompany the young patients to Columbus often need a place to stay but cannot afford a hotel or motel room and want to remain close to their children.

The Ronald McDonald House, a renovated former apartment building with play areas, living rooms, and a common kitchen, will house up to 16 families at a time while their children undergo treatment. Only small donations will be accepted from those able to pay, and in 1982 alone, more than 1,000 families are expected to be helped by the Columbus Ronald McDonald House.

This worthwhile effort by the McDonald's Corp., customers' operation MOST: A.O.K. Services, Inc., and many individual contributors well deserves the praise of the House.●

THE 63D ANNIVERSARY OF LATVIAN INDEPENDENCE DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DONNELLY) is recognized for 60 minutes.

● Mr. DONNELLY. Mr. Speaker, the special order on the 63d anniversary of Latvian Independence Day was originally scheduled for last night, however, due to the late session last night, we are holding the special order today.

On November 19, 1918, the people of Latvia proclaimed their independence, just as we Americans observe our own Independence Day on July 4 of each year. Tragically, however, the Latvians have no independence to celebrate now. They lost their precious freedom when the Soviets reconquered the Latvian Nation following World War II. At that time, thousands of Latvians, children, elderly, and infirm among them, were deported to the barren region of Siberia. Since that sorry event, the brave people of Latvia have suffered greatly under Soviet domination.

I feel it is extremely important today to reaffirm long-standing U.S. policy not to recognize the Soviet Union's claim to Latvia and the other Baltic States of Lithuania and Estonia. In addition to reaffirming that policy, we will continue to speak out in outrage at the Soviets' violation of the most basic of human rights. The confines of the Iron Curtain have not been able to silence the voice of freedom in Latvia. We proclaim today that that ugly wall will never succeed in silencing the human spirit, and the desire of all people everywhere to be free.●

● Mr. DOUGHERTY. Mr. Speaker, as cochairman of the Ad Hoc Congressional Committee on the Baltic States and Ukraine, I would like to bring to the attention of the House the plight of those persons who live in the Baltic State of Latvia. Today marks the 63d anniversary of the proclamation of independence by the people of Latvia. The citizens of Latvia have seen their national identities crushed by Communist intervention, and their nation forcibly annexed into the Soviet Union.

In 1940 the Soviet Union invaded the Baltic States of Latvia, Lithuania, and Estonia. This seizure, which was marked by the murder of tens of thousands of innocent people, ended a short 22-year independence for Latvia. The result has been total Soviet domination, except where the spirits of the Latvian people are concerned.

These people are constantly overcoming many untold sufferings, executions, and deportations, as well as the downgrading of social and working conditions. Practicing any religion is severely restricted. The Lutheran Church, which is the predominant

church in Latvia, has been the object of active persecution. These places of worship have been vandalized, closed down, or converted for other uses. All churches and their property have been nationalized. But, above all, the fundamental freedoms guaranteed to the Latvian citizens under their own constitution have been abolished. However, it is important to remember that this period of domination has not dampened the spirit of the Latvians in their search for independence and the restoration of human rights.

Many citizens have managed to flee from the terrors instilled by the Communists in their homeland. They have settled in many parts of the free world and have spoken out on behalf of their fellow countrymen who remain in Latvia.

Today, only older maps of Europe show Latvia as a sovereign entity. Newer maps show Latvia as a territory of the Soviet Union. However, the United States and other Western nations have yet to officially recognize the annexation of Latvia. The people of Latvia have never given up hope that someday they will again be able to raise their national flag in a declaration of freedom from Soviet rule.

It is imperative that the free countries of the world express their opposition to the continued suppression of human rights in Soviet dominated Latvia. It is our duty to speak out on behalf of those who are less fortunate than ourselves. Americans must remember that these people, whose basic human rights have been denied, are continually looking to the United States for guidance and support in their desperate situations. So long as heroic people of Latvia subscribe to the principle of true freedom, the spark of hope will be kept alive.

In closing, I wish to send my prayers to the people of Latvia in the hope that their aspirations for national independence will be realized once again.●

● Ms. FIEDLER. Mr. Speaker, every Independence Day in the United States, we celebrate. Our fireworks, our speeches, our picnics are a cherished part of our life. Today is Latvian Independence Day. There will be, alas, no celebrations in our sister republic on the Baltic, for Latvia remains occupied by a foreign army. Until that great day when freely elected representatives in Latvia can make speeches on "Independence Day," that task must fall to us in the U.S. House of Representatives. To remember Latvia today is to remember the high cost of freedom for all peoples and to pay tribute to the brave and unconquered spirit of the people of Latvia.

The rights of freedom and self-determination are natural to America. Yet we have, throughout our history, continued to enjoy these rights only through defending them. Latvia, throughout its history, has defended its freedom. It has not won every battle, for Latvia's position at the Baltic crossroads of Europe has invited invaders for centuries. But, in the end, the land and the people of Latvia remained, undiminished through adversity. When the occupation of Latvia by the Soviet Union—an occupation unrecognized by the U.S. Government and in flagrant violation of international law—finally comes to an end, her people will prove as equal to the demands of freedom as they are today eager to experience them.

The forces of the Soviet Union are strong and competent. They are experienced in every manner and way of silencing protest, of quelling freedom, that they have conceived since 1917—if only they applied the same drive they use to oppress their people to feeding them—and so the voice of those who cannot speak out must be heard here in the U.S. Congress. This includes the voice of Latvia, of the other Baltic republics, of the Ukrainians, of Soviet Jewry. It also includes the freedom fighters of Afghanistan and the workers of Poland. On Latvian Independence Day, it is indeed fitting to remember all the peoples and nations that stand in solidarity with Latvia, who share their wait for freedom. In all our negotiations with the Soviet Union, we must keep these peoples always foremost in our mind.

Today, Latvian Americans take rightful pride in their homeland's independence day. We join with them in this pride. Their heritage is a proud and colorful one. Their spirit is just as proud and as vital as ever. Whatever the unhappiness that clouds Latvia today, it has not—and will not—eclipse these people, their hopes, and their dreams; especially today, as we celebrate a free and independent Latvia.●

● Mr. STRATTON. Mr. Speaker, as a member of the Ad Hoc Committee on the Baltic States and the Ukraine, I am pleased to join with my colleagues in commemorating the 63d anniversary of Latvian independence. Congress has long shown its understanding of the struggle of the Latvian and other Baltic peoples for freedom, self-government, and release from Soviet domination. The continuing dramas in Poland and Afghanistan also heighten our sense of the plight of nations under Soviet rule.

The history of Latvia is the story of people on a political faultline. Latvia has long been a victim of German and Russian imperialism, yet under adversity the people have maintained a strong sense of culture, tradition—and independence.

Latvian independence came out of the turbulence of World War I. Latvia and the other Baltic States had been used as pawns during the war by both Russia and Germany. However, with the end of World War I and the collapse of Germany, and with Russia in the throes of a civil war, Latvian leaders proclaimed an independent government on November 18, 1918. Following a period of confusion and political struggle, independent Latvia became secure and adopted a government based on democratic principles in early 1922.

Independence and self-government would only last one generation, though, because at the close of World War II, Latvia was invaded by the Red Army as the Soviets reconquered the Baltic lands. Many Latvians managed to flee from their homeland, but thousands more were deported to northern Russia and Siberia. The United States has never recognized Soviet action in the Baltic States as having any legal validity.

Today in the United States we have a strong, vital Latvian-American community, and I am pleased to join with them in marking Latvian Independence Day, November 18, and in supporting individual freedom and self-government in Latvia. In that same spirit, I have introduced in the House, House Concurrent Resolution 36, expressing the sense of Congress that the right of self-determination be returned to the people of Latvia, Lithuania, and Estonia through free elections conducted under the auspices of the United Nations.

Finally, as we watch the events in Poland and the brave resistance now being put up by the Polish labor unions, we can hope that these efforts in time will set a pattern for a new measure of freedom from Soviet control not only for Poland, but for Latvia and other captive nations as well.●

● Mr. ADDABBO. Mr. Speaker, I welcome this opportunity to join my distinguished colleagues in the House of Representatives in commemorating the 63d anniversary of Latvian Independence Day. It is a day of great importance for the people of Latvia, as well as for the people of free nations such as our own United States. To the people of Latvia, it should serve to give them hope that the freedom they once knew will someday return. To the people of our own country this anniversary serves to remind us how terribly fortunate we are to live in a country surrounded by friends to the North and South, surrounded by friends which have long respected our right to determine our own future free from outside interference.

Before I continue however, I would like to thank BRIAN DONNELLY and CHARLES F. DOUGHERTY, two fine Members of Congress who have labored long and hard on behalf of the people of the Ukraine and Baltic States. Their ad hoc committee which is deeply concerned with these two examples of Soviet interference continues to speak the truth of the oppres-

sion and denial of human rights which exists there today.

In our Nation the commemoration of our independence is a time of great joy with various forms of public expression of pride and patriotism. Unfortunately the same cannot be said for this day in Latvia. Since 1944, when the Soviet Union once and for all reconquered the Baltic lands and Latvia, the people of this country have had no freedom to celebrate. They have become another captive nation of the Soviet Union, another example of the total disregard for a nation's right to self-determination.

Mr. Speaker, this Congress and other Congresses of the free world must continue to do all it can to free those nations who have fallen victim to Soviet expansionism. As we acknowledge the plight of the people of Latvia we must remember that to forget one nation held captive, forcing people to be prisoners in their own homeland, is to forget them all.●

● Ms. OAKAR. Mr. Speaker, on November 19, 1981, the people of Latvia proclaimed their independence after many generations under the domination of tsarist Russia. The age-old dream of Latvians to control their national destiny, enjoy their native culture, and to freely develop their arts and literature became a reality. Sadly, Latvian independence was short lived. In 1940, the Red Army marched into the three Baltic States of Latvia, Estonia, and Lithuania and imposed Soviet rule. The infamous Hitler-Stalin pact which divided Europe between two vicious dictatorships, was used as a pretext for snuffing out the freedom of Latvia and her two neighbors.

Harsh and cruel measures were used to wipe out any opposition to Soviet rule. People were forced to accept foreign rule on pain of imprisonment, even death. Despite decades of repression, however, the people of Latvia continue to struggle for their national existence. It is not an easy task. The Soviet Union is committed to a policy of cultural genocide. The Latvians are a small nation. By encouraging non-Latvians to settle in Latvia, the Soviets have diluted the native population to the point where Latvians are approaching a minority in their own country. In this way, the Kremlin hopes to wipe out the national consciousness of the people, especially the young. This process of denationalization is furthered through a policy of forced Russification in the schools, government offices and all the media. Those who actively oppose the Soviet policy are subjected to harrassment, arrest and imprisonment.

Recent signs indicate that the people of Latvia—especially the young—are responding to the threat of national extinction by reaffirming their national identity and rejecting Russification. The spirit of the nation is growing stronger. Americans can help by holding firm to the policy of nonrecognition of the illegal occupation of the three Baltic States by the Soviets after World War II and by speaking out against the violation of human and national rights in all the countries of the Soviet Union. We must also encourage as many contacts as possible between the peoples of Latvia and the outside world, to break the Kremlin-imposed isolation of the population.

We can also pause to commemorate important anniversaries as we are doing today. Sixty-three years ago, the people of Latvia affirmed their right to national independence. Today, the Congress of the United States joins Americans of Latvian descent and their many friends in reaffirming the right of Latvia to national sovereignty and independence. In this way we also reaffirm the spirit of the Latvian nation and express our belief that the spirit of Latvia will again burst forth in a free and independent country.●

● Mr. DENARDIS. Mr. Speaker, 63 years ago today the people of Latvia proudly announced to the world their existence as a free and independent nation. In doing so they exercised one of the most basic of human rights, the right to an identity as a people. Their freedom, however, lasted barely over two decades.

What happened to them is the history of all non-Russian states within the U.S.S.R., a history of brutal expansionism and tyranical oppression. In 1940, the Soviet Union forcibly and unlawfully incorporated Latvia within its domain and set out systematically to destroy the country's national, cultural, linguistic, and religious integrity. To accomplish this, they practiced every tactic of terrorism: Imprisonment, exile, torture, and murder. It is out of outrage for this barbarous injustice that the United States, along with other great Western powers, steadfastly maintains a policy of nonrecognition of the forcible annexation of Latvia.

A national independence day is supposed to be a time of celebration. So what do we have to celebrate? Latvia is still a captive nation. The Baltic freedom fighters, who for years waged guerrilla warfare in the face of impossible odds, have finally been crushed. All dissident activities have been driven underground. And the people of Latvia are daily denied the elemental rights of human beings. So what do we have to celebrate?

We have the fact that despite unrelenting oppression, the Latvians' fierce love of liberty and commitment to national identity has not diminished by one jot. Their experience should remind us how privileged we are to live in the free world and should spur us to help people everywhere who are struggling against persecution. I am honored, therefore, to join with Latvians around the world in celebrating their independence day; and I join them too in working and praying for the day when Latvia will once again be free in fact as well as in spirit.

● Mr. BONKER. Mr. Speaker, I wish to commend my distinguished colleague, Representative DONNELLY, for sponsoring this special order to mark the anniversary of Latvia's independence.

The brave people of Latvia, one of the oldest unified territories in Europe, have suffered tremendously under the harsh domination of the Soviet Union. The Soviets have attempted to destroy Latvia's rich cultural and religious heritage, but they have not succeeded in killing the strong spirit of the Latvian people or their thirst for freedom. We have many descendants of Latvia in the United States who know that Soviet propaganda proclaiming the friendship between their two countries masks a much grimmer reality. I commend the Latvians for their courage, strength, and determination.

As Chairman of the only House subcommittee that oversees human rights, I gladly join with my distinguished colleagues in commemoration of Latvian Independence Day. The Latvian people have not been forgotten: "Lai Dievs Sveti Latvia!" ●

● Mr. HUGHES. Mr. Speaker, today marks a day of celebration and sadness in Baltic history. It is a day to celebrate because it marks the 63d anniversary of the 1918 declaration of Latvian independence. It is a day to be sad because that independence was troubled and short-lived, unable to overcome the expanding forces of totalitarianism which surrounded and consumed it during the Second World War.

After a long history of German domination and a period of Soviet control, Latvia was able to assert its independence on November 18, 1918. On that historic day, leaders of the nascent nation proclaimed an independent Latvian Government in Riga, a republic to be ruled by representatives of popular will. German and Russian machinations imposed an initial obstacle, but by 1922, the Latvian Constituent Assembly had adopted a constitution for a parliamentary republic. Yet, this happy form of representative statehood was cut short, its fate sealed by global economic depression and the unceasing ambitions of its larger neighbors.

Today, Latvians live under the domination of the Soviet Union. The Soviet Union has successfully colonized this nation and incorporated it into the complex structure of the modern Soviet state. But we in the United States do not and will not recognize the legitimacy of this domination. In-

stead, we gather as we have today to pay tribute to the glorious day of independence which highlights Latvia's history and the sustaining spirit of independence which provides hope for Latvia's future.●

● Mr. MOAKLEY. Mr. Speaker. I rise today to commemorate the 63d anniversary of Latvian Independence Day on November 19, 1981. On this date in 1918, these brave people joyously celebrated what they believed would be the end of many years of repression and manipulation by the powerful surrounding countries. Tragically, as you all too well know, the Latvians' few years of national freedom and sovereignty were abruptly ended in the early stages of World War II by the Soviet Union's occupation and takeover of the Baltic States. Tens of thousands of Latvians lost their lives and homes during this cruel and unjust purge by the Soviets. And, the deepest loss of all was that of the freedom that the Latvian nation has come to cherish.

We, in the United States, take for granted every day, our right to live in freedom and independence. Our Nation was founded on these premises. We must not forget this privilege that we have and we must not forget those nations that continue to be surpressed by others. We have an obligation not only to condemn the denial of these fundamental liberties to the people of Latvia, but to do all we can to support this nation in their struggle to regain and preserve this most precious of all rights. I join with my collegues in commemorating this important date and also in our commitment to the people of Latvia and our wish for their return to freedom.●

● Mr. ANNUNZIO. Mr. Speaker, on November 18, 1918, the courageous people of Latvia received their independence and with it the long-sought privilege of determining their own fate as a people and of developing and enriching their own social and cultural institutions in accord with their distinguished traditions and national will without the interference of foreign powers.

On Sunday, November 15, a commemorative program in observance of the 63d anniversary of Latvian independence day was held at the Wright Junior College Auditorium, 3400 North Austin Avenue, by the United Latvian Associations of Chicago, the able president of which is Ilmars Bergmanis. Other officers include Alex Osis and Alex Kandrovics, vice presidents; John Veitmanis, secretary; and Arvids Barda, Lucy Osolins, Inara Bundza, committee members.

The Latvian republic which rose from the ashes of World War I had every hope of and chance of success. Latvia had educated, devoted leaders, a sense of national purpose, a victorious army, fertile lands, and hardy farmers. The Latvians proved their devotion to democracy by establishing an advanced form of representative government, with a parliament, cabinet, president, and freely organized parties. From their declaration of independence of November 18, 1918, to the reoccupation in 1940 by Communist armies, the Latvians opened the way to economic, social, and political progress.

Latvia was one of the first European countries to reform the currency and financial system. The land reform law of 1920 was a model of fair, democratic dispersal of feudal estates. Happily, it ended forever the supremacy of German—or Balt—nobles over the other 97 percent of the population.

By 1937, there were 5,717 industrial enterprises in Latvia. Seventy thousand farmers were enrolled in 2,300 educational societies. Hydroelectric stations were numerous. The national income increased 120 percent between 1927 and 1938 despite the depression. The Latvian National Bank's assets rose from 48.2 million lats, the local currency, in 1934, to 125.6 million lats in 1939.

Latvian foreign policy was founded on friendly relations with Soviet Russia as well as the West, and trust in the League of Nations. Ninety-five percent of Latvian trade with the West, especially Great Britain, Germany, and the United States, was carried in 103 Latvian ships. By 1939, Latvia was almost self-supporting.

In June 1940, Latvia, along with Estonia and Lithuania, was invaded, brutally occupied by the Red Army, and subsequently incorporated into the Soviet Union. The Communists cynically disregarded their earlier treaty commitments in which they "voluntarily and forever" had renounced all sovereign rights over the people and territory of Latvia.

We in the U.S. Congress can do no less than reassure the Latvian people of our moral support. May the ideals of freedom and democracy be vindicated by the gallant determination of the people of Latvia. Their sacrifices should remind us all that we must continue to strive for a world in which all people can have the opportunity to live their lives as they themselves choose.

Mr. Speaker, the Legation of Latvia recently forwarded to me the Latvian Information Bulletin, and an article from that publication follows:

FLOWER POWER IN LATVIA

So far there has been no sign that the Soviet Union might be infected by a trade-union revolution on the Polish model. But the Kremlin has reason to be a little nervous about the growing tensions in the three Baltic states that were annexed by the Russians 40 years ago. Lithuania is the only one of the 15 Soviet-occupied republics which is predominantly Catholic, and the church—as in Poland—is a source of national unity. In its capital, Vilnius, there is an active group of dissidents and an underground weekly newspaper. In Estonia, there have been a series of demonstrations against the Russification of the republic; and its capital, Tallinn, is the only major Soviet city where people can watch news from the west (on Finnish television). The daily ferry service brings large numbers of Finnish tourists to the city, so that its inhabitants have a better idea than most Soviet citizens about the realities of life in the west.

Latvia, the most productive of the Baltic states, has in the past been more quiescent than its two neighbours. But now there is a growing wave of irritation about the shortage of food. Food shortages are familiar enough in much of the Soviet Union, but Latvia has traditionally been one of the most prosperous places in the whole country. It produces most of the Soviet Union's consumer durables as well as a large share of its motorcycles and locomotives. Riga is the biggest port in the country and is also a centre for Soviet women's fashions. Latvia's living standards used to be the envy of the Soviet Union. Many Russians still regard Latvia as a paradise, but the Latvians do not.

Latvia's food shops are now as empty as those elsewhere. Long before opening time, queues form in front of the milk and meat shops in Riga's Kirov street. Instead of going to work, many people simply go shopping. It is quite common to wait for three hours in a queue for food. Western goods are available, but at a high price. The complete collection of the Beatles' records costs about $6,000.

To meet the unprecedented shortage of food in Latvia, the authorities are now trying to encourage farming on private plots, which already produce 30 percent of the food for the republic. Until recently, the size of private farming plots was limited to half an acre. Outside Riga there are now clusters of small shacks: city-dwellers' private plots. And to help their development the government is encouraging the use of a revolutionary new technology—horsepower. The only problem is that the freelance farmers' favourite crop is not potatoes, as the authorities may have hoped, but flowers. Flowers are extremely important in Latvian life: men and women both like to bring bouquets home after work. Tulips and roses sell for as much as $3.00 a stem—which makes them a profitable crop.

The Latvians reckon that they are getting a worse economic deal than their neighbours in Lithuania and Estonia, because too much of the state farm output is exported to the rest of the Soviet Union. In Lithuania, the food that is grown there is eaten by the locals. At weekends many Latvians make the two-hour drive south, to the town of Siauliai in Lithuania, to stock up on sausages.

Nationalism in Latvia has been reviving—partly because the Latvians are in danger of becoming a national minority in their own country. The success of Latvia's industrial development has attracted immigrants from the rest of the Soviet Union, so that some 45 percent of its population is now non-Latvian. Riga is full of Armenians, Georgians, Uzbeks and Russians, and the predominant language is Russian.

The protests against Russification have been sporadic and poorly organised, mainly by young people. For the young, the pejorative phrase "bourgeois Latvia"—used in the history books to describe the period of independence between 1918 and 1940—conjures up a rich and romantic past. Many youths

can be seen walking down the street wearing tee-shirts emblazoned in English with the slogan "Latvian power"; and they like to sing the old national anthem. Their most overt form of rebellion has been to desecrate Soviet monuments and rough up Russians at random. These protests have been fuelled by opposition to the war in Afghanistan; rumours of atrocities in Afghanistan are commonplace in Riga.

Communist party officials in Latvia are aware of the mounting anti-Russian tension but have no clear idea of how to counteract it, except by stressing the concept of "Soviet brotherhood." However, at a recent meeting of the central committee of the Latvian Communist party, one member took the unusual step of criticising another official for making speeches in Russian instead of Latvian. A hint of things to come?—From a correspondent recently in Latvia, The Economist, August 29, 1981.

Mr. Speaker, as an ethnic myself, I have always been aware of the cultural richness of the various ethnic groups in our city, and the creativity and dynamism they contribute to Chicago and the Nation. For this reason, events such as the Latvian Independence Day observance are very important, not only because they help preserve ethnic identity and culture, but also because they remind us all, as Americans, of our heritage of freedom.

I am pleased, therefore, on this occasion to extend my greetings and best wishes to the Americans of Latvian descent in the city of Chicago and all over our country who are participating in the 63d anniversary commemoration of Latvian independence.●

● Mr. DERWINSKI. Mr. Speaker, I am pleased to join with my colleagues in directing attention to the 63d anniversary of the proclamation of independence of the smallest Baltic State. On November 19, 1918, the courageous people of Latvia established an independent nation, free from Russian rule.

Latvia, a nation situated on the eastern side of the Baltic Sea, was privileged to enjoy only a brief period of national independence between the world wars. In 1920, the Soviet Union signed a treaty which recognized Latvia as a sovereign nation forever, but only 20 years later, in 1940, Stalin cynically broke this agreement. The Red army marched into Latvia and began a brutal occupation of the country, accompanied by forced deportations of Latvians to Siberia and other remote parts of the Soviet empire. In addition, there were jailings and executions of Latvian patriots, cultural and government leaders, and other non-Communists.

Latvia continues to be governed from Moscow, not from Riga, the country's capital. Freedom of expression in religion, literature, and art is suppressed, and the Russians steadily continue their efforts to destroy the Latvian people as a nation and as a cultural entity. As is common in Soviet-dominated nations, the people of Latvia are bound by Soviet control, and above all the fundamental freedoms enjoyed by its citizens under their own constitution have been abolished.

Although those who live in Latvia cannot join with us in observing this event, it is important for us to keep alive the historic nature of this occasion. It is especially important to remember that the Soviet Union continues to suppress the nationalistic spirit of non-Russian republics within the U.S.S.R. In its deliberate policy to eliminate independence of the various Soviet Republics, the Soviet Union is attempting to lessen their nationalistic unity.

These long years of suffering by the Latvian people have not extinguished their yearning for liberty and self-expression of their culture, religion, and basic human rights. So while this anniversary is a day of sorrow, let it also be a day for us to rededicate ourselves to work for the time when Latvians and all other peoples held captive will share the full blessings of freedom.●

● Mr. CARNEY. Mr. Speaker, today, November 18, commemorates the 63d anniversary of Latvian Independence Day. To Latvians all over the world, this is a very solemn commemoration. In 1918, along with the people of neighboring Estonia and Lithuania, the Latvians were able to break free from the oppressive yoke of Soviet-Russian domination. Independence was short lived; it only lasted until the beginning of World War II when Soviet and Nazi leaders conspired to return the Baltic States to domination. However, the experience of this freedom lives in the hearts of all Latvians forever. The brief and productive period of independence fanned the flickering hopes of freedom into an everlasting flame.

Since World War II, the people of Latvia have suffered the many horrors and indignities which accompany any way of life in the Soviet Union. Latvia has had its free leaders periodically purged, its economy ravished, its churches closed and its people enslaved. Yet, its spirit of freedom lives. And throughout the free world, the Latvians continually remind us of the privilege of liberty and our duties to preserve it.

Mr. Speaker, it is entirely appropriate for us to remember this day. As the strongest voice of freedom, America must stand up for the values of self-determination and individual liberty. America must favor what is right over what is merely pragmatic. And America must support the struggle for freedom over totalitarianism wherever this struggle happens in the world. It is in this spirit that we remember Latvian Independence today and pay tribute to the living dream it symbolizes.●

● Mr. BLANCHARD. Mr. Speaker, I would like to take this opportunity to join in the special order taken by my distinguished colleague from Massachusetts (Mr. DONNELLY) on the occasion of Latvian Independence Day.

I am a member of the Ad Hoc Congressional Committee on the Baltic States and the Ukraine, and as such continue to be horrified by the ongoing state of oppression under which the Latvian people, and the peoples of Estonia, Lithuania, and the Ukraine continue to live. The short-lived freedom enjoyed by the Lithuanian people after World War I will live on as a cherished memory for not only Lithuanians but for freedom-loving people and human rights advocates the world over.

Those of us in the free world who enjoy human rights are the natural allies of the Latvian people. The Latvians and others under Soviet domination in their homelands represent some of the strongest advocates of the human rights and personal freedoms that we in America and the free world hold so dear. I hope that all of my colleagues will join with me, on this anniversary of Latvian Independence Day, to lend their fullest support for the cause of freedom, and for human rights to come to all men, women, and children of the world.●

● Ms. FERRARO. Mr. Speaker, the date November 19, 1918, commemorates a crucial and emotional day in Latvian history. After years of subjection to its powerful neighbors, Latvia had finally become a free and independent nation. However, this freedom and independence that the Latvian people had for so long sought to achieve, was quickly revoked by the Soviets' takeover of Latvia after World War II. Ever since then, Latvians have known only exile, persecution, and forced labor, rather than freedom or independence.

Today Latvians still seek the independence that their forefathers in 1918 had once attained. As Americans, we have been fortunate enough to still have the independence and freedoms that our forefathers had attained for us in 1776. It is my hope that in cherishing these freedoms, my colleagues will join me in supporting Latvia's fight for independence from the Soviet Union and do all they can to halt the unjust treatment and russification of Latvian citizens under the Soviets' illegal rule.

In commemoration of Latvian Independence Day, we must all support the efforts of the Latvian people to reachieve their independence. The Latvian people have suffered under Soviet domination for too long and do not deserve to be forgotten.●

● Mr. PEYSER. Mr. Speaker, on November 19, 1918, the Latvians proclaimed the Republic of Latvia a free and independent nation. On this, the 63d anniversary of their independence

proclamation, let us remember with respect and admiration these courageous people who proclaimed to the world their right as a nation to stand proudly among free countries.

Let us also remember, Mr. Speaker, that Latvia enjoyed this independence for only 22 short years. In 1940, the Soviet Union invaded and occupied Latvia, Lithuania, and Estonia and forcibly annexed these Baltic States into the Soviet Union. These courageous people were murdered by the tens of thousands or were sent to forced labor camps during this same period. Even today, as is common under Soviet domination, the people of Latvia are under total control.

On this anniversary of Latvian independence, let us take this opportunity to renew our full and uncompromising support for the basic concept of the sovereign rights of a people to choose their own form of government. For it is this quality which has underscored the history of the American Republic.

On this Latvian Independence Day, I am honored to join with the Americans of Latvian descent of New York's 23d District as well as the entire Nation in striving to keep this spirit of freedom alive for the Latvians and people around the globe.●

● Mr. ZABLOCKI. Mr. Speaker, I am pleased to join with the Ad Hoc Committee on the Baltic States and the Ukraine in commemorating Latvian Independence Day.

For a brief period after World War I, Latvia enjoyed its independence and sought to improve the well-being of its people through its own efforts. However, in June 1940, Latvia was ruthlessly invaded and occupied by the Soviet Union in a futile effort by Moscow to prevent a German invasion. In August of that year, brave Latvia disappeared from the ranks of independent nations and was forcibly annexed as a Soviet republic.

Anniversaries like this one give us much to remember about Soviet methods in dealing with its neighbors and with other nations. In contrast to the independence that took root in Latvia on November 19, 1918, the period since June 1940 has seen mass deportations, Russian colonization, suppression of Latvian art, literature, and music, an education system which makes Communist Party membership a prerequisite for eventual success, and calculated harassment of the Latvian Lutheran Church.

Despite their brutal efforts, the Soviet Union has failed to extinguish the national spirit of Latvia. Nationalism continues to have deep roots among all generations. Notwithstanding the imposition of an inefficient economic system from Moscow, Latvian living standards exceed those of the Russian people to the continued embarassment of the Soviet leadership.

The gentleman from Massachusetts (Mr. DONNELLY) and the gentleman from Pennsylvania (Mr. DOUGHERTY) are to be commended for arranging this special order. It will hopefully contribute to the spirit of Latvian nationalism and self-respect, still evident in that country today.●

GENERAL LEAVE

Mr. SHAMANSKY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from Massachusetts (Mr. DONNELLY).

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Ohio?

There was no objection.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

● Mr. NELSON. Mr. Speaker, I was absent due to offical business on rollcall 324, to convene the House in the Committee of the Whole for consideration of H.R. 3663, the Bus Regulatory Reform Act. Had I been present I would have voted "yes" on this motion.●

FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Michigan. Mr. Speaker, last week, in remarks in the RECORD, I pointed out how the Director of the Office of Personnel Management, Dr. Donald J. Devine, was blaming his staff, the Congress, the courts, and the Carter administration for problems in the Federal employees health benefits program (FEHBP), when in fact, it is he who has caused them. Well, he is at it again.

In a statement released Wednesday, the Director is again trying to blame everyone else. This most recent statement was precipitated by a court order requiring the Director to rescind his decision to indefinitely postpone open season. This is at least the fourth time a court has ruled that the Director's actions with regard to FEHBP were improper or illegal. I do not believe he has yet had a court sustain any position he has taken which has been challenged. And it is not just the courts who are critical of his actions. In 2 days of hearings, our Subcommittee on Compensation and Employee Benefits has yet to hear from anyone who tried to defend the Director's actions. He should get the message.

But the truly disturbing aspect of the Director's most recent statement is that he is trying to exonerate himself and justify his actions by, in effect, threatening that Federal retirees' health benefits claims will not be paid after June of next year. Here is what he said:

> As the joint result of the court's orders to hold an open season, and to push benefits above the level that available funds will pay for, OPM will not be able to pay premiums for retirees to health plans after June, 1982. the plans, in turn, will be unable to pay claims. There is simply no plan if there are no funds to pay for it.

I am sure this reckless statement will unnecessarily frighten thousands of retirees. If the funds do run out because Director Devine has failed to request sufficient amounts during this year's appropriation process, I am confident the Congress will provide a supplemental appropriation sufficient to continue the program. This is not unusual, particularly under Republican administrations. In 1975 and 1976 the Ford administration requested, and the Congress provided, just such supplemental funds. Ironically, the Carter administration, which Director Devine criticizes for its administration of FEHBP, never had to request supplemental appropriations for the program. It always requested and received sufficient funds for the Government to pay its share of health insurance premiums for our retirees.

Instead of frightening our retirees, the Director should be assuring them that he will do whatever is necessary to insure their continued health insurance coverage. I say to those retirees; do not think the Director's most recent comments reflect your Government's attitude. Even an administration as intent as this one with taking away needed benefits from deserving individuals will not default on its legal obligation to pay its share of insurance premiums for those of you on fixed incomes, Director Devine's comments to the contrary notwithstanding.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI) is recognized for 5 minutes.

Mr. MAZZOLI. Mr. Speaker, I was unavoidably absent for certain votes on Wednesday, November 18, 1981.

Had I been present, I would have voted:

"Yea" on rollcall No. 311, the conference report on H.R. 3453, the intelligence authorization bill for fiscal year 1982;

"Yea" on rollcall No. 312, the conference report on H.R. 4522, the District of Columbia appropriations bill for fiscal year 1982;

"Yea" on rollcall No. 313, on the motion that the House recede and concur with Senate amendment No. 42 to the District of Columbia appropriations bill relating to the salary level for the city administrator of the District; and

"Yea" on rollcall No. 314, House Resolution 275, the rule waiving certain points of order against H.R. 4995, the Department of Defense fiscal year 1982 appropriations bill.●

THE PURSUIT OF PEACE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, President Reagan's peace initiatives have been welcomed with enthusiasm by Members of the Congress, the country, and the leaders of our allied nations in Europe. I congratulate the President on the effort to once again chart a course of peace for this Nation and the world. I think it is important that we bear in mind that the President's proposals represent only a first step. Real progress in this area will necessitate a commitment to the negotiating process, and a willingness to engage in meaningful discussions with the Soviet Union.

We have all witnessed the consequences of a policy which ignores the option of negotiations and focuses solely on the race for arms development. Neither the Soviet Union or the United States can win that race. In recent months the image of our Nation developing abroad and exploited by our enemies is that of a country which poses the greatest danger to world peace. This has been particularly the case with growing concerns in Europe over the deployment of U.S. missiles in Britain, Germany, and elsewhere. In addition, it is a hard cold economic fact that our Nation simply cannot afford to sustain an uncontrolled arms race. With deficits over the next 3 years expected to total about $360 billion, there is no way the United States can put a trillion dollars of its GNP into weapon systems. Thus from a diplomatic and an economic point of view, the President was absolutely right to regain the initiative in pursuing arms reductions.

It is interesting to note that with very little delay the Soviet news agency TASS issued a stinging response to the President's initiatives which flatly rejected his offers. Perhaps we could have expected no more, but this should serve as a reminder that success in peace, as in war, is rarely accomplished overnight. It is an ongoing process which will require give and take by each side. It is essential that we begin that process now.

The President's speech marks a new beginning in reaffirming a U.S. commitment to peace in the minds of our allies and those who are watching around the globe. We cannot forget that the critical issue before us remains preventing the grim prospect of nuclear conflict. This peril—which is a threat to us all regardless of nationality—will continue to be with us as long as enormously destructive nuclear weapons are produced and deployed. All world leaders profess a commitment to peace and an abhorrence of nuclear conflict, and given the stakes involved, there is simply no alternative but to negotiate our differences and reduce the risk of nuclear confrontation.

The Soviets have rejected President Reagan's call for a dismantling of Russian missiles in exchange for our foregoing deployment of new generation Pershing and cruise missiles. This ought not to be taken as a sign of the futility of seeking agreement, but rather as an indication of the energy and effort which must be expended in the endeavor to secure real arms reductions.

I sincerely hope that the President is prepared to go forward along the path on which he has set out, as long and as arduous a course as that may be. He should know that he has the support of the Congress and the Nation in that effort.●

REAGAN APPOINTMENTS—RETREAT ON RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CROCKETT) is recognized for 10 minutes.

● Mr. CROCKETT. Mr. Speaker, during the past 10 months, while this Congress has been considering the radical Reagan budget and tax cuts, and while many of us have been engaged in guerrilla warfare to salvage the programs targeted for destruction by the corporate Republican oligarchy, another, equally pernicious, wrecking operation is being carried out by the Reagan administration.

Mr. Reagan, true to his campaign pledges, has sought to reshape the executive branch in the image of corporate supremacy and racist ideology. He has gutted the agencies, departments, and other executive bodies charged with the protection of basic constitutional rights. He has dismantled antipoverty agencies and minority protection programs, enacted by Congress over decades of painstaking effort. In place of these protections, he has installed corporate flunkies to cater to wealthy campaign supporters in their quest to "get Government off their backs." Instead of those who would carry out congressional intent in administering these programs, Mr. Reagan wants only "yes-men" who will follow orders and destroy the programs in their care.

This should surprise no one; although it does sadden those of us who now are witnessing a half century of Government commitments to individual rights being systematically swept under the Presidential rug.

The one hopeful sign is that the black media and the mass of blacks and other minorities see clearly now that Mr. Reagan has exceeded even his own campaign rhetoric when it comes to dismantling Federal civil rights protections.

This administration seeks to destroy or severely cripple the Legal Services Corporation, the Equal Employment Opportunities Commission, and the Civil Rights Commission; and all agencies created to safeguard the constitutional rights of all American citizens. Mr. Reagan also seeks to water down the Voting Rights Act, the keystone of minority participation in Government. Through the Attorney General, Mr. Reagan is retreating from the Government's commitment to affirmative action and school desegregation litigation. The Republican Senate has sought to eliminate all funding for individual programs within the Justice Department where civil rights are protected.

When he found considerable resistance to his efforts to totally dismantle the Federal civil rights apparatus, Mr. Reagan set out to destroy these agencies from within—by appointing unknown, unqualified, and inexperienced persons, with known biases against the mission of the agency, to hold positions of policymaking and control.

The pattern is unmistakable. A few of the most noticeable examples include:

Clay Smith, Acting Chairman of the Equal Employment Opportunities Commission, with qualifications and experience to run the EEOC, is being dumped for William Bell, an inexperienced Republican with virtually no background in law or civil rights.

Arthur Flemming, a former Cabinet member and Chairman of the Civil Rights Commission for the past several years, is being thrown out and replaced by Clarence Pendleton, a friend of the White House counsel, Ed Meese. Mr. Reagan is completing his "politicization" of the Civil Rights Commission by naming a former Republican National Committee chairman, Mary Louise Smith, as Vice Chairman.

As head of the Legal Services Corporation, Mr. Reagan has appointed a lawyer who has spent his career fighting against the Corporation, while it sought full legal assistance for the poor.

As Assistant Secretary of State for Human Rights, Mr. Reagan nominated Ernest Lefevre, whose opposition to human rights initiatives and questionable ties to international corporate ac-

tivities finally forced him to remove his name from nomination.

Mr. Speaker, it is clear that these examples are just the tip of the iceberg, and that, as William Raspberry stated so eloquently in yesterday's Washington Post, "Reagan is insensitive to the serious concerns of black America—either as President or as head of his party."

I would like to include in the RECORD at this point the full text of Mr. Raspberry's column, "A Double Disaster for EEOC," and commend to my colleagues its concise analysis of the state of the Reagan rights retreat.

The Reagan administration's efforts to turn back the clock on human rights and to self-destruct the Federal civil rights efforts are a pervasive, malignant attack on the basic rights of all Americans. It will be a frightening commentary on the vulnerability of those rights if we allow his destruction of the enforcement structure to continue. The article follows:

A DOUBLE DISASTER FOR EEOC

(By William Raspberry)

There may be something about J. Clay Smith that makes him unfit to head the Equal Employment Opportunity Commission, though I can't figure out just what it is.

There may be something about William M. Bell that qualifies him for that post. I can't figure out that one either.

Whatever their pluses and minuses, what is happening to the two men amounts to a double disaster.

Bell has gotten most of the press of late—nearly all of it negative, based on his near-total absence of qualifications for the job. He has never supervised more than four persons, hardly ideal experience for a man who has been nominated by the president to head an agency with some 3,300 employees.

The Detroit Republican describes himself as a financial consultant and executive recruiter, although his own financial statement indicates an income of $7,000 a year, and the total of the executives he has recruited equals zero.

Smith is a hard-working black Republican who was appointed to the EEOC in 1977. He has been acting chairman since March. In the normal course of things, he would have seemed a natural for a White House appointment to a full term as chairman. Instead, he has been languishing on the job for most of the year, doing what he can to hold the commission together, but under far-from-ideal circumstances. For instance, there are only two active members of what should be a five-member commission, which means that there is no quorum for policy decisions.

It's hard to know which is more dismaying: that Smith wasn't nominated or that Bell was. Both men deserve better.

Smith, a native of Omaha, has been an achiever most of his life: the first black youth to be elected governor of Boys' State, a military judge, first black president of the Federal Bar Association. And since he is a Republican, one might have thought him just the sort of person President Reagan would want to tap. Indeed, Reagan did name him acting chairman of the EEOC after Eleanor Holmes Norton stepped down.

Perhaps the fact that he was a Carter appointee is an insuperable barrier to his nomination for a full term as chairman. Or maybe the problem is that Smith disagrees with the administration's stand against affirmative action, or that he has fought (successfully) the OMB proposal to slash the EEOC budget. In any case, his treatment suggests either an absence of interest or a lack of skill on the part of the Reagan administration in enticing blacks into the Republican Party.

So does the nomination of Bell, whose major qualification is that he ran against incumbent Democrat John Conyers for Congress. He got 5 percent of the vote.

Bell says he would be good for the job because he knows discrimination firsthand. Although he had earned a master's degree in business, he told The Wall Street Journal he spent a year looking for a management job before he finally went to work as a $75-a-week bank teller.

But the fact that a man once nearly drowned is hardly sufficient credential for making him chief lifeguard—particularly when the evidence is that he never did learn to swim very well.

Anyone who has been a victim of racial discrimination will find it easy enough to be sympathetic to Bell. But there is very little in his record to support his nomination as the second highest-ranking black (behind HUD Secretary Samuel Pierce) in the Reagan administration.

Ironically, Bell is on record as sharing the administration's opposition to special employment consideration for minorities because they are minorities. But in nominating him, the administration is practicing preference of the most egregious sort. If Bell were white, it is inconceivable that he would have been nominated for any important management post.

That the nomination was made suggests either that Reagan doesn't take the EEOC's mission seriously or else that he thinks blacks will looks at Bell's skin and conclude that Reagan is interested in black advancement.

The more likely conclusion is that Reagan is insensitive to the serious concerns of black America—either as president or as head of his party. His handling of the EEOC chairmanship has at once degraded the agency to which blacks look to enforce fair employment and tainted the reputation of two decent men.

LEGISLATION STREAMLINING INVESTIGATION OF PARENTAL KIDNAPING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. HUGHES) is recognized for 5 minutes.

● Mr. HUGHES. Mr. Speaker, yesterday I introduced a bill to streamline the investigation of parental kidnaping cases by the Federal Bureau of Investigation provided for by the Parental Kidnaping Prevention Act of 1980. Last year Congress directed the Department of Justice to use the provisions of the Federal Fugitive Felon Act to assist the States in enforcing State parental kidnaping laws. This bill eliminates regulations adopted by the Department of Justice that have frustrated the implementation of the 1980 law.

In September the Subcommittee on Crime held a day of hearings that revealed that the Department of Justice had essentially ignored the Parental Kidnaping Prevention Act. The Department is requiring that parents who had no idea of the location of their kidnaped children offer evidence of the children's current condition. The Department is requiring the headquarters approval of every parental kidnaping investigation even though it does not require similar approval for much more significant Federal crimes.

The administratively created requirements of the Department of Justice have no authority in law and must be nullified.

The bill also makes a change in the reporting requirements of the act of last year that will enable us to more accurately determine where the problem of parental kidnaping appears to be greatest and how extensive the burden is upon the Department of Justice.

The Congress made a commitment to the tens of thousands of parents and children who are the victims of this crime that there will be Federal help. This bill forces the administration to follow through on that commitment.●

NATIONAL ECONOMIC POLICY AND ITS EFFECT ON LOCAL GOVERNMENT

(Mr. OBEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. OBEY. Mr. Speaker, Business Week has published an excellent special report on the affect that the administration's economic program may have on the ability of State and local governments to produce a local environment that is conducive to economic strength and growth. It indicates quite clearly the dangers to the future economic strength of the country inherent in any plan that does not give sufficient attention to investment needs in human capital or the physical plant and equipment necessary to make local communities work. The articles follow:

[From Business Week, Oct. 26, 1981]

BUSINESS WEEK SPECIAL REPORT: STATE AND LOCAL GOVERNMENT IN TROUBLE

How well will the Reagan economic revolution work? Most attempts to answer that question so far have focused on the overall U.S. economy and on the financial markets. But the true test of Reaganomics will come at the state and local level. The President is shifting more of the burden of government away from Washington at at time when the local infrastructure is decaying, when the ability of states and cities to borrow is withering, and when state and local revenues are shrinking. The problems are so severe as to constitute a crisis for state and local government. In the pages that follow, the editors of Business Week document the extent of the crisis and examine its implications for

economic growth and for the growing rivalry between regions, as well as its probable political and social impact.

THE DECAY THAT THREATENS ECONOMIC GROWTH

While high interest rates have led in recent weeks to doubts over the prospects for President Reagan's economic program, Americans at large still seem to be committed to its central premise—that a revolutionary curtailment of the government's role in the economy should release resources to the private sector and create a new era of noninflationary growth. Vast tax and spending cuts have been passed that are intended as enabling legislation for unleashing the private sector. But in its zeal to put the U.S. back on a fast-growth track, the Reagan Administration may unwittingly have created a barrier to the success of its program.

Falling revenues are now combining with an inability to borrow in a way that is making it extremely difficult for Washington's great partner in the federal system, state and local government to fill its traditional role of producing the basic government infrastructure for growth—such elementary things as bridges, roads, sewage, water, and mass transit. So serious is the decay of the nation's infrastructure and so poor the prospects for its refurbishment that many sophisticated businessmen and economists believe the U.S. is entering a period of severe crisis for state and local government.

The nation's physical infrastructure is only part of the state and local authorities' problem. Compounding the crisis are cuts in federal funding in the no less important area of human capital—job training, vocational education, and health care. Letting such public services decline could have high costs not only in social and political terms but also in terms of the operating environment for business.

ACCEPTANCE OF DECAY

To a nation that has already experienced the virtual bankruptcy of New York City in 1975, the forced reorganization of Cleveland's finances in 1978, and the recurring difficulties of many cities and states, including Michigan and Missouri, in meeting their payrolls, the idea that local governments are once again in dire straits may seem like nothing to get alarmed about. Indeed, as the passage of Proposition 13 in California and similar tax-spending-limitation moves in 18 other states has shown, the American public is sick and tired of paying high local taxes, even if tax relief means accepting a reduction in services and living with potholes in the streets, bridges that are on the verge of collapse, and an interstate highway system that is about 95% complete but already needs $26 billion in repairs.

But the current crisis is far more severe than in the past. For a series of forces is now at work that calls into question the ability of local governments throughout the nation—not only in the traditionally depressed Northeast and Midwest but even in the fast-growing Sunbelt—to provide the infrastructure needed for economic growth. These forces are:

Massive cuts in federal aid to state and local governments—After growing almost fourfold in the 1970's federal grants-in-aid will be drastically reduced, falling from $88 billion in 1980 to $78.6 billion in 1983 (chart). [Chart not printed in RECORD.]

A reduced state and local tax base—With the cut in federal taxes—especially for business—some 30 states that tie their taxes to federal taxes will face declining revenues.

Record-breaking interest rates—The rates that states and cities have had to pay for money have almost doubled since 1977. The average municipality now has to pay 85% of what the U.S. Treasury has to pay for long-term money; only two years ago it was 70%. So prohibitive have borrowing costs become that even such financially sound states as California have recently suspended new bond offerings.

A reduction in the attractiveness of state and local bonds—To spur private saving and investment, the Reagan Administration has lightened the tax load, particularly in the upper brackets, and has provided special tax-exempt investment vehicles such as the All Savers certificates and has broadened the scope of Individual Retirement Accounts. This has reduced the attractiveness of tax-exempt municipals to the rich, who have been their traditional purchasers.

The effect of these four forces is to put municipal finance in an unprecedented vise at a time of growing need.

According to the Urban Institute, neglect in maintaining the country's existing infrastructure will push maintenance investment alone to over $660 billion in the next 15 years. This is as much as state and local government has spent on new investment in the past 20 years; it is equal to 20% of the entire U.S. gross national product in 1980.

If state and local government cannot find a way out of this bind, the effects will be devastating. It is perfectly true that the private sector has carried the responsibility for economic growth throughout the history of this nation. But at virtually every stage of the nation's history, growth was dependent on a balance between private and public investment.

The great canal boom of the early 19th century was financed mainly by private sources, but public subsidies provided a favorable investment climate. This was even more true of the railroad boom of the late 19th century. The growth of the nation's great manufacturing centers with their dense concentrations of population, was dependent on public spending for streets, bridges, and mass transit. The great auto boom of the 20th century could never have occurred without huge public investment in roads and highways. Similarly, the great post-World War II airline boom was dependent on complementary public investment. There is no reason to believe that this historical necessity for balanced investment has come to an end. So even if, initially, President Reagan's economic program does unleash a surge of private investment, it would be likely to abort if state and local government cannot find the wherewithal to build the public facilities needed for support.

In the past decade, the crisis of state and local government has occurred mainly in the Frostbelt. But it would be a serious mistake to infer that the states of the Sunbelt will therefore be immune to the infrastructure crisis of the 1980s. For just as New York City needs a $5 billion investment in mass transit to prevent a further erosion of jobs and population, Houston needs to invest heavily in new freeways or mass transit in order to prevent the traffic congestion that threatens to strangle its growth.

The crisis of the 1970s became highly visible because some cities and states were hanging by their financial fingernails and had to reduce expenditures sharply and restructure debt. Bankruptcies and near-bankruptcies may also occur during the 1980s. But these lurid financial episodes only serve to worsen the real growth problem. For in the past local politicians have responded to financial stress by postponing the maintenance of existing capital plant and deferring the building of new plants, much the same way an executive in the private sector acts when his company is in a financial bind. Says New York State Comptroller Edward V. Regan, "you can always delay public investment, but in the end it catches up with you."

A WAVE OF ANXIETY

The Reagan Administration argues that, until now, a good part of the infrastructure crisis has been the result not of insufficient spending but of inefficient, wasteful spending. It maintains, for example, that subsidies to mass transit are not cost-effective and that the sewage-treatment program, which cost $3.4 billion in 1980, is in need of overhaul. It believes that federal spending for roads should be confined to major highways essential for national defense. These arguments reflect the Administration's basic philosophy that more and more federal functions should be shifted to state and local government. And the Administration maintains that it has taken a large step in that direction by consolidating 57 separate federal programs into 9 new or modified categories of block grants.

Although many state and local officials may have welcomed the added flexibility in the way they can spend federal money, the Reagan-imposed austerity, particularly the proposed second round of budget cuts, is now stirring a wave of anxiety among local officeholders, including many key Republican governors and mayors. They fear that the states and cities have been set adrift, because there may simply not be enough money from any source. They say that Reagan's new federalism has assigned them a role that they plainly do not have the resources to fill. As a consequence, a desperate hunt is on for new ways for cities and states to raise revenues and to increase the borrowing power needed to attack the infrastructure crisis. But no one thinks funding solutions will be easy.

INFRASTRUCTURE: A NATIONWIDE NEED TO BUILD AND REPAIR

For years cities and states have neglected their basic life support systems. Voters demanded more policemen and teachers and a cap on transit fares; timely road repair and bus maintenance seemed less important. And politicians readily complied with the voters' priorites and neglected their local infrastructures. When they did spend money or investment, they favored new structures over repairs: a picture of a ribbon-cutting was surely worth more votes than one of a sewer line being replaced. This strategy may have gotten politicians reelected, but it left the infrastructure to crumble.

Recently, however, growing numbers of bursting water mains, flooding basements, creaking bridges, collapsing roads, and stalling buses have awakened the public and and elected official alike to the problem of the deteriorating infrastructure. Yet the Reagan Administration's $35 billion first-round budget cuts and proposed $13 billion second round, coming when the municipal capital markets are in chaos, could prevent this new awakening from being translated into effective action. If that occurs, the result would be supremely ironic. For the economic expansion Reagan is predicting re-

quires a strong and healthy public infrastructure. Industry cannot expand without adequate water and sewage systems and well-maintained roads, bridges and mass transit systems to get its employees to work and its goods to market.

Says Pat Choate, author of *America in Ruins* and currently an economist at TRW Inc., "I don't want to sound like the Joe Granville of public works, but the fact is that much of America's infrastructure is on the verge of collapse." The problem is so widespread, he says, that "three-quarters of America's communities can't participate in Reagan's economic growth program."

The decay is evident in all parts of the nation's stock of public capital:

Streets and highways.—More than 8,000 mi. of the interstate highway system's 42,500 mi. and 13% of its bridges are not beyond their designed service life and must be rebuilt. And just to maintain current service levels on the roads and highways outside urban areas that are not part of the interstate system will require more funds for rehabilitation and reconstruction during the 1980s—over $500 billion—than all levels of government spent on all public works investments during the 1970s.

Bridges.—It will cost $41.1 billion to replace or rehabilitate the more than 200,000 deficient bridges—two out of every five—in the nation.

Sewers.—To met existing water pollution control standards, federal and local governments will have to invest more than $31 billion in sewer systems and wastewater treatment plants over the next five years.

Water.—The 756 urban areas with populations over 50,000 will have to spend up to $100 billion over the next two decades just to maintain their water systems. Even more money will be required to develop more water sources for fast-growing areas in the Southwest and West.

Mass transit.—Spurred by the Administration's proposed elimination of operating subsidies and other pressures, up to one-quarter of the country's 300 metropolitan transit systems might have to cease operation by 1985. The New York City Transit Authority must raise $5 billion to rebuild its rusty, dilapidated rail and bus systems. Chicago's system raised its fare to 90¢ from 60¢ this year, and scheduling, maintenance, and financial problems still abound.

Deterioration of the infrastructure hurts growth because its costs must be borne by America's businesses. U.S. Steel Corp. is losing $1.2 million per year in employee time and wasted fuel rerouting trucks around the Thompson Run Bridge, in Duquesne, Pa., which is posted for weight restrictions because it is in such disrepair. Companies wanting to locate in certain parts of downtown Boston must bear the additional cost of a sewage holding tank to avoid overloading the system in peak hours. And companies in Manhattan lose $166 million a year for each additional five-minute delay on the subways and buses.

In real terms, Reagan's first-round budget cuts represent a 25 percent reduction in state and local aid, and a substantial part of that will come straight out of spending for roads, bridges, mass transit systems, and sewers. Moreover, there is a danger that these first-round federal cuts will induce state and local governments to shift their own funds to services and out of infrastructure. And while Reagan's second round of cuts—12 percent across the board—is being resisted by Congress, there is little doubt that the final result will be to shrink even further the money available for upkeep of local public capital.

NOT ONLY OLDER CITIES

The blow these cuts will deal to older cities will be especially severe, for that is where the problems are most advanced. Financially strapped New York City must spend $40 billion to repair and rebuild its 6,000 mi. of streets, 6,200 mi. of sewers, the 775 bridges it owns, and the 1.5 billion gal.-per-day water system. Cleveland needs $124 million to rehabilitate more than 40 of its 490 bridges. And Chicago is seeking $3.3 billion—half from the feds—over the next five years to rehabilitate everything—roads, bridges, sewers, and mass transit.

But even cities in the Sunbelt, which have newer physical plants and rapidly expanding tax bases, face problems with their infrastructures. Fast-growing Dallas must raise some $700 million for water and sewage treatment facilities over the next decade and more than $109 million to repair deteriorating streets. And booming Denver has begun informally delaying its repair and maintenance schedules.

Obviously youth and growth do not guarantee sound and adequate infrastructures any more than age and stagnation necessarily condemn the physical plant to decay. Maintenance, management, and revenues explain why Cincinnati's infrastructure is stronger than Cleveland's and why the bridges run by the Port Authority of New York & New Jersey are better kept than those controlled by New York City. And sophisticated maintenance management is why Dallas' infrastructure, while not perfect, is in better shape than most.

The lack of maintenance has inflicted severe damage on the roads, bridges, and mass transit systems that form the lifeline of the nation's business. Bad roads and bridges keep some 25 percent of America's communities out of the growth business, says Choate. Even the relatively new interstate highway system is spotted by dilapidation. The federal government, which did not provide funds for "the three Rs"—resurfacing, restoration, and rehabilitation—until 1976, blames the states for failing to keep the highways in good repair. The states complain of the federal government once again saddling them with the responsibility of maintaining whatever Washington builds. The Reagan approach is to take most of its overall cuts in funds for secondary and urban roads and to use them for the interstate program, which will require $53.8 billion through 1990 to complete and repair. This would leave the states and localities to bear the entire cost of local roads. The federal government now pays 75 percent of that.

This proposed retreat from aid for local roads means that the potholes that already dominate many local roads will only proliferate. In New York City, where street repair slowed to a near-standstill in the late 1970s, streets, which engineers say have about a 25-year life, are being replaced at a 700-year rate; the replacement rate is 49 years in Cleveland, 50 years in Baltimore, and 100 years in Oakland.

The deterioration of the mass transit systems that move people to and from work has been even more profound. Nowhere is this more evident than in New York City. The Metropolitan Transportation Authority of the State of New York "literally stopped preventive maintenance in 1975," when the city's fiscal crisis hit, says City Council President and MTA board member Carol Bellamy. The results were stark: The number of serious breakdowns en route rose to 12,291 in 1977 and tripled to an estimated 36,000 this year; and the number of miles traveled by the average subway car before having to be laid up for major repairs dropped from 13,627 in 1977 to 6,500 in 1981.

The MTA's plans to borrow some $5 billion to rebuild its system have been set back by high interest rates and will suffer further from Reagan's proposed cuts, which could reduce capital aid by $30 million and operating assistance by $165 million over three years, forcing higher taxes or a 15¢ fare increase, to 90¢, says Steve Polan, special counsel at the MTA. And if the rebuilding is delayed, transit failures will choke the economic vitality of the region even further.

In Massachusetts federal operating subsidies will decline $13 million in fiscal 1982 and $28 million more over the next two years. "The first third that goes we can cope with," says James F. Carlin, Massachusetts' Transportation Secretary. "But when the cuts go up to $20 million, we could have some problems." One of their problems will be caused by Conrail's consolidation, which will leave the communities in the southeast of the state without service. "The state is going to have to come in and acquire the railways and then get some carrier to come in and run those lines," explains Carlin.

Since fast-growing cities in the Sunbelt have avoided reliance on federal help for their still small transit systems, the cuts will not hurt them as much. The Metro bus system in Houston does not use federal money for operating expenses, so it will not be affected immediately by any budget cuts. Most of the federal money for two bus maintenance facilities has already been committed. And work on contraflow lanes and raised tracks for buses will continue with local money. Nevertheless, Houston's plans to develop a rail line to link southwest Houston with downtown will be slowed, even though the city will continue to fund engineering studies with some $10 million in local taxes.

THE VITAL CONNECTIONS

Similarly, Dallas, which has been slow in reacting to the need for a sophisticated system, is now faced with bearing the full burden of financing its future mass transit needs unless the state helps. Although the voters just last year rejected the establishment of a regional transportation authority, mass transit, like sewers, is vital for growth. If growth continues at its present rate, without the development of a mass transit system, cities like Dallas and Houston could eventually be paralyzed.

Inadequate and dilapidated sewer lines and wastewater treatment plants are also stalling economic activity both in stagnating cities that have to bring their systems up to congressionally mandated standards and in growing areas that need additional capacity. Wastewater treatment plants in 47% of the communities surveyed by the Commerce Dept. in 1978 were operating at 80% or more of capacity, while the generally accepted effective full capacity utilization rate is 70%. That means that new plants and homes could not be hooked up to those systems. The Florida Environmental Protection Dept., for example, recently prohibited Orlando, one of the fastest-growing areas in the U.S., from adding more homes to its overloaded sewer system. The moratorium was lifted only when Orlando signed court decrees promising to build more sewage treatment plants.

If the Administration's plans for distributing treatment plant funds go through—it wants to limit funds to the cities needs as of 1980—Orlando and other growing cities and suburbs will have to build capacity for new population without federal money. Capital spending for wastewater treatment facilities by all levels of government has tripled since the Clean Water Act was passed in 1972, making it the largest single public works program now under way. The Administration wants to cut the estimated remaining federal costs for treatment plants to $24 billion from $90 billion. And Reagan would slice annual federal expenditures from $3.5 billion to $2.4 billion

WATER AND THE WEST

If Reagan's changes become law, there will be less money to spend overall, but changes in the allocation formula will benefit some cities and cost others. It could end up penalizing growing areas and helping older cities. Baltimore, for example, needs to spend nearly $1.5 billion, or $1,880 per capita, to get its sewers and waste treatment system in shape, according to estimates by the U.S. Environmental Protection Agency. With current levels of federal aid, it has been spending around $35 per capita per year, according to the Washington-based Urban Institute, which has made a major study of infrastructure needs. Reagan's proposals are expected to give Baltimore more money. But in the Chicago area, where the sewer systems overflow raw sewage into homes and lakes and rivers alike with a disturbing regularity, the Metropolitan Sanitary District is less likely to get the funds it wants to build a $3.4 billion, 131-mi. "deep tunnel" to upgrade its system. It has already sunk $1.2 billion into pollution control and will probably have its flood control moneys slashed by Washington.

Reagan's approach could also reduce grants going south of the Mason-Dixon Line and west of the Mississippi. Right now there is little concern among local officials, partly because the spending requirements to meet standards on these newer systems are low: $3 per capita for Tulsa, Tucson, San Jose, and Dallas.

But over the long run the cuts could create problems. Houston is receiving 75% federal matching funds for a large sewage plant, which the city needs to meet federal clean water standards. Once that is spent, City Controller Kathryn J. Whitmire does not expect any more federal funds. "If we don't have federal assistance, we'll finance as much as is feasible through revenue bonds based on user fees," she says. "But for large additional projects, we'll have to turn to the developers; we've already seen developers ready to participate." But some experts point out that this will raise the cost of new construction, and that could slow growth.

Huge investments also will be required in water systems over the next two decades to maintain economic vitality. "The history of much of the West is the history of its water projects," says Choate. "And water will determine its future." The water systems in much of the West have not been well maintained, and they will require additional spending in the 1980s. Since the federal government does not support local water systems, Reagan's cuts will have no direct impact. But where water is controlled by cities instead of independent authorities the cuts in other areas could force politicians to divert funds that would normally go to maintain the water system, and that could increase problems in the future.

In the East, too, money will have to be spent on water, but there the problem is storage, treatment, and distribution. "One half of the water lines are so decrepit that they need to be replaced," says Choate. New York City, for example, loses 100 million gal. of water per day because of leaks.

The squeeze on state and local governments is not coming only from Reagan's austerity push. Even while federal capital aid is being slashed, court-mandated improvements in jail conditions are requiring many cities and states to upgrade their prisons. "If the federal government doesn't give the local governments and states the money for jail and prison construction," says Susan Walters, an infrastructure expert at the Council of State Planning Agencies, "the trend of mandating jail replacement by the judiciary means that streets, water systems, and schools will go."

Cities and states are scrambling to find ways to buffer their infrastructures from these revenue shortfalls. One approach being considered by cities that still control their sewers and water supplies and other facilities is to turn these over to independent operating authorities that have pricing and bonding power. Experts have noted that, since they have their own revenue sources, the authorities' maintenance programs have been insulated from the fiscal squeeze that has led many municipalities to skimp on maintenance. They "generally maintain their capital plants better and have healthier financing," says Urban Institute economist George E. Peterson. "There's not a pothole in the George Washington Bridge," says Peter C. Goldmark Jr., executive director of the Port Authority of New York & New Jersey, the largest multipurpose operating authority in the U.S. "We resurfaced it two years ago." The City of New York, by contrast, has so neglected maintenance on the Manhattan Bridge that it must sharply limit traffic there for several years while it rebuilds.

A LONG RECOVERY

Yet independent authorities have their drawbacks: Every time one is set up, it limits the flexibility of the government to shift funds to meet its most pressing priorities. There is no way city officials can subsidize street repair out of water fees, for example, if the water system is operated by an independent authority. Says Peterson, head of UI's infrastructure study: "If you generalize that model so every service has its own financing and operating authority, it eliminates all trade-offs between services. How far can you go?"

The crisis in America's infrastructure has been building for decades, and its resolution will take decades. "This is not a crisis for the short-winded," says former New York City Budget Director David A. Grossman. "Most rebuilding will take a decade or decade and a half," adds TRW's Choate. Yet even with such a long horizon, there is no doubt that the cuts Reagan has made and the cuts he has proposed portend a major setback to the rebuilding of America's infrastructure.

BORROWING GETS HARDER AS THE DEMANDS INTENSIFY

Historically among the best credit risks in the financial markets, the state of California approached Wall Street underwriters this September with plans for a $100 million bond issue for parks and water cleanup. The plan looked almost boringly routine in an era when state and local issuers tap the debt markets for amounts approaching $1 billion at a crack and use the money for things as offbeat as building fast-food restaurants. But California financial planners were in for a rude shock. Interest rates leaped beyond the state's self-imposed statutory limit of 11% for public debt—effectively shutting the state out of the bond market. The borrowing still has not been done.

California is not alone. States and cities across the country are facing a borrowing crunch of unprecedented dimension, because of their inability or unwillingness to pay high enough interest rates. Local governments have issued about $2.5 billion in stopgap, short-term notes this year in anticipation of retiring them when they can again bring bonds to market. The amount of bonds authorized but unissued is at least three times that, according to securities industry estimates—bringing the total of bonds held back to about $10 billion.

All in all, the combination punch of high interest rates and blocked borrowing will mean more financial pressure on states and cities at a time when they can least afford it because of the sharp federal cutbacks in aid. Debt service as a percentage of total expenditures will rise for those that can borrow, local government's credit ratings will erode, and they will be forced to resort more and more to short-term financing, which will make long-term planning for an estimated $500 billion in capital needs in the 1980s all but impossible.

In New York, the state legislature has approved $600 million in borrowing power for the New York City subway system, but State Comptroller Edward V. Regan says that the borrowing "is out of the question" so long as rates for 20-year municipal bonds are as high as 12.73%, the current average yield. In Massachusetts, Development Secretary Byron J. Matthews says: "I can't think of one project in the state that has moved forward under a general capital improvement bond for the last several months," and Boston has been virtually shut out of the long-term bond market because of its own fiscal problems. Chicago cannot float notes for its transit system, and even Denver, a high-growth city in a booming region, is holding back $19 million in bonds for water system improvements.

The amount of long-term bonds issued in the tax-exempt municipal market (encompassing states, cities, and all local and regional agencies) this year is expected to register the largest drop in a decade, from $48.3 billion to about $41 billion. More important, the amount of that financing used to meet basic infrastructure needs, such as waterworks, sewers, transportation, and schools, has been about $10 billion a year for more than a decade. The other $30 billion or so goes to areas not crucial to local governments' basic mission—for example, construction for private industry, financing for single-family housing, and building power plants for use by the private sector.

With competition in the tax-exempt market increasing, states and cities have witnessed an unprecedented erosion in their credit ratings. Except for a technical change within one grade level, downgradings in credit ratings by Moody's Investor Services have exceeded upgradings this year for the first time in at least a decade. This means even higher rates for many issuers and, ultimately, more fiscal problems.

"I'm terribly worried about the state of the municipal market," says James J. Lowrey, a New York-based adviser to municipal issuers. Lowrey predicts that the insolvency or near-insolvency in places such as

New York City, Chicago, and Cleveland in recent years may be repeated again and again elsewhere as cities find both their revenues and available credit squeezed.

Eventually, the logjam of pent-up borrowing demand should break; financing for critical infrastructure such as waterworks and mass transit cannot be put off forever. But state and local borrowers who do venture into the long-term markets are finding that the days of deep-discount money—at rates substantially below the private sector's borrowing costs—are gone. Indeed, the tax-exempt rates paid by state and local borrowers for long-term bonds have recently exceeded 80 percent of the cost of comparably rated taxable corporate bonds—far higher than the 65 percent historical standard.

VYING WITH THE BIG BOYS

The spread has narrowed because of fundamental changes in investor preferences and federal tax policy, which go far beyond the cyclical trend of higher interest rates. Even if interest rates moderate, the structural changes in demand for state and local debt, generally referred to as municipal bonds, or "munis," will have serious implications for the ability of local governments to raise capital.

Until now, their borrowing problems have attracted little attention. Indeed, on the surface, the muni market appears to be booming. Although states' and cities' long-term financing is down this year, it still exceeds corporations' long-term borrowing, and individual investor demand is robust. But the future of the municipal bond looks bleak.

The municipal market's most fundamental problem is simply that the supply of available credit is not keeping up with borrowers' demands. Salomon Bros. credit sage Henry Kaufman says that municipalities face "crowding out" from the long-term capital markets by the huge borrowing needs of the federal government, widely expected to total $50 billion in the fourth quarter alone.

"National policy now . . . pits states and municipalities squarely against the economy's most powerful borrowers, the federal government and large business corporations," says Kaufman. "In this kind of struggle, state and local governments cannot win." Corporations and the federal government, Kaufman contends, can virtually "raise money at will" in the markets, although they may have to pay more, while local issuers are fettered by interest rate ceilings, voter referendums, legislative authorizations, and political pressures.

Although annual municipal borrowing has risen by $20 billion in the past 10 years, it has not kept up with inflation. Net new capital raised by states and localities has fallen sharply as a percentage of the entire U.S. capital markets—a trend that can only be intensified in the future by the federal government's soaring borrowing needs.

A less apparent trend is what Kaufman calls "crowding in"—the rapid growth in the use of tax-exempt bonds to finance projects that have little to do with traditional state and city responsibilities. The most controversial of the nontraditional borrowing uses has been tax-exempt industrial development bonds (IDBs). Although Congress restricted IDBs in 1969, state-authorized development agencies are still allowed to act as issuers of tax-exempt bonds to finance private industry construction—the ostensible public purpose being the jobs and economic growth thereby created. In the past five years states have eagerly jumped on the IDB bandwagon, paying little heed to the competition that these issues provide for the general financing done by local governments.

President Reagan has vowed to curb such bonds, and Administration sources hint that they will seek to end the tax exemption on interest on issues of under $10 million, which have financed a string of McDonald's restaurants, K mart stores, and even a topless bar in Pennsylvania. That still leaves tax-exempt IDBs of more that $10 million for a list of quasi-private purposes—pollution-control additions to industrial plants, for instance—that account for perhaps 25 percent of all long-term municipal financing.

"The major question for this decade in public finance is who will get tax-exempt money—the local hamburger chain or the local highway system," says Ronald Forbes, head of the Municipal Finance Study Group of the State University of New York at Albany. The Denver Water Board's finance director, Robert E. Wiedemann, bemoans the proliferating uses for tax-exempt bonds. "Anytime you have more of something, it's going to drive up the interest rates," he says. But issuing IDBs is one of the few things that states can do, short of direct tax abatement, to attract business. "We're willing to let the federal government make some tough [budget] decisions that will have an impact on the states," says Governor Christopher S. "Kit" Bond of Missouri. "But now it seems that they're trying to take it away on the borrowing end." Bond is especially upset about a recent Internal Revenue Service ruling that individual municipalities could not escape the $10 million small-issue ceiling by lumping together smaller issues in one offering.

No matter what the fate of IDBs, state and local governments will still find themselves competing for credit against powerful, independent public authorities whose borrowings are also jamming the market. One of these, the Washington Public Power Supply System (WPPSS), has recently become the largest single issuer of tax-exempt debt. Ironically, while most independent authorities have been strong borrowers because their bonds were secured by user fees, WPPSS is having colossal problems that threaten the entire municipal market.

Construction delays and cost overruns at two of five nuclear power plants WPPSS is building have become severe, and the authority has found the bond markets closed to these two projects. A state commission seems close to winning approval for mothballing the project for 30 months, but bondholders will be left in the lurch—uncertain of whether the authority can be bailed out or return to the markets in time to meet debt service after 1983.

Owing in part to investor apprehensions about the authority, WPPSS paid a record 15% when it borrowed in the bond market for its three less-troubled plants in September. "This kind of thing has a ripple effect," says one municipal bond dealer. "The WPPSS rate drives up everybody else's rate—particularly an issuer in Washington." Indeed, Moody's dropped the state of Washington's bond rating a notch on Oct. 7, which could drive up the cost of a planned one-year note offering by $1 million. Moody's cited revenue shortfalls, but bond dealers feel the fears of state liability for WPPSS also may have been an ingredient in the downgrading.

THE CROWNING BLOW

The Reagan Administration has dealt a severe, if unintended, blow to the municipal bond with its new tax policies. Interest from municipal bonds is, of course, free of federal income tax. But with personal income taxes scheduled for a 23% reduction by 1984, individual investors have that much less reason to seek tax-exempt income. The reduction from 70% to 50% in the top rate for unearned income, moreover, means that interest from competing investments, such as high-yielding money market mutual funds, will also be taxed less for many investors, and there is more incentive to seek capital gains in common stocks or real estate.

For many municipal issuers and dealers, the crowning blow came with the authorization of the new, tax-free All Savers certificate. Because the one-year deposits will compete directly with municipal debt of equal or similar maturity, dealers and issuers alike fear that interest costs will be driven up significantly. The Municipal Finance Officers Assn. estimates that states and cities will pay up to an extra $1.1 billion in finance costs in the first year of All Savers, and they are lobbying hard to prevent the program's renewal after that. Says Michigan's deputy budget director, Douglas Roberts: "Nobody's going to buy [our] notes below the 12.1% [All Savers] rate." Adds Paul R. Thompson, finance director of Detroit: "All Savers drives another nail in the coffin of the tax-exempt market for municipalities."

The Reagan-instilled disincentives to municipal investment come at a time when the market is depending more and more on individuals to soak up municipal paper. Individuals, who have historically bought about 25% of all new municipal issues, have increased their share of the buying to between 50% and 75% in 1981, attracted by high yields.

Part of the problem is that institutions such as commercial banks and property and casualty insurers have all but left the market, either because they have found other ways to shelter their profits or because they have little left to shelter. Thus, if the Reagan tax programs make municipal bonds less attractive to individuals, municipalities will have to raise interest rates as an incentive. That means the historic relation between municipal and corporate rates may be skewed for good.

"We have legislated away, without knowing it, the subsidy for municipal financing," says Felix G. Rohatyn, chairman of New York's Municipal Assistance Corp., which has helped pull the nation's largest city from the brink of insolvency. "We are raising money at essentially taxable rates, and that's a very fundamental change. Even if the rates come down in general, municipal rates will stay at a par with taxable ones."

Rohatyn adds that "we could never have brought New York City back to fiscal health under the financing conditions prevailing today"—words with a foreboding ring for cities that are struggling to get back on their feet. "New York had its crisis early," he says, "But for cities like Cleveland, Chicago, Detroit, St. Louis, Buffalo, and Philadelphia, there will be worse troubles in the 1980's."

With the pressures building, states and cities are resorting to more short-term debt and a host of "creative financing" gimmicks. Issues of debt obligations maturing in less than one year are expected to be about $30 billion this year, a record 42% of the total. The city of Columbus, Ohio, and the state of Connecticut have broken ground by issuing tax-exempt commercial paper—a trend likely to be picked up elsewhere. In one

issue, New York's MAC gave bond buyers the option to buy more bonds at fixed interest rates in the future—desirable to investors if interest rates go down. And the state of Washington planned to sell $400 million in one-year notes on Oct. 15, giving buyers the option to sell them back at face value after a month—desirable to investors if interest rates go up.

THE IMPACT OF A DEFAULT

In one of the most innovative new financing plans, New York City's Metropolitan Transportation Authority (MTA) intends to sell buses and rail cars to investors and then lease them back for system use. The plan allows the MTA to put up only 80 percent of the cost of the new equipment, with the investors supplying the remaining 20 percent—in effect cutting the system's borrowing demands for capital expenditures.

But these may be nothing more than desperation moves. "Local issuers can never rely on short-term obligations for capital projects—and that's the bulk of their borrowing need," says Salomon's Kaufman. These projects require advance cost knowledge, for the long haul, which short-term notes do not provide. Options granted on bond issues can backfire, depending on interest rate movements. Equipment leasing remains subject to IRS scrutiny and may have limited applications outside urban transit. "The reason I fear for municipal issuers is that they really don't have a wide range of financing choices available to them," says Kaufman.

Most serious of all, credit market analysts now believe that the chances for a default by a major municipal issuer—the WPPSS, for instance—are as high as they have been since New York City's euphemistic "moratorium" on interest payments in 1975. The fact that investors have always looked upon the municipal bond as one of the safest investments would only serve to increase the shock value of a failure. If such a default came without warning, it could frighten lenders to the point of holding back credit in general—to corporations and individuals as well—with an unfathomably adverse impact on the economy.

A REVENUE SQUEEZE LEADS TO STOPGAP SOLUTIONS

Reductions in federal grants to state and local governments are coming at a time when many cities and states are already financially strapped and facing slow growth or even declines in revenues from other sources. Revenue losses are not a new problem for many cities, particularly the older ones in the Northeast and Midwest. Indeed, the rate of growth in state and local receipts from all sources during the 1970s slowed to less than half the rate during the 1960s. For the 1980s, the Reagan Administration's cutbacks will intensify this already developing trend and place increasing pressure on the nation's cities to find the wherewithal to continue to provide basic public services for their residents while financing economic and community development.

Although grants to cities and states represent only 14.2 percent of the federal budget, they are the target of one-third of the Administration's sweeping budget cuts. Funds for these programs have been slashed by 14 percent for fiscal 1982—25 percent after inflation—and the Administration's new program to contain the deficit threatens a further 12 percent reduction. Even excluding the latest proposal, by 1983 revenue dependency on Washington will have dropped 28 percent from the peak in 1978.

Localities will be forced to pick up the greatest slack in the area of social service, where more than half of the total budget reductions for fiscal 1982 will hit two broad functions. Income security and health programs, including food stamps, child nutrition, medicaid, Aid to Families with Dependent Children (AFDC), and Trade Adjustment Assistance, will lose about $13 billion. Programs for education, training, and employment, such as the Comprehensive Employment & Training Act and public service employment, will be cut by about $7 billion. In addition, the responsibility for administering many of these programs will be transferred to the local level from the federal government.

Although most of Reagan's cuts are in social service, they will nevertheless have a devastating effect on the infrastructure. The reason is that, while local politicians want to boost infrastructure spending, they find unemployment, loss of income, and loss of city services even more devastating politically. If the Reagan crunch comes, says Executive Deputy Mayor Rudy Nothenberg, the city's chief financial officer, then San Francisco's first priority would be its "defense department"—that is, police and fire protection—public transportation, and the municipal hospital for the indigent, even if that meant skimping on infrastructure repair. In New York City, too, Reagan service cuts could cost the infrastructure dearly. "Our first priority, if the cuts go through, must be the life-support services: police and transit operations," says City Comptroller Harrison J. Goldin. "The infrastructure would have to be allowed to deteriorate even further—which would be disastrous."

The effect of these revenue losses across the various areas of the country is regionally neutral according to an April, 1981 report by the Office of Management & Budget. However, in a private study, Andrew J. Moody, director of metropolitan forecasting at Chase Econometric Associates, concludes: "The impact of the Administration's budget cuts will vary considerably across states and will depend upon the type of programs that are cut." If that is true, some cities could be hit hard—particularly in the highly urbanized and older industrialized states in the Mid-Atlantic, New England, and East North Central regions.

To cope with these losses, city officials face a limited set of traditional revenue-raising alternatives. In the current climate of fiscal restraint, politicians are reluctant to advocate higher taxes, and many cities do not have taxing authority. Most cities have tax limitations that preclude new tax revenues. Moreover, many states, such as Michigan and Ohio, are financially hard pressed themselves and are unable or unwilling to offer cities much relief. Because approximately 30 states "piggyback" their tax rates to the federal tax structure, the Administration's new tax cuts mean less revenue for those states. Accelerated depreciation and other tax-exempt income, such as that from All Savers certificates, will cut further into state coffers.

Adjustment will be particularly difficult for the older cities in the Northeast and Midwest where revenue growth has suffered from a declining industrial base that has gradually eroded the area's tax base along with the credit ratings of some of the major cities. Cleveland, which lost 23 percent of its population in the 1970s and defaulted on its debt in 1978, is a prime example. The city expects to lose nearly $30 million for infrastructure repair and millions more for community development projects, and Cuyahoga County will forfeit an additional $40 million for a number of welfare programs, 60 percent to 70 percent of which goes to Cleveland residents. Cleveland officials are concerned about the long-term impact. "While the city today is in a strong financial position, we are not able to pick up the cutbacks in social and welfare programs," says William J. Reidy, Cleveland's finance director. Currently, the unemployment rate among the city's black teenagers is about 60 percent, according to Larry A. Retallick, executive vice-president of the Urban League of Greater Cleveland, and he fears that conditions may be ripe for unrest.

In Boston, the federal cuts fall on top of the revenue-slashing effects of Proposition 2½, approved last November, which reduced property taxes to 2½ percent of fair market value, cut the automobile excise tax by 50 percent, and gave renters a state tax exemption equal to half of their annual rent. Property taxes were the major source of revenues for the city, and losses resulting from Proposition 2½ will amount to $100 million this year out of a budget of about $1 billion. Now the federal cutbacks will trim a further $50 million, mostly from economic development projects and employment training programs.

In an effort to make do with less, David S. Mundel, Boston's intergovernmental relations director, says the city has developed three basic strategies. First, it is continuing to finance the most efficient programs. Second, it is attempting to bolster charitable contributions and now requires many job-training programs to get matching funds from private industry. Finally, the city has proposed a variety of increases in taxes and fees, such as a boost in parking-violation rates and a condominium-conversion tax. This third route might prove fruitless, however, because any changes in city taxes require state approval, and Governor Edward J. King has vowed to veto any tax increases. Mundel adds that there is a general misconception that budget cuts will trim only the fat and sloth out of public service. "But given the size of these cuts," he says, "we're forced to do less." Mundel notes that there is a basic difference between what Boston and the federal government are experiencing. The federal government is only slowing down its rate of growth, he says, but Boston is actually growing smaller.

NEWER CITIES HURT

While the problems will be most acute in the older cities, newer areas also will feel the revenue bite. Because of the federal cuts, state tax relief, and a sluggish economy, Colorado will barely manage a balanced budget this year after expecting a $144 million surplus. As a result, the state will not be able to replace the $155 million in federal cuts to various state and local agencies. Infighting has begun because Colorado's inability to help Denver has exacerbated state vs. local tensions. City officials argue they should not have to bear the entire burden of providing health care, museums, a zoo, and other cultural facilities to people who come to Denver from all over the state. "We are going to have to live with these kinds of arguments on a continuing basis," says Randy W. Harrison of the Colorado Commission on State & Local Government Finance. Denver officials are choosing to raise user fees in an effort to regain revenues and make the problems more visible to the public. As of Oct. 1, for instance, an out-of-

city resident must pay $100 for a library card.

Many cities in Texas and other energy-rich Southwestern and Mountain states which receive payments from energy-severance taxes, are in a better position to adjust to the loss of federal money, but that does not mean the cuts will go unnoticed, particularly in social services. Statewide, Texas has lost $40 million in funding for social programs, and the Dallas-Fort Worth area alone has forfeited $7 million. According to William E. Buchanan of the Texas Human Resources Dept., 53,000 people in Dallas-Fort Worth will be forced off AFDC, and 175,000 will be dropped from the food stamp program.

These and other problems that state and local governments are experiencing in adjusting to the Administration's cutbacks cast doubts on the success of the White House's block-grant programs. The Administration plans to consolidate the funding for a number of similar categorical programs into broad block grants while giving states the responsibility to administer the programs and to spend the money as they see fit. But it will not be that easy.

First, the states have fewer federal funds to handle the increased responsibility. Second, states complain that the promised flexibility to spend the money as they wish is not there. And third, the cities are concerned that they will get lost in the allocation shuffle and that worse, not better, relations with state governments will result as municipalities fight for their share.

Chicago's Budget Director F. Tim Witsman worries about the state and local bureaucracy that might grow up around the block grants. "I am not opposed to the notion of block grants, but I am opposed to them going though the states. That is a contradiction of philosophy, layering a new level of bureaucracy on top," he says. Witsman fears that administration costs might eat away money the city could use. George A. Athanson, mayor of Hartford, Conn., foresees cities fighting states and inner-city groups fighting city hall. "Meanwhile," he says, "Reagan will be sitting at Camp David saying, 'Isn't it wonderful, our national government is not interfering.' "

Indeed, Bernard L. Weinstein, professor of economics at the University of Texas at Dallas, believes that the cutbacks will profoundly change the relationship between federal and state governments and, in particular, between the states and the cities. "My major concern," he says, "is that Washington has pushed this stuff without thinking about what the responsibility of each level of government should be. Who should do what?"

City officials from both North and South also express concern that the Reagan cuts will create more problems than they will solve. Many view the transfer of federal responsibilities to cities that are ill-equipped to handle the new burden as merely a shift of the financial stress on the federal government to the cities, and many feel that the Administration has moved too far too fast.

"We are undertaking a major federal policy without understanding its impact on the cities," says Anita A. Summers, adjunct professor at the Wharton School of the University of Pennsylvania. Summer emphasizes that this impact depends crucially on the untested axioms of supply-side economics. "If the supply-side theory does not work, then I think the Northeastern cities will receive a severe blow, if not a mortal blow," she maintains.

NOW ENERGY IS WHAT COUNTS IN THE WAR BETWEEN STATES

President Reagan's economic policies may, in the long run, revitalize the U.S. economy and bring new fiscal health to the states of the Northeast and Midwest. But for the time being those policies will intensify the war between the energy-rich and energy-poor states. While that has some of the characteristics of the Sunbelt vs. Frostbelt fights of the 1970s, neither the alignments nor the issues are the same. Some Sunbelt states, notably Florida, have developed typically Northern urban problems, while such frosty places as Wyoming and, above all, Alaska, are rolling in energy wealth. The growing importance of energy will change the nature of the intensifying competition among states for industry and jobs.

Without access to federal government funds and a relatively weak tax base, even many states of the Old South, which had been able to attract industry from the Northeast and Midwest with generous tax-forgiveness incentives, will find themselves at a disadvantage. Like the states in the Frostbelt, they can ill afford to give up tax revenues if they no longer have Washington financing to help with building roads, sewers, and basic facilities. Energy-rich states do not have to worry about such trade-offs since they have abundant revenues.

The Administration and representatives of the energy-poor states, mainly those concentrated in the Midwest and Northeast, have engaged in a heated argument about whether the Reagan tax and budget cuts discriminate among regions. The Office of Management & Budget has published a study arguing that the benefits of tax reductions and the pain of budget cuts are evenly distributed around the nation. But Representative Carl D. Pursell (R-Mich.), chairman of the bipartisan Northeast-Midwest Congressional Coalition's budget task force, counters: "If you look at what is happening in the distribution of dollars in the budget, there's a major transfer of money to the Sunbelt."

Regardless of who is right, some states are much better equipped than others to offset federal spending cuts with state funds. The massive runup in energy prices since the mid-1970s has greatly increased the disparity in the fiscal capacity of states. Energy producers dominate the list of states with the largest and fastest-growing per capita tax bases, according to a comprehensive measure of income developed by the staff of the Advisory Commission on Intergovernmental Relations.

TAXES AND DECONTROL

Last year, seven states received more that 20 percent of their revenues from severance taxes levied on the production of minerals, mainly oil, gas, and coal. A decade ago, only one state—Louisiana—relied so heavily on energy taxes. Severance taxes, which range as high as Montana's 30 percent levy on coal, have become a major bone of contention in interstate relationships. The Midwest Governors Conference estimates that residents of its 13 member states paid $700 million in severance taxes to other states in 1979 and will pay more than $2.5 billion in 1985.

Accelerated decontrol of natural gas prices, which the Administration will soon recommend, will exacerbate the situation. The Northeast-Midwest Institute, the research arm of the congressional coalition, estimates that, with decontrol, severance tax receipts will total $280 billion through this decade. "Nothing scares us more right now than natural gas decontrol," says Rhode Island Governor J. Joseph Garrahy. The 13 Midwestern governors, 11 of whom are Republicans, recently voted unanimously to oppose immediate decontrol of natural gas.

The energy-consuming states also feel that severance taxes put them at a disadvantage in attracting and keeping business and jobs. While they are being forced to raise taxes to make ends meet and are running the risk of driving employers away, the energy producers are able to rely on revenue sources that do not increase the cost of doing business in their states. "It's going to become apparent that Texas, Louisiana, and Montana, for example, are using their energy revenues competitively," says Representative Barber B. Conable (R-N.Y.), ranking Republican on the House Ways and Means Committee.

The energy-poor states, which find themselves squeezed between Washington's budget cuts and what they view as rapacious tax policies by energy-producing states, are bent on retaliation. At their August meeting, the Midwestern governors set up one task force to study a "soil-depletion tax," in effect a severance tax on food production, and another to consider how the region's abundant water resources could be used to squeeze money out of the water-poor West. "The fear is that we're going to get into a war with the energy-rich states," says Rhode Island's Garrahy. "You'll have states coming up with all kinds of schemes to tax each other, and it will be bloody murder."

Consuming states are attempting to stop energy-rich states from imposing severance taxes. Earlier this year, the Supreme Court denied a bid by Commonwealth Edison Co. in Chicago, joined by several state and local governments, to have Montana's coal tax declared an unconstitutional restraint on interstate commerce. But in its decision, the court made it clear that Congress, if it wished, could restrict the states. A number of bills have been introduced in Congress to do just that, although the prospects for passage are bleak. Another idea gaining force is a federal severance tax with the proceeds earmarked for expanded revenue sharing. "I don't see anything else that will reduce the threat," says Tom Cochran, executive director of the Northeast-Midwest Institute. But many state and local politicians, looking at the federal government's own fiscal plight, are dubious about any new money coming from Washington, despite Reagan's promise to return revenues to the states. "As sure as we're talking, the only way we'll see anything returned is with equal or greater budget cuts," says Maryland House of Delegates Speaker Benjamin Cardin, a Baltimore Democrat.

Faced with their limited ability to get directly at severance taxes, many consuming states are looking for ways to grab their share of the oil bounty. Last year, New Jersey imposed a special tax on petroleum refiners while New York and Connecticut attempted to levy gasoline excise taxes that could not be passed through to retail buyers. All three taxes were struck down by the courts. New York is trying to redraft its tax to meet the legal requirements, while Connecticut is considering taxing oil companies on a share of their total profits rather than just their income earned in the state.

The common problems of energy-consuming states are pushing them into joint efforts. Such long-standing regional blocs as the Midwest Governors Conference are becoming more assertive. Regional congressional groups, such as the New England Congressional Caucus, are stepping up their activities. Florida Governor Robert Graham is pushing for a Southern "common market" to coordinate regional taxation and development policies. The New England Energy Conference is negotiating for Canadian gas and hydroelectric power. The Midwestern governors are planning a similar agency both to negotiate for their energy needs and to develop the region's coal and grain resources as synthetic fuel feedstock.

HARSH POLITICAL REALITIES

But these regional arrangements can do no more than nibble at the edges of the problem. Politicians from energy-consuming states believe that solutions must begin with the federal government. And they see precious little sign that the Reagan Administration is interested in addressing the issue.

Our major problem is in getting the federal government to recognize that there is a problem," says Senator David Durenberger (R-Minn.), chairman of the Senate subcommittee on intergovernmental relations. "There are people in the White House who think that all the problems of regional disparity have been solved because the South is going to rise again."

Faced with these harsh political realities, the energy consumers are reduced to fighting a rearguard action against measures that will make their problems worse. The one thing they are dead set against is any further transfer of federal responsibilities to states without a corresponding shift of revenues, and this bodes ill for Reagan's latest budget-cutting proposals. "If we turn back more responsibility for welfare to the states, we'll have a world-beater of a problem," says Durenberger. "Every state just does not have the fiscal capacity to pick up the cost."

State and Local Budgets Become a Brake on Growth

President Reagan's program of fiscal austerity is putting many state and local governments in what economists regard as the worst of all worlds: that of having to cut spending and raise taxes at the same time. Such policies are a double whammy for both business and consumers. Higher taxes, of course, discourage consumers from buying and business from investing. And cutbacks in state and local government spending, which totaled $355 billion in 1980, will simply mean less demand for many goods and services.

The growing fiscal squeeze on state and local governments will further reduce that sector's role as a major source of economic growth. Borne by the baby boom and the spread of suburbia, state and local government spending in the postwar period grew by leaps and bounds in response to the demand for roads, bridges, schools, hospitals, water, and sewage treatment—as well as police and fire protection and social services. Spending by state and local government far outpaced that of the overall economy for almost 25 years, and by 1975 it accounted for 15% of gross national product.

That trend was brought to an abrupt halt during the 1974–75 recession. The importance of the state and local sector in the economy has been shrinking since the mid-1970s as stagflation has cut into the growth of real incomes and the public has demanded lower taxes and fewer services. Reagan's fiscal austerity, which will cut Washington aid to state and local governments heavily, is expected to accelerate that trend.

Both monetarist and supply-side advisers of Reagan argue that this will have little impact on the economy because the reduction of the state and local sector will free resources for the private sector. The resurgence of capital investment and business activity in general caused by reining in government will more than offset the cuts in spending, in their view. And an analysis by the Office of Management & Budget in April concluded that the cuts in state and local government spending would not prevent the economy from hitting the Administration's growth targets.

Weighing the importance of government spending is, of course, a major unresolved issue among economists. Traditional Keynesians such as George Perry of the Brookings Institution believe that it is very important. "The reduction in state and local spending—the result of cutbacks in federal spending—constitutes one of the things that is contributing to an emerging recession," he says.

A POLITICAL DILEMMA

But even many conservative economists maintain that the cutbacks in state and local government spending will have some impact on overall economic growth, at least in the short run. As Rudolph Penner, of the American Enterprise Institute, put it in a recent article:

"There is a great deal of controversy as to whether one dollar of grants provokes more or less than one dollar of state and local expenditures, but there is no doubt that total spending rises as a result of the grant system." Federal grants to state and local government will drop by about $10 billion over the next three years under Reagan's programs. Washington aid will also be cut back substantially in other areas.

The dilemma for many states and local governments is that it will not be easy politically to cut many services. In some areas, such as education, where demand is weakening because of the end of the baby boom, further restraint will be relatively easy. Most economists agree that a major factor influencing the growth of state and local spending in the postwar period has been the need to "educate the baby," as Penner puts it. But spending on education has slowed dramatically in the last decade as the baby boom was absorbed, and demographics indicate that this trend should continue at least for much of this decade.

The shift to an older population that began in the 1970's and is expected to continue into the 1990s, could, however, have an equally dramatic impact on the demand for other state and local government services. In the past decade the fastest-growing areas of state and local government spending have been for health care, including hospital construction, and for social and other welfare services. This has been in large part a response to the enormous growth in the 65-and-over age group. But these are also some of the services hit hard by the Administration's cuts.

At the same time transformation of the baby boom generation into young adults is expected to keep the demand for housing strong, even though it is in a depression now because of high interest rates. Even if much of the new housing is multifamily and built in older suburbs, as many economists believe, the demand for accompanying police and fire protection and administrative services, also among the fastest-growing in the past decade, is likely to continue. But in many services needed to support housing such as aid for sewers, roads, and water installations, Washington aid is being slashed. And this reduction is taking place at a time when such vital underpinnings are in a rapid state of decline.

The business community as a consumer of state and local government services will also be hurt by such cutbacks. "State and local governments account for about 85 percent of capital construction, often with government aid, and that is going to shrink," notes Manuel Carballo, a lecturer on public policy at Harvard University. "Yet already sewers, roads, water systems are in a very sad state of repair. Things that businessmen rely on as staples are going to be jeopardized."

OFFSETTING THE BENEFITS

The business community, as well as the young adults and the older population, have considerable political clout. Politicians around the country are already finding themselves in the uncomfortable position of having to cut popular services or raise taxes. Conservative Republican Governor John Rhodes has stirred up a political storm in Ohio's Republican-controlled state senate by proposing to raise taxes to avoid a budget deficit.

A great number of economists believe that states and cities will have no choice but to raise taxes. Many are prohibited by law from running deficits, and it is increasingly difficult for almost all state and local governments to borrow in the financial markets.

As American Enterprise Institute's Penner put it in his article: "It may seem implausible to assume that total tax burdens will be increased rapidly in an era that is supposed to be characterized by new conservatism and virulent tax revolts. In particular, it may be quite unreasonable to assume that the state and local sector will grow rapidly relative to net national product when so many states are passing constitutional limits on tax rates and spending. Yet the recent history of New York State and New York City has taught us that it is not difficult to get around constitutional limits, and at the federal level President Carter felt it permissible to recommend in his 1981 budget one of the largest tax increases in recent peacetime history."

There is little chance that Reagan will back off the recent tax cuts, which are the centerpiece of his whole program. But increases in state and local government taxes will certainly offset some of the benefits of federal tax cuts. And if the end result of the efforts of state and local governments to cut some spending while maintaining or increasing others is a net decline in outlays, as many economists believe, the combination will have a significant impact on overall economic growth.

Policies To Help the States and Cities Cure Their Ills

Whatever the promise of President Reagan's economic program in the long run, the short-term reality for most of the nation's state and local governments is a period of austerity and uncertainty over how to redefine their own roles and cope with greater responsibilities. These may be more than problems of adjustment as Washington's budgetary and tax cuts ripple through to local jurisdictions in reduced federal aid and, for many, a smaller tax base. There is a strong sense among local officials that ele-

ments of the Administration program are in flat contradiction with each other and the overall economic goals.

"You can't just turn over fiscal responsibility to the local governments without giving them the fiscal capacity to meet the new demands," says economist Roger Vaughan, deputy director of New York State's Office of Development Planning. The results of this fiscal squeeze must inevitably be felt in the services, social programs, and capital spending administered by the states and cities. Governor Hugh L. Carey of New York compares the federal cutbacks to walking out of a restaurant without paying the bill and claiming that this reduces the price of food.

Ideas abound among economists and other public affairs experts for ameliorating the plight of the cities and states:

Local taxing power—The fiscal capacity of state and local governments could be strengthened through both the taxation and borrowing routes. The states should be able to make effective use of some user fees, excise taxes, and highway tolls now preempted by Washington.

On the financing side, the state's plight clearly has been exacerbated by the All Savers certificates. Continuing this device beyond 1982 would compound the disaster for the municipals market. An old idea to make local financing more competitive would be to give states and cities the option of issuing taxable bonds, whose necessarily higher interest rates would be subsidized by the federal government—a method that many tax experts say would be less costly to Washington than tax-exempts. At the same time, Washington should eliminate or set some limits on industrial revenue bonds to prevent abuses.

New tax concepts—Metropolitan areas that contain decaying central cities could share in overall growth through development of regional tax plans. In the Minneapolis-St. Paul area, for example, 144 communities contribute taxes on increased property values into a common pool, which redistributes the money based on population.

Potential warfare between the energy-rich states and the energy consumers could be halted by placing a federal limit on state severance taxes for coal, oil, and natural gas. A complement would be a federal severance tax on these resources, particularly those produced on federal lands, to fund revenue-sharing for the energy-poor states. A windfall profits tax on natural gas, when it is decontrolled, could do the same.

A reconstruction bank.—A new agency—perhaps on the lines of Herbert Hoover's Reconstruction Finance Corp.—could be created to provide capital for the revitalization of U.S. industry, the cities, and the nation's deteriorating infrastructure of roads, bridges, and other public plant. "At present there is no instrument capable of dealing with a problem like Chrysler or New York City, except on an ad hoc basis, in front of congressional committees," says Felix G. Rohatyn, who helped New York solve its financial crisis as head of the Municipal Assistance Corp. (MAC). While Rohatyn does not want government bureaucrats to get into the business of picking "winners" and "losers," he believes such a structure, "publicly accountable but operated outside of politics," is needed to generate the massive injections of permanent equity capital required to reinvigorate much of U.S. enterprise that may not benefit directly from the Tax Reduction Act of 1981.

A national capital budget.—Public works spending in the U.S. could be rationalized by creating a national capital budget. The nation lacks any comprehensive framework for deciding what should get built or financed by what jurisdiction of government, much less an inventory of public facilities, an assessment of their condition, or estimates of projected capital needs and maintenance costs. A multiyear capital budget might lead to increases in public works spending when lawmakers contrast the outlays for, say, a Tennessee-Tombigbee Waterway with the little or nothing being spent for coal ports, but it would also give government a way to control a large part of its domestic nondefense spending.

A commitment to human capital.—A new commitment could be made to human capital development parallel to that just made to physical capital through the 1981 tax act. With federal job and other programs being pared, the biggest danger is that many working poor will decide they cannot afford to work, dropping them into the welfare trap. The Administration should consider alternatives to turn welfare recipients into taxpayers and maintain a skilled labor force.

One such alternative, suggested by New York's Vaughan, would be a dedicated fund for training programs financed on the lines of the unemployment insurance system as "an earned entitlement." It could be paid for by a national payroll tax on workers and employers, taking a plethora of current programs out of the general revenue system and permitting some consolidation.

Strengthen private participation.—The private sector's role in providing services now handled by government could be strengthened. For several years, the American Enterprise Institute has sponsored a project to explore and expand the role of "mediating structures" in U.S. society—the family, churches, neighborhood ethnic organizations, and other groups whose roles have often been taken over or even impeded by government in the last 50 years. AEI President William J. Baroody Jr., who notes that his organization is launching a new study for the White House of private-sector efforts to solve social problems and how its successes might be replicated throughout the nation, sees the need "for an appropriate balance of roles and missions between government and the traditional private structures." At the same time, however, Robert Woodson, a black scholar who heads AEI's neighborhood revitalization project, warns that "budget-cutting and voluntarism alone do not constitute a social policy." Woodson does not see withdrawal of government support as a panacea but wants instead to see such aid get to the neighborhood level and "not the middle-class providers who now direct services to the poor." The public-private partnership idea is now being promoted by such groups as the National Alliance of Business, the Committee for Economic Development, the American Council of Life Insurance's Clearinghouse on Corporate Responsibility, and John W. Gardner's Independent Sector.

If the Reagan Administration's budget problems force it to turn to revenue-raising ideas, Congress will get the opportunity to reconsider parts of the new tax law that critics assert will worsen the imbalances between declining industries and regions of the U.S. and those now on a strong growth track—particularly the new accelerated depreciation and leasing rules. But short of such a retreat on the President's program, options still abound for ameliorating the new crisis of the cities and states. Without such concessions to reality, Reagan's new federalism may amount to little more than a political slogan.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ROTH (at the request of Mr. MICHEL), after 4 p.m. today and for the balance of the week, on account of official business.

Mr. AUCOIN (at the request of Mr. WRIGHT), for today, on account of illness.

Mr. JONES of North Carolina (at the request of Mr. WRIGHT), for the balance of the week, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. GONZALEZ, special order for today for 60 minutes.

Mr. OBEY, special orders today for 60 minutes.

(The following Members (at the request of Mr. TAUKE) to revise and extend their remarks and include extraneous material:)

Mr. DERWINSKI, for 60 minutes, December 3.

Mrs. SMITH of Nebraska, for 5 minutes, today.

Mrs. HECKLER, for 15 minutes, today.

(The following Members (at the request of Mr. SHAMANSKY) to revise and extend their remarks and include extraneous material:)

Mr. WEISS, for 60 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LAFALCE, for 30 minutes, today.

Mr. RAHALL, for 10 minutes, today.

Mr. SHAMANSKY, for 5 minutes, today.

Mr. GAYDOS, for 60 minutes, today.

Mr. BENJAMIN, for 60 minutes, today.

Mr. DONNELLY, for 60 minutes, today.

Mr. NELSON, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. MAZZOLI, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. CROCKETT, for 10 minutes, today.

Mr. HUGHES, for 5 minutes, today.

(The following Members (at the request of Mr. GAYDOS) to revise and extend their remarks and include extraneous material:)

Mr. GAYDOS, for 60 minutes, on December 9.

Mr. BENJAMIN, for 60 minutes, on December 9.

Mr. GAYDOS, for 60 minutes, on December 10.

Mr. BENJAMIN, for 60 minutes, on December 10.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. OBEY, and to include extraneous matter notwithstanding the fact that it exceeds 2 pages of the RECORD and is estimated by the Public Printer to cost $4,320.

Mr. WEISS, to revise and extend his remarks in support of House Joint Resolution 349.

(The following Members (at the request of Mr. TAUKE) and to include extraneous matter:)

Mr. LEBOUTILLIER.
Ms. FIEDLER.
Mr. SPENCE.
Mr. MOLINARI.
Mr. ERLENBORN.
Mr. SCHULZE.
Mr. MARKS.
Mr. MCEWEN.
Mr. PORTER.
Mr. HILLIS.
Mr. CRAIG in two instances.
Mrs. HECKLER.
Mr. FORSYTHE in two instances.
Mr. SMITH of Alabama.
Mr. LOWERY of California in two instances.
Mr. BROOMFIELD.
Mr. GILMAN.
Mr. WOLF in two instances.
Mr. DREIER.
Mr. DOUGHERTY.

(The following Members (at the request of Mr. SHAMANSKY) and to include extraneous matter:)

Mr. YOUNG of Missouri.
Mr. MAVROULES in two instances.
Mr. CORRADA in two instances.
Mr. STARK in three instances.
Mr. HUCKABY.
Mr. RODINO in two instances.
Mr. DASCHLE in 10 instances.
Mr. BRODHEAD.
Ms. OAKAR in two instances.
Mr. WON PAT in two instances.
Mr. COELHO.
Mr. MAZZOLI.
Mr. PEYSER.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 57. Joint resolution to provide for the designation of February 7 through 13, 1982, as "National Scleroderma Week"; to the Committee on Post Office and Civil Service.

ENROLLED BILL SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 3454. An act to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the Intelligence Community Staff, and for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 815 An act to authorize appropriations for fiscal year 1982 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, and for other purposes.

S. 1133. An act to amend the National Advisory Committee on Oceans and Atmosphere Act of 1977 to authorize appropriations to carry out the provisions of such act for fiscal year 1982, and for other purposes.

ADJOURNMENT

Mr. GAYDOS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 9 minutes p.m.), the House adjourned until tomorrow, Friday, November 20, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2545. A communication from the President of the United States, transmitting offsetting amendments to requests for appropriations for fiscal year 1982 for the Federal Emergency Management Administration (H. Doc. No. 114); to the Committee on Appropriations and ordered to be printed.

2546. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the proposed conversion to contractor performance of the containers, textiles, tents and tarpaulins activity at Fort Bragg, N.C., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2547. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment and services to Pakistan (Transmittal No. 82-03), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2548. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to Pakistan (Transmittal No. 82-04), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2549. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment and services to Pakistan (Transmittal No. 82-06), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2550. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-111, "To amend the Police Regulations concerning designation of certain areas as farmers street markets," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2551. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-112, "To amend the Life Insurance Act to provide the same right of access to duly licensed psychologists and optometrists for those persons covered by group health insurance policies," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2552. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-113, "To require the appointment of qualified interpreters for deaf persons in administrative proceedings," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2553. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to Pakistan (Transmittal No. 82-03), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2554. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Pakistan (Transmittal No. 82-04), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2555. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to Pakistan (Transmittal No. 82-05), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2556. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to Pakistan (Transmittal No. 82-06), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2557. A letter from the Secretary of Transportation, transmitting the semiannual report of the Department's Inspector General, covering the period ended September 30, 1981, pursuant to section 5 of the Inspector General Act of 1978; to the Committee on Government Operations.

2558. A letter from the Administrator of Veterans' Affairs, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2559. A letter from the Secretary of Agriculture, transmitting a report on the potential for expansion of U.S. agricultural export markets, pursuant to section 210 of the Agricultural Act of 1980; jointly, to the

Committees on Agriculture and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows;

Mr. BEVILL: Committee of conference. Conference report on H.R. 4144 (Rept. No. 97-345). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. JOHN L. BURTON:

H.R. 5035. A bill to amend the Merchant Marine Act of 1936 as it applies to certain passenger vessels of the United States; to the Committee on Merchant Marine and Fisheries.

By Mr. CRAIG (for himself and Mr. HANSEN of Idaho):

H.R. 5036. A bill to repeal the authority of the President to dispose of silver presently held in the national defense stockpile; to the Committee on Armed Services.

By Mr. CRAIG (for himself and Mr. HANSEN of Idaho):

H.R. 5037. A bill to provide for an adequate supply of silver to the United States in times of national emergency and to provide that excess supplies of silver in the national defense stockpile are disposed of in a manner that minimizes the potential for market disruptions while providing maximum revenues to acquire other stockpile materials that are in short supply; jointly, to the Committees on Armed Services and Banking, Finance and Urban Affairs.

By Mr. DERWINSKI (for himself, Mr. TAYLOR, and Mr. CORCORAN) (by request):

H.R. 5038. A bill to amend title 5 of the United States Code to foster the timely revitalization of the U.S. air traffic control system, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. ERLENBORN:

H.R. 5039. A bill to amend the Fair Labor Standards Act of 1938 to encourage the employment of youth by authorizing a special minimum wage for the limited employment of individuals under the age of nineteen and for the employment of fulltime students; to the Committee on Education and Labor.

By Mr. GUARINI:

H.R. 5040. A bill to provide for the addition of certain lands in the State of New Jersey, comprising the Liberty State Park, to the Statue of Liberty National Monument; to the Committee on Interior and Insular Affairs.

H.R. 5041. A bill to suspend until January 1, 1985, the duty on natural graphite; to the Committee on Ways and Means.

By Mr. HOWARD (for himself and Mr. CLAUSEN):

H.R. 5042. A bill to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers; to the Committee on Public Works and Transportation.

By Mr. HUGHES (for himself, Mr. RODINO, Mr. MCCLORY, Mr. SAWYER, and Mr. SAM B. HALL, Jr.):

H.R. 5043. A bill to amend title 18, United States Code, to authorize the Attorney General of the United States to enforce certain laws applicable with respect to firearms, to provide for certain offenses involving the use of fire, and for other purposes; to the Committee on the Judiciary.

By Mr. LAFALCE:

H.R. 5044. A bill to amend the Currency and Foreign Transactions Reporting Act to provide for more efficient enforcement of the provisions of such act by making it illegal to attempt to export or import large amounts of currency without filing certain reports; to the Committee on Banking, Finance and Urban Affairs.

H.R. 5045. A bill to amend the Currency and Foreign Transactions Reporting Act to allow U.S. Customs officials to search for currency in the course of their presently authorized search for contraband articles; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

H.R. 5046. A bill to amend the Currency and Foreign Transactions Reporting Act to allow U.S. Customs officials to search for currency in the course of their presently authorized search for contraband articles; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

H.R. 5047. A bill to amend the Currency and Foreign Transactions Reporting Act to allow U.S. Customs officials to search for currency in the course of their presently authorized search for contraband articles; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

H.R. 5048. A bill to amend the Currency and Foreign Transactions Reporting Act to authorize the payment of compensation to informers; to the Committee on Banking, Finance and Urban Affairs.

H.R. 5049. A bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children and other specified individuals; to the Committee on the Judiciary.

By Mr. HUNTER (for himself and Mr. DUNN):

H.R. 5050. A bill to impose parity fees on automobiles imported into the United States from Japan; to the Committee on Ways and Means.

By Mr. LOTT:

H.R. 5051. A bill to designate the New Intermediate Care and Rehabilitation Medicine Building located in Biloxi, Miss., as the "William B. Sheppard Building"; to the Committee on Veterans' Affairs.

By Mr. MCEWEN:

H.R. 5052. A bill to amend title II of the Social Security Act to suspend the payment of benefits thereunder to inmates of penal institutions; to the Committee on Ways and Means.

By Mr. MOORE (for himself and Mr. CONABLE):

H.R. 5053. A bill to amend the Internal Revenue Code of 1954 to clarify the provisions relating to exempt-interest dividends paid by regulated investment companies; to the Committee on Ways and Means.

By Mr. PURSELL:

H.R. 5054. A bill to encourage on-the-scene emergency care aboard aircraft by relieving licensed medical personnel and air carrier employees from civil liability for damages resulting from any act or omission in rendering such care; to the Committee on the Judiciary.

By Mr. RAHALL (for himself, Mr. BLILEY, Mr. APPLEGATE, Mr. KOGOVSEK, Mr. MURPHY, Mr. PERKINS, Mr. BAILEY of Pennsylvania, Mr. SYNAR, Mr. DANIEL B. CRANE, Mr. YOUNG of Alaska, Mr. MOLLOHAN, and Mr. STATON of West Virginia):

H.R. 5055. A bill to provide for an accelerated study of the causes and effects of acid rain, to provide for an examination of certain acid precursor control technologies, and for other purposes; jointly, to the Committees on Energy and Commerce and Science and Technology.

By Mr. ST GERMAIN:

H.R. 5056. A bill to amend title 5, United States Code, to allow ex-service members who voluntarily leave military service to receive unemployment compensation; to the Committee on Ways and Means.

By Mr. STOKES (for himself, Mr. EDGAR, Mr. FORD of Tennessee, Mr. FITHIAN, Mr. MCKINNEY, and Mr. FAUNTROY):

H.R. 5057. A bill to amend title 18 of the United States Code to carry out the recommendations of the House Select Committee on Assassinations of the 95th Congress, and for other purposes; jointly, to the Committees on the Judiciary, House Administration, and Rules.

By Mr. TRIBLE:

H.R. 5058. A bill to suspend the duty on 1,6-Hexamediol until July 1, 1985; to the Committee on Ways and Means.

By Mr. WRIGHT (for himself, Mr. ANNUNZIO, Mr. BARNARD, Mr. BEVILL, Mr. BIAGGI, Mr. BONER of Tennessee, Mrs. CHISHOLM, Mr. COELHO, Mrs. COLLINS of Illinois, Mr. DAN DANIEL, Mr. DERWINSKI, Mr. DIXON, Mr. DWYER, Mr. FASCELL, Mr. FIELDS, Mr. GOODLING, Mr. SAM B. HALL, Jr., Mr. HUGHES, Mr. LANTOS, Mr. MATTOX, Mr. MINETA, Mr. MURPHY, Mr. NELSON, Mr. OTTINGER, Mr. PEPPER, and Mr. ROSENTHAL):

H.R. 5059. A bill to amend the Internal Revenue Code of 1954 to allow an individual a credit against income tax for any taxable year during a limited period of years after the individual attains age 65 if the individual is eligible to retire on social security, but does not retire, during such year; to the Committee on Ways and Means.

By Mr. YOUNG of Missouri:

H.R. 5060. A bill to provide for the reconstruction and rehabilitation of the Martin Luther King Bridge over the Mississippi River connecting the cities of St. Louis, Mo., and East St. Louis, Ill., and for other purposes; to the Committee on Public Works and Transportation.

By Mr. FOGLIETTA:

H.R. 5061. A bill to name the social security building in Philadelphia, Pa., known as the Mid-Atlantic Program Service Center, the "William A. Barrett Social Security Building"; to the Committee on Public Works and Transportation.

By Mr. STUDDS (for himself, Mr. ZABLOCKI, Mr. FOUNTAIN, Mr. FASCELL, Mr. BINGHAM, Mr. YATRON, Mr. SOLARZ, Mr. BONKER, Mr. BARNES, Mr. WOLPE, Mr. SHAMANSKY, Mr. GEJDENSON, Mr. DYMALLY, Mrs. FENWICK, Mr. DORNAN of California, Mr. LEACH of Iowa, and Mr. MICA):

H. Con. Res. 225. Concurrent resolution with respect to the scheduled Presidential elections in Honduras; to the Committee on Foreign Affairs.

By Mr. YATRON (for himself, Mr. FASCELL, Mr. ROSENTHAL, Mr. BINGHAM, Mr. SOLARZ, Mr. BONKER, Mr. STUDDS, Mr. BARNES, Mr. WOLPE, Mr. SHAMANSKY, Mr. GEJDENSON, Mr. DYMALLY, Mr. GILMAN, and Mr. LEACH of Iowa):

H. Con. Res. 226. Concurrent resolution expressing the sense of the Congress that the President should press for unconditional discussions among the major political factions in El Salvador in order to guarantee a safe and stable environment for free and open democratic elections; to the Committee on Foreign Affairs.

By Mr. McEWEN:

H. Res. 281. Resolution to lower and stabilize interest rates; to the Committee on Banking, Finance and Urban Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. WRIGHT:

H.R. 5062. A bill for the relief of the estate of Samuella Frelich Simon; to the Committee on the Judiciary.

By Mr. MAZZOLI:

H. Res. 282. Resolution opposing the granting of permanent residence in the United States to certain aliens; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3046

By Mr. ANDREWS of North Carolina:

—Page 5, beginning on line 21, strike out "striking" and all that follows through line 23, and insert in lieu thereof the following: Inserting before the period at the end thereof the following: ", $200,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984".

Page 7, beginning on line 16, strike out "inserting" and all that follows through line 21, and insert in lieu thereof the following: Striking out "and," and by inserting after "1981" the following: ", $306,000,000 for fiscal year 1982, and such sums as may be

necessary for each of the fiscal years 1983 and 1984,".

Page 7, beginning on line 23, strike out "inserting" and all that follows through page 8, line 3, and insert in lieu thereof the following: Striking out "and", and by inserting after "1981" the following: ", $319,100,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984,".

Page 8, beginning on line 5, strike out "inserting" and all that follows through line 10, and insert in lieu thereof the following: Striking out "and," and by inserting after "1981" the following: ", $60,000,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1981 and 1984,".

Page 11, line 2, insert after "services" the following: (except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts)

Page 14, line 24, insert after "institution" the following: (except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts)

Page 18, line 4, insert before the period the following: (except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts)

Page 19, line 21, strike out "$45,000,000" and insert in lieu thereof "$23,200,000".

Page 22, line 5, strike out "inserting before" and insert in lieu thereof "striking out".

Page 22, line 6, insert "and inserting in lieu thereof" after "thereof".

Page 22, line 6, strike out "$350,000,000" and insert in lieu thereof "$277,100,000".

Page 22, beginning on line 7, strike out ", and" and all that follows through line 8, and insert in lieu thereof the following: (in accordance with the provisions of section 606(b)(1)(A) of the Omnibus Budget Reconciliation Act of 1981), $293,726,000 for fiscal year 1983 (in accordance with the provisions of section 606(b)(1)(A) of the Omnibus Budget Reconciliation Act of 1981), and such sums as may be necessary for fiscal year 1984. Amounts authorized for fiscal years 1982 and 1983 also shall include the additional sums specified in section 606(b)(1)(B) of the Omnibus Budget Reconciliation Act of 1981.".

Page 23, line 15, strike out "$6,000,000" and insert in lieu thereof "$6,500,000".

Page 23, beginning on line 15, strike out "$6,400,000" and all that follows through "year" on line 16, and insert in lieu thereof the following: and such sums as may be necessary for each of the fiscal years 1983 and

Page 25, line 10, insert before the period the following: (except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts)

Page 27, strike out line 16 and all that follows through page 28, line 2, and insert in lieu thereof the following:

"SEC. 29. The appropriation of funds for fiscal years 1982, 1983, and 1984 to carry out title II of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5001 et seq.) shall be made in accordance with the authorizations of appropriations contained in the amendments made by section 607(b) of the Omnibus Budget Reconciliation Act of 1981."

Mr. TRAXLER:

—Page 12, after line 2, insert the following new paragraph (and redesignate the subsequent paragraphs accordingly):

(2) in paragraph (4) thereof—

(A) by inserting "(A)" after "including";

(B) by inserting "(i)" after "designed";

(C) by striking out "or" and inserting in lieu thereof "; (ii)"; and

(D) by adding at the end thereof the following: "or (iii) to prevent unlawful entry into residences of older indiividuals, through the installation of security devices and through structural modifications or alterations of such residences; and

(B) the provision of security personnel who would be responsible for maintaining and monitoring security systems and for otherwise providing security against unlawful entry into residence of older individuals;".

SENATE—*Thursday, November 19, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

"O beautiful for spacious skies, for amber waves of grain; for purple mountain majesty, above the fruited plain. America, America, God shed His grace on thee; And crown thy good with brotherhood from sea to shining sea."

We are profoundly grateful, God of our fathers, for the bounty Thou hast lavished upon our land and people. Thou hast preserved us through many domestic and international crises. Thou hast blessed our Nation as no other in history. Thou hast ordained human government as "ministers of God for good."

We thank Thee especially for this Government, conceived in the hearts and minds of our founders as a "government of the people, by the people, for the people." Enable this Government to fulfill in these days the mandate given it by the Constitution. Give to the Senators and all who bear responsibility for the conduct of their affairs, wisdom, and grace to find the way of justice, virtue, and peace in these troubled times. We ask this in the name of Him whose love is without measure. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings to date be approved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

TIME TO LIFT THE FEDERAL EXECUTIVE PAY CAP

Mr. STEVENS. Mr. President, the editorial page of two of the Nation's leading newspapers have urged congressional support of my amendment to lift the executive pay cap. This is realistically our last chance to remedy this problem for the next 2 years. I know for a fact that if we do not adjust these salaries now, there will be a new flood of early retirements and premature resignations from all departments and agencies of the Government.

I am particularly concerned, as chairman of the Defense Appropriations Subcommittee, about the information that has been provided to me by the Defense Department. We now have two thick folders, which I shall bring to the floor later today, with the statistics showing the tremendous vacancy rate that has occurred in the Department of Defense since the pay cap was imposed. This has led, as I have indicated, to premature retirements and unfortunate resignations from key positions in the Department of Defense.

Mr. President, I have been given a chart which sets forth 10 management levels of people who receive the same salary. This is literally one of those organizational charts that shows the route of promotion. Unfortunately, it is not the type of chart we can reproduce in the CONGRESSIONAL RECORD, but it demonstrates that a person who is at the level of GS–14, step 10, would have no financial incentive whatsoever to accept the additional responsibilities of moving up nine additional grades in the Department of Defense.

Mr. President, the impact of this situation is that those people who are in a position such as I just described, knowing that there is no hope for additional compensation but recognizing there will be increased pressure to take on additional responsibilities, have retired prematurely or have resigned and left a staggering number of vacancies in the Department of Defense.

We now face literally a brain drain as far as the executive branch is concerned unless we remedy this problem.

The solution is simple, Mr. President. The Senate has passed this amendment now three times. I am hopeful that the Senate will again pass it today and that we may find a way to convince our colleagues in the other body that we should grant the modest rate of increase. The amendment is really a cost-of-living adjustment, not a salary increase to the senior executives in order to stem this flow of trained executive talent from the Federal Government.

Mr. President, I ask unanimous consent that the two editorials, one from the New York Times, entitled "The Top Officials Need a Raise," and the second from the Washington Post, entitled "Free the Federal Hostages," be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 18, 1981]

THE TOP OFFICIALS NEED A RAISE

In the parlance of the moment, Congress ought to get off the backs of senior Government officials. It needs once and for all to eliminate the link between their salaries and its own.

Increases in the top-level executive grades are urgent. Since 1977 the pay of the highest Federal officials has been raised 5.5 percent; other white-collar Federal employees meanwhile had raises that total 33.5 percent. That means more than 48,000 employees' pay has been leveled flat, eliminating distinctions between managers and those they manage.

That is no way to run a Government or hold superior talent. With executive pay now capped at $50,112 a year, senior managers are fleeing Federal service. Programs in health, education and space exploration seem typically hard hit. Whereas 15.5 percent of eligible executives retired in 1978, the current rate is above 90 percent. Replacing them is no easier than holding them.

The problem is rooted in politics. To camouflage its own pay raises, Congress over the years contrived to link its salary scales to those of the top people in the judicial and executive branches. But it also prohibited almost all of these officials from earning more than a member of Congress.

Now the cost of that folly is coming home. The legislators are embarrassed to raise their own pay while they cut most Federal budgets. And so some of the best talent in Government is deprived and driven away.

The House debate of the issue is not promising; it turns on a bill that would merely extend the cap for another year. The case for a fundamental change has never been stronger. But if that is rejected, Congress should at least provide some relief, by approving a proposal in the Senate to give senior executives an immediate 4.8 percent increase.

A decent raise would surely pay for itself in efficiency and morale. Federal executives deserve it, and so does the nation.

[From the Washington Post, Nov. 19, 1981]

FREE THE FEDERAL HOSTAGES

Congress has another chance today to do right by top federal officials. Sen. Ted Stevens, chairman of the civil service subcommittee, will be urging the Senate to raise the cap on federal executive salaries as part of the spending bill Congress must complete today to keep federal funds flowing.

We have heard from all sides that the problem of pay compression at the top levels of civilian and military pay is causing a massive loss of scarce talent. Pentagon officials are especially alarmed at the loss of technical and administrative personnel to high-paying defense contractors. Early retirements among federal executives in all agencies have reached such alarming proportions—over 95 percent of those newly eligible to retire are now doing so, compared with only 17 percent five years ago—that the General Accounting Office recently estimated that lifting the pay cap could actually save the government money because of reduced pension costs.

While other factors may contribute to this exodus, the pay cap must be a major contributor. Federal executives now earn only 5.5 percent more than they did five years ago. Over the same period, private-sector executive salaries rose 40 percent and cost-of-living adjustments pushed up federal pensions by 55 percent. For those who have stayed behind, the cap has caused severe management and morale problems. Pay increases at lower grade levels have forced more and more workers up against the pay

ceiling. At the moment there is nothing beyond self-esteem to motivate workers to accept the added duties and pressures associated with a promotion within the top five civil service levels.

The Stevens amendment would not remove the pay cap entirely. It would, however, improve the competitiveness of top federal salaries somewhat and restore some incentive for promotion at the top grade levels. For several years now, Congress has held federal officials hostage to its own reluctance either to take the heat for raising congressional pay—to which federal pay is now tied—or allow federal executives to earn more than congressmen. Whatever the merits of a congressional pay raise—and there are many separate factors involved in that matter—it is time for Congress to release its federal hostages.

AN AWFULLY GOOD SPEECH BY THE PRESIDENT

Mr. BAKER. Mr. President, yesterday, President Reagan launched a historic agenda for achieving strategic arms reductions in Europe.

As I stated on the floor yesterday, I was most pleased with the bipartisan support that the President's speech received in the Senate Chamber, especially the astute and gracious analysis given by my good friend the distinguished minority leader.

This morning in the Washington Post, an editorial titled "Europe's Turn," comments on the President's remarks. It begins:

The President gave an awfully good speech yesterday. He was well prepared, forceful and he made a lot of sense. Serious people in this country, in Europe and in the Soviet Union ought to study his message.

Mr. President, I ask unanimous consent that the entire editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

EUROPE'S TURN

The President gave an awfully good speech yesterday. He was well prepared, forceful and he made a lot of sense. Serious people in this country, in Europe and in the Soviet Union ought to study his message.

What the president did was to put the United States into a negotiating position on the critical issue of the military balance in Europe and, by extension, in East-West relations overall. This is more than a public relations stunt, though an appeal to public opinion is vital to the diplomacy practiced by democratic countries. It is a serious effort to stabilize relations with the Soviet Union.

In content, Mr. Reagan's speech followed closely the NATO deploy-and-negotiate decision of 1979. Previously, the United States had held off approaching the table lest the spectacle of negotiation undercut an ambivalent Europe's support for deployment of new missiles to match the new Soviet SS20s. But it was finally decided to start talks promptly in an attempt to limit further public unraveling. Either way, European public opinion would hardly have stayed still. With talks begun, however, the United States can fairly say it is abiding faithfully by the terms of the NATO deal.

In the talks due to start Nov. 30 the president said he will offer to halt the new NATO deployment if the Soviets dismantle the daily growing force of new SS20s trained on Europe, and the older missiles for which the 20s are a replacement. Soviet President Leonid Brezhnev told a West German audience recently that that was not good enough. American "forward-based systems" (airplanes and sub-launched missiles) of intermediate range and the British and French independent nuclear deterrents must also be on the table, he declared. That's what the negotiation will be about.

How will it come out? That will depend in the first instance on the temper of the Europeans. Each great power is playing to them. The Soviets, as they observe the European "peace movement," may be sorely tempted to play to it in the hopes that eventually NATO will have to reduce or call off the new deployments without Moscow's having to make any concessions in return. No one can say confidently that this will not happen. The Europeans, however, have to ponder what then might result.

Ronald Reagan has just made a genuine and unthreatening commitment to the Atlantic Alliance. He has laid out a basis on which American support for European security can be sustained indefinitely, and he has put forward a respectable position from which to launch a serious negotiation. It is not for any American, however, to define Europe's concept of its own security. Europeans must decide for themselves whether it is better to respond or not—on the double track on which they insisted—to the new Soviet missile force and to the political purpose represented by that force. In brief, Mr. Reagan has returned the question of Europe's security to the only place where it can finally be answered: Europe.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The acting minority leader is recognized.

Mr. CRANSTON. Mr. President, I reserve the remainder of our time. I am prepared to yield it back if the acting majority leader wants to do the same.

ORDER OF PROCEDURE TODAY

Mr. STEVENS. Mr. President, I am likewise prepared to make the same motion. It is my understanding that the distinguished Senator from Delaware (Mr. BIDEN) has a special order for 15 minutes and that, following his special order, there will be a period for the transaction of routine morning business not to extend beyond 10:30 this morning. Is that correct?

The PRESIDENT pro tempore. The acting majority leader is correct.

Mr. STEVENS. Mr. President, before I yield back my time, I again call the attention of those Senators who are listening to the proceedings in their offices that, at 10:30, the Senate will begin consideration of Senate Joint Resolution 115, a resolution to approve the President's recommendation for a waiver of law pertaining to the Alaska Natural Gas Transportation Act of 1976. This is a measure that is of substantial importance to me because of its impact on my State. In addition, this legislation will significantly influence the attractiveness of the Alaska natural gas transportation system project which will provide domestically produced energy to people across the country. I hope that those Members who are interested will be alert to the fact that there is a 1-hour time limitation under the law for the consideration of this resolution and that there will be a vote by the Senate on the President's request for approval of the waiver package at 11:30 this morning.

Mr. President, I yield back the remainder of my time.

Mr. CRANSTON. Mr. President, I yield the remainder of my time to the distinguished Senator from Delaware.

RECOGNITION OF SENATOR BIDEN

The ACTING PRESIDENT pro tempore. The Senator from Delaware is recognized.

Mr. BIDEN. I thank the distinguished acting majority and minority leaders.

THE PRESIDENT'S FOREIGN POLICY ADDRESS

Mr. BIDEN. Mr. President, I wish to express my opinion of the statement of President Reagan yesterday with regard to nuclear arms policy and to comment further on U.S. foreign policy and NATO.

Yesterday, the President spoke before the National Press Club and issued a significant declaration of policy concerning American goals in East-West negotiations concerning the Soviet Union. The President enunciated a U.S. position in four areas: First, the area of nuclear weapons in Europe; second, strategic nuclear systems; third, conventional forces in Europe; and fourth, special measures to enhance East-West stability which might be agreed upon in the Conference on Disarmament in Europe which is now being planned during the CSCE talks in Madrid. Of these four, the only truly new U.S. proposal concerns nuclear weapons in Europe and was clearly aimed less at the Kremlin than at public opinion among our NATO allies.

Although the President referred to a long history of the North Atlantic Alliance and the valuable purpose it has served, he did not give detailed attention to recent events within that Alliance which have been disturbing the leaders on both sides of the Atlantic. I wish, therefore, to take this opportunity to place the President's statement in the context of the last 9 months.

During the Presidential campaign in 1980, candidate Ronald Reagan and other Republicans who did not take umbrage at the Republican platform took considerable issue with President Carter's administration's handling of relations with our democratic partners in Western Europe. The United States, they charged, was losing the confidence of its NATO allies and without a doubt, this indictment held some truth. American leadership had, indeed, come into question.

Unfortunately, the analysis offered by President Carter's political opponents was somewhat flawed, in my opinion:

and by acting upon this flawed recollection of the 4 years of the Carter administration, they managed during the Reagan administration s first 10 months to inflict more damage upon the Atlantic Alliance than any which occurred in the previous 4 years.

There is no question that Mr. Carter's Presidency had numerous European critics, not the least of whom was Chancellor Schmidt, who, on several occasions, for several hours at a time, bent my ear about why my President was not a strong President. But their critique of President Carter centered far more on technique than on substance, more on competence than on goals.

For example, on U.S. energy policy—so important to the world economy—it was the Carter failure to win congressional support that caused European complaint. On human rights, it was the Carter administration's aggressive moralism, which many Europeans thought counterproductive.

In NATO's defenses, it was the sudden and contentious American stress on percentage-annual-increases in expenditures, which overlooked the superior allied record of the previous decade. On SALT, it was the Carter team's impetuous proposal of deep cuts, which served only to delay negotiating progress, and later President Carter's inability to achieve the SALT II ratification that West Europeans overwhelmingly supported. In each of these Carter efforts—to intensify American energy production and conservation, to enhance human rights internationally, to bolster NATO's military strength, and to achieve nuclear arms limitation—it was primarily a concern about results, not about Mr. Carter's priorities or policy aims, that generated doubt in Allied Governments.

To so describe President Carter's transatlantic problems is by no means to minimize them. Indeed, by the time of our election in late 1980, it was preeminently clear that NATO's most urgent need was a new surge of confidence in American leadership. In an uncertain world—with the Soviets in Afghanistan, Poland in turmoil, SALT II still unratified, and East-West relations in decline—a reassuring demonstration of U.S. strength, wisdom, and reliability had become the obvious imperative—an imperative that many of our allies and leaderships in Western Europe doubted Mr. Carter could fulfill.

THE CLAIM OF COMPETENCE AND COHERENCE

Sadly—both for the United States and for the Western democratic alliance—no such display has been forthcoming in the last administration; and I respectfully suggest that none has been forthcoming from this administration. Arriving in office, the Reagan administration boldly promised a foreign policy characterized by competence and coherence. But as yet it has supplied little of either, relying instead on a confused but belligerent rhetoric that has accomplished nothing other than to exacerbate the problem of confidence among America's allies.

Guiding the Reagan administration has been the simplistic premise that virtually every world problem can be traced to Soviet malfeasance. Soon after the President's inauguration, this notion prompted administration officials to cast tiny El Salvador, in its revolutionary strife, as a major cockpit of East-West confrontation and to summon our allies to join the battle. Then, turning to the Middle East, the administration quickly misled itself into believing that the clarion call for a "strategic consensus" would somehow work the magic of replacing that region's multiple and deep-seated conflicts with a single-minded anti-Soviet alliance. In each case, America's European partners—themselves quite familiar with the Third World's complexities—could only watch with bewilderment, wondering how such bizarre policy prescriptions met the administration's proclaimed standard of competence.

Meanwhile, still other administration actions erased even the pretense of foreign policy coherence. To be sure, Reagan officials have talked a consistently tough anti-Soviet line. But our NATO allies have been hard-pressed to reconcile American words with American deeds.

In the area of East-West trade, for example, the administration continues to express grave reservations about current plans for a major pipeline that would funnel Soviet natural gas to Western Europe—as, I might add, I do, also.

Yet, without even a bow in the direction of intra-alliance consultation, the President suddenly resumed massive U.S. grain sales to Russia, thereby reversing in a stroke the Carter administration's most significant anti-Soviet policy.

How, our allies have asked, could West European purchases of natural gas offer greater benefit to the Eastern bloc than the demonstrated U.S. willingness to fill the Soviet Union's enormous annual shortfall in food production?

I point out that the Soviets are still in Afghanistan, things in Poland are not much better, and we continue to lecture our NATO allies about how we want to be tough with the Soviets.

How, we ourselves must ask, could we now, having so capriciously dropped our sanctions for the Soviet invasion of Afghanistan, expect future allied cooperation in applying serious and sustained sanctions if the Kremlin intervenes in Poland?

The issue of coherence reaches to the military realm as well. In his decision on MX missile deployment, the President obviously took serious account of citizen opposition to certain proposed basing modes. Yet on what grounds, the allies have wondered, has the Reagan administration treated so gingerly with public concern in the United States but so disdainfully with comparable discontent about new missile deployments among a West European populace which already lives amidst the densest concentration of nuclear weapons in the world?

Put another way, how do we explain that we are not going to base a missile system we say is essential to our security out in the southwestern desert of the United States of America because of citizen opposition and then, somehow, fail to understand that there is some reason why the Europeans would be a little upset about the placement of weapons in their area of the world? It is a little like placing the MX system in New York City or placing it in Washington, D.C., or placing it on the east coast.

In sum, since the administration is demonstrably capable of accommodating its anti-Soviet doctrine to political and economic considerations here in America, by what standard can we chastise our allies for contemplating the same? Can we really expect our NATO partners to rally to a policy which has been not only unpersuasively simplistic in theory, but also has appeared hypocritically incoherent in practice?

As if such questions were not difficult enough, the administration's foreign affairs team has still further undermined the image of either competence or coherence in its first few major statements. During the 1980 campaign, taking note of reported discord between Secretary of State Vance and Presidential Security Adviser Brzezinski, Candidate Reagan gave assurance that his administration would speak with a single voice. But in practice the Reagan players have provided a public theater of acrimonious backbiting that makes the Carter chorus seem in retrospect almost a paragon of adroitly orchestrated harmony. Understandably, our allies have not been reassured by this one unfortunate element of continuity in American foreign policy.

THE EUROPEAN "DISEASE"

Following the recent wave of protest demonstrations in West European capitals, American concern has focused on the upsurge of antinuclear sentiment among our allies.

A tempting response—one already voiced by certain pundits—is to accuse our European partners of having lost their will, of being infected by a sickness of the spirit that blinds them to the realities of the Soviet threat and their long-term security interests. By this newly fashionable assessment—that the European trend is toward pacifism, neutralism, and anti-Americanism—obscures more truth than it conveys. Western Europe today has not been gripped by a philosophy of either pacifism or neutralism; on the contrary, a powerful allied consensus continues to support the principle of collective military defense. Nor are there signs of any significant growth in European feeling against America—or, more particularly, against U.S. troops in Europe.

What understandably has arisen, however, is an unprecedented level of European doubt about American leadership in the conduct of East-West relations. Indeed, what began as a murmur of allied disappointment with Carter has become, during the brief tenure of Pres-

ident Reagan, a shout of European disillusionment.

The reasons for this hemorrhage in allied confidence are hardly obscure.

The Reagan administration arrived in office having convinced itself, at least partly, through an intoxication with its own campaign rhetoric, that our NATO allies were quietly, but deeply yearning for the United States to mount a bold, determined, and comprehensive anti-Soviet campaign.

Unfortunately, this premise derived far more from the psychological desire to heal the sting of defeat in Vietnam than from any serious analysis of our allies' priorities or of NATO security needs. As a result, wishful thinking produced a half-truth that has been a distorted guide to alliance leadership.

There is little doubt that America's allies do welcome the renewed U.S. commitment to military defense. Contrary to popular impression, European defense budgets—unlike our own—rose substantially during the decade of the 1970's. And when the U.S. decline was eventually reversed, first by the Carter administration, and even more sharply by President Reagan, the alliance response was plainly positive.

But the allies find scant virtue—and considerable futility—in an American quest to regain the strategic military superiority which the United States enjoyed for a relatively brief period following World War II. Today, in the prevailing European view, the wisest goal of Western military spending is to maintain a sound military balance—first, to deter aggression, but also to provide a stable basis for constructive East-West negotiation that can enhance our collective security even further.

This two-dimensional approach—a security strategy aiming for defense and détente—was in fact formally and unanimously endorsed by NATO governments more than a decade ago and has remained alliance doctrine ever since. Although the benefits of détente have predictably been limited, the doctrine itself has proven serviceable, both as a guide to collective action and as the centerpiece of a solid allied consensus. In contrast, the recently voiced U.S. aim of recapturing military superiority appears to many Europeans as a sudden, misguided manifestation of American nostalgia, which could—by stimulating an arms race and impeding East-West negotiations—have the consequence of actually decreasing the security it is NATO's purpose to provide.

The lightning rod for European anxiety has been the December 1979 alliance decision to modernize NATO long-range theater nuclear forces—LRTNF—and simultaneously to seek East-West limits on such weaponry through United States-Soviet negotiations. In the minds of alliance planners, a combination of factors necessitated this "dual track" decision as it is known. First, the advent of superpower parity in strategic—or central—systems has heightened the importance of military balance within the European theater, which does not exist now because the Soviets have a superior capability in the theater. It must be redressed.

Second, the reliability of NATO's existing LRTNF—U.S. F–111's and British Vulcan bombers based in the United Kingdom—has declined as those systems approach obsolescence while Soviet air defenses have improved considerably.

Third, Soviet LRTNF capabilities have meanwhile been increased by the addition of new SS–20, Backfire bombers, and other modern systems. NATO thus perceived an adverse shift in the European balance just as that balance had acquired added significance. By its commitment to modernize LRTNF, NATO officials reasoned, the alliance could insure the retention of all rungs on its ladder of graduated response—thereby maintaining the strategic coupling of Europe and the United States—and also induce the Soviets, whose LRTNF modernization is well underway, into negotiating mutual limits on theater systems, analogous to SALT ceilings on central systems, or put even more simply, the Soviets were gaining the significant edge in Europe and the alliance agreed that unless they dismantled their efforts we were going to move forward with our effort to modernize our weaponry. But we agreed that we would attempt both. We would move forward while we talked. Although the alliance decision had a clear internal logic, it was also clear from the outset that European public opinion would meet the plan with at least some measure of resistance. And that should not surprise us. I have not heard anyone in America suggest that the people of Utah are pacifists, nor do I suggest that. Nonetheless, we have met with some resistance toward the idea of placing the MX missile system in that area. The same kind of resistance is met in European quarters. For years. NATO's relatively constant nuclear posture remained in the shadows of public consciousness. But the Carter administration's experience with the enhanced radiation warhead in 1977 revealed a new political fact. And I might add the Carter botch of the enhanced radiation weapons systems further revealed a new political fact.

In a resurgent Europe—with a young generation not yet acclimated, like its predecessor. to the mind-boggling assumptions of what Churchill called the "balance of terror"—a proposed change in nuclear weaponry, even if intended to enhance deterrence and prevent war could quickly raise a storm of protest. Indeed, had President Carter not suspended the ERW decision in 1978, anti-nuclear sentiment in the Low Countries might well have risen to the point of blocking the unanimity needed for NATO's more crucial LRTNF decision of December 1979.

When the LRTNF decision, once taken, caused antinuclear feelings to coalesce again, the movement's emotional appeal gained impetus from reasonable questions: Does NATO's proposed modernization, by introducing new Pershing missiles able to hit Soviet territory within 6–8 minutes, represent a provocative and destabilizing increase in alliance capabilities?

My answer is no, but nonetheless you can expect the Europeans to ask the question.

The second question asked is: Why not deploy any new systems at sea, thereby minimizing both military and civilian vulnerability? Another question raised was: Should not NATO try the negotiating track first, before deciding on new deployments?

All of these questions are legitimate to be asked.

For alliance officials who had participated in the NATO decision and were prepared to defend it—particularly, the leaders of West Germany's ruling coalition—such questions had persuasive answers. They soon realized, however, that a sustained and patient dialog with their publics would be necessary. With SALT II effectively blocked in the U.S. Senate and East-West relations deteriorating after the Soviet invasion of Afghanistan, the profound reluctance of West Europeans to return to the cold war was expressing itself through opposition to the apparent danger of a nuclear arms race in Europe.

Against this background the Reagan administration took office bearing a serious burden of responsibility. Not without reason, candidate Reagan and his colleagues were perceived by Europeans as personifying not only American opposition to SALT II but also a spirit of erratic bellicosity. The very fact of the Reagan election thus intensified allied doubt that the United States would proceed in good faith on the LRTNF negotiating track or in other avenues of East-West negotiation. To win European confidence thereby posed for the new administration its central challenge of alliance leadership.

Ten months later, unfortunately, no such victory has been won. Initially, the appointment of Secretary Haig, a former NATO commander, provided the allies some reassurance. Since then, however, Reagan officials—expressing contempt both for the Soviet leadership and for the dangers of a new nuclear arms race—have seemed almost at pains to foster European anxiety about American prudence in the conduct of East-West relations. A particularly blatant disregard of allied sensitivities was evident when the administration announced in August, again without intra-alliance consultation, its intention to proceed with the already controversial ERW.

Then, as if to insure a negative impact in Europe, Reagan officials followed up with an extraordinary outbreak of foot-in-mouth speculation about the possibility of confining a nuclear war to European soil—causing one West German leader to wonder aloud if Washington had actually decided to assist the European peace movement. Meanwhile, Chancellor Schmidt, whose efforts to support NATO's LRTNF decision have been seriously undermined by the administration's cavalier behavior, now finds in the European mood a politically destabilizing rise of "angst, concern, and fear."

This atmosphere developed as a consequence of administration statements that we were going to manufacture the

neutron bomb, that we could set off demonstration nuclear strikes in Europe—we have not figured out where that could be done—and that we were going to move forward. The President suggested it was possible to have a tactical nuclear war in Europe without the Soviet Union or the United States being involved. All these utterances by the President of the United States or high administration officials. You can understand why there might be a little anxiety in Europe.

NATO'S UNDERLYING STRENGTH

Those dedicated to NATO's continuing solidarity can only hope that future developments will reverse the current trend. Later this month, United States-Soviet negotiations on LRTNF will finally convene in Geneva; and early next year SALT talks will begin in another room in the same building. Eventually, assuming progress ensues, the two negotiations will merge—in effect if not in fact—into the SALT III talks envisioned when SALT II was originally signed. If and as such progress occurs, the rising tide of European doubt may recede.

As a beginning to this process, the President's speech yesterday constitutes a sound, if belated statement of an American negotiating position on LRTNF.

And the President should be complimented in finally doing that.

For months now, European leaders have argued that NATO should make clear its acceptance—and indeed advocacy—of a negotiating outcome in which neither side would possess long-range theater nuclear forces. The essence of this "zero option" would be NATO's cancellation of its decision to deploy new Pershing II and cruise missiles in exchange for agreement by the Soviets to dismantle some 250 SS-20's recently deployed, as well as some 350 SS-4's and SS-5's which have been in the field for years. Heretofore, U.S. officials have resisted the notion of a "zero option," arguing that its frequent articulation could undermine public support in Europe for the LRTNF deployments to which NATO is committed.

European officials have countered that NATO's failure to give voice to the "zero option" as a goal has meant foregoing the opportunity to underscore, in public debate, that it is Soviet deployment of LRTNF which are the source of current instability and that NATO is simply seeking to respond. As of today, the administration appears finally to have accepted this argument; and the President's speech is obviously designed to demonstrate full U.S. acceptance of the "zero option" before the arrival of President Brezhnev in Bonn, this Sunday, for discussions with Chancellor Schmidt.

While supporting the President's proposal on LRTNF and hoping that it will have some success in allaying West European concern, we must recognize that the proposal represents an effort to solve a problem—of allied confidence—which this administration did much to create. We must also recognize that, even given our best efforts, the "zero option" is an unlikely outcome of negotiations. It may be ironic, considering the administration's reluctance to accept the "zero option" concept, but it is probable that the Soviets will be reluctant as well. To date at least, Soviet statements have insisted that LRTNF negotiations include all theater nuclear delivery systems—not just missiles. Accordingly, the initial Soviet response to the President's speech was negative.

It is therefore almost certain that the LRTNF negotiations will be prolonged and highly complex as the two sides must reach agreement on precisely what weapons are to be limited before numerical limits can even be discussed. Thus, only through a sustained effort will the administration be able to demonstrate its sincere desire to establish LRTNF limits.

As we now await the onset of negotiations, administration officials might be well advised to contemplate the basic strengths of the alliance we all routinely describe as the cornerstone of American security. Just 3 short years ago, the specter of Euro-communism was perceived as threatening alliance solidarity along much of NATO's southern flank. Yet that picture has now brightened remarkably. In Iberia, Spain has followed Portugal in building free institutions and is indeed approaching entry into NATO.

In France, power has passed to a socialist government which shows even firmer commitment to alliance goals than its more conservative predecessor. And in Italy—once the principal focus of concern—Communist strength has receded, while the ruling coalition has provided crucial support for NATO's two-track decision on LRTNF. In each case, the democratic process—which it is NATO's goal to defend—has operated to support the alliance.

Although far from inevitable, such positive developments do offer perspective on NATO's current plight. Today, the question of alliance solidarity has reappeared to the north, but the outcome will—as before—be determined by the democratic process. In West Germany, the Low Countries, and Britain—each engaged in a divisive domestic debate concerning nuclear weapons and national defense—the issue will turn finally on public confidence in existing institutions of collective security. If a majority of citizens in each allied nation remains, as in the past, persuaded of the soundness of NATO's purpose, the alliance will hold.

Helping to buttress such majorities is a perpetual duty of all U.S. administrations and, in light of its performance thus far, an especially pressing responsibility for this one. Earlier this month, reflecting their concern that the Soviets have gained the initiative in the international war of ideas Reagan officials commenced an aggressive counterpropaganda campaign they call "Project Truth." But while truth per se may be fine, such a zealous effort to propagate our own version of it obviously runs two risks: Of compromising our own credibility and, perhaps worse, of deluding ourselves with the nonsense that propaganda is the heart of our problem.

Europe's current nuclear controversy is a pronounced case in point. If many West Europeans have recently come to view the United States as an unreliable and possibly dangerous partner, the explanation lies not in Soviet propaganda but in recent failures of U.S. policy and pronouncement. When Washington gives clear evidence of supplying NATO the true leadership it has been America's historic role to provide—and the President's speech today may represent a beginning—there is little doubt that our democratic partners in Europe will sustain the alliance to which we both belong. If such leadership is not forthcoming, this administration will face the grave charge of having jeopardized not only the solidarity of the alliance but also the security of the United States.

Mr. President, while I have been very critical of the President's policy thus far, I sincerely hope that this echoes not only a change in his attitude toward negotiation but a diminution of the rhetorical excesses that have caused us so much problem in NATO and that this administration will face the grave problem of keeping NATO solid in our own best interests.

Thank you very much, Mr. President. I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 10:30 a.m. That time has arrived.

ACTIVITIES OF THE COMMITTEE ON THE JUDICIARY

Mr. THURMOND. Mr. President, recently, on the floor of the Senate, there was discussion of the work and activities of the Committee on the Judiciary in processing legislation and nominations. For the information of the Senators and public, I am setting forth today a brief summary of the highlights of committee action to date in this first session of the 97th Congress.

First, the Committee on the Judiciary has reported favorably the following major items of legislation which are pending on the Senate Calendar:

First, S. 951, "Department of Justice Appropriation Authorization Act, fiscal year 1982."

Second, Senate Joint Resolution 58, to amend the Constitution of the United States altering Federal fiscal decision-making procedures.

Third, S. 1080, to amend the Administrative Procedure Act to require Federal agencies to analyze the effect of rules to improve their effectiveness and to decrease their compliance costs, to provide for a periodic review of regulations, and for other purposes.

Fourth, S. 114, to establish rational criteria for the imposition of the sentence of death, and for other purposes.

Fifth, S. 537, to aid State and local governments in strengthening and improving their judicial systems through the creation of a State Justice Institute.

Sixth, S. 391, to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying agents, informants, and

sources and to direct the President to establish procedures to protect the secrecy of these intelligence relationships.

Seventh, S. 691, to amend titles 18 and 17 of the United States Code to strengthen the laws against record, tape, and film piracy and counterfeiting, and for other purposes.

Eighth, S. 1700, to establish a U.S. Court of Appeals for the Federal Circuit, to establish a U.S. Claims Court, and for other purposes.

Yesterday, the committee ordered reported S. 1630, the "Criminal Code Reform Act of 1981," and that bill should be on the Calendar about December 2 or soon thereafter.

I point out also that on the Senate Calendar are the following major legislative proposals which are within the jurisdiction of the Committee on the Judiciary:

First, S. 1741, a bill to provide that human life shall be deemed to exist from conception.

Second, S. 1742, a bill to restore the right of voluntary prayer in public schools and to promote the separation of powers.

Third, S. 1743, a bill to insure equal protection of the laws as guaranteed by the 14th amendment to the Constitution of the United States and to deny jurisdiction of the inferior Federal courts to order the assignment or transportation of students and for other purposes.

Fourth, H.R. 3112, to amend the Voting Rights Act of 1965 to extend the effect of certain provisions, and for other purposes.

Of these, the committee has held hearings on bills identical to the first three proposals, and hearings are scheduled on the last bill in January and February of 1982. These hearings should be helpful to the Senate when these measures are considered.

The Senate has also passed and sent to the House of Representatives the following significant bills reported by the Committee on the Judiciary:

First, S. 255, to amend the patent law to restore the term of the patent grant for the period of time that nonpatent regulatory requirements prevent the marketing of a patented product.

Second, S. 816, to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws, and for other purposes.

Third, S. 823, to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, in fabric, yarn, or fiber, and for other purposes.

Fourth, S. 863, to establish a uniform law on the subject of bankruptcies.

Fifth, S. 923, to amend chapter 207 of title 18, United States Code, relating to pretrial services.

Sixth, S. 1365, to amend the Bankruptcy Act regarding farm produce storage facilities, and for other purposes.

The committee has also approved 44 commemorative resolutions and 29 private relief bills, of which 11 have been House measures. Eleven of the private relief bills passed by the committee have become private laws.

Moreover, the committee has reported favorably 108 executive nominations, all of which have been confirmed. Excluding military officers and ambassadors, this number represents approval of far more nominations than considered by any other committee of the Senate; and it also includes the nomination of a Justice of the Supreme Court.

Although we are still not yet half way through this Congress, the following measures under jurisdiction of the committee on the Judiciary have become public laws:

First, S. 840, to extend authority provided under the Justice Department Authorization Act of 1980, until October 1, 1981.

Second, H.R. 4603, to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, fiscal year 1980, for a certain period, and for other purposes.

Third, S. 736, to provide for the control of illegally taken fish and wildlife.

Fourth, S. 1033, to grant the consent of Congress to the agreement between the States of North Carolina and South Carolina establishing their lateral seaward boundary.

Fifth, S. 253, to increase the members of the Commission on wartime relocation and internment of civilians.

Two public measures, as follows, are awaiting the President's signature:

First, S. 195, to incorporate the U.S. Submarine Veterans of World War II.

Second, S. 1672, to amend the membership of the U.S. Holocaust Memorial Council from 60 to 65 and for other purposes.

The foregoing statutes do not include the many days of observance and commemorative bills which have also been enacted and are now public law.

Although much remains to be done, the record of the Committee on the Judiciary, thus far in the 97th Congress, is a record for which I commend the members of the committee and of which I believe the Senate can be proud.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Is there morning business? If there is no morning business, it is closed.

WAIVER OF LAW TO EXPEDITE CONSTRUCTION OF THE ALASKA NATURAL GAS TRANSPORTATION SYSTEM

The PRESIDENT pro tempore. Under the previous order, the hour of 10:30 a.m. having arrived, the Senate will now proceed to the consideration of Senate Joint Resolution 115, which the clerk will state by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 115) to approve the President's recommendation for a waiver of law pursuant to the Alaska Natural Gas Transportation Act of 1976.

The Senate proceeded to consider Senate Joint Resolution 115.

Mr. McCLURE. Mr. President, I make a parliamentary inquiry to clarify our situation. Do I understand that Senate consideration of Senate Joint Resolution 115 is governed by the expedited procedures in section 8 of the Alaska Natural Gas Transportation Act of 1976, Public Law 94-586?

The PRESIDING OFFICER (Mr. WARNER). The Senator is correct.

Mr. McCLURE. Mr. President, do I understand further that pursuant to section 8: First, the resolution is not amendable; second, a motion to recommit the resolution is not in order; third, debate is limited to 1 hour; and, fourth, the 1 hour shall be divided equally between those favoring and those opposing the resolution?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLURE. Do I understand——

The PRESIDING OFFICER. If the Senator will indulge me, the Parliamentarian has further advised the Chair that there is an additional stipulation which reads as follows:

It shall not be in order to move to reconsider the vote by which such resolution is agreed to.

Mr. McCLURE. Mr. President, do I understand finally that, therefore, the action of the Senate today is limited by law to agree or disagree to the joint resolution at the end of the debate?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLURE. Mr. President, I thank the Chair for these clarifications.

Mr. President, I rise in support of Senate Joint Resolution 115, a resolution to approve the President's recommendation to Congress regarding the waivers of law necessary to remove the remaining obstacles to the private financing and construction of the Alaska natural gas transportation system (ANGTS). This resolution was reported favorably by the Committee on Energy and Natural Resources by a vote of 14 to 1.

The Alaska natural gas pipeline will open access to proven gas reserves on the North Slope which equal 15 percent of the domestic gas reserves and will deliver 5 percent of our current annual gas consumption to the lower 48 States for a period of 20 to 30 years. Such access and delivery will make a major contribution to our national energy security, the economic growth of America, and certainly our national security.

Also, as the President cabled to Prime Minister Trudeau and noted in his formal transmittal statement, the project is "a symbol of United States-Canadian ability to work together cooperatively in the energy area for the benefit of both countries and peoples—and—this same spirit can be very important in resolving the other problems we face in the energy area."

President Reagan's proposal of October 15, 1981, as stated in the formal transmittal, "is designed to clear away governmental obstacles to proceeding with private financing of this important project." The President's proposal includes in its provisions the provisions of law which he finds constitute obstacles to private financing and waives them as a package. At the same time, the President does not propose to waive broadly all

laws applicable to the project, not to waive each included provision of law totally, without regard to other policies. Rather, the waiver proposal has been formulated carefully to waive the indicated provisions of law as each would be applicable to the project only to the minimum extent necessary, while preserving maximum remaining legal protections for other important policies and principles.

Perhaps what I believe is most important about this specific package is that it will provide a positive opportunity for private financing of the pipeline, rather than require any Federal Government assistance. Legal barriers to gas producer participation in financing the project would be modified to allow such participation, while retaining appropriate safeguards, thus insuring needed equity financing for construction. Also, potential legal impediments to adequate debt financing are modified to increase the security of such investments in the billing arrangements and in needed regulatory predictability.

I am convinced that the combination of these several modifications, which the President found to be necessary under the law "to permit expeditious construction and operation" of the pipeline, will create a reasonable opportunity for negotiation of a viable financing plan, with needed debt and equity for the pipeline. I am also convinced that these modifications, which will be implemented and enforced by the Federal Energy Regulatory Commission (FERC) under strict regulatory procedures, carefully balance the very best interests of this Nation, including gas consumers, participating financial institutions, the participating pipelines, producers, and sponsors, as well as internationally important diplomatic agreements with Canada.

Mr. President, the Energy and Natural Resources Committee has strongly endorsed the thoroughly responsible approach of the President's waiver package, in terms of its formulation and construction, as well as its substance. First, the proposed waiver addresses the several individual provisions of existing law which the President has identified to constitute obstacles to private financing. These several provisions in the aggregate, with such obvious significant close interrelations, in the committee's judgment, should be addressed as a package and should be waived only to the extent and in the manner specified in the President's proposal.

Congress clearly contemplated the necessity for just such action to permit expeditious construction and initial operation of ANGTS, and for that very reason enacted the special procedures in section 8 of the Alaska Natural Gas Transportation Act (ANGTA) to provide this legal framework for the necessary waiver of law.

As chairman of the committee, I have concluded that the President's proposal is completely consistent with that intent and wholly satisfies as a matter of law, those requirements of ANGTA. It is on that legal and policy basis that I believe the committee recommends Senate passage of Senate Joint Resolution 115, the required joint resolution of approval.

Mr. President, at this time, I want to clarify the provision in the waiver package characterized generally as "producer ownership participation." This provision requires the specified finding with regard to any agreement on producer participation which may be approved by FERC. The committee emphasizes that the finding regarding the agreement is based on the FERC review prior to such approval. Once the agreement is approved, there is no further legal requirement for FERC to review activities under the agreement related to the finding.

The import of the "in and of itself" phrase in part (b) of the provision is to emphasize that the FERC review should focus on the terms and conditions of the agreement as it is submitted for review and approval, but not on a continuing review of the actions of the parties under the agreement after approval. The committee understands that the producers will have an ownership role, currently contemplated as a minority equity position, and of course would anticipate that they will seek to protect their interests responsibly under the agreement. The required finding, however, will be conclusive when rendered.

Mr. President, I ask unanimous consent that a letter of November 17, 1981, from Secretary of State Haig and Secretary of Energy Edwards regarding the waiver package be printed in the RECORD at this point. I also ask unanimous consent that an editorial from the Washington Post of November 16, 1981, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF ENERGY,
Washington, D.C., November 17, 1981.

Hon. JAMES A. MCCLURE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCCLURE: On October 15, President Reagan transmitted a proposed waiver of law to the Congress pursuant to Section 8(g) of the Alaska Natural Gas Transportation Act. In his accompanying message, the President reiterated the "critical importance of the project to the energy security of this country" and as a demonstration of cooperation between the United States and Canada.

As you know the Senate Energy Committee has conducted extensive hearings on the proposed waiver of law and received testimony from a broad spectrum of witnesses, including financial experts, and consumers, as well as the project sponsors themselves.

As the Senate now moves toward final consideration on the proposed waiver, we would like to take this opportunity to reiterate several points which we believe are crucial in your analysis of the President's proposal.

1. Access to Alaska natural gas reserves is vital to the Nation's long-term energy security. The 26 trillion cubic feet of proven reserves at Prudhoe Bay comprise about 13 percent of domestic proven gas reserves. Completion of the project also will facilitate exploration and development of an estimated additional 100–200 trillion cubic feet of undiscovered gas in Alaska. It is our conclusion that the ANGTS represents the most realistic option to bring this gas to the lower 48 states.

2. Approval of the waiver will fulfill important U.S. commitments to the Canadian Government. Prior to the decision of the Canadian Government in the summer of 1980 authorizing the export of Canadian gas in support of the early construction of portions of the pipeline system, President Carter sent a letter to Canadian Prime Minister Trudeau underscoring the U.S. commitment to the project and pledging to initiate appropriate action before the Congress to remove legal impediments to the ability of the Canadian sponsors to recover their costs upon completion of the Canadian portion of the system.

This commitment was endorsed by the Congress through the passage of a concurrent resolution in July 1980 stating that the project "enjoys the highest level of congressional support for its expeditious construction and completion." Given these commitments, failure to approve the proposed waiver could have serious repercussions for United States-Canadian relations.

3. The proposed waiver will ensure an equitable balance of the economic risks associated with the project. Given the extensive design and engineering work already completed by the project sponsors, the risk of precompletion billing due to significant construction delays or abandonment is remote. A more substantial risk to consumers is that, in the event of delay or abandonment of the project as a result of congressional inaction on the President's waiver proposal, they will be forced to rely on more costly and unstable supplies of imported oil.

This project represents an important investment in the energy future of this country from which energy consumers will receive substantial long-term benefits. Significant procedural and other safeguards included in the terms of the proposed waiver, as well as in the underlying authority of the Federal Energy Regulatory Commission to review and ultimately to approve the project including the final tariff, will ensure that the interests of consumers remain protected.

4. The President's decision to propose the waiver of law was reached independently of the Administration's ongoing review of natural gas price decontrol. Whatever decision is reached by the President and the Congress on decontrol, the project sponsors will have a range of options to ensure the marketability of Alaska natural gas. The analyses of the various economic studies prepared for the project sponsors and made available to your Committees during the course of the hearings demonstrate that over the life of the project, the cost of Alaskan natural gas will be significantly below the price of alternative fuel supplies under any decontrol plan.

The proposed system will be the largest privately financed project in history. However, for the sponsors to attract significant private capital, they must demonstrate that the gas will be marketable when delivered to the lower 48 states. The proposed waiver is designed to clear away Governmental obstacles which now prevent a true market test of the project.

In his letter transmitting the proposed waiver to the Congress, President Reagan stated that it is critical to the energy security of this country that the Federal Government not obstruct development of energy resources on the North Slope of Alaska. We strongly urge your support for this important national energy project.

With best wishes,

Sincerely,

JAMES B. EDWARDS,
Secretary of Energy.
ALEXANDER M. HAIG, JR.,
Secretary of State.

THAT GIGANTIC PIPELINE

We want to talk to you this morning about your gas bill—not the one you got this month, but the one you'll begin getting in the late 1980s. There's lot of gas underneath Alaska's North Slope, and getting it down here to customers in Washington and throughout the country is going to require the longest, most expensive pipeline ever built.

You need to be aware that the cost will be in the range of $40 billion and that it will ultimately be paid by the consumers who use the gas. But to get this assured supply at a stable price far into the future will be worth the money.

Congress now has to vote on it once again. The original legislation five years ago contained restrictions that turn out to make the financing impossible, and President Reagan has asked Congress to waive them. These waivers are a reasonable compromise with the realities of current conditions in the financial markets, and if Congress were to reject them it would, as a practical matter, kill the whole undertaking.

Rejection would also constitute a gross betrayal of the Canadian government, which has permitted the construction of the line south from Calgary into this country on the explicit promise by the United States that the rest of it would proceed promptly. That line is already in operation.

The effect of the waivers is to shift more of the financial risks of this enormous investment from the lenders to the consumers. But those risks are pretty small. The greater issue is the cost of the gas, compared with that of other fuels. At first, that price is likely to be substantially higher. But as time passes, with inflation and the higher oil prices that most people expect, the balance will change. An analysis for the House Energy Committee concludes that, over 20 years, on average, the Alaskan gas would cost slightly less than the alternative fuels. But it's necessary to acknowledge that there are many uncertainties in the calculation. Should consumers have to bear the brunt of those uncertainties?

The greater threat now is further rapid escalation of oil prices—and the higher they go, the better deal the Alaskan gas will be. If the gas at first is expensive and raises your gas bill, you ought to regard it as an insurance premium for the longer future. Whatever happens abroad, the prices of the Alaskan gas will continue to be set by law and by long-term contract. The shorter Alaskan oil pipeline seemed extravagantly expensive when it was finished, in 1977, at $9 billion. But since then it has saved this country $50 billion in the foreign exchange that it would otherwise have paid for more oil from OPEC. For the same reasons, the gas line serves the interest of both the consumer and national security.

Mr. McCLURE. At this point I wish to review the salient elements of the Alaska natural gas transportation system (ANGTS), discuss the economic and national security aspects of the system which favor its construction, and review the project's history which brings us to where we are today with our consideration of Senate Joint Resolution 115.

The Prudhoe Bay field, located on the North Slope of Alaska was discovered in 1968. The field contains recoverable reserves estimated to be at least 9 billion barrels of oil, and 26 trillion cubic feet of natural gas which is equivalent to 4.5 billion barrels of oil. This is the largest single gas reservoir ever discovered on the North American Continent and it contains about one-eighth of the U.S. proven reserves of natural gas. Besides the Prudhoe Bay gas reserves, independent experts place Alaskan gas resources somewhere in the 100- to 200-trillion cubic feet range, gas which will never be explored for or produced unless there is a transportation system capable of delivering this gas to market.

The Alaska natural gas transportation system is a pipeline which will stretch 4,800 miles from the North Slope of Alaska to Chicago and San Francisco. This pipeline will have an initial volume of 2 billion cubic feet of gas per day which is about 5 percent of current U.S. gas consumption. The reserve will be capable of providing the lower 48 States with an assured supply of gas for well in excess of 20 years even if no additional Alaskan gas reserves are located.

The gas the ANGTS will deliver during the first year of operation will replace as much as 400,000 barrels per day of foreign oil. The transportation system will be expendable to transport as much as 3.2 billion cubic feet of gas per day which will offset as much as 600,000 barrels per day of foreign oil.

The ANGTS will deliver Alaskan gas to 48 of the 50 States; Hawaii and Vermont are the only States which are not currently slated to receive any of this gas. About 70 percent of the gas will go to markets located in the Midwest, East, and South; the remaining 30 percent will go to markets located in the West.

I would like to note that the construction of the ANGTS is already underway, and in places already completed and delivering gas. Under the "prebuild" program, parts of the ANGTS are being constructed to deliver Canadian gas to the United States until the other portions of system necessary to transport Alaskan gas are completed. When completed, the prebuild will be capable of moving more than 1 billion cubic feet of surplus Canadian gas to U.S. markets. More than 1,500 of the ANGTS are already under construction, 1,000 located in the United States and 500 miles in Canada. Private financing totaling more than $2 billion has already been committed for the completion of the prebuild segments.

On the first of October deliveries of 240 million cubic feet of gas commenced to southern California through the Western leg of ANGTS; the Eastern leg of ANGTS is currently under construction and when it is completed by the fall of 1982, 800 million cubic feet of Canadian gas will begin to flow to midwestern markets.

The completion of the ANGTS and the commencement of delivery of Alaskan gas to lower 48 States markets will substantially reduce our dependence on foreign energy which, in turn, will both strengthen our economy and reduce our vulnerability to supply interruptions. A brief review of the U.S. dependence on foreign energy illustrates just how important this project is.

During the first 7 months of 1981 the United States imports of foreign energy totaled $49 billion which is about one-third of our entire imports of foreign merchandise and about four times our entire merchandise balance of trade deficit of nearly $14 billion. And more than one-third of the oil we consumed during this period came from foreign sources. These imports of foreign energy have played a significant part in our continuous adverse balance of payments which, in turn, has weakened the value of the dollar, increased the flow of imported goods, worsened our rate of inflation, and significantly lessened the ability of our domestic companies to compete in the international market. The initial delivery of 2 billion cubic feet per day of Alaskan gas to lower 48 States markets will save us about $7 billion per year in imports, and the expansion of the system to 3.2 billion cubic feet per day could save us in excess of $11 billion in imports. It is only too obvious to even a casual observer that any action taken to insure delivery of this Alaskan energy to domestic markets will substantially strengthen our domestic economic situation.

Similarly, the commencement of delivery of Alaskan gas to lower 48-States markets will substantially contribute to our national security. Just prior to the oil crisis of 1973, 27 percent of U.S. crude oil imports came from the Middle East. In January 1981, more than 39 percent of U.S. crude oil imports came from the Middle East. In addition to the crude oil which we import directly from the Middle East are those petroleum products we import which are refined from oil produced in the Middle East. And was exemplified during the recent Iranian revolution and Iran/Iraq war, some of the foreign suppliers of petroleum which we overly depend upon are both unstable and only too willing to use the "oil weapon" to further their political interests.

Mr. President, the resolution which we are considering today is but one further link in a chain of events and actions which were set off when the Prudhoe Bay field was discovered back in 1968. The most important of these have been discussed at length in the committee report on Senate Joint Resolution 115 but for the benefit of my colleagues I would like to briefly cite in chronological order the major events to date connected with the Alaska natural gas transportation system.

CHRONOLOGY OF MAJOR EVENTS

ALASKA NATURAL GAS TRANSPORTATION SYSTEM

1968: Reserves of oil and gas discovered in Prudhoe Bay, Alaska, estimated to contain 9.6 billion barrels of crude oil and over 26 trillion cubic feet of gas.

March 21, 1974: A group of private companies headed by Arctic Gas filed for necessary approvals with the Federal Power Commission (FPC), Department of Interior (DOI), and Canadian National Energy Board (NEB).

April 1974: Construction started on 800 mile pipeline to bring crude oil from Prudhoe Bay to shipping terminal at Valdez, Alaska. The $7.7 billion line was completed and operational by mid-1977.

May 14, 1974: Northern Border Pipeline Co. sought FPC approval to build an Eastern Leg, and on July 12, made a similar filing with DOI.

September 24, 1974: El Paso Alaska, a second competitor, filed for FPC approval for a land-sea system involving liquification at Valdez, Alaska.

December 13, 1974: Pacific Gas Transmission and Pacific Gas and Electric jointly filed with DOI and FPC to build the Western Leg of the Arctic Gas system.

April 1975–November 1976: FPC Administrative Law Judge Nahum Litt held hearings on the two competing applications.

June 1975: DOI issued its draft environmental impact statement (EIS) on the Arctic Gas proposal.

September–October 1975: DOI held public hearings on its draft EIS.

November 1975: FPC released its draft EIS on the El Paso system.

March 29, 1976: DOI issued its final EIS on Arctic Gas system.

April 1976: FPC issued its final EIS on El Paso's System.

July 9, 1976: Alcan Pipeline Company, a new affiliate of Northwest Pipeline Corporation, filed the third competing application with FPC and the Canadian NEB to build an overland system generally following the Trans-Alaska oil line and the Alcan Highway.

September 1976: FPC issued a final EIS on the Alcan system.

October 22, 1976: Congress passed the Alaska Natural Gas Transportation Act to expedite the selection and approval process.

February 1, 1977: Judge Litt (FPC) issued his initial decision recommending Arctic Gas, but found that any of the three proposals were feasible.

May 1, 1977: FPC made a split recommendation to the President: two Commissioners chose Arctic Gas, two chose Alcan.

May 9, 1977: Canadian Justice Thomas R. Berger issued a report recommending postponement of a Mackenzie Delta pipeline because of environmental and sociological problems, to allow time for native claims settlement.

June 1977: Canadian NEB decision found Alcan route preferable.

July 4, 1977: NEB recommended Alcan project and denied Arctic Gas' application as environmentally unacceptable.

July 20, 1977: DOI Secretary Andrus recommended to the President that the Alcan project be approved.

July 23, 1977: Northwest Energy contracted with Pan-Alberta Gas Ltd. of Calgary for delivery of substantial gas reserves for early transport through the Eastern leg.

July 29, 1977: Kenneth M. Lysyk of Canada submitted a report recommending that construction of the pipeline in the Yukon Territory be delayed until August 1981 to allow time for native claims settlement.

July 29, 1977: Arctic Gas withdrew and the eight American members joined in the Alcan project.

September 8, 1977: President Carter and Canada's Prime Minister Trudeau announced agreement on the gas pipeline project.

September 22, 1977: President Carter issued his Decision and Report to Congress selecting the Alcan system.

October 12, 1977: Federal Energy Regulatory Commission (FERC; formerly FPC) commented on the President's decision, supporting the Alcan selection.

November 2, 1977: Both Houses of Congress overwhelmingly approved the President's recommendation of Alcan.

November 8, 1977: President Carter signed the Congressional Joint Resolution approving the Decision.

December 16, 1977: FERC conditionally approved Alcan's proposed project, enabling the company to begin pipeline design and planning.

December 31, 1977: Alcan changed its name to Northwest Alaskan Pipeline Company and the project name to the Alaska Highway Pipeline Project.

May 8, 1978: FERC proposed an incentive rate of return structure, as required by the President's Decision.

November 9, 1978: President Carter signed into law the Natural Gas Policy Act which set the wellhead price of Alaska natural gas at $1.45 per thousand cubic feet plus monthly inflation allowances.

December 1, 1978: FERC adopted an incentive rate of return plan, but did not attach values to the factors.

January 26, 1979: Northern Border filed for FERC approval to build $1.4 billion facilities to take Canadian gas in advance of availability of Alaskan gas.

February 2, 1979: FERC proposed to require the Prudhoe Bay producers to pay for construction and operation of conditioning facilities needed to ready the gas for transport.

April 6, 1979: FERC issued notice of proposed rulemaking attaching values to each incentive rate of return component.

April 20, 1979: FERC ordered expedited hearing on the prebuild portion of the system.

June 8, 1979: FERC issued an order adopting incentive rate of return values and deciding tariff issues, by permitting rehearing.

June 8, 1979: John T. Rhett nominated as Federal Inspector.

June 11, 1979: President Carter signed Reorganization Plan No. 1 spelling out the duties of the Federal Inspector.

June 13, 1979: DOI conditionally authorized right-of-way grant for construction across Federal lands in Alaska.

June 21, 1979: President Carter signed Executive Order 12142.

July 1, 1979: Office of the Federal Inspector officially came into being.

July 12, 1979: Senate confirmed John T. Rhett as Federal Inspector.

July 13, 1979: John T. Rhett sworn in as Federal Inspector.

August 1, 1979: PERC staff issued an EIS which finds Prudhoe Bay an acceptable site for the gas conditioning plant.

August 6, 1979: FERC approved 48-inch pipe size, 1260 psig pressure for Alaskan segment, and in October denied rehearing of that decision.

August 24, 1979: FERC issued an order affirming its policy that the producers must bear the production-related costs, but allowed applications for rehearing to be filed.

September 6, 1979: FERC issued its final, unappealable incentive rate of return and tariff order.

October 12, 1979: DOI published proposed regulations to assure that minorities and women have the opportunity to participate in construction of the project, and scheduled hearings in November 1979.

October 26, 1979: Exxon submitted to DOE a proposed final decision on production related conditioning costs, at the request of the Secretary of Energy.

October 31, 1979: FERC agreed to postpone final decision on production related conditioning costs, at the request of the Secretary of Energy.

January 11, 1980: FERC issued Western Leg pre-build certificate subject to rehearing.

January 31, 1980: FERC upgraded diameter for Western Leg pre-build from 36 to 42 inches.

February 26, 1980: FERC conditioned Northwest's certificate to give the Federal Inspector authority on stop-work orders.

February 26, 1980: First major gas pipeline drilling began in Alaska to gather soil samples on southern part of the route.

March 10, 1980: Major contract involving about $36 million awarded to Unified Industries, Inc., a minority firm, for engineering and environmental support services to OFI.

March 12, 1980: Federal Inspector reached agreement with Interior's Heritage Conservation and Recreation Service to represent him in cultural resources matters for lower 48 system. This will help assure early identification and preservation of archeological resources.

April 1980: Federal Inspector reached agreement with Interior's Heritage Conservation and Recreation System to represent him in cultural resource matters for lower 48 system. This will help assure early identification and preservation of archeological resources.

April 15, 1980: Budget hearing before Senate Appropriations Committee, chaired by Senator Ted Stevens of Alaska. The Federal Inspector announced trimming of his requested staff from 130 to 104.

April 28, 1980: FERC certified Eastern Leg pre-build involving 811 miles and $1–1.2 billion in cost.

May 12, 1980: Interior Department and FERC published final regulations on EEO/MBE.

June 10, 1980: House budget committee made a preliminary cut of $4.3 million from OFI's requested $25.8 million for fiscal 1981.

May–June 1980: Interior's Bureau of Land Management in Alaska, through the OFI one-window, issued permits for Northwest build to four construction flycamps.

June 10, 1980: U.S. and Canada formally agreed on procedures for use by both countries in approving contracts for ANGTS goods and services.

June 13, 1980: FERC finalized January 10, 1980, Western Leg order on rehearing, by providing for an additional 30-day rehearing on the Northwest Energy's Western Delivery System.

June 19, 1980: Agreement signed by pipeline sponsors, gas producers, and the State of Alaska for financing of $500 million design, engineering and final cost estimate of Alaska segment. A statement of intent to develop a financing plan for construction was also signed.

June 20, 1980: OFI announced creation of a Citizen's Environmental Advisory Committee and asked for nominations to the five-member group.

July 1, 1980: Northwest Alaska filed its application for a final certificate with the FERC, and applied to Interior for a right-of-way permit. The FERC filing contained a cost estimate which will, if approved, be the basis for the incentive rate of return.

July 1, 1980: The U.S. House of Representatives unanimously approved a Resolution affirming Congressional support for the ANGTS. The Senate on June 27 had given its approval.

July 17, 1980: President Carter signed letter to Canadian Prime Minister Trudeau reaffirming U.S. Government support for completion of ANGTS.

July 17, 1980: Canadian Government approved construction of the southern part of its system.

August 4, 1980: Construction began on Canadian Western Leg.

August 6, 1980: OFI issued policy statement on the legal status of the Western Delivery System, construction of which began that same month.

August 13, 1980: Pacific Gas Transportation Co. announced $60 million steel pipe contract award for Western Leg.

August 20, 1980: Department of Interior signed off on the Alaska Leg grant of right-of-way and sent it to Congress with a request for waiver of the 60-day review period.

September 11, 1980: OFI published proposed EEO enforcement regulations, along with a Memorandum of Understanding with the Equal Employment Opportunity Commission concerning handling of employment discrimination complaints.

September 26, 1980: The Federal Energy Regulatory Commission filed a joint suit in Federal District in Bismarck, North Dakota, challenging a September 12 State Public Service Commission order disapproving the route selected through that state.

September 30, 1980: Northern Plains Natural Gas Co. announced purchase of $490 million in steel pipe from three U.S. and two foreign firms for the Eastern Leg phase one construction.

November 29, 1980: Department of Interior

issued right-of-way grant to Northwest Alaska Pipeline Co. to cross the 433 miles of Federal land in Alaska, following Congressional approval on November 19.

December 8, 1980: Federal Inspector issued a Notice to Proceed to Pacific Gas Transmission Co. initiating the final green light for actual Lower 48 construction.

December 8, 1980: Construction began in Idaho on the Western Leg by Pacific Gas Transmission Co.

December 10, 1980: Northern Border Pipeline Co. signed an agreement on a $1.055 billion loan from a consortium of North American banks for financing most of East Leg construction.

December 29, 1980: FI announced approval of Northern Border Pipeline Co.'s Eastern Leg affirmative action and minority business contracting plan.

January 9, 1981: Secretary of Energy Charles Duncan recommends to the FERC that PGT's remaining West Leg be 42-inches in diameter instead of 36-inches.

February 9, 1981: A West Leg ceremony is held in Spokane, Washington to commemorate starts of ANGTS Lower 48 construction.

February 26, 1981: FI approves Pacific Gas Transmission's Affirmative Action Plan.

March 9, 1981: Dennis Schroeder, OFI's East Leg Director, was named OFI's one-window authority for East Leg transactions.

March 11, 1981: Dept. of Interior right-of-way grant signed for Eastern Leg passage across Federal lands.

March 25, 1981: Dept. of Interior's Bureau of Indian Affairs approved a right-of-way grant to Northern Border Pipeline Co. to allow the East Leg to cross the Fort Peck Indian reservation in Montana.

April 2, 1981: U.S. District Court for North Dakota ganted a motion for summary judgement in favor of OFI and the FERC in a lawsuit filed against North Dakota's Public Service Commission in September 1980. The PUC objected to the Federal Government's authority to route the ANGTS Eastern Leg through North Dakota.

April 10, 1981: FERC and the OFI issued first draft of the "Adger-Berman Report", which analyzes the cost estimate for the Alaskan segment.

April 15, 1981: FI issued final design cost estimate for the East Leg.

April 18, 1981: FI issued a Notice to Proceed which allowed for construction to begin in May on six spreads in Montana. South Dakota, Minnesota, and Iowa.

April 21, 1981: FI testified before the Senate Appropriations Subcommittee, chaired by Sen. James McClure, R-Idaho.

April 27, 1981: U.S. District Courts in Minneapolis, Minn. ruled in favor of Northern Border Pipeline Co. in a March 13 suit filed against Jackson County for its 6 foot cover requirement.

April 30, 1981: FI conditionally approved Northwest Pipeline Corporation's Affirmative Action Plan (AAP) for the Western Delivery System—an arm of the ANGTS West Leg.

May 4, 1981: Northern Border Pipeline Co. held a groundbreaking ceremony in Aberdeen, S. Dakota, to commemorate start of East Leg construction.

May 14, 1981: FI testified before the House Appropriations Subcommittee, chaired by Representative John Murtha, D-Penn.

May 21, 1981: The pipeline sponsor consortium and the major gas producers in Prudhoe Bay—Exxon, Sohio, and ARCO—reached agreement for financing of the Alaskan segment.

June 17, 1981: John McMillian of Northwest Alaskan Pipeline Co. in a letter to the President requested consideration of a series of waivers of laws that the company believes are necessary to enable private financing.

July 24, 1981: Senators McClure, Jackson, Stevens, and Murkowski in a letter to the President submit a revised waiver proposal and urge prompt consideration.

August 10, 1981: The Federal Inspector approved Northwest Alaskan Pipeline Co.'s Affirmative Action Plan for the Alaska segment.

August 21, 1981: The final Adger-Berman report on estimated construction costs for the Alaskan segment was issued by the FERC.

September 23, 1981: Two letters were sent to the President: one by Congressmen Dingell and Udall; the other by Congressmen Broyhill and Brown. Representing both majority and minority membership, they state willingness to cooperate toward resolution of the waiver issue, while expressing concern with some specific provisions proposed.

October 1, 1981: A ceremony in Los Angeles marks the first flow of Canadian gas through ANGTS facilities to California.

October 15, 1981: President Reagan sent to Congress waivers for certain provisions of the 1977 President's "Decision." If approved, the waiver package will aid in firming up financing for Alaskan segment construction.

November 10, 1981: Senate Committee on Energy and Natural Resources by a vote of 14 to 1 approved and recommended to the Senate S.J. Res. 115, a resolution to approve the President's recommendation for a waiver of law pursuant to the Alaska Natural Gas Transportation Act.

November 12, 1981: House Committee on Interior and Insular Affairs approved H.J. Res. 341, the House companion bill to S.J. Res. 115, by a vote of 32 to 7.

November 17, 1981: House Subcommittee on Fossil and Synthetic Fuels approves and recommends to the full Energy and Commerce Committee H.J. Res. 341 by a vote of 12 to 9.

Mr. President, the waiver of law which the President has proposed and we are considering approving through Senate Joint Resolution 115 has been discussed at length in the committee report. But I think that for the benefit of my colleagues that it would be worth while to review the nature of the President's waiver proposal.

First, neither the waivers nor the Alaska natural gas transportation system project itself involve any Federal loan guarantees, subsidies, or expenditures. The approval of Senate Joint Resolution 115 will not increase Federal expenditures or increase the Federal deficit; and in fact if approval of Senate Joint Resolution 115 leads to the construction of ANGTS the increased business revenues and personal income alone will in fact lead to a significant improvement to our economy and a reduction in the Federal deficit.

Second, the approval of the President's proposal will not authorize construction of the project. The waiver of law covered by the resolution will only remove Government obstacles so that private financing of the project can be developed by the private sector.

And third, the waiver approach to eliminating regulatory impediments to the expeditious construction of the project is a mechanism which was created by Congress in the Alaska Natural Gas Transportation Act of 1976 and it has been used by the President once before in 1977.

The President's waiver proposal will: First, permit equity participation in the project by Prudhoe Bay producers; second, include conditioning plant in the system; third, permit FERC to approve, at its discretion, tariffs which would provide lenders with sufficient assurances of repayment after individual completion of the conditioning plant, the Alaska pipeline segment and the Canadian pipeline segment, each after a date certain to warrant the lenders advancing the enormous sums needed for private financing; and, fourth, enable the FERC to expedite the issuance of the final certificate.

And finally, I would like to point out to my colleagues that while congressional approval of the President's waiver proposal will not guarantee construction of the Alaska natural gas transportation system—that is a determination which will ultimately be made by the private sector—our failure to approve the President's proposal will guarantee that the private sector will be unable to privately finance this project.

It is for all of these reasons, Mr. President, that I recommend to my colleagues that the Senate approve Senate Joint Resolution 115.

Mr. President, during the course of the debate on the proposal several issues have been raised by the distinguished opponents which I would like to address at this time.

Some would oppose the President's waiver recommendation on the basis that several of the major banks and the three major oil company participants (Exxon, Arco, and Sohio) have directors from each other. Laying aside the point that the President's waiver would have no effect on the degree of cross-directorships, I have three other comments on this matter. First, it is not an uncommon practice in the business world for an officer of one company to sit on the board of directors of another company.

Second, even though the members of the board of directors of a company may serve as an officer of another company, that does not relieve them of their fiduciary and other legal responsibilities, either when they serve as a director or an officer. And finally, of the 274 board members who serve on the boards of these three major oil company participants, and the nine financial institutions potentially involved in arranging financing for the project, only seven are officers who serve on one of the other companies.

To claim that the major banks and the three major oil companies are totally interlocked at the board level, therefore, is totally preposterous.

It has also been alleged that consumers are being asked to guarantee the costs of the pipeline with no assurance that it will ever be completed. In this regard I would first note that before the financial community will commit any funds for the construction of the project they will first assure themselves that the project will be completed.

Second, I would note that before the Federal Energy Regulatory Commission issues a certificate of convenience and public necessity that the FERC must first find that the project is technically and financially feasible. And finally, that since the sponsors' and producers' equity funding of the project—funding which will likely total between $9 and $13 billion—cannot be recovered unless the project is completed, it is clear that they will have a very strong incentive to complete the system. Thus given the interests and responsibilities of the various parties, it is only too evident that once begun the project will be completed.

There are some who argue that the

Alaskan gas is not needed and when it is delivered it will cost too much. From the current rate of additions to reserves it is only too evident that gas supplies from conventional resources in the lower 48 States will not be sufficient to meet projected needs, nor will supplies from Canadian sources, Mexican sources, synthetics, and tight formations be sufficient to satisfy future demand. According to the testimony presented to the committee, the interstate pipelines involved in the project simply will not be able to meet projected demands for natural gas without the Alaskan gas. The Secretary of Energy concurred with the pipelines judgment, as did the Chairman of the FERC.

With respect to the price of Alaskan gas, during the first years the delivered price will likely be somewhat above the cost of alternative fuels. However, over 20 years the delivered price of Alaskan gas in real terms will average between $24 and $33 per barrel in oil equivalent cost. And in this connection I might note that the international price of crude oil already exceeds this amount.

Moreover, since under the Natural Gas Policy Act the wellhead price of Alaskan gas can rise only with inflation and the pipeline tariff will decline over time as the pipeline is amortized, the delivered price will fall in both real and nominal terms.

There also has been some objection to the President's waiver proposal on the grounds that it will allow the producers and pipeline sponsors to earn monopoly profits through anticompetitive activity; in fact, nothing could be further from the truth. First I would like to note that the price that the producers are allowed to receive for their gas at the wellhead is limited by the wellhead price control provisions contained in the Natural Gas Policy Act of 1978. Second, the rate of return on the producer's and partners' investment in the Alaska natural gas transportation system is regulated by the Federal Energy Regulatory Commission through their tariff determination mechanism. And most importantly, the President's waiver proposal does not amend or change any provisions of the existing antitrust laws which deal extensively with anticompetitive activities. Moreover, the President's waiver proposal requires the FERC to consult with the Department of Justice on antitrust matters and to condition its certificate to prevent discriminatory treatment.

Finally, I would like to comment to those who question the need for allowing the North Slope gas producers to participate in the private financing of the project. During the committee's hearings the project sponsors testified that the capital costs of the undertaking have increased to the point that their investment advisers informed them that they simply would not be able to proceed successfully without the additional financial investment capability of the producers. The bottom line then, is that if this Congress expects to see this project privately constructed with private financing then producer participation is essential.

Mr. President, I yield 3 minutes to the Senator from Washington (Mr. JACKSON).

Mr. JACKSON. Mr. President, I am pleased to join my colleagues today in support of Senate Joint Resolution 115, a resolution to approve the President's waiver of law recommendation for the Alaska natural gas pipeline.

In my opinion, failure to proceed with this important project would be very shortsighted. We must act, and we must act now.

Years and years of effort by the private sponsors, three Presidents and their administrations, the Canadian Federal Government, and the Congress have gotten us this far. We have reiterated our respective commitments to this effort numerous times. But unless we act today and approve this resolution, our years of effort will be for naught. Without changes in the existing law, the project will not go forward because it cannot be privately financed.

Frankly, development of this waiver package has required many of us to put aside some previously held beliefs about some of the issues involved. Over the years I have learned that we must approach these difficult issues pragmatically. We must all adapt to a changing, dynamic world. That is difficult for politicians to do, especially when the choices before us are not intuitively pleasing.

The pipeline cannot be privately financed without the producers joining the partnership. They are simply unwilling to do so unless they are allowed to hold equity, and to join in the management decisions. They also want to have the gas conditioning plant—which is an integral part of the system—financed along with the rest of the pipeline.

The bankers have told us that the billing commencement provisions in the waiver package, and the regulatory certainty provisions, are the minimum necessary for them to proceed.

Keeping these very real factors in mind, we must ask ourselves whether the project is still in the national interest and whether the consumers' interests are still adequately protected.

The answer to both questions is an unequivocal yes.

This project is still vital to our national interest, and to our national security. It goes to developing our own energy resources so that over the long haul we can strengthen both our economy and our national security.

There are enormous existing reserves in Alaska and Canada. It would be unconscionable to lock them up. The future potential is even more enormous, in both Alaska and Canada. Our Nation's energy future depends upon developing oil and gas reserves in frontier areas. This pipeline system is a very important link in a secure energy transportation system.

I am certain my colleagues join me in longing for the "good old days" when both oil and gas were cheap. We all realize intellectually that those days are gone forever. Now we are faced with approving a project that will bring us expensive gas. I do not enjoy that prospect any more than anyone else does. But we simply have no other alternative.

The pipelines involved need the gas. They cannot find any other cheaper sources. The only alternatives are synthetic fuels or imported oil. Imported oil will likely be just as expensive as this gas will be; over the life of the project, it will be much more expensive. And it certainly is not as secure. Synthetic fuels are simply not available in sufficient quantities to satisfy these pipelines' needs; and they are likely to be even more expensive than Alaskan gas.

It is tempting to say let us wait a while, and see if we cannot work something else out. Several people have asked me why we cannot legislate a better solution to this sticky problem, rather than using the waiver approach.

Unless we act now, the project will be delayed at least another year because of the construction season situation. Delay means money, and lots of it. Losing a year would cost consumers anywhere from $3 to $6 billion because of inflation. I can see absolutely nothing that would be gained for consumers by putting off this decision. In fact, they would be hurt more than helped.

We are at a point where we simply must make a decision. I believe that the waiver package before us today is a responsible approach to a very difficult problem. I hope my colleagues will agree with me and that they will join in supporting passage of Senate Joint Resolution 115.

The floor situation today is controlled by the provisions of the Alaska Natural Gas Transportation Act of 1976. The act allows 1 hour for debate, equally divided.

In order to be fair, I have agreed to yield the remaining time I control to the Senator from Ohio (Mr. METZENBAUM) who is in opposition to this resolution.

Mr. McCLURE. I would be happy to yield at this time to the distinguished senior Senator from Alaska, Senator STEVENS.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. I thank my good friend. I yield myself 3 minutes or I ask that the Senator from Idaho yield me 3 minutes. I think he is in control of the time.

Mr. McCLURE. I yield 3 minutes to the Senator from Alaska.

Mr. STEVENS. Mr. President, I join today with my colleagues in support of this resolution to approve the President's waiver package. This waiver package is designed to remove the legislative and regulatory obstacles preventing private financing of the Alaska natural gas transportation system. This project represents an attempt to continue delivery of critically demanded energy resources from the North Slope of Alaska.

I recently learned of two interesting facts about the North Slope that I would like to call to your attention. The first fact is that the National Petroleum Council has assessed expected discoveries of recoverable oil on the North Slope at 44 billion barrels. This group also found over 100 trillion cubic feet of gas as likely for future discovery in that region. In fact, many estimates assess likely discovery of Alaskan gas in the neighborhood of 200 trillion cubic feet. Clearly the Arctic, especially the North Slope, represents the highest potential dis-

covery area for oil and natural gas on the North American continent.

Another fact of interest to me was the passage of the 2 billionth barrel of oil through the trans-Alaska oil pipeline. That pipeline is currently designed to deliver 9.6 billion barrels of recoverable oil from Prudhoe Bay. The point, Mr. President, is that although Alaska represents the highest potential area for discovery in the country, actual production through the oil pipeline may decline during the latter part of this decade. That is, production will decline unless we demonstrate our resolve to take the steps necessary to encourage exploration and development both onshore and offshore in Alaska. This is the issue we must face today.

We have before us a waiver package submitted by the President targeted at those specific provisions of law impeding the ability of the capital markets to finance this project. Congress can assist the President and our Nation by removing these obstacles through approval of this waiver. This waiver will accomplish the essential objective of permitting equity participation in this project by North Slope gas producers, allowing the Federal Energy Regulatory Commission to approve, at its discretion, a tariff providing sufficient certainty to warrant lending the enormous sums needed to finance this project, and will enable expeditious issuance of the final certificate of public convenience and necessity.

Mr. President, we are contemplating a project that could run between $40 and $50 billion. The companies involved have already invested over a billion dollars in design and engineering. They are now before Congress not to get a Federal loan guarantee, not to ask for grants, but to seek removal of existing law and regulation that acts as disincentive to risk of private capital to deliver a proven reserve of 13 percent of this Nation's natural gas supply, 26 trillion cubic feet.

There is little point in investing the vast amount of capital required to explore frontier areas in Alaska if our Government is not permitted to take the steps necessary to facilitate the delivery of the resources once discovered. What motivation or incentive is there to drill in the Beaufort Sea, the Navarin Basin, or the national petroleum reserve of Alaska if there is substantial fear that we, as a government, are not committed to the proposition that every effort must be made to clear useless obstructions to exploration, discovery, and delivery of domestic energy resources.

In this particular instance, the unparalleled scope of the project prevents the sponsors from obtaining sufficient domestic debt financing. The sponsors must seek the vast majority of their debt capital abroad. We are, in this waiver, creating a legal and regulatory framework that would put this project on equal footing with other international projects of similar magnitude. We must assist these domestic corporations in convincing international lending institutions that this project is competitive in relation to other world-class investment opportunities.

Significantly, the Soviet Union has constructed approximately 6,000 miles of a 56-inch gas pipeline from its frontier areas since 1976. Furthermore, the Russians plan to lay approximately 10,000 additional miles of 56-inch pipe from fields in western Siberia to central and western areas in Russia between 1981 and 1985. There is little doubt the Siberian pipeline and other Soviet pipeline projects will compete with this project in capital and steel supply markets in the industrialized world. Moreover, the Soviet Union is demonstrating the drive necessary to insure secure energy supplies.

Mr. President, I have another grave concern that must be considered in the debate on this waiver. That concern is the commitment that we have made to Canada. We in Congress and in two administrations have pledged to move heaven and Earth, short of Government subsidy, to clear the way for this project.

In fact, President Carter, in a July 1980 letter to Prime Minister Trudeau, provided assurances not only that the pipeline would be completed, but also the resolve of the United States to provide the legislative assurance required to embark upon the so-called prebuilt sections of the pipeline. These sections are now nearly complete.

In view of the substantial undertaking already initiated by the Canadian Government with respect to approval of and export of Canadian gas through the prebuilt section, in direct reliance on various commitments provided by the United States, failure to meet these commitments through rejection of the President's waiver could have serious repercussions for United States-Canadian relations. We have received a diplomatic note from the Canadian Embassy which I submit for the RECORD.

There being no objection, the note was ordered to be printed in the RECORD, as follows:

CANADIAN EMBASSY,
October 29, 1981.

DIPLOMATIC NOTE NO. 592

The Embassy of Canada presents its compliments to the Department of State and has the honour to request the Department to transmit to the interested Committees of the Senate and the House of Representatives copies of this Note and the attached brief, requested by the Committee, outlining the history of Canada's involvement in the Alaska Natural Gas Transportation System (ANGTS).

The Embassy wishes to draw attention in particular to the following points, elaborated in more detail in the accompanying document:

The decision of the Government of Canada to facilitate construction of the ANGTS was taken in the firm conviction that the earliest possible transport of U.S. natural gas from the western Arctic to southern markets would make a vital contribution to reducing North American dependence on insecure world oil supplies.

Selection of the ANGTS followed three years of careful consideration of several competing proposals by Canadian and U.S. regulatory authorities and intensive negotiations between the governments of both countries.

Joint action by the Canadian and U.S. Governments on the ANGTS was preceded by conclusion of the Transit Pipeline Treaty, which provides for non-discriminatory treatment of pipelines in one country used to transport the hydrocarbon products of the other and non-interference with supplies of hydrocarbons crossing one country en route to the other.

The broad commitment of the two governments to facilitate completion of the ANGTS found expression in the Agreement between Canada and the United States of America on Principles Applicable to a Northern Natural Gas Pipeline. The Agreement declared that the two governments would "facilitate the expeditious and efficient construction of the Pipeline" and that they would seek all required legislative authority and remove any impediments to this end.

The Agreement expressed the understanding of both governments that the pipeline would be privately financed and made provision, inter alia, for determination of the pipeline's route and capacity, for close coordination and consultation between the appropriate regulatory agencies of both countries and for the procurement of goods and services related to construction of the pipeline on generally competitive terms.

In the spirit of the undertakings of that Agreement, the Government of Canada made the difficult decision to authorize commencement in 1980 of construction of the southern sections of the pipeline in Canada. That decision was taken on the basis of:

Agreement between the project sponsors and the producers to share the cost of completing the final design and engineering of the system in Alaska and to cooperate in developing a financing plan;

Resolutions adopted by the U.S. House of Representatives and Senate in July 1980 declaring that the ANGTS remained "an essential part of securing this Nation's energy future" and that the system enjoyed "the highest level of congressional support for its expeditious construction and completion by the end of 1985";

A letter of July 17, 1980 from the President of the United States to the Prime Minister of Canada stating that the U.S. Government was satisfied that the entire system would be completed, that the U.S. energy situation required its completion without delay, that the U.S. appreciated the steps taken by Canada to advance its side of the project, that the U.S. stood ready to take appropriate additional steps necessary for completion of the system, and that the President was prepared at the appropriate time to initiate action before the U.S. Congress to remove any impediments that may exist under present law.

Construction of the western leg of the southern portions of the pipeline has been completed and construction of the eastern leg is expected to be completed by the autumn 1982.

While it would not be appropriate for the Government of Canada to comment on the specific provisions of the package of waivers submitted to the Congress by President Reagan, the Government of Canada considers that approval of the waivers is required to facilitate private financing. The Government of Canada is pleased to note that the waiver provision relating to precommencement billing for the Canadian segment of the pipeline meets with the satisfaction of the Canadian sponsors.

The Embassy of Canada avails itself of this opportunity to renew to the Department of State the assurances of its highest consideration.

Mr. STEVENS. Mr. President, another issue that has constantly arisen is the impact upon consumers of this waiver. Those who are concerned with the

American consumer should keep in mind the need of that consumer for the incomparable quantities of Canadian and Alaskan gas made available by the Alaska natural gas transportation system. In fact, virtually all testimony before the Energy Committee supports this project as a vast benefit to consumers.

After thorough debate among the Senators, Congressmen, and administration officials, we stand convinced that this waiver preserves the fundamental protections afforded of natural gas consumers under existing law. The waiver guarantees protection of consumers because there is no return on equity on the Alaska segments until gas is actually flowing through the system. FERC also serves to protect consumer interests by setting a date certain for completion of the system after full examination of all relevant factors affecting that completion and by establishing just and reasonable rates in is tariff. Finally, the waiver requires that each of the three defined segments in the system must be entirely complete prior to billing. For instance, the Alaska pipeline segment is nearly 800 miles in length and will cost roughly $21 billion by the time of completion.

The consumer will pay nothing if pipeline construction were delayed somewhere in Alaska and the entire segment is not complete. Furthermore, this project will be financed so that equity dollars are the first dollars spent on construction. The sponsors and producer companies stand to lose nearly $7.5 billion in equity investment if the project is not finished.

There is absolutely no benefit to the builders to abandon construction. Only through completion can a return on investment be realized. This waiver provision must clearly be distinguished from construction work in progress, (CWIP) with which it is often confused.

In fact, testimonv on the Energy Committee demonstrated that in the worst case the consumer would pay onlv $1.70 per month after the target completion date until completion in the case of delay. However, even in that case, by absorbing the cost initiallv in prebilling. the consumer avoids capitalization of debt service in the tariff rate base. Over the life of the project, this saves the consumer untold dollars by avoiding the addition to the tariff of inflation and interest costs for amounts prepaid in cases of delay.

Let me conclude by saying that what we face today is a critical stage concerning our resolve to meet national energy demand. Alaska represents a golden opportunity for our Nation to obtain secure domestic energy resources. We must not fail in our responsibility to meet the justifiable plea of the energy producing industry for legislative and regulatory certainty. Without such certaintv. firms cannot indefinitely continue to funnel capital into arctic exploration. Failure to approve this waiver this session will not only kill this project but will also serve as a strong signal that we simply do not have the resolve to dispose of the impediments to energy securitv. For our future, we must pass the President's waiver and allow this project a healthy chance of success.

We now have before us a waiver package submitted by the President targeted at those specific provisions of law impeding the ability of the capital markets to finance this project.

Mr. President, it is my position that unless we take this action there will be little point in investing the vast amount of capital required to explore frontier areas of Alaska if we are not able to permit the industry to take the steps necessary to facilitate the delivery of already discovered and proven reserves.

What motivation or incentive is there to drill in the Beaufort Sea, which is off our State, the Navarin Basin out in the Bering Sea or the national petroleum reserve of Alaska if there is a realistic fear that we, as a Government, are not committed to the proposition that every effort will be made to clear useless obstructions to exploration and development?

There must be a feeling in the industry, in the oil and gas industry, as well as in the financial community that oil and gas as discovered in these high-risk areas as a result of very risky investments will be deliverable to the markets of the South 48.

Mr. President, I would also like to mention the commitments to Canada. We have made commitments in Congress, and two administrations have pledged to move heaven and earth, short of Government subsidy, to clear the way for this project. President Carter, in a July letter to Prime Minister Trudeau in 1980, provided assurances that not only the pipeline would be completed but also the resolve of the United States to provide the legislative assurance required to embark upon the so-called prebuilt sections of the pipeline. Those sections in Canada are nearly completed now.

In view of the substantial undertakings already initiated by the Canadian Government with respect to approval of an export of Canadian gas through the prebuilt section, in direct reliance on various commitments by the United States, failure to meet these commitments through rejection of the President's waiver could have serious repercussions for United States-Canadian relations.

We have received a diplomatic note from the Canadian Embassy to that effect which I have submitted for the RECORD.

Mr. MCCLURE. Mr. President, I yield 3½ minutes to the distinguished Senator from Alaska. Mr. MURKOWSKI.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. I thank the senior Senator from Idaho.

Mr. President, I strongly urge the Senate to adopt Senate Joint Resolution 115, the resolution of approval for the waiver package proposed by the President to facilitate financing and construction of the Alaska Natural Gas Transportation System. The Senate Energy Committee, after extensive hearings and careful consideration, voted to report this resolution by a vote of 14 to 1.

The Alaska Natural Gas Transportation System (ANGTS) a 4,800-mile pipeline stretching from Prudhoe Bay, across Canada to terminals in Illinois and California, will bring to 48 of our States some 26 trillion cubic feet of badly needed natural gas.

That 26 trillion cubic feet, which represents 13 percent of the Nation's gas reserves, is only the beginning, Mr. President. Up to 200 trillion cubic feet of natural gas are estimated to be in Alaska—a vast energy resource that will not be developed until a means to bring it to market is in place. Construction of this pipeline from arctic Alaska is the key to our Nation's effort to achieve energy independence.

The Alaska Natural Gas Transportation System will be the largest, privately-financed construction project in history of the free world. It will involve no Federal subsidy or loan guarantee. Failure to remove the legal and regulatory obstacles which stand in the way of the pipeline's private financing and construction would constitute a signal to OPEC that we are either not committed to or capable of achieving energy independence in our Nation. We have been making speeches in this country about the need to achieve energy independence ever since the 1973 Arab oil embargo. This project represents a real opportunity to do something about it.

We currently import 3.4 million barrels of OPEC oil each day. When completed, the Alaskan pipeline will deliver 2 billion cubic feet of natural gas each day—equivalent to about 400,000 barrels of imported oil. Later, the pipeline can be easily modified to transport up to 3.2 billion cubic feet of gas per day, thereby displacing about 600,000 barrels of imported oil daily.

Despite the current, tenuous energy glut, our total proven reserves of natural gas are continuing their decline. Recently, the Energy and Natural Resources Committee heard testimony that this Nation will be facing a natural gas supply shortage as early as 1983. Annual additions to our proven gas reserves remain substantially below annual consumption of natural gas.

The pipeline is not only important from the standpoint of national security and energy independence, but it is important to our balance of payments. During the first 7 months of 1981, our energy imports cost us more than $49 billion—about one-third of our total imports of goods. The foreign oil that Alaskan gas would displace is currently costing us $7 billion per year.

We have made a commitment to Canada, as my colleague, Senator STEVENS, referred to, that this gasline would be completed. As the result of that commitment, Canada has approved a prebuilt portion of the pipeline that is currently transporting Canadian gas from Calgary, Alberta, to the United States. Our failure to fulfill our commitments would constitute a gross betrayal of Canada and strain the commercial relations between our two nations.

All of this brings us to the resolution to approve the waiver package before us today. Congress has been working toward the goal of bringing Alaskan gas to market for more than 4 years. Various, alternative options have been explored. Extensive hearings have been held. Legislation has been enacted. Presidential reassurances of our commitment

to the project have been made—all bringing us to this moment. The President has proposed a reasonable waiver package and it is now up to Congress to act on it. Testimony during the Energy Committee's hearings, which was overwhelmingly supportive of the waiver package, can be distilled to one basic and recurring point—without approval of the President's waiver package, there will be no pipeline, period.

If we are truly committed to greater energy independence, an enhanced national security, improved balance of payments and a reduction in the risk of future natural gas shortages, we must approve this waiver package.

I would like you to recall that there is a parallel to this. On November 16, 1973, there was a vote taken in this Chamber and it was a tie vote that was broken by the Vice President. Today, we have the oil pipeline across Alaska which is delivering 18.8 percent of our total U.S. domestic production of 1.6 million barrels a day going through that pipeline.

Mr. President, this gas transportation system in its entirety will cost over $40 billion in inflated or as-spent dollars. Given these enormous capital costs, the development of a sufficient and workable financing plan has been and will continue to be a great challenge. The sponsors, the gas producers, the pipeline companies, and a number of financial institutions have already had many discussions in this regard. Members of Congress who have been working on this waiver package have certainly become well aware of the unprecedented financial commitment it will take to complete the project.

The waiver package itself contains seven individual waivers. The first waiver would permit the Alaskan North Slope gas producers to own an equity interest in the pipeline. President Carter's 1977 Decision recognized that "(P)roducer participation in the financing of the project is warranted due to the beneficiary status and their financial strength." However, it limited that participation by prohibiting producers from having an equity interest in the project. The concern that producer participation in the ownership of the pipeline might give rise to potential competitive abuse is adequately protected by the proposed waiver: First, the producers' equity position will be limited to a minority interest; and, second, the proposed waiver provides that the FERC, after consultation with the Attorney General, must find that producer participation will not create or maintain a situation inconsistent with the antitrust laws or create restrictions on access to the ANGTS or restrictions on capacity expansions.

Further protections against potential anticompetitive abuse include section 13 of the Alaska Natural Gas Transportation Act of 1976, Public Law 94-586, which requires that the FERC condition its certificate to prevent discriminatory treatment; the FERC regulation of the ANGTS under the Natural Gas Act; and the anti-trust laws, which will still apply to the ANGTS. The Senate Energy Committee heard overwhelmingly supportive testimony relating to this waiver during its 3 days of hearings on ANGTS.

Each of the representatives of the financial community underscored the importance of this waiver to the financing of the pipeline. H. Anton Tucher, vice president of the Bank of America, testified that:

Since the existing pipeline sponsor group does not have the capacity to provide all the necessary precompletion debt support and insufficient support appears to be available from other sources, significant producer involvement in the equity and pre-completion debt support arrangements would seem to be practically essential.

Clearly, the private financing of this project is dependent on equity participation.

The second waiver includes the Prudhoe Bay gas conditioning plant in the legal description of the approved transportation system. President Carter's 1977 decision excludes the conditioning plant from that description. The exclusion stems from the original certificate application which requested certification of facilities commencing at the discharge site of the conditioning plant facilities. The system described in the decision was necessarily limited to the facilities for which certification was requested.

As a practical matter, the economic effect of including the conditioning plant in the system is the same as treating the plant as a separately certificated facility and providing a conditioning cost allowance sufficient to provide for the recovery of the gas conditioning cost. Conditioning facilities are essential to permit Alaskan gas to be delivered to the lower 48 States. The ANGTS has special conditioning requirements for the gas to be transported through the system. Circumstances in Alaska are unique and gas processing costs in Alaska are much greater than the processing costs that normally occur in the lower 48 States.

The producers' willingness to make a substantial financial commitment to the project is predicated on the inclusion of the conditioning plant as a part of the ANGTS to permit a recovery of costs associated with constructing and operating the plant, plus a reasonable return on invested capital pursuant to a FERC-approved tariff. Application of the incentive rate of return (IROR) mechanism to the conditioning plant would substantially delay issuance of a final certificate. Further, there is a much lower risk of cost overrun for the plant, because the plant will be built at a single location where the producers have experience in building facilities and much of the plant will be prefabricated in the lower 48 States.

Thus, there is no need for an IROR mechanism for the plant. However, the actual construction costs will be reviewed by the Federal Inspector and only prudently incurred plant costs will be recovered in rates. The ANGST hearing testimony also stressed the importance of this waiver to the development of a workable financing plan. Robert H. Graham, vice president of Citibank, N.A., testified that:

It is impractical to consider financing of the Alaskan pipeline if the conditioning plant is subject to uncertainties of ownership, financing and integration of construction and operation in the System.

Again, the waiver provision is critical to the completion of this vital project.

The third, and possibly most controversial waiver would authorize the Federal Energy Regulatory Commission to approve tariffs that permit: First, recovery of the full cost of service of the Canadian pipeline segment upon completion and testing of the Canadian segment but not before a date certain, as established by the FERC, to be the most likely date for the entire approved transportation system to commence operation; and second, recovery of actual operation and maintenance expenses, current taxes, and amounts necessary to service debt, including interest and scheduled retirement of debt, for both the Alaska pipeline segment and the gas conditioning plant upon their individual completion and commissioning but not before a date certain, as established by the FERC, to be the most likely date for the entire approved transportation system to commence operation.

There has been a good deal of misunderstanding and misinformation relating to the prebilling waiver. The fact is, the risk that prebilling could actually occur is so small it is unmeasurable for the following reason. It is unlikely that a segment will be completed and commissioned without the other segments also being completed and commissioned on the target operation date established by the FERC since: First, the U.S. sponsors will not receive a return of or on equity until the entire system operates; second, the project sponsors and regulatory authorities in the United States and Canada will assure coordinated construction; and third, the most difficult portions of the project will be constructed first.

The request that billing be permitted to commence for each of the three individual segments of the ANGTS upon their separate completion and commissioning and after a date set by the FERC, in consultation with the Federal Inspector, as the most likely date for the entire ANGTS to commence operation represents a fair sharing of risk between investors and consumers: First, consumers would not pay for the ANGTS as it is being constructed, and in no event would consumers be charged before November 1986, which is the currently projected date for completion of the entire ANGTS; second, the consumer risk in the unlikely event of a delay is minimal because it is so widely dispersed—the average residential consumer would pay only 32, 80, or 98 cents per month after the target operation date depending on which segment was delayed; and third, the project sponsors would continue to incur significant risk because no charges could be made for any segment that is not completed and commissioned.

Thus, investors in a segment bear the loss associated with its noncompletion. The U.S. sponsors do not receive a return of or on equity until gas flows. Finally, no charges can be made until the target operation date set by the FERC.

The waiver honors a commitment to Canada. In a letter of July 13, 1980, President Carter advised Prime Minister Trudeau of Canada that he would request the Congress to permit the Canadian sponsoring companies to collect their full cost of service upon completion of their segment.

Congressional approval of the proposed waiver would not relieve the FERC of its statutory responsibilities under the Natural Gas Act to find that the project tariff is in the public interest. Under that act the Commission would still be required to find that all rates and charges for delivering natural gas to markets in the lower 48 States are just and reasonable.

As was the case in the other waivers, the testimony of the financial community was clear on this point. Without the prebilling waiver, there would be no pipeline. Again, in the words of Anton Tucher of the Bank of America:

Without the (prebilling) waiver, as a practical matter, private financing cannot be arranged.

The fourth waiver would have the effect of permitting FERC, at its discretion, to dispense with formal evidentiary hearings on certificate applications authorizing construction and operation of the ANGTS. If Alaskan gas deliveries are to commence in late 1986, the process of obtaining final certification pursuant to section 7 of the Natural Gas Act must not be unduly delayed.

Given the extensive government scrutiny of the project over the past years, the FERC should not be required to initiate further elaborate hearings if in its judgment to do so would add little or nothing to the already voluminous project record which includes: First, over 2 years of formal evidentiary hearings before the Federal Power Commission prior to the President's 1977 decision; second, 1½ years of hearings, both in Canada and the United States, before the final "pre-build" authorizations were issued; third, 2 years of formal rulemaking relating to the project tariff and the Incentive Rate of Return mechanism; fourth, 2 years of FERC review of the design specifications for the Alaskan pipeline; and fifth, over 1 year of review by the FERC and the Office of the Federal Inspector of the cost estimate for the Alaskan pipeline segement.

Approval of the proposed waiver would not in any way relieve the FERC of its statutory responsibility under the Natural Gas Act to find that construction and operation of the remaining portions of the ANGTS would serve the public interest and that all rates and charges are just and reasonable. Nor would approval deny any party the right to otherwise fully participate in any FERC proceedings leading to final certification.

In testimony before the Senate Energy Committee, Stanley J. Lewand, Vice President of the Chase Manhattan Bank made the following observation about this specific waiver:

With regard to evidentiary hearing requirements, I think that the history of regulation and the potential for further delay in the process of reaching a decision make it desirable for FERC to be granted discretion to hold hearings only when it deems such hearings appropriate. Time is important in the construction of this project and in the delivery of our own gas from Alaska. The more expeditious we can make the hearings before the regulatory commissions, the less will be the cost of the delivery system and the greater will be the benefits to the eventual consumer.

The fifth waiver will provide assurances of regulatory certainty which the financial community requires to insure sufficient revenue recovery. This proposed waiver is limited in scope in order to preserve a balance between the assurance of pipeline revenue recovery vital to lenders and the statutory obligation of the FERC to assure just and reasonable rates.

This waiver would only prevent changes to the tariffs which would impair debt service for the ANGTS or preclude the recovery by shippers of costs associated with the purchase and transportation of Alaska gas. Thus, actual expenses will still be subject to a FERC prudency examination. The lenders will not advance the necessary capital to fund the project without assurances that, once approved by the FERC, the tariffs will not be subject to future regulatory action which would impair the recovery of debt provided in reliance on such tariffs.

The FERC has attempted to provide as much regulatory certainty as possible by approving a tariff that, in the event of a service interruption, would assure a stream of revenues sufficient to service debt and pay operation and maintenance expenses and taxes. However, the FERC recognizes that it could be legally possible for a future Commission to modify this tariff.

In a recent memorandum to the chairman and ranking member of the House Subcommittee on Fossil and Synthetic Fuels, the General Counsel of the FERC indicated that both he and the FERC chairman concur with the assessment that potential lenders to the ANGTS need greater assurances on the matter of regulatory certainty than they have been supplied to date and that, under present law, this assurance cannot be provided by the FERC. Again, the financial community expressed its unanimous support of this waiver. Robert Graham of Citibank testified that the financial community ". . . would not accept the tariff arrangements proposed as the security for repayment of our loans to this project without this waiver."

The sixth and seventh waivers are of a technical nature, specifying the regulatory status of the project and insuring the sufficiency existing of export-import authority. Again, witnesses at the Energy Committee hearings agreed that these technical amendments clarify potential legal and regulatory difficulties and may add perceptibly to the feasibility of attaining private financing for the project.

Mr. President, this nonamendable package of waivers contain the minimum elements that can attract private financing given the current realities of today's financial markets. I hope my colleagues in the Senate understand that we have a rare opportunity before us today. A vote for this single piece of legislation is a vote for enhanced national security, increased energy independence, and an improved balance of payments.

Moreover, a vote for this resolution will allow the United States to fulfill its commitments to Canada and bring Alaskan gas to the lower 48—and I might add that this gas would come to us by the method and along the route preferred by the environmental community. Also, a vote for this resolution will help facilitate the creation of private-sector jobs and the infusion of private-sector capital into an economy which is in the midst of a recession.

Finally, a vote for this resolution is a signal to OPEC that America intends to develop its own energy resources. I think the American people deserve no less than that. The alternative—continued dependence on foreign oil—is an alternative I cannot live with, and I am certain my colleagues will share that conclusion and support this resolution.

I would urge my colleagues today to consider that a vote for the waiver is a vote to insure that each of your States will be assured of a proportional share of this gas. The alternative is to deny your State of its gas supply over the next 25 years.

I, therefore, urge your support of Senate Joint Resolution 115.

Mr. McCLURE. Mr. President, I yield myself 1 additional minute.

Mr. President, it has been suggested that Congress should not follow the expedited procedure provided for in the Alaskan Natural Gas Transportation Act, which would waive laws. It has been proposed by some that a better solution might be to legislate a solution.

I would point out that the proposal before us was formulated by the President in recognition of the need to expedite decisions regarding the system. Delay would cost billions of dollars and at least another year. Separate legislation would not be practical in light of the need for a timely decision to remove remaining barriers to private financing. We must act now. The waiver package before us is a responsible approach to a solution to the present situation.

Mr. STEVENS. Will the Senator yield just 30 seconds?

Mr. McCLURE. I yield 30 seconds to the Senator from Alaska.

Mr. STEVENS. Mr. President, I wish to underscore what the Senator has just said. I know of no time frame that we could find to consider the complex legislation that would evolve if we tried to go the legislative route. The President's route is the only route to go to get the assurances we need to go to the financial markets in time to finance this project. A legislative route would kill this project. The waiver package is the only way that this project is going to survive.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

Mr. METZENBAUM. Mr. President, the measure we have before us is raw,

it is crude, it is unfair, it is inequitable, it is unjust, and it is the result of sheer and unadulterated greed.

I rise in opposition to this package. This is one of the rawest deals to ever come before the Congress, and it will go through overwhelmingly because one of the finest lobbying jobs this Congress has ever seen has been in effect.

I ask unanimous consent to have printed in the RECORD at this point an article from the Washington Post concerning all of the lobbyists involved in pushing this legislation through.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GAS PIPELINE: FORGING A CONNECTION BETWEEN DEMOCRATS AND GOP

(By Paul Taylor)

What do you do when you hold the government franchise to build the most expensive private construction project ever conceived, but can't find a banker who will touch the project?

If you're a politically connected pipeline tycoon by the name of John McMillian, you put together a lobbying team that covers the waterfront from old friends like Walter F. Mondale and Robert S. Strauss to new ones like former Reagan speechwriter Peter Hannaford.

You commission sheaves of reports on how your project, the Alaska natural gas pipeline, serves the national interest. You arrange for help in the persuasion game from the unions that will build the line, the steel companies that will supply the raw materials and the oil companies that will feed the gas through it.

Then you let the White House and Congress know that if they want the private sector to finance the $40 billion project, they're going to have to shift some of the risk of building it from the bankers to the consumers.

McMillian, a hard-driving, one-time, oil field roustabout, is in the midst of such a campaign. His company, Northwest Alaskan Pipeline, is seeking a series of waivers to its 4-year-old franchise for the project, the most controversial of which would expose nearly half the nation's natural gas customers to the possibility of being billed for the line before it is finished.

The pipeline is expected to provide the "lower 48" states with more than 4 percent of their natural gas needs by the time it is completed in 1986 at the earliest. It is planned to run a total of 4,790 miles—six times longer than the trans-Alaskan oil pipeline—from Prudhoe Bay, Alaska, to the Midwest in one segment and to California in another.

Consumer groups are opposing the waiver package. The Reagan administration, after some initial hesitance and substantial tinkering, is supporting it. But so far its efforts have been modest, and the major lobbying thrust is being orchestrated by McMillian, who is drawing on a lifetime of political friendships to help steer it through Congress.

McMillian is a heavy financial contributor to the Democratic Party, and his aggressive partisanship has become a matter of regular comment on Capitol Hill, where the package is facing a key vote today in the House Energy and Commerce Committee.

Is it any coincidence, some wonder, that Rep. Tony Coelho (D-Calif.), chairman of the Democratic Congressional Campaign Committee, is one of the most active supporters of the package, and that this summer McMillian purchased a $10,000 table at a dinner sponsored by the committee?

Committee director Martin Franks denies any link. He did, however, note that McMillian has been "an old friend of the committee" and that "we are in the midst of a broad effort to make Democrats aware that you don't remain in the majority by screwing your friends."

Still, he said that the "widespread perception" that campaign contributors receive special treatment from Congress is "vastly overblown."

Former Democratic National Committee chairman Strauss, whose law firm helped McMillian draft the waiver package, took the same tack. "He's my friend and I'm helping him with pride," Strauss said. "But I'm doing it because it's a good project. I certainly don't go around getting involved with helping friends to the tune of $40 billion." Then Strauss added puckishly, "A couple of billion, maybe."

Some committee staffers say that if McMillian is getting any boost from his Democratic Party connection, it is costing him on the other side of the aisle. "He's a dominant personality and people tend to associate the pipeline project with him," said one Republican Senate staffer who asked not to be identified. "I've heard people say why should we rush to his rescue when the rotten bastard is a Democrat."

For his part, McMillian is inclined to dismiss the importance of partisanship. He notes that he himself has given money to individual Republican candidates, and that most of the nine other pipeline companies and three oil companies in his consortium tend to be more Republican in orientation.

Still, he is sensitive enough to the whole question of party loyalty to have assembled a lobbying team that is scrupulously balanced among Democrats and Republicans. To work the GOP side of the aisle, he retained the Hannaford firm and Jack Ferguson & Associates.

For Democratic persuasion, he is leaning on Strauss's firm, Akin, Gump, Strauss, Hauer & Feld, and the firm of White, Fine & Verville.

He also has hired Mondale as a consultant, although a spokesman for the former vice president said he has made only one call to Capitol Hill on the project. McMillian, who this spring contributed $5,000 to Mondale's fund-raising vehicle, the Committee for the Future of America, said the main reason he brought Mondale on board was to help in arranging for financing on the world market.

When McMillian won the franchise in 1977 over two competing pipeline consortiums, he assured Congress he could build the pipeline without government loan guarantees and without consumer risk-sharing.

He now says high interest rates and inflation have thrown his projections out of kilter. To placate a now-skittish financial community, the waiver proposal would split the pipeline project into three segments and call for the Federal Energy Regulatory Commission to set a "date certain" (probably around January, 1978) by which all three are expected to be finished. If, on that date, any one segment is completed but the others are not, the pipeline consortium could begin billing customers for the completed section, even though they would not be receiving Alaskan natural gas.

"This is the minimum the banks can live with, and we're not even sure it is enough," McMillian says. "But we do know if we don't get it, we have no chance for private financing."

The chanciness of the project, even with the waiver package, is part of what is slowing its progress through Congress. Some fear that the waiver proposal is just a foot in the door, that McMillian eventually will be back asking for full federal loan guarantees.

Meantime, the likelihood that natural gas prices will be decontrolled by the time the line is completed has caused some to wonder whether the Alaska gas, with its high fixed transportation costs, will be economically competitive with other forms of energy.

Complicating all this, from McMillian's point of view, is the lukewarm response from the Reagan administration. It substantially cut back on his original waiver request (which had been for a much more extensive pre-billing system) before approving it, and so far it has done little lobbying for the package on the Hill.

But he hopes the administration will get more involved, in part because the proven gas reserves in Alaska are 13 percent of the nation's supply, and in part because letting the project die would severely strain relations with Canada which has a heavy stake in it.

"We need the best lobbyist in town in on this one," said McMillian with a Democratic tipping of the hat to President Reagan. "We don't have him yet, but we're hoping."

Mr. METZENBAUM. This package is, without question, as anticonsumer as almost any legislation that we have ever had before us—and we have had some pretty rugged legislation that has forgotten about the American consumer.

Some of the proposals that have made their way to the floor of the Senate in the past have been rough, but this one is unbelievable. Nobody in their right mind would have thought that there could ever come to pass a time when the consumers of gas would be called upon to underwrite a pipeline that may never be built. Consumers did not ask for this waiver. The pipeline proponents asked for it.

The big winners under this resolution will be Arco, Exxon, and Sohio, the three major oil companies that are producing the North Slope oil and gas. They will get a 70-percent internal rate of return during the first year of production, and the consumers will get zip.

The other winners are the banks, which will be relieved of any risk that the pipeline might not be completed, and the consumers will get zip.

The State of Alaska will reap $10.7 billion in severance taxes and royalty payments on the Alaskan gas, and the consumers will get zip.

The big losers again on the floor of the Senate, again in the halls of Congress, are the millions of consumers who will be forced to shoulder the risk that the $43 billion pipeline might not be completed on time or at all. But the consumers will pay whether completed or not.

Mr. President, I do not know how to get the message to some of the Members who serve with me on this body about what they are doing to their own constituents. They are supposed to be here representing those constituents, but the fact is that consumers in 36 States can very likely be called upon to pay extra dollars on their gas bills, month in and month out, for 20 years and never get a drop of gas.

Mr. President, I ask unanimous consent to have printed in the RECORD a list indicating just what those extra costs may be for each of those constituents in the 36 States.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ANNUAL COST OF PREBILLING THE ALASKAN AND CANADIAN PIPE SEGMENTS

(NOTE.—These figures are based on the House Energy and Commerce staff analysis in 1987 dollars, assuming a compounded annual rate of inflation of 10 percent.)

State/region, residential, and industrial:
United States, $50–$97, $16,294–$32,411.
New England, not directly served.
Connecticut, not directly served.
Massachusetts, not directly served.
Rhode Island, not directly served.
Mid Atlantic, $32–$53.3, $6,352–$11,008.
New Jersey, $15–$29, $2,702–$4,825.
New York, $18–$40, $2,074–$4,434.
Pennsylvania, $60–$82, $20,759–$29,015.
E. North Central, $89–$150, $19,820–$28,434.
Illinois, $27–$135, $3,340–$16,253.
Indiana, $50–$32, $18,161–$31,196.
Michigan, $118–$200, $21,848–$37,030.
Ohio, $114–$126, $40,791–$41,876.
Wisconsin, $114–$179, $25,377–$27,541.
W. North Central, $103–$188, $26,713–$51,557.
Iowa, $118–$217, $47,066–$86,869.
Kansas, $47–$174, $15,131–$57,297.
Minnesota, $256–$256, $26,683.
Missouri, $27–$68, $20,621–$50,773.
Nebraska, $119–$232, $27,125–$52,911.
North Dakota, not directly served.
South Dakota, $132–$221, $8,791–$14,743.
S. Atlantic, $32.2–$74, $14,728–$33,602.
Delaware, not directly served.
D.C., $111, $38,719.
Florida, $0–$11, $6,622–$49,918.
Georgia, not directly served.
Maryland, $109, $9,895.
Virginia, $100, $18,029.
W. Virginia, $82–$100, $91,361–$110,989.
E.S. Central, $29–$42, $17,776–$25,544.
Alabama, $5–$21, $4,313–$18,151.
Kentucky, $85, $29,048.
Mississippi, $23–$24, $21,959–$22,914.
State/region, residential, and industrial:
Tennessee, $29–$45, $12,808–$21,803.
W.S. Central, $3–$32, $3,558–$29,633.
Arkansas, $3–$39, $2,035–$25,512.
Louisiana, $11–$21, $18,694–$21,472.
Texas, $3–$79, $2,127–$67,746.
Oklahoma, $0–$85, $1,438–$68,456.
Mountain, $17–$129, $6,636–$52,835.
Arizona, not directly served.
Colorado, $21–$147, $7,652–$51,997.
Idaho, $85–$100, $119,193–$138,911.
Montana, not directly served.
Nevada, $18–$103, $180,370–$981,210.
New Mexico, $5–$158, $1,481–$32,311.
Utah, $0–$145, $821–$95,719.
Wyoming, $5–$153, $7,190–$93,174.
Pacific, $82–$89, $24,739–$25,889.
California, $82–$89, $23,830–$25,020.
Alaska, not directly served.
Hawaii, not directly served.
Oregon, $74–$81, $72,893–$93,530.
Washington, $93–$114, $59,525–$72,782.
Maine, not directly served.
N. Carolina, not directly served.
S. Carolina, not directly served.

Mr. METZENBAUM. Mr. President, in 1977, when Congress approved President Carter's decision to go forward with the present plan to build the pipeline, we did so with certain specific conditions. Now the pipeline's sponsors are coming back to Congress saying: "We cannot do it on our own; business is unable, keep out of our way, Government, but when we get in trouble, come back, Government, and bail us out."

This is the bailout bill, Mr. President, the bailout bill for the oil companies, who sure do not need any bailout. It is also the bailout bill for those other proponents of this gas pipeline.

There are three specific conditions that were in the legislation originally. One, that the entire pipeline be completed and gas flowing before consumers are billed for any of the pipeline's costs; two, that Exxon, Sohio, and Arco be barred from any ownership in the pipeline; three, that the oil companies bear the responsibility for constructing the $6 billion conditioning plant at the pipeline's northern end.

Now, Mr. President, this administration is asking Congress to waive all of these conditions and more. The 10 interstate pipelines that make up the Alaska pipeline consortium and the three oil companies producing the gas want to change the rules of the game in midstream. The same oil and gas industry that comes here and importunes Members of the Senate and says, "Get the Government off our backs; let the market operate," today has changed its colors. It is talking out of both sides of its mouth. They are now asking Government to step in and shield them from the decisions of the marketplace.

For almost 4 years, this project has been unable to secure financing despite the more than 30 percent rate of return the project would provide for the pipeline during the first year. The major banks have scrutinized this project and decided that there is a major risk that the pipeline might not be completed or that the Alaskan gas might not be marketable.

What do the banks say? "Consumers, you underwrite it. You are rich, consumers, and the poor oil companies are not so rich."

The banks' fears may be justified that the pipeline will not be completed or that the gas might not be marketable, because according to the pipeline's figures, the delivered price of the Alaskan gas in 1987 will be $11.91 to $18.51 per mcf, which is an oil equivalency price of $69 to $107 a barrel. A House Energy and Commerce Committee analysis puts the delivered price as high as $15 to $20 per mcf.

Stanley Lewand, vice president of Chase Manhattan Bank, told the Committee on Energy on October 30, 1981—and I commend him for his candor—that:

> Lenders have indicated . . . that they are not willing to accept the risks that the delivery system might not be completed . . . and that they must be assured of the timely repayment of their debt and interest thereupon.

Oil companies will not underwrite it; why should they take the risk? The banks will not underwrite it; why should they take the risk? But the American consumers in 36 States should underwrite it, according to the pipeline's sponsors.

The decision of the financial marketplace, Mr. President, is that they are not willing to take that kind of risk. Now the pipeline's sponsors want to waive the provisions of the law that prohibits consumers from paying for any of the pipeline's costs until the pipeline is completed and gas is flowing. That means that consumers will be forced to assume the risks that the pipeline might not be completed even though shrewd businessmen such as Mr. Lewand have concluded that the risk is too great.

When Congress approved the present pipeline plan in 1977, Mr. President, we were assured this would never happen. But what they tell Congress in 1 year or 1 week, they change the next year or the next week if it suits their convenience.

On September 22, 1977, John McMillian, chairman of the Northwest Oil Co., a very responsible, reputable gentleman of integrity, head of the pipeline's parent company, told the House Commerce Committee:

> The President's decision requires that the Alcan project be privately financed in its entirety. The United States and Canadian Governments will not be called upon for financial guarantees.

And there is nothing in this legislation that calls upon the Government for those financial guarantees. He was correct.

But he also said:

> Nor will consumers have to bear the hypothetical burden of noncompletion of the project.

I want to repeat that for the Members of the Senate, Mr. President. When Mr. McMillian testified for this measure in 1977, his unequivocal language was:

> Nor will consumers have to bear the hypothetical burden of noncompletion of the project.

He went on to state:

> Instead, other primary beneficiaries of the project will be called upon to provide the necessary financial backing. We believe that Alcan can obtain the necessary project financing from Canadian and United States sources.

What kind of credibility is that? He tells us one thing in 1977, then totally reverse the story in 1981, after the project is underway. What kind of responsibility is that? That is the kind of thing we just recently heard from the Office of Management and Budget Director, Mr. Stockman, saying one thing but meaning another thing.

That is what we have in this instance, a total lack of credibility and a total reversal of the commitment that was made to the people of this country and to the Congress and to the President of the United States when the legislation was first before us.

It was on the basis of Mr. McMillian's assurances that Congress approved President Carter's decision. The concept of consumers being forced to pay for the pipeline's cost before any gas service is provided is anathema to anyone who believes in fair play and free enterprise. But so much for fair play.

What does this waiver really mean, Mr. President? Under this proposal, the pipeline would be allowed to begin charging consumers for the cost of constructing the pipeline's Alaskan segment or the gas conditioning plant if they are completed by the estimated due date to be established by the Federal Energy Regulatory Commission, even though the entire pipeline is not completed and functioning.

For the Canadian segment, consumers would be forced to pay a hefty rate of return on equity in addition to the construction costs. Those costs would continue for 20 years—for 20 years—even if the pipeline is never completed.

Mr. President, is that not unbelievable, that we have before us today a proposal to require the American people in 36 States to pay for a pipeline that may never be completed because the bankers and the proponents of it are not willing

to underwrite it themselves? Does anybody really believe that the three oil companies that are in this deal cannot find the wherewithal to provide the financial backing for this pipeline if they truly were committed to it and intended and wanted to do so? Of course, they can.

But why should they put that on their balance sheet if they can get the American people to put it on their balance sheet?

How much would the prebilling cost? Based on an analysis prepared by the staff of the House Energy and Commerce Committee, prebilling of the Alaskan and Canadian pipeline segments in 1987 would add, on a national average, between $50 and $97 a year to a residential consumer's gas bill.

In my home State of Ohio, where more than 72 billion cubic feet of Alaskan gas is slated to be sold each year, the annual prebilling surcharge for residential consumers could be as much as $114 to $126. I submit that my constituents cannot afford that, and I further submit to my colleagues that their constituents cannot afford the additional billing charges they will have to pay.

On a monthly basis, the prebilling surcharge in Ohio comes to $9.50 to $10.05; $9.50 to $10.05 a month that residential consumers in my home State may be asked to pay because the Congress forced them to assume a risk that the banks refused to accept. Consumers are already being straddled with high interest rates, double digit inflation and a depressed economy. To ask them to bear this risk is unconscionable.

But it is not merely the impact on residential consumers.

The impact of prebilling on industrial gas consumers raises another major problem. The House Energy and Commerce study, weighted for inflation, shows that in 1987, prebilling for the Alaskan and Canadian pipeline segments would add $16,294 to $32,411 per year to the gas bill of an industrial user on a national average. In Ohio, an industrial gas bill would rise from $40,791 to $41,876. A cost increase of this magnitude clearly would hurt our economy. But there is an even greater danger. According to a November 3 Congressional Research Service study:

> The impact on the industrial sector is especially noteworthy because most companies would pass the increased cost to its customers through product price increases or more likely in many cases switch to a cheaper source of energy such as residual oil. If massive switching occurs in the industrial sector, then the average monthly cost to consumers in the residential sectors could skyrocket because the industrial sector was going to bear 50 percent of the consumer liability.

To some of my colleagues, that may sound unlikely. But the potential for industrial users being forced off gas and back on to oil is very real.

Many industrial users in the Northeast and Midwest, where most of this Alaskan gas is scheduled to be sold, possess fuel switching capability that was installed after 1970, when natural gas production is the Southwest and Gulf of Mexico dropped and industrial users were curtailed, rather than face a surcharge of $40,000, most industrial users will simply flip a switch and go back to oil, thereby increasing our oil imports. Consumers would be left holding the bag.

Massive fuel switching in the industrial sector may occur even if the pipeline is completed and the Alaskan gas is flowing. The House energy and commerce analysis shows that in 1987 the price of alternative oil based fuels will be around $6 per Mcf, between two and three times cheaper than the Alaskan gas at $12 to $18 per Mcf—and that price assumes the continuation of price controls on Alaskan gas under the NGPA. But the oil companies are hard at work to repeal the NGPA and totally decontrol natural gas prices. If decontrol occurs there will be no price cushion of old, price-controlled gas to hide the true cost of the uneconomical gas from Alaska.

Despite all of these problems, Mr. McMillian and the other pipeline executives tell us that the risk is "almost none" that consumers will have to make any payments for pipeline construction before gas is flowing, or that the pipeline will not be completed. If the risks are so slight, then why have the banks demanded the total insulation of a prebilling waiver?

The answer is obvious. The risk of noncompletion is great. And the bottom line of this waiver, Mr. President, is that consumers are being asked to guarantee payment of the $43 billion pipeline—but the pipeline is not willing to guarantee that a single cubic foot of gas will ever be delivered.

Of course, the prebilling waiver is not enough. There is more, there is always more and more for the oil and gas industry. The administration also wants to waive the ban on producer ownership in the pipeline. The Antitrust Division of the Justice Department concluded that permitting Exxon, Soho, and Arco to obtain an equity interest in the pipeline could create the opportunity for the earning of monopoly profits. Congress agreed with that assessment and imposed the ownership ban. This legislation will very effectively weaken that.

The administration claims that any opportunity for monopoly profits will be prevented by requiring the FERC—in consultation with the Justice Department to conclude that producer participation will not violate the antitrust laws. But this condition is meaningless. The FERC does not have any expertise in antitrust enforcement and the officials in this administration's Justice Department have already shown that they are totally unwilling to effectively and vigorously enforce the antitrust laws. Furthermore, FERC Chairman Charles Butler has already told the Energy Committee that he believes the pipeline should go forward with the waivers.

The pipeline and the producers already have negotiated at less than arm's length. Just look at the indefinite price escalator clause in Exxon's supply contract with Pacific Gas Transmission Co. in which the purchaser agrees to pay the price of middle distillate fuel in the event of decontrol.

There are other existing barriers hampering competitive contractual negotiations such as the provisions that permit the pipeline to pass through to its retail customers all of its purchaser gas costs. To permit the oil companies to sit on both sides of the negotiating table will only heighten these problems.

No, we should not lift the ban on producer ownership, Mr. President. The concern about the potential for the producers earning monopoly profits remains as compelling today as it did 4 years ago. We need not look further than the Office of Federal Inspector's, October 19, 1981, cost of service analysis. That report estimates that the producers will receive an internal rate of return of more than 70 percent a year, if they obtain a 30-percent ownership in the pipeline. This fact alone is ample reason for opposing this waiver package. But there's still more. More and more and more.

At the same time the administration proposed to lift the ownership ban, the administration also wants to relieve the producers of their responsibility for constructing the $6 billion conditioning plant at the pipeline's northern end. This requirement was imposed on August 24, 1979, by the FERC in order No. 45. The Commission found that the industrywide practice has been for the producer to construct the conditioning plant. The gas is not marketable to a transmission pipeline until it has been conditioned.

This waiver would create a bad precedent by including the conditioning plant in the pipeline rate base. That is plainly absurd, that shows how raw you can get when you start to push and you are getting your own way.

Now the consumers, instead of the oil companies, are even being required to assume the risk in conditioning plant costs.

I ask my colleagues, who is better able to shoulder this risk: Major oil companies with billions of dollars in cash and billions more in lines of credit or consumers who are fighting to keep their heads above the tidal wave of inflation?

The justification for this outrageous waiver is that it will improve the ability of the pipeline to attract financing. This is a most ironic claim. The House Energy and Commerce Committee analysis correctly points out that the conditioning plant in the pipeline rate base adds 20 percent to the delivered price of the gas.

If the banks are concerned about the marketability of the Alaskan gas, increasing the delivered price by 20 percent will only drive more industrial users with fuel switching capability off gas and on to oil. This waiver will not help finance the project. It will only give Exxon, Sohio, and Arco a $6 billion windfall by relieving them of their responsibility to construct the conditioning plant.

And there is still more. After asking consumers to assume the multibillion risk that the pipeline and the conditioning plant might not be completed, the administration proposes to waive several key provisions of the Natural Gas Act. This would eliminate many of the legal safeguards consumers need to protect

themselves from any questionable activities in which the pipeline's sponsors and the oil companies might engage.

This provision would waive evidentiary hearings during FERC's consideration of the pipeline's applications for certificates of public convenience and necessity for the construction or operation of any pipeline segment. Eliminating evidentiary proceedings means that consumers will lose their right to cross-examine the pipeline's witnesses and openly challenge their data and assumptions.

Furthermore, in the name of "regulatory certainty" this proposal would bar FERC from ever lowering the monthly minimum bill for debt service and construction costs that each of the interstate pipelines will be allowed to pass on to its retail customers. The President's synopsis of the waiver says that this provision is necessary to insure that the Commission does not change the rules of the game at some later date. Who is kidding whom? Either the game did not begin with congressional approval of President Carter's 1977 decision or the pipeline's sponsors have a blatant double standard.

That is the waiver package, Mr. President. Why is this outrageous proposal before the Senate?

The proponents of this resolution say, "This is the only way. The banks demand it."

Why would the banks want only a waiver package that forces up the delivered price of Alaskan gas by 20 percent? Why would the banks want only a package that relieves the three oil companies of their $6 billion responsibility to build the conditioning plant and guarantee them a 70-percent rate of return? Why would the banks want to force consumers to assume the risk of noncompletion? Why is this the only way?

According to the Congressional Research Service, the major banks financing the pipeline and three maor oil companies producing the gas are directly interlocked at the board level.

Chase Manhattan, for example, has on its board Howard S. Kaufman, the president of Exxon.

Citicorp has on its board, G. Clifton Garvin, Exxon's board chairman. Citicorp's board also includes J. Peter Grace and Robert A. Hatfield, both directors of Kennecott, which is a wholly owned subsidiary of Sohio. The Bank of America has on its board Phillip M. Hawley, who also sits on the board of Atlantic Richfield.

C. J. Morgan & Co., has on its board Carter L. Burger, who also sits on the board of Kennecott.

And Sohio has on its board Renee McPherson, the dean of the Stanford Business School, who also sits on the board of Manufacturers Hanover.

At the very least, the existence of these interlocking board memberships will inevitably lead to questions if the consuming public is forced to assume costs that properly belong to the pipeline's investors and creditors.

I believe, however, that this is not the only way to finance the pipeline. Keeping the conditioning plant out of the pipeline rate base will lower the delivered price of the gas by 20 percent, thereby lessening marketing problems. It will also mean $6 billion less that the pipeline will have to borrow. Let Exxon, Sohio, and Arco, all of which are awash in cash, use their profits to build the plant instead of buying up other oil companies.

The marketability problems could be further reduced by forcing the producers to sell their gas at prices substantially below the NGPA price ceiling. The prices for Alaskan gas under section 109 assume exploration and production costs that the oil companies have not incurred here. This gas is already being produced at Prudhoe Bay right now and simply being reinjected back into the field. The only expense left is hooking up a gathering line. Why do Exxon, Sohio, and Arco need another windfall from the sale of this low-cost gas?

According to the CRS, the State of Alaska will reap $10.7 billion in severance taxes and royalty payments from the sale of Alaskan gas. Yet, to date, Alaska has not invested one penny in the pipeline.

Finally, other bankers have suggested that by selling additional equity as part of the financing package, the money could be more easily raised.

There are other ways, Mr. President. Certainly I am not opposed to tapping the Alaskan gas for domestic energy use. But I cannot support a waiver package that forces consumers to assume a risk that the financial community will not accept. I cannot support a waiver that decreases the marketability of the gas in order to bail Exxon, Sohio, and Arco out of their responsibility to build the conditioning plant. And I cannot support a waiver package that will allow them a 70-percent internal rate of return, by giving the producers an equity ownership.

If the risk of noncompletion and delay is as small as the pipeline's sponsors claim, then there is no need for any of these waivers. If the risks exist, then they should not be borne merely by consumers who face the danger of seeing their gas bills go up sharply in 1987 while getting nothing in return.

The issue here, Mr. President, is fairness and commonsense. I strongly urge my colleagues to reject this outrageous proposal.

Mr. President, the justification for this outrageous waiver is that it will improve the ability of the pipeline to attract financing. Of course, What is such a great problem about getting financing from the banks if the American people are going to underwrite it?

This waiver that we have before us is going through. It is slick. It is greased. It is all set to roll. The lobbyists have done their job, and the American people will pay the price. But I challenge any Member of the U.S. Senate to go back to their own constituency and tell them what you are doing to them. Go back and tell them about the unfairness and the inequity of this. If you do not want to tell them yourself, invite me to your State, and I will debate you on that issue. You do not have a right to do this.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield to nobody.

You are just playing into the hands of the oil companies. You are playing into the hands of the Senator from Alaska for $10.5 billion on this deal.

This deal does not have any propriety. This deal is evil. This deal reflects greed. This deal should not be approved, and it will be approved because the people of this country do not know what is happening.

But if you think that this deal can be justified in your State, go out and talk to your people and tell them what is in it. If you want me to come along, I will come along and debate you publicly. This is a raw deal. You should not be doing it.

Mr. President, I reserve the remainder of my time.

Mr. STEVENS. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. D'AMATO). Who yields time?

Mr. METZENBAUM. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Ohio has 7 minutes and 41 seconds.

Mr. METZENBAUM. I yield 4 minutes to the Senator from Minnesota.

Mr. DURENBERGER. Mr. President, I oppose Senate Joint Resolution 115 which would waive certain provisions of law to expedite construction of the Alaska Natural Gas Transportation System. In my mind there are many unresolved issues related to this waiver package. There is not time to touch on each and every issue in the debate this morning. I will limit my comments to four areas of objection: Precompletion billing, the provision called regulatory certainty, the role of Alaska as a tax assessor on this national resource, and the procedures that bring this resolution to the floor.

Before taking up these issues, I say to my colleagues who support this resolution that my purpose is not to kill the Alaska Gas Pipeline. Natural gas from Alaska can and I am sure someday will make a substantial contribution to the Nation's energy supplies. Internorth Pipeline Co., which is one of the sponsors of this project, supplies almost 95 percent of the natural gas coming into my home State of Minnesota. Internorth depends heavily on Alaska gas to meet its commitments in the future. However, the question that we debate today is whether these specific waivers are necessary to assure that supply. If we defeat this resolution, and I am under no illusions that we will, there is nothing to preclude the President from submitting a second, more reasonable package to the Congress so that outstanding issues can be resolved. In fact, I would encourage him to do so and would support most of the items that are to be waived under Senate Joint Resolution 115. It is only precompletion billing and regulatory certainty to which I object.

Mr. President, I object to precompletion billing for the obvious reason that it shifts decisions that should be made in the marketplace to Congress. And it does so because the marketplace has already made a negative judgment on the probability of completing the pipeline. The

sponsors and the producers have reached an agreement that limits the liability of the partners to the assets committed to construction. In other words lenders could not reach to the underlying assets of these corporations to recover the principal for any debt should the project not be completed. This arrangement is called project financing.

The sponsors and producers presented a project financing proposal to the banks and were rejected. The banks are so doubtful on the prospects for the pipeline that they would not accept the assets of the project as collateral nor would they risk their capital on a project which will have Exxon and Arco and several major utility pipeline companies as equity partners. So we have Senators coming to the floor to ask that we risk the assets of the American public in 48 States to guarantee that the project gets built.

We have Senators from the States most heavily affected opposing precompletion billing. We know that it is our future supply of natural gas at stake. We, like the banks and the oil companies and the utility pipelines, are saying that we do not want to risk the assets of our consumers either. That does not seem to me an unreasonable position to take. If Exxon will not risk its assets to gain a substantial profit, why should a small businessman in Minnesota be expected to take on the risk of the project when he has no possibility of gain?

Figures from the House Energy and Commerce Committee show that a typical residential consumer in Minnesota could face a surcharge of $159 per year if the Canadian and Alaskan segments of the line are completed, but the gas processing facility is not built. That is $159 per year without getting a single Btu of natural gas. Under a similar scenario the small businessman in Minnesota would be subsidizing his project at the rate of $775 per year.

But, Mr. President, that is only the smallest part of my objection. There is another provision in this waiver package that has the potential to be one of those familiar governmental creatures—a trojan horse. I refer to the waiver of certain sections of the Natural Gas Act which is being described by the sponsors of this resolution as "regulatory certainty." Their argument is that these waivers are necessary to prevent the FERC at some future time from adjusting the tariff on the pipeline so low that the sponsors of the project could not recover their operating costs, debt principal, interest, and taxes.

That is a very unlikely possibility, but it is being used to hide a much more significant issue. This part of the waiver shifts the entire debt of the project once completed onto the consumer whether the project is operated to deliver gas or not. There is a principle in utility ratemaking that requires an asset to be "used and useful" in the provision of service before it can be billed to the customer. This part of the waiver package cancels that principle so far as the Alaska gas pipeline is concerned.

If for some reason the pipeline were built and commissioned but later abandoned, the consumer would still be forced to pay the debt portion—75 percent of $40 billion—of the project under this part of the resolution. One can easily imagine such conditions. For instance, the development of a cheaper substitute fuel in the lower 48, the discovery of other reserves more cheaply delivered, or an act of God that puts the pipeline or the gasfield out of commission.

One can imagine other ways in which this part of the waiver might be abused. Suppose for instance that a tariff were established to recover the debt at a transmission capacity of 2 billion cubic feet per day and then later the capacity was expanded to 3.2 billion cubic feet per day. This provision would prevent the FERC from lowering the tariff to reflect the additional capacity. The extra revenues would be gravy for the pipeline partners.

My third objection, Mr. President, is to the role of the State of Alaska in this project. We see here on the Senate floor two Senators from the State of Alaska urging this project on the rest of the Nation. That is easy to understand. If the project is built and gas flows, the State of Alaska stands to collect a minimum $10 billion in royalties and severance taxes over the next two decades. And yet it is the consumers in the lower 48 States that are being asked to take all the risk on this project. I do not begrudge Alaska its royalty share in the revenues from Alaskan gas, but I do think that the State in the name of the national interest and to the extent that it stands to benefit greatly as a royalty partner should forgo the severance tax on this gas as part of any arrangement that puts the assets of the rest of the American population at risk to assure that the project is completed.

We do not even have a commitment from the State of Alaska to keep severance taxes at present rates. There is every reason to believe that as debt is retired on the project, bringing down delivered cost, that Alaska will raise the severance tax burden to fill the gap. The economics of the project depend crucially on the role of Alaska as a tax collector and we ought to expect them to make a commitment of reasonableness before we take the risk.

My final objection, Mr. President, goes to the procedures under which we are considering this resolution. I do not believe that the Alaska Natural Gas Transportation Act of 1976 contemplated the use of the waiver resolution in relation to the basic sections of the Natural Gas Act. These provisions of the NGA are the fundamental procedures by which we determine just and reasonable rates.

The implications of waiving these provisions as I have indicated are serious and should be considered with more thought than is allowed by a 1-hour debate. The waiver provisions were designed to deal with law on licenses, permits, certificates, and other authorizations related to construction. They were not intended to be directed at the ratemaking process. So I object to the procedures we are using this morning on the waiver package presented by the President. The scope of the waiver is too broad to be considered under these rules.

Mr. President, I have a memorandum from the FERC on the subject of the waiver of the Natural Gas Act and I ask unanimous consent that this memorandum be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

FEDERAL ENERGY
REGULATORY COMMISSION,
Washington, D.C., August 18, 1981.

Memorandum to Hon. Philip R. Sharp, Chairman, Subcommittee on Fossil and Synthetic Fuels, Committee on Energy and Commerce, House of Representatives.

Memorandum to Hon. Clarence J. Brown, Ranking Minority Member, Subcommittee on Fossil and Synthetic Fuels, Committee on Energy and Commerce, House of Representatives.

From Charles A. Moore, General Counsel, Federal Energy Regulatory Commission.

Re Proposal by Sponsors of the Alaskan Natural Gas Transportation System (ANGTS) for Congressional Waiver of Sections 4, 5, 7 and 16 of the Natural Gas Act in Certain Respects Pursuant to Section 8g of the Alaskan Natural Gas Transportation Act of 1978.

QUESTIONS PRESENTED

By letter of July 24, 1981, to C. M. Butler III, Chairman, Federal Energy Regulatory Commission,[1] you requested a legal memorandum addressing the following questions:

(a) The full implications of the proposed waiver quoted hereinbelow, (b) whether there have been past Commission actions which justify the desires of the sponsors to have Congress provide the waiver, (c) hypothetical situations which would work to the injury of the pipeline sponsors of ANGTS or other participants in the project should no such waiver be provided by Congress, (d) hypothetical situations which might work to the injury of resale customers and consumers should such a waiver be provided by Congress, and (e) the reasonable likelihood of the hypothetical situations actually occurring.

The text of the waiver request, as set forth in your letter, is as follows:

Authority to Modify or Rescind Orders.

Waive Sections 4, 5, 7, and 16 of the Natural Gas Act to the extent that such sections would allow the Commission to change the provisions of any final rule or order approving (a) any tariff in any manner that would impair the recovery of the actual operation and maintenance expenses, actual current taxes, and amounts necessary to service debt, including interest and scheduled retirement of debt, for the approved transportation system; or (b) the recovery by shippers of Alaska gas of (1) all costs related to the purchase of such gas at just and reasonable rates, and (2) transportation of such gas pursuant to an approved tariff.

We are advised that this text is currently a topic of discussion at staff levels in the Administration and the Congress, and that the text may be revised in one or more respects. Accordingly, the memorandum is expressly limited to the preceding text, although I will be pleased to respond as expeditiously as possible to any questions you might have in connection with material changes in such text.

DISCUSSION

1. Background:

As you know, the ANGTS is an international project created to transport natural gas from the North Slope of Alaska, through

Footnotes at end of article.

Canada, to the lower 48 states. The United States portion of the system consists of three segments: (1) the Alaska segment, running from Prudhoe Bay on the North Slope to the Yukon border; (2) the Western Leg, running from the British Columbia border to California; and (3) and the Northern Border pipeline, running from a point on the Canadian border near Monchy, Saskatchewan, to Dwight, Illinois.

The ANGTS is unlike any other gas pipeline in the United States in that it is governed by a unique legal framework. The Alaska Natural Gas Transportation Act (ANGTA), 15 U.S.C. section 719, *et seq.*, enacted by Congress in 1976, supplements (but does not replace) the Natural Gas Act; certificates are issued under the Natural Gas Act pursuant to procedures mandated by ANGTA.

Pursuant to Section 7 of ANGTA, the President, in September of 1977, submitted his Decision and Report to Congress on the Alaska Natural Gas Transportation System (Executive Office of the President, Energy Policy and Planning) which designated both the project sponsors and the route for the ANGTS as well as many conditions for its construction. Congress approved the President's Decision by Joint Resolution, which became law on November 8, 1977. H.J. Res. 621, Pub. L. No. 95–158, 91 Stat. 1268, 95th Cong., 1st Sess. (1977).

The ANGTS is also governed by two international agreements with Canada, both of which have the force and effect of law. The "Agreement Between the Government of the United States of America and the Government of Canada Concerning Transit Pipelines," entered in force October 1, 1977 after ratification by the Senate, applies to all pipelines in both countries whenever one country's pipeline carries the other country's gas or oil. The treaty mandates nondiscriminatory treatment.

The "Agreement Between the United States of America and Canada on Principles Applicable to a Northern Natural Gas Pipeline," signed by representatives of the two governments on September 20, 1977, is an executive agreement that was made part of the President's Decision (pages 47–83). Inasmuch as the Decision was approved by Congress, it (including the Agreement) has the legal status of a statute. The Agreement specifies the route of the ANGTS, and contains numerous conditions. Pursuant to the Agreement, our Commission has consulted with the National Energy Board of Canada in coordinating respective certification of the various ANGTS segments in the U.S. and Canada, including related imports of Canadian gas to support the "prebuilding" of the lower half of the system.

One other relevant item of legislation is Reorganization Plan No. 1 of 1979, which was submitted by the President to the Congress and not disapproved by the Congress. The Plan establishes the Office of the Federal Inspector, which reports directly to the President. The Inspector is responsible for monitoring the construction of the pipeline, and for coordinating all federal permitting and certification of it. The Plan transfers to the Inspector the Commission's Natural Gas Act Sections 3 and 7 jurisdiction to enforce the Commission's certificates and import authorizations issued to the ANGTS project sponsors.

Two categories of tariffs are involved. The project sponsors will own and operate the various segments of the ANGTS, but will not buy or sell the gas transported through it. The shippers will buy the gas at the Prudhoe Bay Field, ship it through the sponsors' facilities, and sell it somewhere at the other end of the pipeline. The sponsors will have tariffs authorizing charges to the shippers. The shippers will in turn have tariff provisions authorizing charges to their customers for the sale of the gas, which charges will include in some form reimbursement of the shippers for the transportation charges paid by the shippers to the sponsors, as well as reimbursement for the costs of purchasing the Prudhoe Bay Field gas.

Thus, for example, if a shipper buys gas at Prudhoe Bay for sale in Detroit, the shipper would incur separate transportation charges billed by the respective sponsors of the Alaska segment, the Canadian segment, and the Northern Border segment of the system. That shipper would request a tariff authorizing "flow through" to its customers of the full amount of transportation charges paid to the sponsors of each of the three pipeline segments through which the gas was transported, as well as the full cost of the gas itself.

The "flow through" issue is often referred to as "tracking" of charges. Tracking of gas purchase costs is authorized by the Commission's regulations, through purchased gas adjustment clauses. (See 18 C.F.R. 154.38.) Tracking of transportation charges has been authorized in certain instances on a case by case basis.

In order Nos. 31 and 31–B,[2] the Commission approved in principle the tracking by ANGTS shippers of transportation charges billed by U. S. certificated ANGTS project sponsors (i.e., the sponsors of the Alaska, Northern Border and Western Leg segments), but reserved for later resolution the issue of tracking the charges of Foothills Pipe Lines (Yukon) Ltd. (Foothills), the sponsor of the Canadian segment. The unresolved tracking issues (including tracking of Foothills' charges that have been approved by the National Energy Board of Canada) are currently under study by the Commission's Alaskan Delegate, who is preparing a report to the Commission.

The sponsors' and shippers' initial tariffs are approved by the Commission pursuant to Section 7 of the Natural Gas Act upon issuance of the certificates. Alaskan Northwest's pro forma tariff was approved in Order Nos. 31 and 31–B. Section 7 provides a "public convenience and necessity" standard. While the Commission may establish initial rates that meet the more rigorous "just and reasonable" standard in Sections 4 and 5 of the Act, it is not required by law to do so. The Commission must only find that the initial rates are in the "public convenience and necessity" and may reserve for later determination what the "just and reasonable" rate should be.

Section 7(e) of the Natural Gas Act gives the Commission authority to attach conditions to certificates. The courts have construed broadly the Commission's responsibility under the Natural Gas Act to condition certificates with respect to rate terms and other matters affecting the public convenience and necessity. *See, e g., Atlantic Refining Co.* v. *Public Service Commission of New York*, 360 U.S. 378 (1959); *FPC* v. *Hunt*, 376 U.S. 515 (1964). *But see Panhandle Eastern Pipe Line Co.* v. *F.E.R.C.*, 613 F.2d 1120 (D.C. Cir. 1979), *cert. denied*, 101 S. Ct. 247 (1980).

Section 4 of the Act requires that all rates and charges be "just and reasonable." After certification, all changes in the initially approved tariffs and rates must be filed with the Commission pursuant to Section 4. The Commission, pursuant to prescribed standards and procedures, may "suspend" such changes for up to five months pending a hearing. If the changes are suspended, the prior approved tariffs and rates remain in effect during the period of suspension. The changes may take effect after the suspension period but subject to refund (with interest) depending on the outcome of the hearing process on contested issues or other disposition by the Commission.

Section 5(a) of the Act authorizes the Commission to institute a proceeding on its own initiative, to consider the justness and reasonableness of a certificate holder's rates and tariffs, and to determine new rates or tariff provisions if the existing ones are determined to be "unjust, unreasonable, unduly discriminatory, or preferential." Such changes can only be prospective; in a Section 5 proceeding the Commission cannot suspend rates or order refunds.

Section 16 of the Natural Gas Act authorizes the Commission to modify or rescind its orders after they have been issued. This authority, under appropriate circumstances may be utilized for a variety of purposes, ranging from correction of mistakes to modification of certificate terms and conditions in light of changed circumstances.

2. Nature of the Financing:

The subject waiver is sought from Congress by the project sponsors of ANGTS in connection with the financing of the project. The financing mechanism selected by the sponsors has been referred to as "project financing." The propriety of project financing has been addressed by the Commission on a number of occasions, most recently in Ozark Gas Transmission System, FERC Opinion No. 125, Docket No. CP78–532 (July 28, 1981). In that opinion, the Commission described project financing generally as follows:

Project financing differs from conventional financing mainly in connection with loan security. Security generally takes one of two forms in a conventional financing. First, the project sponsor, or borrower, has sufficient unencumbered assets that the lender feels secure in making a loan on the basis of the borrower's general credit. The loan agreement, in such cases, may require any of a number of different undertakings on the part of the borrower to maintain his creditworthiness. Secondly, if the borrower does not have unencumbered assets sufficient to secure the borrowing, the lender may require the pledge of specific assets to be funded by the borrowing as collateral for the loan. As Judge Litt pointed out in his initial decision on the Alaskan Natural Gas Transportation System, this is itself a kind of project financing. In this case the lender is secure in the knowledge that the borrower has put enough money into the project that the economic value of the project, less equity and liquidation costs, will yield sufficient funds for the lender to recover the principal value of the loan and accrued interest. A convenient example of this kind of financing is the mortgage of a building.

A project financing, as it has come to be known in energy projects before the Commission, is a financing in which the general creditworthiness of the borrower is either insufficient or allegedly unavailable to secure the borrowing, and the underlying economic value of the assets to be financed are also insufficient to assure the lender that he will not lose his money. The latter inadequacy will presumptively obtain in the case of any pipeline financing, since the salvage value of the pipeline to be built should, in all cases, be less than the loan obligation. (Note: In this regard Ozark's witness, Gary, states, "Today we all recognize a mortgage on a pipeline is virtually worthless, except for one aspect, in making a legal investment." Tr. 12/1064.)

In this case, an optional financing vehicle is the stream of income to be generated by the project. However, that vehicle is only available in the event that the income stream can be assured whether or not the project should fail. Such assurance is sought in this case in the form of the so-called minimum bill. The minimum bill has been structured in a fashion which will yield sufficient revenues to cover debt service (both principal and interest payments), whether the project is successful or not. In the event the project were to fail, the minimum bill would be

Footnotes at end of article.

levied on the customers of the shippers in the form of a surcharge for gas they do not receive. Slip opinion, at 10–11 (footnotes omitted in part).

As the Commission pointed out in the Ozark case, substantial policy justification should be found in certificate applications before the Commission pursuant to which project financing is sought. In the case of the ANGTS, such justifications have already been considered by both the Executive and Legislative Branches of the Federal Government, as well as the Commission, and have been found sufficient to permit the project financing of the ANGTS.[3]

Some of the justifications have included the substantial amount of natural gas to be delivered by the project, the potential for displacement of large quantities of foreign oil, reduction of pressure on the U.S., balance of payments, net national benefits to both the U.S. and Canada, and the anticipated average cost of gas over the project life.

3. Reason for the Proposed Waiver:

The waiver has a rather singular purpose. It is intended to assure lenders for the project that the income stream which serves as security for their loans will not be reduced below the level necessary to retire the principal of the loan and to pay the interest thereon. It would accomplish this purpose by precluding the Commission from changing the rules of the game, so to speak, in a manner which would undercut the security for the loan. This objective would be achieved by withdrawing from the Commission its authority under the Natural Gas Act to change the project tariffs in such a manner as to reduce project revenues below the level necessary to service project debt. The request for the waiver evidences that certainty of the security is essential, i.e., in this instance that the lenders will rely heavily and to their detriment on the orders of the Commission granting the certificate and establishing the tariffs as preconditions to the sponsors' take down of the construction loans.

All of the foregoing has been explicity recognized by the Commission in FERC Order No. 31.[4] In that order the Commission stated:

The project sponsors have earnestly sought that this Order, especially as its relates to the tariff structure, provide assurance to prospective equity investors and lenders. The concern of the sponsors is well founded. The Commission fully recognizes that equity investors and lenders will make critical decisions respecting the financing of the construction of ANGTS in reliance on this Order.

The Commission has articulated in great detail its rationale for this Order. Where reasoned alternatives were available, we have provided a thorough analysis of the issues and the basis for our conclusions. This thoroughness provides the investor's best security in relying on this Order.

The fact of a request for a waiver suggests that the project sponsors and the lenders feel that they need greater assurance than has been provided to date. The Chairman and I feel compelled to agree with that assessment. As the subsequent discussion and legal analysis shows, with the objective of "security" in mind, a waiver is clearly a far better assurance than an order of the Commission. For example, previous efforts by sponsors to secure additional certainty for lenders by attempting to obtain estoppel findings in Commission orders have been unsuccessful.[5]

Important in the context of ANGTS financing is that a waiver would provide clear assurances and signals to foreign, as well as domestic, lenders. We are advised that a sizeable portion of the borrowing must be acquired from foreign investors because of legal lending limits and other institutional obstacles faced by domestic lenders.

4. Regulatory Risk:

The regulatory risk perceived by lenders consists of two separate, but not unrelated, sets of events. They are: (1) that the Commission would change the tariffs initially approved on a claim of changed circumstances, and (2) that a subsequent Commission, composed of a majority with a different view of the public interest than the collective view of the Commission originally approving the tariffs, would change the tariffs to the detriment of the lenders in order to reflect their different views. The Commission's ability to change the tariffs in either of these events is not clear as a matter of law. It is not unlimited, but our analysis indicates that it is fairly broad. The effect of the proposed waiver would be to eliminate in material part the Commission's options—to the event they exist—to change the tariffs in either of these cases.

5. Constitutional Question:

Implicit in the questions articulated in your letter is the issue of whether the waiver is a reasonably necessary mechanism to provide the lenders with the certainty they seek. The threshold issue, in this respect, is whether there is any constitutional bar to the Commission taking the kind of action described in the subsequent paragraphs. If such a bar exists, the waiver would not be necessary. Our research indicates that this question has not been authoritatively answered by the courts. That is, there are no clear constitutional limits regarding the Commission's power to change tariffs, where parties have substantially changed position in reliance on such tariffs, and the Commission had prior, actual knowledge of such reliance. The Chairman and I believe that a respectable case could be made that it would violate basic constitutional principles of due process for the Commission to change tariffs not explicitly conditioned to permit change, when the Commission is fully aware that the tariffs form the basis of project financing, and the changes will in one way or another undercut that basis. However, there is an absence of authority to support such a proposition.[6]

6. Statutory Question:

The foregoing is not to suggest that there are no Supreme Court cases dealing with regulatory estoppel. To the contrary, there are two cases of considerable relevance; however, both are based on interpretations of the enabling legislation of other agencies. In the first of these, *United States* v. *Seatrain Lines*, 329 C.S. 424 (1946), the Court held that the Interstate Commerce Commission lacked the authority to alter the certificate of a water carrier on its own motion. The holding was based on the express statutory language which permitted such action with respect to motor carriers, and the absence of correlative statutory authority in the case of water carriers, in the Interstate Commerce Act.

In *Civil Aeronautics Board* v. *Delta Air Lines, Inc.*, 367 U.S. 316 (1961), the Supreme Court considered a similar question. The Court determined that Section 401(g) of the Federal Aviation Act prohibited the CAB from altering a certificate of public convenience and necessity, even where the certificating order purported to reserve jurisdiction prior to certification to make summary modifications pursuant to petitions for reconsideration. Reaching this result, the Court's analysis was founded on the plain meaning of the language in the enabling statute and its legislative history.

The *Delta* case is of particular importance to the subject of this memorandum for two reasons. First, the Court clearly explained the nature of the problem with the following statement:

Whenever a question concerning administrative, or judicial, reconsideration arises, two opposing policies immediately demand recognition: the desirability of finality, on the one hand, and the public interest in reaching what, ultimately, appears to be the right result on the other [footnote omitted]. Since these policies are in tension, it is necessary to reach a compromise in each case. . . . *Id.* at 321.

The second key element of the *Delta* case is the recognition by the Court that the limitations placed on the CAB under the Federal Aviation Act resulted from Congressional concern during the passage of its predecessor, the Civil Aeronautics Act of 1938, over the reliance on, and consequent expenditure by airlines of large sums of money on the basis of the CAB's certificate (route) decisions. In this connection, the Court stated:

In short, our conclusion is that Congress wanted certificated carriers to enjoy "security of route" so that they might invest the considerable sums required to support their operations; and, to this end, Congress provided certain minimum protections before a certificated operation could be cancelled. We do not think it too much to ask that the Board furnish these minimum protections as a matter of course, whether or not the Board in a given case might think them meaningless. It might be added that some authorities have felt strongly enough about the practical significance of these protections to suggest that their presence may be required by the Fifth Amendment. See *Seatrain Lines* v. *United States*, 64 F. Supp. 156, 161; *Handlon* v. *Town of Belleville*, 4 N.J. 99, 71 A. 2d 624; see also 63 *Harv. L. Rev.* 1437, 1439. *Id.*, at 331–332.

7. The Natural Gas Act:

The *Seatrain* and *Delta* cases teach that the starting point in determining the practical necessity of the waiver as a security device is the language of the relevant enabling statute, the Natural Gas Act. Sections 4 and 7 are relevant, but the key provisions are Sections 5(a) and 16. Section 16 reads in pertinent part:

The Commission shall have power to . . . prescribe, issue, make, amend, and rescind such orders, rules or regulations as it may find necessary or appropriate to carry out the provisions of this act.

Section 5(a) provides, in pertinent part, that if the Commission:

. . . *[S]hall find that any rate, charge, or classification demanded, observed, charged, or collected* by any natural gas company in connection with any transportation or sale of natural gas, subject to the jurisdiction of the Commission, *or that any rule, regulation, practice or contract affecting such rate, charge, or classification is unjust, unreasonable, unduly discriminatory, or preferential, the Commission shall determine the just and reasonable rate, charge, or classification rule, regulation, practice, or contract to be thereafter observed* and in force, and shall fix the same by order. [Emphasis supplied.]

These statutory pronouncements are mandatory as opposed to precatory. The broad language of Section 16, when employed in conjunction with Section 5, has permitted the Commission to alter and amend conditions to certificated service with full approval by the courts. Section 5(a) has been interpreted as giving the Commission authority to alter the terms and conditions of certificated service even though the affected parties, acting alone, could not have changed them. *F.P.C.* v. *Louisiana Power and Light Co.*, 406 U.S. 621, 646–647 (1972). In Opinion No. 754–A, Docket No. RP71–119, issued August 17, 1976, *aff'd on other grounds, Hercules, Inc.* v. *F.P.C.*, 559 F.2d 1208 (3rd Cir. 1977), the F.P.C. concluded, with court approval, that it could exercise its Section 5 authority to promulgate new terms and conditions attached to certificates authorizing initial service.

The combined effect of Sections 5(a) and

Footnotes at end of article.

16 is to *require* the Commission to amend terms and conditions of a certificate if those terms and conditions prescribe tariff provisions subsequently found to result in rates or charges which are not just and reasonable. As the United States Court of Appeals for the District of Columbia Circuit stated in *American Smelting and Refining Company* v. *F.P.C.*, 494 F.2d 925, 940–941 (1974), *cert. denied sub nom., Southern California Gas Co., et al.*, v. *F.P.C.*, 419 U.S. 882 (1974), once the Commission finds that an existing rate or charge is injust or discriminatory,[7] it "must prescribe the remedy for that condition."[8] If the existing illegal rate or charge is the result of the operation of a certificate condition, the remedy clearly will lie in the revocation or alteration of the order prescribing that condition, and thus the certificate itself.

Furthermore, the unique nature of the Alaskan Northwest tariff provisions may subject them to amendment on another basis. Because they were developed in a rulemaking, the provisions of Order No. 31 arguably are not the result of the Commission acting in a judicial capacity, but in a legislative one, formulating and applying policy. The distinction is important because where the Commission acts in the former capacity, applying law or policy to past facts, a decision on the merits as to a disputed, and litigated issue of fact becomes final. *United States* v. *Utah Construction and Mining Co.*, 384 U.S. 354, 421–422 (1966); Davis, *Administrative Law Treatise*, § 18.09 (1970 Supp.). In the latter case, the Commission is free to take appropriate steps without being bound by its prior actions. *Permian Basin Area Rates Cases*, 390 U.S. 747, 789 (1968); *Public Service Commission, State of New York* v. *F.P.C.*, 511 F. 2d 338, 353 (D.C. Cir. 1975). The policy determination in this case has been that the public convenience and necessity required the assurances to investors in the ANGTS provided for by the tariff provisions of Order No. 31. Arguably, the Commission has determined that as a matter of policy, at least under present circumstances, a tariff designed to meet the conditions of Order No. 31 will be just and reasonable. The same reasoning might also apply to the shipper tracking provisions in the event that such provisions are adopted by the Commission through rulemaking procedures. Although it is questionable whether the rulemaking-adjudication distinction would be given great weight in the context of the facts at hand, it might be enough to convince a future Commission that it could, within the law, conclude that a different policy determination better serves the public interest.

From the foregoing it is clear that there is a plausible case for Commission authority to subsequently alter the tariff conditions of Alaskan Northwest's certificate, relying on Sections 16 and 5(a) of the Natural Gas Act and judicial pronouncements authorizing agencies to make changes in policy. The foundation for that case is the general principle that a policy determination made by a present Commission cannot preclude a future Commission from making a policy determination to the contrary, provided that in doing so it adequately explains the reasons for its new position, *Consolidated Gas Supply Corp.* v. *F.P.C.*, 520 F. 2d 1176 (D.C. Cir. 1975), whether or not there has been a change of circumstances *Greater Boston Television Corp.* v. *F.P.C.*, 444 F. 2d 852 (D.C. Cir 1970). A corollary to that principle is that a present Commission cannot bind a future Commission so as to preclude the prospective operation of Section 5. *Optional Procedure for Certificating New Producer Sales of Natural Gas*, 48 F.P.C. 218, 223 (1972); *Pacific Gas Transmission Co.* v. *F.P.C., supra*. These rules are analogous to those applicable to the legislature: namely, this Congress cannot preclude legislation, or amendments to legislation, by the next Congress.

8. Reasonableness of the Waiver Request:

This line of analysis suggests several important conclusions, which bear ultimately on the recommendation of this memorandum. First, the presence or absence of a *constitutional* ban to the impairment by this or a future Commission of the tariffs upon which the lenders will rely is unclear. Second, there appears to be no *statutory* bar, such as was found to exist in the *Seatrain* and *Delta* cases, which would preclude the Commission from changing the tariffs. Even though it is clear that commentators, the Courts, at least by way of dictum, and the past and probably current Commissions accept the principle that elementary notions of justice should allow the project lenders to rely in good faith on the decisions of the Commission in making their loans, the request of the project sponsors indicating their "desires . . . to have these provisions waived" appears to be based on a concern as to the certainty of the federal estoppel doctrine under the Natural Gas Act. The questions that remain are those that are directly raised by your letter. They ask in essence whether there are either historical or predictable future facts which support or impugn the legislative request. That is, assuming that the waiver request is not patently unreasonable, is there a historical legal perspective from which the Congress could judge the future and find sound public reasons to grant or deny the waiver.

9. Past Commission Actions:

For the moment I will defer to subsequent paragraphs the question of "the full implications of the waiver" and turn to your second specific question: Whether there have been past Commission actions which justify the desires of the sponsors to have the subject sections of the Natural Gas Act waived. In this connection, the following contains a summary of recent cases, representative of past Commission actions, which involved issues of claimed detrimental reliance. Having done so I will leave it to the Subcommittee to conclude from these decisions whether or not the project sponsors' request is justified.

A. Jurisdiction: *Distrigas Corporation, et al.* v. *F.P.C., et al.*, 495 F. 2d 1057 (D.C. Cir. 1974), *cert. denied*, 419 U.S. 834 (1974).

This proceeding involved, in pertinent part, a filing by Distrigas Corporation and its affiliates, Distrigas of New York Corporation and Distrigas of Massachusetts (Distrigas), which requested the Federal Power Commission to grant Distrigas the authority under Section 3 of the Natural Gas Act to import liquefied natural gas (LNG) from Algeria.[9] The filing also contained a request by Distrigas for the FPC to issue a disclaimer of the Commission's jurisdiction under Sec-7 of the Natural Gas Act.[10]

The Commission in a three to two vote granted the requested Section 3 authorization without condition but, noting that this was a novel situation, reserved the right to add conditions in the future if circumstances should change. The Commission noted that Section 3 of the Natural Gas Act specifically provided for such future amendments. However, the Commission did not find Section 7 jurisdiction over the regasification facilities and service nor over the facilities and services involved in the sale of the regasified LNG in the state of importation.[11] The result of the decision was that there was no jurisdiction under Section 7 or Section 3 (by way of conditions to the import authorization) over the regasification facilities and service nor over the intrastate facilities and service. The Commission indicated its hope that this disclaimer of jurisdiction would make the project more attractive to private investors and "lead to more gas at a lower price to the consumer than if [the Commission] controlled every detail and decision related thereto." Two Commissioners dissented, arguing that the Commission should take jurisdiction under Sections 3 and 7 of the Natural Gas Act over the regasification facilities and the "intrastate" facilities.

Following the Commission's decision, Distrigas "assertedly in reliance on the Commission's limited jurisdictional disclaimer, . . . proceeded to construction of its Everett and Staten Island facilities, expending very substantial sums on each." In a *new* filing, Distrigas also applied for Section 3 authorization to import significant additional quantities of natural gas and for Section 7 authorization to sell these additional volumes, as well as certain of the originally authorized volumes, in interstate commerce.

Meanwhile, at the Commission two of the original three person majority had left and had not been replaced. Therefore, the two dissenting Commissioners were now a majority. In response to Distrigas' applications, they found that circumstances had changed since Distrigas' original application had been acted upon by the Commission. Specifically, they stated that the original Distrigas application proposed new and increased sales for resale in interstate commerce. Therefore, the Commission held that Section 7 certification was mandated for all of Distrigas' facilities.

On appeal, Distrigas argued, among other things, that once the Commission's previous decision on the jurisdictional issue was final and Distrigas had subsequently acted in reliance on that decision by (1) contracting with its customers and (2) constructing its facilities, the Commission was foreclosed from changing its mind and asserting jurisdiction where it had previously declined to do so. Distrigas cited the *Seatrain* case,[12] where the Supreme Court had overturned the Interstate Commerce Commission's attempt to revoke a certificate previously granted to a water carrier.

The Court found that the Commission had the authority to issue the order it had issued under Section 3 of the Natural Gas Act but remanded for additional proceedings before imposition of any requirements to certification under Section 7. The Court distinguished *Seatrain* on basis of lack of statutory authority in that case, and noted that both Section 3 of the Natural Gas Act as well as the Commission's previous order specifically contemplated changes and amendments. The Court further found that if Distrigas had relied on an interpretation of the original Commission order to the contrary (i.e., that the original Commission order granted Distrigas a permanent immunity from regulation), Distrigas' reliance was misplaced.

As part of its basis for rejecting the estoppel argument, the Court concluded that Distrigas' claim of injury was at that point hypothetical in nature since Distrigas had not demonstrated that the Commission would not ultimately authorize Distrigas' proposal.

On remand, the Commission granted Distrigas' application subject to certain conditions.

The *Distrigas* case is one where the Court approved a changed Commission's reversal of a previous Commission's ruling upon which the company and its lenders had arguably relied to their detriment. As a basis for that approval the court stated, "any 'right' to non-regulation that the Commission's previous decision can be supposed to have vested in Distrigas was entirely contingent on the Commission's continuing to view such non-regulation as in the public interest." However, two facts tend to distinguish *Distrigas* from the ANGTS. One is the conditions cited by the Court in the original Section 3 authorization, which arguably placed Distrigas and its lenders on notice that the rule could change. The other distinguishing fact was

Footnotes at end of article.

that the Court found that the Commission's decision had not yet injured Distrigas and that it might not in the future. Presumptively, the matter was resolved at the Commission level in a way which did not adversely affect Distrigas or its lenders. Nonetheless, once could conclude that the uncertainty caused by the Commission's reversal is the type of action the ANGTS lenders seek to protect themselves against.

B. Cost of Service Tariff: *Pacific Gas Transmission Co.* v. *F.P.C., et al.*, 536 F.2d 393 (D.C. Cir. 1976, *cert. denied*, 429 U.S. 999 (1976).— This case involved a Commission order which, pursuant to Section 5(a) of the Natural Gas Act, changed in part Pacific Gas Transmission Company's (PGT) cost-of-service tariff after a full hearing. Prior to the Commission decision, PGT had been permitted to adjust its rates automatically on a monthly basis to reflect *all* changes in its costs, including amounts for gas purchased from Canadian producers for resale in the United States. This tariff had been in effect since PGT was first authorized to import gas from Canada in 1960.[13]

In 1974 and 1975, after a hearing under Section 5(a) of the Natural Gas Act, the Commission modified PGT's cost-of-service tariff to provide that changes in the cost of gas purchased by PGT from Canadian suppliers could be passed on to PGT's customers only after PGT had applied for the rate increase pursuant to Section 4 of the Natural Gas Act, and after any suspension period imposed by the Commission thereunder. The Commission revised the tariff to provide that such filings would be subject to suspension by the Commission pursuant to Section 4 of the Natural Gas Act and, if suspended, subject to refund and possible reduction as provided in Section 4 of the Natural Gas Act. The Commission justified the revised tariff by stating that Canadian authorities had recently begun to require that significantly increased prices be charged for Canadian gas sold for resale in the United States. Furthermore, Canadian authorities had changed their pricing policy be referencing it to prices for alternate energy sources (primarily oil products) in markets served by Canadian gas. This formula change signaled further significant increases in the cost of gas purchased by PGT from Canadian producers (as much as four times higher than prior to the Section 5 proceeding). The Commission found that these changed circumstances rendered PGT's existing tariff "unjust and unreasonable" and required prior Commission review of rate increases for Canadian gas before they could be passed on to consumers in the United States.

On appeal, PGT argued in part that the Commission-ordered modification of its tariff could result in delay or outright denial of its recovery of increased Canadian purchased gas costs which, in turn, would financially destroy PGT. PGT also argued that the Commission was without power to modify the cost-of-service tariff which a previous Commission had approved in 1960 when PGT was originally authorized to commence the importation of Canadian natural gas.

The Court denied all of PGT's claims and affirmed the Commission order and its action revising the tariff under Section 5(a). In support of its holding, the majority noted that the Commission had granted prompt authorization under Section 4 for Canadian gas rate increases which took effect after the disputed tariff change. The majority opinion indicated that failure of the Commission to include such increases might well be to "abdicate" its responsibilities under Section 4. However, Judge Bazelon in a dissenting opinion directed considerable criticism toward the Commission for injecting uncertainty into PGT's financial position. As the dissent stated: ". . . the FPC concedes that had PGT been required to absorb even the initial 32 cent price increase for a short period of time it would have been driven out of business, and 2,000,000 consumers would have been deprived of 40 percent of their gas supply." (536 F.2d at 397.)

C. Advance Payments (30 day rule): *Tennessee Gas Pipeline Co., et al.* v. *F.E.R.C., et al.*, 606 F.2d 1094 (D.C. Cir. 1979), *cert. denied*, 447 U.S. 922 (1980); *Natural Gas Pipeline Co.* v. *F.E.R.C.*, 590 F.2d 664 (7th Cir. 1979); *United Gas Pipe Line Co.* v. *F.E.R.C.*, 597 F.2d 581 (5th Cir. 1979): *Trunkline Gas Co.* v. *F.E.R.C.*, 608 F.2d 582 (5th Cir. 1979).— These cases involve interstate natural gas pipelines which, pursuant to a series of Commission rulemakings, including most notably Order Nos. 465 and 499, made interest-free loans (advance payments) to natural gas producers as exploration and development investments which were to be repaid by future delivery of gas. Pursuant to these Commission Orders the pipelines were allowed to include such advances in their rate bases, for rate of return purposes, as exploration and development investments. This policy was advanced by the Commission as an incentive for the addition of gas supplies. The Commission's rulemaking orders spelled out in detail the requirements for inclusion of advance payments in Account 166. However, insofar as the "timing" of the expenditures by the producers versus the date of the pipelines investment, the Commission was silent, except to the extent the orders stated that amounts included in Account 166 could receive favorable rate base treatment where they were found to be "reasonable and appropriate." Subsequent to these Orders, pipelines invested at least $5.5 billion in "advance payments" with producers. However, after these investments had been made, the Commission, acting under FPC Order No. 465, pursuant to the "reasonable and appropriate" language, disallowed rate base treatment for certain advances because they were made to the producers and included in the pipelines' rates more than "thirty days" before they were spent by the producers. As a result large amounts of advance payments were *retroactively* disallowed on a deferral basis for inclusion in pipeline companies' rate bases.

On appeal to three different Circuit Courts, the pipelines claimed serious injury and voiced loud complaints that the general language of Order Nos. 465 and 499 had offered no notice of the new specific timing rule imposed by the Commission. As acknowledged by the D.C. Circuit Court, ". . . substantial sums were involved and deferral has resulted in considerable losses for the pipelines' stockholders." (606 F.2d at 1108.)

The pipelines argued that, at the invitation of the Commission rulemaking orders, pipelines were encouraged to make advance payments to promote exploration and development of natural gas reserves for the interstate market. Pursuant to those orders, the pipelines argued, they had invested substantial sums of money in the advance payment program. Thus, they argued that it was unfair and illegal for the Commission, pursuant to the reasonable and appropriate standard, to establish in individual pipeline rate cases decided after the rulemaking orders had issued and after the advance payments contracts had been executed, that rate base treatment of advance payments would not be allowed more than thirty days in advance of when they were spent by the producers.

The three separate circuit courts reversed the Commission orders decided on this basis. However, the D.C. Circuit in *Tennessee* rejected the pipelines' claims of retroactive ratemaking and detrimental reliance and directed the Commission on remand to develop a timing relationship supported by substantial evidence. The Fifth Circuit in the *United* and *Trunkline* cases and the Seventh Circuit in the *Natural* case found that it was impermissible retroactive ratemaking to impose a timing requirement on Order No. 465 advances and that the pipelines had relied to their detriment on the absence of a timing requirement in the Order when they made advances to producers. Therefore, they reversed the Commission decision on the Order No. 465 advances and directed inclusion of the designated amounts in the respective pipelines' rate bases. Since Order No. 499 contained at least an ambiguously general reference to a timing relationship, those portions of the Commission decision were remanded because of a lack of substantial evidence supporting that portion of the Commission orders. Although the Commission was reversed in these cases, language from the Court's opinion in *Tennessee* is illustrative of the "regulatory risk" inherent to an industry subject to the Commission's jurisdiction.

We find that petitioners' arguments in support of their interpretation (of estoppel facts) are undercut by consideration of the character of the advance payment program as an experimental departure from well accepted and understood regulatory law. (606 F.2d at 1108.)

* * * * *

One of the risks incurred by the pipelines has been the "regulatory risk" that an experimental program such as advance payments might miscarry, and that administrative readjustment would not prevent substantial adverse impact. (606 F.2d at 1120.)

D. Dedication of Gas Reserves: *Air Products & Chemicals, Inc.* v. *F.E.R.C.*, — F.2d — (5th Cir 1981, Case No. 78-2011, decided July 16, 1981.—This case involves a commission order which ended a prior Commission policy under the "Chandeleur incentive doctrine" (of approximately 7 years duration) which allowed offshore natural gas producers to reserve for their own use a portion of gas reserves which otherwise would have been dedicated to the interstate market. The prior policy had allowed these reservations as an incentive to producers to expedite the exploration and development of offshore reserves of natural gas. The Commission, in its final order, found that the reservation incentive was no longer needed because, among other things, the interstate market was suffering severe curtailments and thus the gas which would be reserved by the producers was needed to serve the interstate market.

On appeal the producers argued, among other things, that they relied to their detriment on the prior FPC policy allowing reservations and that it was unfair and illegal for the Commission to reverse its policy in an adjudicated case instead of a rulemaking proceeding to be applied prospectively.

The Court remanded the case to the Commission because of the improper way in which the Commission relied on extra-record evidence to support its decision, but it rejected the producers' arguments of detrimental reliance on the prior Commission policy. The Court noted that the old Commission policy was continually attacked by consumer groups in various cases and that it was, at its inception, described by the FPC as experimental. In sum, the Court found that the policy was never "well established" enough to have caused detrimental reliance thereon by producers or anyone else. The Court noted further that the producers were not precluded from selling the gas in interstate commerce for a fair price but rather were prohibited from reserving the gas for their own use.

E. Unsuccessful Project Costs: *Tennessee, et al.* v. *F.E.R.C.*, 606 F.2d 1094 (D.C. Cir. 1979), *cert. denied*, 447 U.S. 922 (1980).— This proceeding involved, among other things, an attempt by Transcontinental Gas Pipe Line Corportaion (Transco) to recover costs associated with four unsuccessful proj-

Footnotes at end of article.

ects related to the production of synthetic natural gas (SNG). The Commission denied recovery of these costs because they were not "used and useful" in providing service and could not be charged to ratepayers.[14]

On appeal, Transco argued it had spent $22 million on these ultimately unsuccessful projects in purported reliance on a Commission policy allowing recovery of the costs of the projects if they proved to be unsuccessful. The Court found that the Commission had no policy allowing recovery of these costs and then affirmed the Commission's decision.

Other cases in which the Commission is currently under criticism for assertedly changing policies to the detriment of jurisdictional companies include (i) applications for rehearing of Commission Opinion No. 90 [15] and Order No. 94,[16] and (ii) the oil pipeline cases where revision of the ratemaking methodology formerly employed by the Interstate Commerce Commission is under consideration.[17]

However, these cases should not be taken as a suggestion that the Commission never accords finality to its orders. In *Texaco, et al.*, Docket No. CI77-329, *et al.*, 13 FERC ¶ 61,222 (1980), for instance, a United States Senator filed a pleading on July 21, 1980, seeking to reopen a case settled on February 10, 1978. Part of the Senator's argument was that changed circumstances justified reopening the case, but the Commission refused to grant the intervention and declined to disturb its earlier order.

Arguably, cases such as those described above represent a possible "justification" or reason why the sponsors have now sought the waiver from Congress. At the same time, however, these decisions and others of a similar nature have generated some sympathy in the courts and have begun to establish the proposition that estoppel is available as a defense against the government if the government's wrongful conduct threatens to work a serious injustice and if the public's interest would not be unduly damaged by the imposition of estoppel. *Lazy FC Ranch, supra*, 81 F.2d at 989. Nevertheless, because the estoppel doctrine has not been fully developed under the Natural Gas Act, it is fair to state that only a waiver would provide the lenders with the same sense of legal certainty that a firmly established "regulatory estoppel doctrine" would afford these investors. Whether this legal uncertainty "justifies" the requested waiver is a value judgment best left to Congress. With this in mind, it is appropriate to consider your questions as to hypothetical situations creating injury to protect participants.

10. Hypothetical Injuries to Protect Participants:

Our analysis has produced four general sets of hypothetical circumstances which might induce a Commission response changing the tariff provisions related to the project, absent the waiver. They are:

(1) a changed economic environment resulting in materially different costs of capital (i.e., interest rates and return on equity) from those extant at the time of initial approval;

(2) changed amounts of natural gas available to be transported resulting in a materially different economic life for the transportation system;

(3) changed economics of the gas to be delivered by the system, relative to other sources of energy supplies, warranting an altered revenue pattern in order to avoid more serious economic dislocations; and

(4) premature project failure.

As a consequence of these general events, the following hypothetical Commission actions might take place:

(a) Upon a finding of changed circumstances the Commission could determine, pursuant to Sections 5, 7, and 16 of the Natural Gas Act, that the cost-of-service tariff (which provides that Alaskan Northwest's rates will be adjusted twice a year by a formula that requires Alaskan Northwest to change its rates to reflect actual costs in its charges to shippers) was no longer appropriate. The Commission could then require Alaskan Northwest to charge a stated rate, such as a flat rate per MMBtu of natural gas transported, and require a filing pursuant to Section 4 of the Natural Gas Act to be made prior to the effectuation of any increase in that stated rate. The rate increase filing could be suspended for up to five months, and the proposed rates thereafter collected could be subject to possible reduction and refund with interest.

The risks to Alaskan Northwest in the event of a Commission-ordered change to a stated rate form of tariff involve the adverse economic impacts resulting from the regulatory lag attendant to putting into effect a proposed rate increase under Sec- lag consists of the sum of: (1) the time necessary to prepare a Section 4 rate filing plus (2) the one-month notice requirements between the time the filing is made and the earliest possible effective date (absent a waiver of the notice requirements) plus (3) a suspension period of up to 5 months beyond the proposed effective date. During the lag period, Alaskan Northwest sponsors would not be able to recover all of the costs previously covered by operation of the cost-of-service tariff.

As noted previously, the FPC modified in part the cost-of-service tariff of Pacific Gas Transmission Company to require Section 4 filings to recover increased Canadian purchased gas costs. However, the Court concluded that the result was justified inasmuch as the Commission had, pursuant to Section 4, allowed a "non-niggardly" flowthrough by the company of increased gas costs, notwithstanding the dissent's concern that delay would have resulted in adverse consequences.

(b) Alternatively, the Commission could decide at a future time to leave the cost-of-service tariff intact but remove the minimum bill (which guarantees recovery of actual operation and maintenance expenses, actual current taxes and debt costs).[18] The consequence of this action could be that during periods of interruption exceeding thirty days Alaskan Northwest would bear all of the financial consequences of the interruption because it would not be able to charge the shippers for any costs incurred during the period of interruption.[19]

(c) Another hypothetical involves a situation wherein the ANGTS project fails some time after the date construction had commenced. Assume further that upon review of the circumstances surrounding the project failure, a future Commission decided, pursuant to Sections 5, 7 and 16 of the Natural Gas Act, to reverse a previous decision in principle to require consumers to pay all debt costs regardless of the circumstances once final certification had been granted and debt servicing obligations had commenced. Thus, the partners of Alaskan Northwest (including sponsor-shippers) would be required to absorb all Alaskan Northwest Debt costs as well as other (such as equity) Alaskan Northwest costs. Such a Commission decision would have an immediate severe financial impact on Alaskan Northwest, with the degree of severity being a function of the financial health of its partners.

(d) The Commission could decide several years in the future, pursuant to Section 5 of the Natural Gas Act, to direct the shippers of the gas to remove from their respective tariffs the rate adjustment (tracking) provisions which permit the shippers to flow through increases in transportation costs without the necessity of making a full filing under Section 4 of the Natural Gas Act (reflecting all current costs and revenues, not merely the increased costs of transportation).[20] In these circumstances, the shippers could be subject to under recovery of the Alaskan Northwest transportation costs because of the same regulatory lag discussed above.

(e) If additional reserves of natural gas were found in Alaska sufficient to lengthen the economic life of the ANGTS beyond the 25-year life now inherent in the proposed depreciation rate, the Commission might at some future time reduce the depreciation rate so as to more accurately spread the recovery of the plant investment over the useful life of the project.[21] Alaskan Northwest might oppose such a change on the ground that the resultant reduced amount of depreciation expense recovered on an annual basis would impair their ability to service debt having a shorter term.

(f) In the event of a premature end to the viability of the project after it had commenced operation (because of physical, market or other forces), the Commission might find that a faster write-off of debt was appropriate, rather than continued operation of the minimum bill provisions. This could cause financial harm to Alaskan Northwest if the debtholder refused to allow Alaskan Northwest to accelerate repayment of its debt, particularly if the interest rate to be paid to the lenders on the debt is higher than the general level of interest rates being paid for comparable investments. Alternatively, absent a waiver, a future Commission could determine, based on either a change in policy perception or based on facts attributing fault to the sponsors for the project failure, that the sponsor-investors (as opposed to the consumers) should bear some part, or all, of the risk of loss of recovery of debt, and then appropriately adjust the tariff or minimum bill provisions.

(g) In the event that Alaskan Northwest transportation costs and the cost of Prudhoe Bay and other natural gas, increase significantly, a shipper's resale rate could be increased so as to adversely affect the marketability of a shipper's gas. Under this scenario, the shippers (particularly the non-sponsor shippers) might argue for a reduction in the Alaskan Northwest transportation charges so that the shippers could continue to market their gas. Absent a waiver the Commission would have the power to order some sort of temporary or indefinite reduction to Alaskan Northwest's charges. In response, Alaskan Northwest, or some other party, might argue that the reduction in Alaskan Northwest's charges (regardless of the reason therefor) impaired the recovery of Alaskan Northwest's "minimum bill" costs and thus jeopardized the financial health of the project.

(h) Another hypothetical involves the pipeline-shippers' current purchased gas cost adjustment (PGA) clauses which, as now written, would permit the shippers to pass through Alaskan purchased gas costs to their customers. If the Commission should decide to revoke or modify the PGA clauses, the shippers would be subject to regulatory lag in recovering Alaskan and possibly other purchased gas cost increases. To the extent that such a lag caused a financial strain on the shippers, it could affect the cash flow to the ANGTS.

(i) In Order No. 31, the Commission stated its intention to periodically review Alaskan Northwest's rate of return on common equity. Absent the waiver, the Commission's authority to conduct such periodic reviews would provide a basis to adjust the return on common equity downward to reflect any lowering of the cost of common equity to Alaskan Northwest. Such a lowering of common equity costs would most likely result from a general overall improvement in the economy resulting in an improvement in the financial markets, leading to a reduction in the return on equity needed by Alaskan Northwest to continue to render adequate service in the public interest. The argument

Footnotes at end of article.

that a reduction in equity return could impair collection of all debt costs in violation of the proposed waiver language would presumably be an argument by lenders and others that the interest coverage must be greater than one (*i.e.*, 1.5, 2.0, etc.) in order to ensure that Alaskan Northwest's ability to pay debt is not impaired.

11. Hypothetical Injuries to Consumers:

You have asked "what hypothetical situations there might be which would work to the injury of resale customers and consumers should the waiver be granted." At bottom the most injurious risk that could be borne by the consumer is that the project might be abandoned either before or after completion, and that the consumer, through the resale customer, would be surcharged for the investment in the project but would not receive gas from it. Next most injurious is the risk that the consumer will have to pay for gas not received during sustained periods in which the pipeline is out of service. Arguably, for each risk which would exist to the sponsors and/or shippers in the absence of a waiver, there would exist a concommitant risk to the resale customers and/or consumers in the event a waiver is granted. However, in fairness these risks should be properly placed in the context of the facts of the proceeding and the legal status of the ANGTS project to date.

President Carter in his formal *Decision*, the Congress in its approval of the President's *Decision* and international agreements, and the Commission in its *Recommendation to the President* and in existing orders, have each concluded that this project is in the public interest. These approvals have led to the existing tariff, minimum bill and other provisions applicable to the ANGTS as described above. The project sponsors and lenders have nonetheless responded by seeking further assurance that the unique features of these determinations, as well as the Commission's final orders and rules, will not be altered or modified after adoption. Relevant here are the existing decisions of various authorities that the ANGTS may be project financed and that certain portions of the investment should be recoverable from consumers in events, including project interruption, where consumers do not receive the benefit of delivered gas. Thus, decisions have been made that impose risk on the consumers regardless of the waiver. Further, the Commission's ultimate orders and rules will allocate the remaining risks among the parties after consideration of all factors consistent with or affecting the public interest. Accordingly, an argument can be made that once the legal foundation for the ANGTS places the risks, the waiver would impose no substantial additional risk on the consumers, but only provide a method for assuring implementation of the federal decisions made. The extent to which a waiver would place additional onus on the consumers would include the implications of removing the "regulatory risk" from the sponsors. In other words, the consumers would then face the risk that a future Commission could *not*, based on changed circumstances or different policy perception, modify the ultimate ANGTS orders or rules within the parameters of their final issuance.

12. Reasonable Likelihood of These Events Occurring:

From a legal standpoint, the likelihood that a future Commission would take or decline to take action of the type inquired about in your letter would appear to depend upon (a) whether a reconsideration of past policy determination occurs, and/or (b) the future existence of facts which would produce a policy response by the Commission. The likelihood of such facts occurring is a prediction or assessment that, presumably, has been made in connection with all federal determinations to date. In issuing the final orders and rules, the Commission is legally charged with the responsibility of weighing the risks, to both the sponsors and consumers, attendant to investing the sums necessary to complete the project. The risks are exceptionally difficult to quantify because of the infinite set of variables that exist, and in the end the question is one of judgment. Either the risks are too great for the consumers to be asked to bear (*i.e.*, the project is not in the public interest), or they are not. The Commission may well be required to make that determination as part of its final certification of the project.[22] Appropriately, the Congress must decide, through adoption or rejection of the waiver, whether to eliminate the "regulatory risk" inherent in continued Commission jurisdiction after final certification.

I am advised by the Chairman that he will support passage of a waiver designed to assure project financing of the ANGTS consistent with the positions expressed in this memorandum.[23]

Hopefully the foregoing provides you with an adequate response to your inquiry given the length of time taken and the resources available to prepare this memorandum. Please understand that this response is not intended, nor should it be taken, as an official Commission position. Rather, this memorandum represents the combined efforts of the Office of the General Counsel and other Commission staff members, as well as opinions of the Chairman and myself.

FOOTNOTES

[1] Hereinafter, the term "Commission" refers to the Federal Power Commission at all times before October 1, 1977, and the Federal Energy Regulatory Commission at all times thereafter.

[2] Order No. 31, "Order Setting Values for Incentive Rate of Return, Establishing Inflation Adjustment and Change in Scope Procedures, and Determining Applicable Tariff Provisions," issued June 8, 1979 in Docket No. RM78-12; Order No. 31-B on rehearing, issued Setpember 6, 1979, in the same docket.

[3] See, generally, Federal Power Commission, *Recommendation to the President, Alaska Natural Gas Transportation Systems* (May 1, 1977).

[4] *Supra*, note 2, at 4 (mimeo).

[5] Applicants in the Great Plains case asked the Commission to make a very explicit estoppel case against itself by including certain statements in its order. *Great Plains Gasification Associates, et al.*, FERC Opinion No. 69 (November 21, 1979) (reversed on other grounds. *Office of Consumers' Counsel* v. *F.E.R.C.*,—F.2d—(D.C. Cir. 1980), Case No. 80-1303, decided December 8, 1980). The estoppel option will be discussed in the text, *infra*. In its initial brief to the Presiding Administrative Law Judge, Great Plains claimed the following:

". . . The lenders have indicated that they will require that the authorizations obtained [from the Commission] by the project companies contain [as a condition to take down of the loan for the project]:

"(1) A statement of the Commission's intention not to revoke or modify the tariff provisions approved by it for this project during the term of the bank loan;

"(2) A statement of the Commission's understanding that the lenders would not commit funds for this project without assurances that these provisions would continue in effect without modification during the term of the bank loan;

"(3) A statement of the Commission's intent to suspend the application as to this project of any future rule, order, or decision of general applicability which might affect the approved tariff provisions until after the conclusion of a full evidentiary hearing to determine the propriety and lawfulness of such Commission action as it affects the tariff provisions on which the financing is based. . . . "Initial Brief of Great Plains Gasification Associates and the Customer Pipeline Companies, Docket Nos. CP78-391, *et al.*, January 29, 1979, at 70-71.

Five other admissions were sought from the Commission, but those quoted are exemplary of what the lenders sought. Both the law judge and the Commission refused to provide them. See Opinion No. 69, at 63.

Similar estoppel findings were requested by the ANGTS sponsors in the proceeding that culminated in Order No. 31; however, they were refused in favor of the language quote at page 10, *supra*. As discussed hereafter, it is questionable whether such findings would achieve the desired or intended result.

[6] The question whether legislative or quasi-legislative action with retroactive effect works to deprive an owner of property without due process is somewhat analogous. Unfortunately, there are no clear principles, and the cases go both ways. *See generally*, text and cases collected in *Cong. Research Service of Library of Congress, The Constitution of the United States of America: Analysis and Interpretation* (1972), at 1165, *et seq.*

A case strongly suggestive that the principles of estoppel do not apply to federal agencies is *Federal Crop Insurance Corp.* v. *Merrill*, 332 U.S. 380 (1947). In that case, certain farmers were assured by a local agent of the federal corporation that a certain type of crop could be insured. In fact, rules of the corporation provided that such crops could not be insured, although neither the agent nor the farmers had actual knowledge of the regulations. Relying on the agent's advice, the crops were planted and subsequently destroyed.

In holding that the farmers could not collect insurance for the crops despite the payment of premiums therefor and the inducement of the local agent's assurances, the Court indicated that knowledge of the rules contrary to the agent's advice would be imputed to the farmers because the rules were published in the *Federal Register*. Despite the difference of the facts in the *Merrill* case (farmers had relied on *apparent* rather than *actual* authority), the Court used strong language to suggest in dicta that the government corporation would be treated as an agency of the United States and would be *immune* from doctrines like estoppel. *Id.* at 384-85.

These dicta have led one commenator to take the following position:

Merrill indicates that estoppel will not be used to protect an individual who has changed his position in reliance on administrative advice: "It is settled law that no estoppel can arise against the government." [Citing, *Chapman* v. *Santa Fe Pac. R.*, 198 F.2d 498, 519 (D.C. Cir. 1951) (dissenting opinion), cert. denied, 343 U.S. 964 (1952).] B. Schwartz, Administrative Law (1976), at 133, *et seq.*

Professor Schwartz agrees with the *Merrill*-type result when the agency has acted in excess of its statutory authority. However, he goes on to say:

. . . Both reason and policy argue that prejudicial reliance warrants invoking the doctrine of estoppel against the government in other cases: "when the sovereign becomes an actor in a court of justice, its rights must be determined upon those fixed principles of justice which govern between man and man in like situations." *Id.*, at 135 (footnote omitted), citing *Ritter* v. *United States*, 28 F.2d 265, 267 (3d Cir. 1928).

The following cases support Professor Schwartz's policy proposal: *Brandt* v. *Hickel*, 427 F.2d 53, 56-57 (9th Cir. 1970); *Chapman* v. *El Paso Natural Gas Co.*, 204 F.2d 46, 53-54 (D.C. Cir. 1953); *United States* v. *Lazy FC Ranch*, 481 F.2d 985, 988-989 (9th Cir. 1973); *Oil Shale Corp.* v. *Morton*, 370 F. Supp. 108, 124-127 (D. Colo. 1973).

The decision in the *Lazy FC Ranch* case, *supra*, indicates that a line of federal estoppel cases may be emerging, and such is required by elementary notions of fairness. 481 F.2d at 989. The Chairman advises that his view is consistent with that of Professor Schwartz and the Court in *Lazy FC Ranch*. However, absent an authoritative pronouncement on the matter by the United States Supreme Court, or specific federal legislation, I cannot render an opinion as General Counsel of the Commission that the Commission would in all or substantially all cases be estopped by its orders from changing the ANGTS tariffs in such manner as to impair the underlying security for the financing of the ANGTS. In my judgment, the best opinion that could be rendered would simply agree that the Commission is constitutionally prohibited from setting a confiscatory rate of return. As stated by the Supreme Court in *Bluefield Water Works & Improvement Co.* v. *Public Service Commission of West Virginia*, 262 U.S. 679, 690 (1923):

Rates which are not sufficient to yield a reasonable return on the value of the property used at the time it is being used to render the service are unjust, unreasonable and confiscatory, and their enforcement deprives the public utility company of its property in violation of the Fourteenth Amendment.

See also, F.P.C. v. *Hope Natural Gas Co.*, 320 U.S. 591, 603 (1943). As the subsequent discussion reveals, short of this constitutional limitation, the Commission has considerable latitude in the exercise of its jurisdiction under Sections 4, 5, 7 and 16 of the Natural Gas Act.

The fact that the lenders have induced the project sponsors to ask for the waiver may well indicate that an unqualified legal opinion cannot be obtained from lenders' counsel to the effect that a constitutional bar exists to provide an estoppel defense. A similar conclusion may be deduced from the request for estoppel admissions in the *Great Plains* case, *supra*, note 5.

[7] The Commission's authority to find that a tariff (previously determined to be just and reasonable) no longer functions in a reasonable manner has been upheld by the U.S. Court of Appeals for the District of Columbia Circuit in *Pacific Gas Transmission Co.* v. *F.P.C.*, 536 F.2d 393 (1976).

[8] The D.C. Circuit has also taken this position in *Pacific Gas Transmission Co.* v. *F.P.C., supra.*, where it stated at page 396 that "[a]fter such a finding, the Commission had not only the power but a solemn duty to take immediate action."

[9] Following regasification, more than 80 percent of the gas was to be sold in the state of importation to distributors and direct customers and the remainder to distributors in neighboring states.

[10] The imported LNG was to be delivered and regasified at facilities at Staten Island, New York and Everett, Massachusetts.

[11] The Commission did take jurisdiction under Section 7 of the Natural Gas Act over the sales of gas which was ultimately destined for resale in interstate commerce. However, it found that jurisdiction over such sales attached only at the tailgate of the regasification plant.

[12] *Supra*, at 15.

[13] See *Pacific Gas Transmission Company*, 24 FPC 134 (1960).

[14] A possible concern of the lenders is that a dogmatic application of the "used and useful" maxim would result in similar treatment of the ANGTS if the project were to suspend operation after completion or, through no fault of the sponsors they were unable to commence operation after completion. The need for assurances to the contrary (the minimum bill) provides a major impetus for project financing as opposed to conventional financing.

[15] 12 FERC ¶ 61,080 (1980).

[16] 12 FERC ¶ 61,080 (1980); FERC Statutes and Regulations, ¶ 30,178 (1980).

[17] *Trans Alaska Pipeline System (TAPS) (Phase I)*, Docket Nos. OR78–1, *et al.*; *Williams Pipe Line Company (Phase I)*, Docket Nos. OR79–1, *et al.*

[18] The minimum bill provides for the recovery of actual operation and maintenance expenses, actual current taxes, and all amounts necessary to service debt including interest and scheduled retirement of debt. Under no circumstances would debt service be impaired.

Recovery of equity investment and return on equity investment is, however, treated differently. The "90 percent billing adjustment ratchet" reduces charges to eliminate return on equity investment and associated taxes for any service dimunition below 90 percent of tendered gas. This tariff provision would be applicable in instances when the reduction in service for any one month was greater than 10 percent. The reduction in charges to reduce the return on equity and associated taxes would be proportional to the percentage of volumes tendered but not transported. The pipeline would be permitted to recoup any such billing adjustments by transporting volumes in excess of the contract level in subsequent months. The charge for such "Billing Adjustment Gas" transportation would be computed by using the same billing adjustment (*i.e.*, the same dollar per Dekatherm). Any service reduction below 100 percent but more than 90 percent would be accounted for as "No Billing Adjustment Gas." As such, this gas would be transported in subsequent months at no added charge to the shipper.

The "90 percent billing adjustment ratchet" also operates during periods of interruption of service. It ceases to be operative, however, for any period of total cessation of service for more than 30 days Beginning with the thirty-first day of any total cessation of service, the portion of the charges attributable to "equity costs" would be collected subject to refund pending a showing by Alaskan Northwest that it should be permitted to retain equity costs collected during the period of cessation of service. Equity costs, in this context, are defined to be "that portion of depreciation expense not necessary for debt service and associated taxes." (Order No. 31, at 181–182.)

The above discussed ANGTS tariff provisions differ substantially from lower-48 pipeline tariff provisions in a number of important respects. It is fair to state that the ANGTS tariff contains unique, "first-of-a-kind", provisions which have not been previously granted by the Commission.

[19] This assumes that in eliminating the minimum bill the Commission would also eliminate the opportunity to collect equity costs subject to refund and to make a showing pursuant to the provisions described in note 18, *supra*.

[20] While the Commission has decided in principle to allow the shippers to track in a timely manner amounts reflecting transportation costs paid to the ANGTS sponsors under tariffs approved by the Commission, the Commission has not yet decided what kind of tracking of these costs by the shippers would be permitted. For example, the tracking provision could require a periodic rate filing under Section 4 reflecting only the change in transportation cost, similar to the shipper's current purchased gas cost adjustment clauses. Or the provision could permit the shippers to adjust their rates automatically on a simultaneous basis to reflect changes in ANGTS transportation costs. Such a provision would be similar to fuel cost adjustment clauses permitted in rate schedules and tariffs of electric utilities for transactions which are subject to this Commission's jurisdiction.

It should also be noted that no decision has yet been made by the Commission governing pass-through by the shippers of transportation costs incurred under tariffs subject to the jurisdiction of Canadian authorities.

[22] *See* President's *Decision*, Finance Condition No. 2, at pages 36–37.

[23] In this connection, the text of the ultimate waiver language, if any, is a matter of continuing interest to the Chairman, myself and the Office of the General Counsel. Without addressing any of the complexities involved with the final language, please be advised that we would welcome the opportunity to provide your Committee and other interested persons with any technical assistance or advice that may be requested.

Mr. DURENBERGER. Mr. President, I thank the Senator from Ohio for yielding time. and I thank the President.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I yield 1 minute and 20 seconds to the distinguished Senator from Texas (Mr. BENTSEN).

Mr. BENTSEN. Mr. President, I am pleased to support the President's proposed waiver of law pertaining to the Alaskan natural gas pipeline. I believe that the completion of this pipeline is of critical importance to the energy security of this country. Access to Alaska natural gas reserves is vital to the long-term energy security of our country. The 26 trillion cubic feet of proven reserves at Prudhoe Bay comprise about 13 percent of our domestic proven gas reserves.

The fact that we are not having brownouts now does not insure us we will not have them in the future if we do not have this kind of a reserve that is available to us.

Completion of the project will also facilitate exploration and development of an estimated additional 100 to 200 trillion cubic feet of undiscovered gas in Alaska.

I have seen in years past where we would have enormous reserves of gas in Texas but we did not have a pipeline near the site, so even though they knew those reserves were there, they would not drill those wells. That is what we are trying to avoid here.

The proposed waiver package will insure an equitable balance of the economic risks associated with the project. Given the extensive design and engineering work already completed by the project sponsors, the risk of precompletion billing due to significant construction delays or abandonment is remote. A more substantial risk to consumers is that, in the event of delay or abandonment of the project as a result of congressional inaction on the waiver proposal, they will be forced to rely on more costly and unstable supplies of imported oil.

This project represents an important investment in the energy future of this country from which energy consumers will receive substantial long-term benefits. Even with the adoption of the waiver package, the sponsors of this project will have to attract significant private capital. I think that it is important that

we give the sponsors this opportunity. Without the adoption of this waiver package, this project will not be completed and we would have delayed the importation of a vitally needed natural resource.

I urge my colleagues to support this waiver package.

I thank the distinguished chairman of the committee for the time.

Mr. McCLURE. Mr. President, I yield 2 minutes to the distinguished senior Senator from Alaska (Mr. STEVENS).

Mr. STEVENS. Mr. President, I hope the Senator from Ohio is here.

Mr. METZENBAUM. I am here.

Mr. STEVENS. Having made the statement he made I will tell him he is coming dangerously close to a point of personal privilege in making the statement he made concerning this package.

I know of nothing evil here. I am prepared to debate the Senator on this issue in his own State any time he wishes. Perhaps he can explain to his constituents why we have just reinjected, after having produced it in our State, over 2 trillion cubic feet of natural gas because of delay in getting this project built.

Perhaps he would explain to his consumers why he suggests that the debt service that would have to be paid in the event of any delay should be capitalized. His solution would be to capitalize that debt service. Debt service would have to be paid in any event and his consumers would pay a rate of return in the tariff on capitalized debt service during construction year after year for 20 or more years.

I have never heard an assertion with less validity in this Chamber than the one made by the Senator from Ohio, and I personally take umbrage at the wording he used in addressing this project. It is not an evil project. It is designed to provide to the consumers of the United States a reserve of gas which was discovered concurrently with oil currently being delivered through the trans-Alaska pipeline. We delivered the 2 billionth barrel of oil just this past month. Every drop of that oil went to American consumers. Two trillion cubic feet of gas produced with that oil was reinjected because there was not a transportation mechanism to take it to consumers.

The U.S. consumers of that gas will pay for its having been produced twice, and the Senator from Ohio wants to delay or kill this pipeline and perhaps have another 2 trillion cubic feet reinjected.

But the worst aspect of his debate are his economics. The Senator would have us capitalize debt service incurred during delay and have his consumers pay year after year after year at a rate of return on capitalized debt service through the rate established by tariff.

That is contrary to the practice of the world. I think we should examine our own system to see whether or not it should not be changed.

Mr. McCLURE. I thank the Senator and yield 2 minutes to the junior Senator from Alaska (Mr. MURKOWSKI).

Mr. MURKOWSKI. I thank the senior Senator from Idaho.

Mr. President, a great deal has been said this morning by my good friend and colleague from Ohio about risk, and I think we need to explore just what the risk to the consumer in the United States is.

What has not been mentioned is the equity contribution that the owner companies are putting into the project and the fact that not one cent of equity will be returned until the three segments of the gas pipeline are operating as designed.

We have built pipelines across this country for years and years. The technology is certainly not new. We have built an oil pipeline through permafrost across Alaska. There is every reason to believe that we can build this 4,000-mile pipeline, but the fact is that there is no prebilling on two sections of the pipeline at any time until the equity matter of the contribution is considered because both companies have put up $6 billion worth of equity and they do not get a return until the pipeline is actually functioning.

So that is the incentive to insure that the consumers of the United States will not be prebilled.

I think to go back to the testimony taken during the hearing when asked all the companies involved in the pipeline what the risk was they all answered without exception the risk was negligible to zero.

I wish to add that there is a risk in this project and, of course, the risk is that we will again repeat the shortage of gas that we saw in this country in the 1970's, and that is a very real risk, and I add one more thing, that the Washington Post, an advocate of consumer rights, has come out with an editorial that is a part of the record suggesting that this project is very much in the best interests of the consumer and in the national interests as well as evidenced by the President's letter and Secretary Haig's letter and Secretary Edwards' letter.

I thank the senior Senator from Idaho.

Mr. McCLURE. Mr. President, I yield 30 seconds to the distinguished Senator from Minnesota (Mr. BOSCHWITZ).

The PRESIDING OFFICER (Mr. MURKOWSKI). The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. Mr. President, prior to my entering the Senate, Congress enacted the Alaska Natural Gas Transportation Act and approved President Carter's designation of a route for the system. At that time, there existed strong congressional support for the pipeline as long as it was privately financed.

The reasons for this congressional support were clear. The pipeline is projected to carry natural gas from Alaska's Prudhoe Bay where proven gas reserves total 26 trillion cubic feet—13 percent of the total U.S. proven gas reserves. The system will be able to carry 2 billion cubic feet of gas per day, through the 4,800-mile pipeline system stretching from Prudhoe Bay, across Canada to terminals in Illinois and California. This amounts to 4 to 5 percent of the U.S. daily need.

Also, the actual natural gas reserves could be much greater than the 26 trillion cubic feet of proven reserves.

In testimony before the Senate Committee on Energy and Natural Resources, Charles Butler, Chairman of the Federal Energy Regulatory Commission, estimated the "potential natural gas reserves in Alaska range from 100 to 200 trillion cubic feet." In light of these facts, congressional support for a privately financed pipeline is understandable.

Of course, when Congress approved President Carter's selection, it also approved certain conditions to be imposed on the project. Now the project sponsors have convinced the administration that some of these conditions—permitting producer equity ownership, including the gas conditioning plant in the system and allowing billing to consumers for completed project segments prior to completion of the whole system—need be waived for the pipeline to have any chance for private financing. On that, everyone agrees: without these waivers there will be no pipeline.

The decision to support or oppose the waiver package rests on one fundamental question: Does the need for the natural gas exceed the potential risk for the consumer? The conclusion I have reached is yes—because we will need the gas.

This is an issue of significant consequence for my State. Minnesota has almost no indigenuous energy resources. Being at the end of every line that supplies energy causes concern about having adequate supplies in both the short and long term. In preparation for considering this waiver package on the Senate floor, I requested the review and analysis of the package by the Minnesota Energy Agency and the Minnesota Public Utilities Commission.

The Minnesota Energy Agency projections show that Alaskan supplies will account for about 19 percent of Minnesota's total natural gas supplies in the 1980's and could rise to 25 percent by the end of the century. The agency's analysis summarizes:

> Alaskan gas is a secure source of supplies for Minnesota in the last dozen years of this century. Obtaining these supplies from alternative sources would be either more risky, more expensive, or both. Therefore, the waiver package—though it does post some costs to Minnesota consumers—would be beneficial to Minnesota to the extent it promotes the completion of the Alaskan pipeline, and there is ample reason to believe that the line would not be completed without the waiver package.

Minnesota Public Utilities Commissioner Terry Hoffman reached the same conclusion—we need gas.

I will support the waiver package, although I do so with reservation. I am always reluctant to see the rules changed in the middle of the game. The most controversial proposal in this package is allowing the prebilling for completed segments after the target date. This would be particularly onerous for consumers if the pipeline is not completed.

However, I am confident that strong incentives remain for the project sponsors to complete the pipeline. The prebilling will be limited to return of the debt, and not to repay the producers equity in the project. Also, the pipeline sponsors and producers will not receive

1 cent on their investment until the gas flows. That is a powerful incentive.

So while aspects of this waiver proposal cause me concern, I will support the project in hopes that it will be completed to provide my State and others the natural gas supply they need.

Mr. President, I ask unanimous consent that the waiver package analysis of the Minnesota Energy Agency be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

WAIVER PACKAGE ON ALASKAN GAS PIPELINE

ANALYSIS OF THE MINNESOTA ENERGY AGENCY

The waiver package submitted by President Reagan to Congress is designed to improve the probability of securing private financing for ANGTS. The elements of the package—permitting producer equity ownership, including the gas conditioning plant in the system, allowing billing to consumers to occur before gas begins flowing, and prohibiting further regulatory changes—serve to shift risks from the project sponsors to the gas consumers and public at large. The Agency sees no positive aspects of the package itself on Minnesota independent of its efficacy in obtaining financing of the line, and hence, the project's realization.

The benefits of the line to Minnesota are substantial. Current projections show that Alaskan supplies will account for about 19 percent of Minnesota's total natural gas supplies in the late 1980's, possibly rising to 25 percent by the end of the century. These Alaskan supplies, currently amounting to 13 percent of total U.S. proved reserves, are secure. Although Alaskan gas will be more expensive than new gas supplies discovered in the lower forty-eight states in the initial years of operation, this differential will narrow substantially throughout the 1990's, and will disappear before 2000.

What are the alternatives to Alaskan gas? Alaska will provide about 5 percent of U.S. supplies when it begins operation. Increasing domestic production by that amount in the late 1980's will likely be risky and expensive. Even industry groups like the American Gas Association are projecting decreasing conventional supplies in that time frame. Unconventional gas sources will not be so well developed by that time as to make up the difference, and their price would not be significantly less than that of Alaskan gas, if lower at all. Neither would increased Canadian gas exports replace Alaskan gas. Failure to build the Alaskan line would severely strain energy relations with Canada.

Two aspects of the waiver package would or could increase cost of gas to Minnesota. First, one of the waivers permits the inclusion of the gas conditioning plant in what can be billed to consumers. This will increase the price of Alaskan gas by $2/Mcf in 1986 (about $1.20 in 1980 dollars), and the average price of gas in Minnesota will rise by $.40/Mcf—or an increase of 4 percent. Some may consider this a small price to pay to induce the delivery of Alaskan gas.

Secondly, the waiver package would allow for some charges to be made to gas customers even if all the segments of the pipelines were not complete. These charges would probably amount to 5 to 18 cents/Mcf charge on existing gas supplies (in 1986 dollars). Such a charge would amount to 0.5 percent to 1.8 percent increase in gas prices.

In summary, Alaskan gas is a secure source of supplies for Minnesota in the last dozen years of this century. Obtaining these supplies from alternative sources would be either more risky, more expensive, or both. Therefore, the waiver package—though it does pose some costs of Minnesota consumers—would be beneficial to Minnesota to the extent it promotes the completion of the Alaskan pipeline, and there is ample reason to believe that the line would not be completed without the waiver package.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Ohio has 3 minutes and 28 seconds remaining and the Senator from Idaho has 1 minute and 48 seconds remaining.

Mr. METZENBAUM. Mr. President, I yield myself 2 minutes.

Mr. President, I do not want to kill the pipeline. I just want the pipeline to be built on a basis that is more equitable, more fair. And they say the bankers require a particular kind of financing. We should point out, as I have done in my remarks, which I ask unanimous consent to be printed in their entirety in the RECORD.

Mr. STEVENS. Mr. President, reserving the right to object, I understand the Senator from Ohio objected to the colloquies the Senator from Idaho and I prepared. If there is no such objection I withdraw my objection.

Mr. METZENBAUM. Mr. President, the Senator from Alaska is welcome to make his objection if he cares to. I have no objection to his doing that.

Mr. STEVENS. Was there such an objection?

Mr. METZENBAUM. There has been no such request made.

Mr. STEVENS. I withdraw the objection.

Mr. METZENBAUM. May I proceed?

The PRESIDING OFFICER. The Senator from Ohio has the floor.

Mr. METZENBAUM. Mr. President, this pipeline can be built. The bankers have said to me when I asked them if it could be financed by selling more equity, and they said, yes, indeed, it could be financed that way. It would be difficult but it could be done. It is a question of how much the marketplace would take.

With all due respect to my friends from Alaska, and I do not mean to be insulting at all, it is a fact that Alaska, which will get $10.7 billion out of this transaction, could itself be helpful in providing and helping to underwrite the financing of this pipeline.

This deal is going to provide a 30-percent return in the first year on the investment of those who have equity in it. It will provide 70 percent internal return to the oil companies. The real question is what is fair; what is right?

We made a commitment to the people of this country that consumers would not be asked to underwrite this program, and all I am saying——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. METZENBAUM. Mr. President, I yield myself an additional 20 seconds.

The PRESIDING OFFICER. The Senator is recognized for an additional 20 seconds.

Mr. METZENBAUM. Mr. President, the real question is the fair thing to do.

A commitment was made to Congress that we would do it one way. This waiver just is a 10 degree reversal. It is not right and it is not proper.

Mr. President, I have reserved the remainder of my time.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. McCLURE. Mr. President, how much time remains on both sides?

The PRESIDING OFFICER. The Senator from Idaho has 1 minute and 48 seconds remaining and the Senator from Ohio has 1 minute and 1 second remaining.

Mr. McCLURE. Mr. President, I yield to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. D'AMATO. Mr. President, I am pleased to support the passage of Senate Joint Resolution 115, the resolution to approve President Reagan's waiver request of the Alaska Natural Gas Transportation Act. I strongly believe that these waivers are necessary to expedite the construction and initial operation of the Alaska Natural Gas Transportation System by the private sector.

The Phudhoe Bay field on the North Slope of Alaska contains proven recoverable reserves of natural gas which conservatively total 26 trillion cubic feet; this is the equivalent to about 4.5 billion barrels of oil. This field is the largest single gas reservoir ever discovered in North America and it contains about one-eighth of the United States known reserves of gas. This field alone is capable of providing gas markets located in the lower 48 States with more than 2 billion cubic feet of gas per day over a 25-year period.

In addition to the proven reserves of natural gas located at Prudhoe Bay, experts have estimated that there may be another 200 trillion cubic feet of reserves located elsewhere in Alaska. However, without the construction of the Alaska Natural Gas Transportation System, none of the natural gas located in Alaska will be able to be transported to, and used in the lower 48 States. It may be shut off to us forever.

We cannot let these tremendous resources go untapped. The natural gas located in Alaska must be transported to the lower 48 States in order to reduce our dependence on imported oil. Recent events in the Middle East illustrate only too vividly the volatility of that region and the fragile nature of our imported petroleum supply.

Mr. President, I believe Congress must reassert its commitment to the private development of the pipeline project and the development of energy resources on the North Slope of Alaska.

I urge my colleagues to support the resolution. I ask unanimous consent to have printed in the RECORD, an editorial from the Washington Post entitled "That Gigantic Pipeline."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THAT GIGANTIC PIPELINE

We want to talk to you this morning about your gas bill—not the one you got this month, but the one you'll begin getting in the 1980's. There's a lot of gas underneath Alaska's North Slope, and getting it down here to customers in Washington and

throughout the country is going to require the longest, most expensive pipeline ever built.

You need to be aware that the cost will be in the range of $40 billion and that it will ultimately be paid by the consumers who use the gas. But to get this assured supply at a stable price far into the future will be worth the money.

Congress now has to vote on it once again. The original legislation five years ago contained restrictions that turn out to make the financing impossible, and President Reagan has asked Congress to waive them. These waivers are a reasonable compromise with the realities of current conditions in the financial markets, and if Congress were to reject them it would, as a practical matter, kill the whole undertaking.

Rejection would also constitute a gross betrayal of the Canadian government, which has permitted the construction on the line south from Calgary into this county on the explicit promise by the United States that the rest of it would proceed promptly. That line is already in operation.

The effect of the waivers is to shift more of the financial risks of this enormous investment from the leaders to the consumers. But those risks are pretty small. The greater issue is the cost of the gas, compared with that of other fuels. At first, that price is likely to be substantially higher. But as time passes, with inflation and the higher oil prices that most people expect, the balance will change. An analysis for the House Energy Committee concludes that, over 20 years, on average, the Alaskan gas would cost slightly less than the alternative fuels. But it's necessary to acknowledge that there are many uncertainties in the calculation. Should consumers have to bear the brunt of those uncertainties?

The greater threat now is further rapid escalation of oil prices—and the higher they go, the better deal the Alaskan gas will be. If the gas at first is expensive and raises your gas bill, you ought to regard it as an insurance premium for the longer future. Whatever happens abroad, the prices of the Alaskan gas will continue to be set by law and by long-term contract. The shorter Alaskan oil pipeline seemed extravagantly expensive when it was finished, in 1977, at $9 billion. But since then it has saved this country $50 billion in the foreign exchange that it would otherwise have paid for more oil from OPEC. For the same reasons, the gas line serves the interest of both the consumer and national security.

Mr. McCLURE. Mr. President, I ask unanimous consent that a colloquy between myself, Mr. STEVENS, and Mr. MURKOWSKI be printed in the RECORD in full.

Mr. METZENBAUM. Mr. President, reserving the right to object. I have no idea what the colloquy contains. It could very well bear on the interpretation of our action here today. Until such time as I have an opportunity to examine it, I have to object. I have not seen it. I do not mean to preclude my friend from Idaho from getting his material in the RECORD. I am happy to look at it even after we dispose of this and make a nunc pro tunc entry so it may be included.

At this point, without seeing it, that colloquy could bear upon the interpretation of our actions.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. How much time do I have?

The PRESIDING OFFICER. Thirty-eight seconds, and the Senator from Ohio has 1 second.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. D'AMATO). Who yields time?

Mr. METZENBAUM. Mr. President, I want to make clear that when we talk about the bankers we ought to realize that we are talking about people who are totally interlocked with the oil companies. One has to look askance at their refusal to provide the funding unless the law changed.

The fact is that each of the banks has members or in some way does interconnect with the three oil companies producing the Alaskan gas and, therefore, one rightfully can look askance at this.

I ask the Members of the Senate just to be fair and to be reasonable. I point out to my friend from Idaho that in his own State the industrial users could very well be called upon to pay an amount that is quite astounding. I believe it is something like $119,193 to $138,911 a year. I cannot believe that anyone would like to see that happen.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. How much time do I have?

The PRESIDING OFFICER. Thirty-eight seconds, and the Senator from Ohio has 1 second.

Mr. McCLURE. Mr. President, I will not use up that time. I yield myself the remainder of the time.

Let me say to my friend from Ohio I do not know what he had in his remarks that he inserted in the RECORD. Senator STEVENS and Senator MURKOWSKI and I have an equal right to make whatever statements we wish to make, and that is all the colloquy is. It might indeed have to do with an interpretation on the bill, just as the Senator from Ohio's remarks may have something to do with an interpretation of the bill.

Mr. President, I regret the action the Senator from Ohio has taken. But it is not my practice to submit my remarks for his approval before I make them, and I shall not do so today.

The PRESIDING OFFICER. All time has expired.

Mr. METZENBAUM. I have no desire for the Senator to submit his remarks. But the colloquy could bear on the interpretation.

● Mr. KENNEDY. Mr. President, after careful study I have decided to vote against approval of the waiver proposed by the President on October 15, 1981, pursuant to the Alaska Natural Gas Transportation Act.

The sponsors of this measure have stated that it is a matter of national interest and security to assure the delivery of gas from the Prudhoe Bay reserve to the lower 48 States. I agree completely. The Alaska gas reserves can play an important role in our quest for energy independence and energy security.

I am not persuaded, however, that this waiver package is the right way to assure that those reserves are tapped. I am particularly concerned by the waiver that would permit prebilling of consumers for construction costs, shifting the risk of noncompletion of the pipeline to residential and industrial customers. I am also concerned by the antitrust implications of the decision to permit producers to obtain an equity interest in the pipeline.

I believe a better and fairer package can be developed—one that would assure the construction of the pipeline, meet our international commitments and treat fairly all the parties involved—producers and customers alike. But this is not that package.●

● Mr. DODD. Mr. President, like most of my colleagues on both sides of this debate, I support construction of the Alaska natural gas pipeline—if it is economically feasible—if it will provide secure supplies of gas to American consumers at a reasonable price.

Alaskan natural gas supplies are unquestionably important to this Nation's long-run energy security. I sincerely hope that the pipeline's sponsors will be able to secure financing for the project. I am willing to support any reasonable and equitable measure to advance that effort including the waiver of previously agreed upon provisions of the law. Conditions do change in a dynamic world and we must recognize such changes and adapt to them.

With regard to the waiver package we are considering today, I can, somewhat reluctantly, support most of its provisions. Unfortunately, we are confronted with either accepting the total package or rejecting it. I intend to vote against the package and urge the administration to modify what I consider its fatal flaw.

That flaw is the waiver provision that would allow natural gas consumers to be billed for the cost of the project before they start receiving any gas, before the project is even completed and even before there is any guarantee that the project will be completed.

Every administration and every Congress that has considered this project has supported it with one proviso—that it be privately financed. The project sponsors have consistently assured the Government and the taxpaying public that this would be the case.

The so-called preconstruction billing authority created by this waiver package clearly reverses that commitment. It quite simply authorizes a public loan guarantee to the project sponsors and to any banks who participate in financing the project, and no disguise the proponents of this waiver try to dress it up with is going to change that fact.

The only difference between this so-called preconstruction billing authority and a Federal loan guarantee is that not all taxpayers will equally share the risk. Only those taxpayers who are served by existing gas pipeline that might someday carry Alaskan gas will have to pay this prebilling tax to provide the banks their loan guarantee. This tax will not even be charged to potential new gas customers who would be the chief beneficiaries if the pipeline is completed.

If the pipeline is completed and Alaskan gas is delivered to the lower 48 States, those who use that gas will pay for the project. The private company revenues from the sale of that gas will pay off any loans made to finance the project. That is the way this project was conceived. That is the way this project

should be continued unless the Congress determines that it is of sufficient national importance to warrant Federal loans or loan guarantees.

The back door public financing authorized by the current proposal is nothing more than deception and should be rejected. I can with confidence assure my colleagues that natural gas consumers in Connecticut, in whose name we are being asked to sign this loan guarantee, would never do so under the conditions of this contract—a contract that guarantees only that they will pay whether they receive any gas or not.●

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The question is, Shall the joint resolution pass? The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Rhode Island (Mr. CHAFEE), and the Senator from Arizona (Mr. GOLDWATER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Hawaii (Mr. MATSUNAGA) would vote "yea."

The PRESIDING OFFICER (Mr. MATTINGLY). Are there any Senators in the Chamber wishing to vote?

The result was announced—yeas 75, nays 19, as follows:

[Rollcall Vote No. 399 Leg.]

YEAS—75

Abdnor	Ford	Murkowski
Andrews	Garn	Nickles
Baker	Gorton	Nunn
Baucus	Grassley	Packwood

NOT VOTING—6

Armstrong	Chafee	Leahy
Byrd, Robert C.	Goldwater	Matsunaga

So the joint resolution (S.J. Res. 115) was passed as follows:

S.J. RES. 115

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the House of Representatives and Senate approve the waiver of the provision of law (Public Law 95–158, Public Law numbered 688, Seventy-fifth Congress, second session, and Public Law 94–163) as proposed by the President, submitted to the Congress on October 15, 1981.

Mr. JACKSON. Mr. President, I want to express my thanks to the committee staff, majority and minority, for the fine way they have managed this matter.

I want to make special mention of the particularly outstanding job done by Betsy Moler, of the staff. She has been involved with the Alaska gas pipeline for many years, beginning with the 1976 act, continuing through the President's 1977 decision, the National Gas Policy Act, and now this waiver resolution submitted by President Reagan.

Her high level of professionalism has helped all of us greatly.

Mr. McCLURE. Mr. President, I want to join with the distinguished Senator from Washington, the ranking minority member on the Energy and Natural Resources Committee, in that comment. I think it is fair to say that all of the staff have contributed mightily. Betsy's contribution has been particularly significant over a long period of time.

The staff has done a tremendous job with respect to the very complex issues surrounding this issue. I know that both the majority and minority staff have shared in that, and I certainly want to express our appreciation on the floor.

Mr. JACKSON. If the Senator will yield, I think we will all agree that it was a genuine bipartisan effort.

Mr. McCLURE. The Senator is correct.

Mr. JACKSON. The Senators from Alaska in particular have been extremely helpful.

Mr. STEVENS. If the Senator will yield, Mr. President, I want to personally thank the leaders of the Energy Committee and to commend the staff, as the chairman and ranking member have done. I also commend Mark Schneider, of my staff, who has also worked very hard on this legislation.

At this time, I particularly want to thank my friend and new colleague, Senator MURKOWSKI. He is a new member on the Energy Committee. This is a project of major importance to our State and he has worked tirelessly in order to see to it that this vote took place today. Having the cooperation of Senator McCLURE and Senator JACKSON was essential to that.

I want the record to show that I am delighted to have had the opportunity to work in concert with my colleague, to work with him, and to have his cooperation throughout. I think he has done an admirable job for the State of Alaska today.

Mr. McCLURE. Mr. President, let me underscore that statement as well. Certainly, the contributions of the junior Senator from Alaska have been immense. I personally have appreciated the assistance he has given to me throughout the weeks and months of deliberation on this question both in the public discussion and the private discussion surrounding it.

Mr. President, I want to take this occasion to indicate that, not only by the vote but also by the participation in the construction of the waiver package and the President's own interest in the waiver package, that this waiver package, the Alaska natural gas pipeline, is not simply an Alaskan issue.

It is a national issue. The letter of the Secretary of State, the Honorable Al Haig, and the Secretary of Energy, the Honorable Jim Edwards, underscores the national importance of the action that we have taken. It is of peculiar interest to those who are in Alaska, but it would be a mistake to believe that it is only an Alaskan bill. It is truly a national bill and has a very favorable impact on those consumers in all but 2 of the 50 States who will receive this gas, or a portion of this gas, through this pipeline.

Mr. MURKOWSKI. Mr. President, I thank the distinguished chairman of the committee for his kind remarks, and I appreciate the remarks of the senior Senator from Alaska and the Senator from Washington. I think the action taken on the floor today will have far-reaching effects in achieving energy independence, as the President said when he proposed the waiver.

SECOND CONTINUING APPROPRIATIONS, 1982

Mr. BAKER. Mr. President, what is the business before the Senate?

The PRESIDING OFFICER. The pending business is the second continuing appropriations resolution, which the clerk will state.

The assistant legislative clerk read as follows:

A House joint resolution (H.J. Res. 357) making further continuing appropriations for fiscal year 1982, and for other purposes.

The Senate resumed consideration of the resolution.

UNANIMOUS-CONSENT REQUEST

Mr. BAKER. Mr. President, there are two amendments that I am aware of at this time that can be called up and on which I believe the principals are agreeable to a time limitation. This has been discussed on the minority side and I should like to propound the unanimous-consent request at this time.

I ask unanimous consent that the next amendment be an amendment to be offered by the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.), on which there will be a time limitation of 30 minutes to be equally divided; and that, following that will be an amendment to be offered by the Senator from Alaska (Mr. STEVENS), on which there will be a time limitation of 30 minutes equally divided, and a second-degree amendment to that amendment to be offered by the Senator from Alaska on which there will be a time limitation of 20 minutes equally divided.

Mr. FORD. Reserving the right to object, Mr. President, and I do not think I will, could the distinguished majority

leader advise us of the nature of the Stevens amendment?

Mr. BAKER. It is my understanding that the Stevens amendment will be an amendment to lift the pay cap of Federal employees, including the Members of Congress, and the second degree amendment will strike Members of Congress and leave it effective only as to top executives.

Mr. FORD. I probably know how I shall vote, Mr. President. I shall not object.

Mr. BUMPERS. Reserving the right to object, Mr. President, would the majority leader be interested in adding another amendment to his list?

Mr. BAKER. I am happy to do that.

Mr. BUMPERS. Senator CHAFEE and I have an amendment that we can probably handle in 30 minutes, 15 minutes to a side, dealing with child and maternity health care.

Mr. BAKER. If the chairman and the ranking member do not object, Mr. President, I add that amendment to the sequence as a third amendment, with the time limitation of 30 minutes, equally divided.

Mr. PROXMIRE. Mr. President, could we have an explanation, a brief one, of Senator BYRD's amendment?

Mr. BAKER. May I yield to the Senator from Virginia for that purpose?

Mr. HARRY F. BYRD, JR. Mr. President, a brief explanation of this amendment is that it would provide that, until an appropriation bill is enacted into law, the administration's latest budget request would be the figure that would prevail. As soon as an appropriation bill is enacted into law, then the figure in the appropriation bill for each of the departments would prevail.

Mr. RIEGLE. Will the Senator yield for a question on that, if the Senator controlling the time will yield?

Mr. HARRY F. BYRD, JR. Yes.

Mr. RIEGLE. If we were to do that, Mr. President, would that not create a situation where, if we substituted the President's requested figure and that were lower than the appropriation figure, someone who favored the lower figure could, using parliamentary devices and other tactics, prevent the appropriation from ever even coming to a vote and, in effect, require that the lower figure be the one that is used; thereby, in a sense, setting aside the whole appropriations process by keeping it from coming to a vote? Do we not run that risk?

If so, is that not really a pretty basic attack on the prerogatives of the Senate itself and the appropriations process?

Mr. HARRY F. BYRD, JR. As I see it, Mr. President, the Senate is in an extraordinary situation right now in handling the appropriations bills. Never before have we had a continuing resolution to the degree and to the time extent and the magnitude of this continuing resolution. So I think we are already in a very extraordinary situation.

Mr. RIEGLE. If the Senator will yield further, it is my understanding that some of the appropriations bills have been passed by the Senate, passed by the House, sent to conference. They are waiting here to be voted on and we could vote on them in the next 10 minutes, and they are behind us.

In other words, I think the notion that the appropriations are not ready is something of a fiction: some are, some are not.

Would the Senator be willing to amend his approach to at least take those appropriations that have already been settled in conference and require that they be acted on first, so that they are dealt with in the normal course and put aside so we are really only dealing with those things that are truly unresolved?

Mr. HARRY F. BYRD, JR. As soon as the appropriations bills—there are seven, I believe, or eight, which have already gone through most of the legislative process. When each one is enacted into law, whatever figure is in that bill will prevail.

Mr. RIEGLE. If the Senator will yield further, are we not still in a situation where, if we adopt his amendment and go with perhaps lower figures than the President has asked for—let us say the Senate and the House have acted in conference and they have a higher figure than the President's figure. Could not someone here, in the Senate, or a group, using parliamentary tactics, delay that appropriation bill or that appropriation conference report, from coming to a vote. And if they were successful in doing so, they would, in effect, have succeeded and then seen to it that those functions were funded at the lower level than the President's budget request? Do we not set ourselves up for that kind of sabotage?

Mr. HARRY F. BYRD, JR. That can be done now.

Mr. BAKER. Mr. President, if the Senators will permit me, let me say I apologize for interrupting the colloquy, but I am advised now that there is an objection to the whole arrangement. Therefore, I withdraw my request.

UP AMENDMENT NO. 661

(Purpose: To authorize the Attorney General to acquire and exchange certain information relating to deceased individuals and missing children)

Mr. HATFIELD. Mr. President, I yield at this time to the Senator from Florida (Mrs. HAWKINS) for the purpose of presenting an amendment.

The PRESIDING OFFICER. The Senator from Florida.

Mrs. HAWKINS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. Does the Senator from Oregon wish to lay aside the pending committee amendment?

Mr. HATFIELD. Mr. President, I ask unanimous consent to temporarily lay aside the pending amendment for the purpose of proceeding with the amendment of the Senator from Florida.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Florida (Mrs. HAWKINS) proposes an unprinted amendment numbered 661.

Mrs. HAWKINS. I ask unanimous consent that the further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution, insert the following new section:

SEC. . (a) This section may be cited as the "Missing Children Act".

(b) Section 534(a) of title 28, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by redesignating paragraph (2) as paragraph (4);

(3) by inserting after paragraph (1) the following new paragraphs:

"(2) acquire, collect, classify, and preserve any information which would assist in the identification of any deceased individual who has not been identified within fifteen days after the date of the discovery of the deceased individual;

"(3) acquire, collect, classify, and preserve any information from authorized officials of the Federal Government, the States, cities, and penal and other institutions, or from a parent, legal guardian, or next of kin of an unemancipated person, as defined by the laws of the State of residence of such person, which would assist in the location of any missing person who—

"(A) is under proven physical or mental disability making the person a danger to himself or others;

"(B) is in the company of another person under circumstances indicating that his physical safety is in danger;

"(C) is missing under circumstances indicating that the disappearance was not voluntary; or

"(D) is unemancipated as defined by the laws of his State of residence; and"; and

(4) by striking out "exchange these records" in paragraph (4) (as so redesignated) and inserting in lieu thereof "exchange such records or information".

(c) (1) The heading for section 534 of title 28, United States Code, is amended to read as follows:

"§ 534. Acquisition, preservation, and exchange of identification records and information; appointment of officials".

(2) The table of sections at the beginning of chapter 33 of such title is amended by striking out the item relating to section 534 and inserting in lieu thereof the following new item:

"534. Acquisition, preservation, and exchange of identification records and information; appointment of officials.".

Mrs. HAWKINS. Mr. President, the amendment I am offering today is identical to S. 1701, the missing children bill which has been cosponsored by 58 Members of the Senate and passed as an amendment to the State, Justice, and Commerce appropriations bill last week. Public and congressional support continues to grow overwhelmingly for this much needed legislation.

Yesterday, I had an opportunity to present testimony on the Missing Children's Act before the Subcommittee on Civil and Constitutional Rights of the House Judiciary Committee.

At this time, the following Members of the Senate are cosponsors of S. 1701: Mr. ARMSTRONG, Mr. BAKER, Mr. BAUCUS, Mr. BOREN, Mr. BOSCHWITZ, Mr. BUMPERS, Mr. HARRY F. BYRD, JR., Mr. CANNON, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EAST, Mr. EXON, Mr. GARN, Mr. GORTON, Mr. GRASSLEY, Mr. HATCH, Mr. HEFLIN, Mr. HEINZ, Mr. HELMS, Mr. HOLLINGS, Mr. JEPSEN, Mrs. KASSEBAUM, Mr. KASTEN, Mr. LAXALT, Mr. LEVIN, Mr. LUGAR, Mr.

MATHIAS, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. METZENBAUM, Mr. MURKOWSKI, Mr. NICKLES, Mr. PACKWOOD, Mr. PELL, Mr. QUAYLE, Mr. RANDOLPH, Mr. RIEGLE, Mr. ROTH, Mr. RUDMAN, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. SYMMS, Mr. THURMOND, Mr. TOWER, Mr. WALLOP, and Mr. WILLIAMS.

Adoption of this legislation would be an important step forward toward insuring the safety of our children. The Congress must send a message that we care as much about finding missing children as we do about locating stolen cars or refrigerators which are kept on computerized file. As chairman of the Labor-Subcommittee on Investigations and General Oversight, I heard heartbreaking testimony from parents of missing and murdered children. All pointed to the need for a nationwide information system.

From Mr. and Mrs. John Walsh of Hollywood, Fla., whose 6-year-old son, Adam, was abducted from a shopping center and murdered, I heard of the frustration of trying to coordinate their search among different agencies. Mr. Walsh told my subcommittee:

It is certainly evident that the priorities of this great country are in some disorder. A country that can launch a space shuttle that can return to Earth and take off again, a country that can allocate millions of dollars to save a small fish the snail darter . . . but does not have a centralized reporting system or a nationwide search system for missing children, certainly needs to reaffirm the very principles that this country was founded on. We pray, along with thousands of other concerned parents, that you will continue to have the strength to continue your efforts. You have helped us keep the threads of our lives together and given us definite reassurance that Adam did not die in vain. God bless you.

The shocking facts of America's missing children problem are:

First, while no one among us can accurately describe the extent of the problem, estimates are that as many as 1.8 million children disappear each year.

Second, many children who disappear become victims of crime, exploitation, abuse and are in constant danger.

Third, the record shows that only 10 percent of children missing for an appreciable period of time are entered into the national missing persons file although 47 States normally participate.

I ask unanimous consent to have printed in the RECORD a table showing participation by States currently.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

MISSING PERSON FILE ACTIVITY BY STATE FOR AUGUST 1981

[Populations in millions]

State	Entries	Population	Utilization rank [1]
Alabama	11	3.9	43
Alaska	34	.4	7
Arizona	270	2.7	4
Arkansas	11	2.3	41
California	507	23.7	25
Colorado	276	2.9	5
Connecticut	222	3.1	13
Delaware	31	.6	18
Florida	885	9.8	6
Georgia	87	5.5	31
Idaho	3	.9	42
Illinois	835	11.4	10
Indiana	78	5.5	32
Iowa	193	2.9	12
Kansas	23	2.4	35
Kentucky	83	3.7	25
Louisiana	68	4.2	36
Maine	2	1.1	45
Maryland	589	4.2	46
Massachusetts	318	5.7	16
Michigan	690	9.3	9
Minnesota	296	4.1	11
Mississippi	19	2.5	38
Missouri	500	4.9	3
Nebraska	72	1.6	19
Nevada	18	.8	24
New Hampshire	18	.9	27
New Jersey	424	7.4	15
New Mexico	8	1.3	39
New York	1,446	17.6	8
North Carolina	71	5.9	33
North Dakota	31	.7	20
Ohio	333	10.8	21
Oklahoma	26	3.0	36
Oregon	616	2.6	2
Pennsylvania	291	11.9	22
Rhode Island	188	9.4	28
South Dakota	16	.7	23
Tennessee	47	4.6	34
Texas	850	14.2	14
Utah	12	1.5	37
Vermont	1	.5	44
Virginia	295	5.3	17
West Virginia	11	2.0	40
Wisconsin	1,155	4.8	1
Wyoming	9	.5	29

[1] Order is determined by entries per capita submitted to the FBI.

Note: Hawaii, Montana, Puerto Rico, South Carolina, and Washington submitted no data at all.

Source: FBI and Bureau of the Census.

Mrs. HAWKINS. Fourth, presently, the FBI collects information from States which choose to send information on missing persons on a voluntary basis.

Fifth, missing children and others do not always survive their ordeals and their families never find out. Each year about 2,000 cases involving the unidentified dead are closed.

My amendment establishes by statute a national computer information network to assist law enforcement agencies in locating and identifying missing children and to aid in the identification of the dead who are found without enough evidence to establish their next of kin. It also permits parents to enter their missing children directly into the system if local or State police officials fail to do so.

Much of the language in this amendment has been suggested by the Federal Bureau of Investigation. After extensive discussion with the Bureau almost all of their suggestions or recommendations were included by appropriate additions to the Missing Children's Act.

This amendment provides a solution desperately needed. I urge all Members of the Senate to join the 58 cosponsors of S. 1701 and the National and International Associations of Police Chiefs, the International Union of Police Associations, AFL–CIO, and the American Correctional Association who strongly endorse the missing children bill by supporting passage of the amendment.

I thank the able Senator from Oregon.

Mr. HATFIELD. Mr. President, I thank the Senator from Florida for her leadership in this area.

As the Senator knows, this language is in the State-Justice-Commerce part of the bill.

Under our present situation, with a continuing resolution, unless we have boiler plate language, there could be slippage here, which she is very interested about, I know, in trying to plug that possible loophole.

So, because it is already a commitment by the Appropriations Committee in the State-Justice-Commerce section, and because I understand the purpose for presenting this amendment at this time, I have discussed it with the minority, and the managers are willing to accept the amendment.

Mr. PROXMIRE. Mr. President, I congratulate my good friend from Florida. She is certainly a persistent and determined friend of missing children and their heartbroken parents.

Nobody, in my recollection, has done more in a short time to try to meet this problem than has the Senator from Florida. She deserves congratulations. I understand she has worked very hard with the Judiciary Committee as well as with the Appropriations Committee, and I am certainly happy to agree with the manager of the bill to accept the amendment.

Mrs. HAWKINS. I thank the Senators.

Mr. BOREN. Mr. President, I am pleased to rise in support of the amendment of my colleague from Florida, Mrs. HAWKINS, which will improve nationwide efforts to find missing children. The American public has indicated in no uncertain terms its enthusiasm for this legislation. Support for this proposal is broad; it disregards all partisan or ideological boundaries.

Such support should not be surprising, Mr. President, in light of the need for such a program. This need was underscored by a recent occurrence in Oklahoma. At the Oklahoma State Fair in Oklahoma City this fall two young girls disappeared. In spite of a massive search conducted by law enforcement officials in the aftermath of the disappearance, these children have still not been found. In the meantime, parents, friends, and neighbors of these children agonize in uncertainty.

It is my hope, Mr. President, that this amendment will help avert tragedies such as this one. If enacted this legislation might bring peace of mind to millions of American parents. I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 661) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I yield the floor to the Senator from Virginia, for the purpose of offering an amendment. The managers of the bill have agreed to lay aside the pending amendment in order to receive this amendment.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, is there a time limitation?

Mr. HATFIELD. No.

The PRESIDING OFFICER. The time limitation was withdrawn.

Mr. HARRY F. BYRD, JR. Mr. President, I plan to offer an amendment in a moment, but first I should like to discuss it briefly.

The thrust of this amendment is very simple. The proposal would provide that until an appropriation bill has been signed into law, spending authority may not bust the budget.

The amendment stipulates that for each activity funded under appropriation bills which exceed the budget request, the level of funding shall be the level of the most recent budget estimate from the administration. This would hold, of course, only—and I emphasize "only"—until a regular appropriation bill was enacted.

In other words, under this proposal, if Congress is to exceed the budget request—and I hope it will not do so—it must do it in the regular and orderly way, in specific appropriation bills.

Congress could not bust the budget in this continuing resolution under the threat of shutting down the Government.

My amendment would affect eight appropriation bills, assuming the accuracy of the estimates of the Appropriations Committees and the conferees on bills which have been through conference. These are bills which, according to committee estimates, would exceed the budget levels recommended by the President.

I name the bills which, according to the committee estimates, would exceed the budget levels recommended by the President.

There are five bills on which conferences have been completed—namely, Agriculture, Housing and Urban Development, Interior, Energy and Water, and Transportation.

Three bills exceeding the budget have been passed only by the House—namely, Labor, Health and Human Services and Education; Commerce-State-Justice and Judiciary; and Treasury and Post Office.

This enumeration of bills could change in the course of debate on this resolution.

The amendment has been framed to provide that the Government will meet its legal obligations and that no reduction could occur in social security benefits. It seems to me that this proposal should be acceptable to all parties.

At this point, let me say that this amendment was developed after very hard and painstaking work by my senior legislative aide, John I. Brooks. It should, I think, meet some of the problems which the Senate faces in this continuing resolution.

It should be acceptable to the Appropriations Committee, because it protects and preserves the appropriations process. It has the effect of enforcing an orderly procedure.

It should be acceptable to the Congress as a whole, because it assures the opportunity for careful scrutiny at each step of the legislative process: Committee action, votes by each House, conference and final action on conference reports.

It should be acceptable to the President, because he can examine each appropriation on its merits. Clearly there would be no incentive for a veto of this resolution if my amendment were adopted.

For years, I have listened to colleagues in this Chamber denouncing the continuing resolution as a device of desperation, a necessity forced upon us by delays in budget requests, delays in authorizations, delays in appropriation bills, delays of all sorts. Time and again, I have heard it argued that the continuing resolution forces us into hasty and irrational ratification of ill-considered spending proposals. I have agreed with my colleagues who have spoken out in this way.

Neither the Congress nor the President should be dragooned into approving spending schemes under the imminent threat of paralyzing the Nation.

Indeed, the now annual struggle over continuing resolutions seriously diminishes the dignity and stature of our Government—and these are commodities in short supply, in case Senators have not noticed.

My proposal offers a way out of the dilemma.

Mr. President, it pulls the fangs from the continuing resolution; it tames the beast, if you will.

Like all Senators, I hope that we shall come to the day when our budgeting and appropriation procedures have undergone a thorough reform, and continuing resolutions have become a bad memory. But until that day—and I pledge to work to hasten it—let us at least make the best of a very bad thing.

I realize it could be argued that appropriations bills which are under the budget also should not be put into effect by this resolution. But I submit the case is different with bills which reduce the President's proposals, because pending final decision we can be assured that the interest of the taxpayer is protected.

Let us never forget that the historic function of legislatures is to restrain spending. The English barons did not gather at Runnymede to force the King to spend, but rather to stay his extravagant hand. That is the heritage of Magna Carta and the true mission of legislative bodies.

Let us carry out that mission. Let us provide the time that is needed for the momentous decisions bound up in these huge appropriation bills.

If we do not guard the public purse, who will?

So, Mr. President, this proposal seems to me is a reasonable one. It safeguards the appropriations process. It says in effect that the President's budget estimate will be the figure which will prevail until, and only until, such time as Congress enacts and the President signs into law an appropriations bill. At that point, the prevailing figure is the figure in the enacted appropriations bill.

Mr. HATFIELD. Mr. President, there is nothing I enjoy more than chatting about history with a history buff like the Senator from Virginia, and now that he has raised an historic event, one of the great ones of all times, at Runnymede, I would say that really in that same historical analogy the Senator's amendment is going to give all the power back to King John. The barons are yielding their power in this amendment; they are not retaining it. The Magna Carta that came out of that little meeting at Runnymede was to deny King John that autocratic power.

Let me explain how this really, in effect, would return the power to King John. What we have here is an amendment that would set the continuing resolution level at the President's budget request level. Let me remind the Senator that the Senate has acted on all but four of the appropriations measures. The Senate Appropriations Committee has discharged and recommended all 13 bills to the floor.

By this amendment we are, in effect, saying that whole process of the congressional involvement, the Senate in this case, shall be totally thrown out the window and we are going to bow down to King John's simple level of budget request.

Let me remind the Senator that we have already had two in one fiscal year. We had the March request. Then we got modifications in September from the White House, and the President could veto all of the congressional bills and merely keep modifying his budget request and that would always be the level for the spending.

So, in effect, what we are saying is to the White House, "You determine the level of spending, even in the continuing resolution."

I think we recognize that already we are 2 months into the fiscal year and, as I say, the Senate committee has acted on all 13 bills. I just cannot understand in using that historic analogy how the Senator from Virginia thinks this is going to other than yield back to the executive the total authority.

All he would have to do, as he has done between March and September, is keep modifying his budget request and throughout the period of the continuing resolution he could then control fully without congressional input, that is, if Congress passed the bills and he vetoed them he could engage in that kind of a process to dictate the whole fiscal year without the congressional voice.

That is what he is setting up. He is setting up a whole system to return all of the authority back from the barons, and I am not about ready to engage in that. I want to hold the authority that we have wrenched from King John back in 1214 and sustain that kind of political philosophy on through 1982.

Mr. HARRY F. BYRD, JR. I must say the Senator from Virginia does not agree with the analysis of the distinguished Senator from Oregon.

The power rests with Congress to enact appropriations bills. This amendment, of course, does not change that in any way. It does not change that in any way, shape, or form.

The President under the procedures advocated by the distinguished Senator from Oregon can veto any or all of the appropriations bills. So he has that right, whether the amendment to be offered in

a moment is adopted or whether it is not adopted.

So I cannot agree with him that this gives the power to King John. What it does attempt to do is to bring about a lower total spending by the Federal Government until such time as Congress itself acts to go beyond, in the individual appropriations bills, the figure recommended by the President. It seems to me it is reasonable.

Mr. HATFIELD. What will the Senator do with the Defense bill in his amendment?

Mr. HARRY F. BYRD, JR. The Defense bill under the present resolution if I——

Mr. HATFIELD. No, under the amendment offered by the Senator from Virginia. What would happen to the Defense bill?

Mr. HARRY F. BYRD, JR. To answer that I would have to answer it this way.

Under the present resolution, if I understand it, now before the Senate, the lower of two figures would prevail. The House figure is $193 billion; the Senate figure is $208 billion. The President's request is $200 billion. Thus, the President's request is above one of the Houses, so the amendment would not have an effect on that.

Mr. HATFIELD. In other words, the Senator would include the Defense bill in this, in other words, cover all the bills, all 12.

Mr. HARRY F. BYRD, JR. It covers all the bills, but it does not cover social security.

Mr. HATFIELD. Mr. President, I appreciate the Senator's efforts to try to keep the budget at the lowest level possible. But I say at the same time I feel that Congress should have a voice in that and should be a major participant in the whole constitutional system and with the working of the will of Congress. Until we know what the President is going to do with the bills that we have acted upon and the bills that will be acted upon, we are in effect saying let the President set the level.

We are really particularly and in actual reality removing ourselves from a voice as to the role and the level that shall be played by the Federal agencies during the period of the continuing resolution, and I would resist the amendment on that basis.

Mr. PROXMIRE. Mr. President, will the chairman yield on that point?

Mr. HATFIELD. I would be happy to.

Mr. PROXMIRE. He said to let the President set the level. The distinguished Senator from Virginia and the distinguished Senator from Oregon, may I say to them, on Defense, which is the greatest bill of all, the Congress would set the level and not the President. The restrictions on King John or King Ronald would be imposed by not permitting the President to go any higher. He must have a lower request, as I understand it. That is the heart of the Byrd amendment.

I understand the very valid objections of the Senator from Oregon, and I am tempted to support him, except I think that overall, having crossed the bridge of having the date in September of 1982, that now that we face that fact I want to do all I can to cut spending as much as possible, and I think the Senator from Virginia offers that opportunity. We would save, as we calculate it, between $5 billion and $6 billion if the President exercises his full discretion, and it is well worthwhile.

Mr. HARRY F. BYRD, JR. May I say that I recognize that no proposal we can take at the present time is going to be a perfect solution to the problems facing the Senate and the Congress of the United States at this particular moment in history.

I want to commend the Appropriations Committee, the distinguished chairman of the Appropriations Committee, the staff of the Appropriations Committee. It has been a very difficult job that that committee has had. My purpose in offering this amendment is not in any way to complicate or make more difficult the work of the Appropriations Committee.

As the Senator from Wisconsin (Mr. PROXMIRE) pointed out, the purpose of it is to get spending under control at least until such time as the appropriations bills are enacted.

Mr. FORD. Mr. President, will the Senator yield for a question, for just a moment?

Mr. HARRY F. BYRD, JR. Yes.

Mr. FORD. As I understand the Senator's amendment—and it is kind of complicated, and I want to be sure I am correct in my understanding of it—did the Senator say the President's estimate shall prevail until such time as appropriation legislation is passed and submitted to the President?

Mr. HARRY F. BYRD, JR. That is correct.

Mr. FORD. It would be my judgment under those circumstances if the President vetoed the appropriations legislation, and the veto was sustained, then his present figures would stay on in perpetuity until we had the next budget; am I correct in that?

Mr. HARRY F. BYRD, JR. Well, that is correct. If he vetoes an appropriation bill, which he has the right to do with or without this amendment——

Mr. FORD. Yes, I understand that.

Mr. HARRY F. BYRD, JR. (continuing). Then it is thrown back into the lap of the Congress, and the Congress must make some decision as to the way he wants to proceed.

Mr. FORD. Under the present circumstances the figures that are in the continuing resolution will prevail or the President's figures will prevail?

Mr. HARRY F. BYRD, JR. Under the continuing resolution, the lower of the figures by each House will prevail.

Mr. FORD. So with the $190 billion some odd that the House has for defense compared to the roughly $220 billion of the Senate, the House figure then of less than $195 billion would be the prevailing figure until the Department of Defense appropriation bill was passed? If the President vetoed that or some lesser figure was initiated, then we would be traveling the path of the lower figure for the Department of Defense.

Mr. HARRY F. BYRD, JR. The Senator from Kentucky is correct.

Mr. FORD. I thank the Senator for his answers to my questions.

Mr. HARRY F. BYRD, JR. Mr. President, I realize that, as the Senator from Oregon pointed out, it is not a perfect solution. I do not like the continuing resolution any more than the Senator from Oregon. I do not think many of us in the Senate want to proceed with the continuing resolution route, but we are there.

What I am willing to do is to lay down this amendment—and I think it has great possibilities—but not call for a vote immediately. It may be that other amendments which may be presented later in the day would take care of the situation. Although I am not sure it would, I am willing to lay down this amendment now and then ask that it be temporarily laid aside. I will consult with the distinguished Senator from Oregon and we can determine later whether it would be well to call it up or whether some other amendment may be presented which would more nearly take care of the situation which I am trying to get at; namely, I am trying to find a way to bring about a lesser amount of spending than is incorporated in the present resolution, and which will satisfy the President of the United States so that he will not be forced to veto the proposal.

Mr. HATFIELD. I will say to the Senator from Virginia, Mr. President, that it would be perfectly agreeable to proceed along that line.

As the Senator is aware, there is a possible amendment floating around at the present time that would reduce these appropriation measures further.

I would only like to point out that when the Senator talks about the attempt to reduce Federal spending, and I think that is really what the name of the game in town is at the moment, that it is always well to underscore again really why we are in this situation and where we are really reducing.

I think it is important to keep in mind that the two major factors that have caused the tremendous increase in Federal spending, to this uncontrollable situation we face—almost uncontrollable—have not been addressed really in this bill. It has not been addressed in any one of these 13 bills. I would remind the Senator that 78 percent of the total Federal spending is in "uncontrollables" and the Appropriations Committee and the appropriations process have little to say about that portion of the budget.

Mr. President, if you take the 22 percent in which we are engaged here in the appropriations process, 17 percent of that is in defense. That is in 3 of the 13 bills; 5 percent is in all other nondefense appropriated accounts.

If you want to take the last President Carter budget as a basis of comparison, 1980, and the first full year Reagan budget, President Reagan budget, 1982, in that period of time military spending will have increased 49 percent; nondefense, all other programs, will have decreased 12 percent.

But let me remind the Senator again that we are dealing with a 5 percent base of the total budget upon which all the major cuts have been made.

In the rescission package the President asked for $15 billion of reductions in the last President Carter budget, $14 billion. We gave him a $14 billion rescis-

sion package. That was applied to 5 percent of the total budget.

Military was exempt from those reductions; entitlements were exempt from that. At the same time in that same rescission package the military got an $11 billion increase, offsetting the $14 billion that we reduced in the total budget.

The reconciliation resolution came along next, and on the reconciliation resolution another $20 billion was reduced on that 5 percent base of the total budget.

Then the September request came in, the new budget estimate by the President, in which he asked for another $10.4 billion reduction in the appropriated accounts. This time he said he would accept, for the first time, a $2 billion reduction in the military, and asked for a reduction of $8.4 billion of the remaining total of the $10.4 billion part of the package in the nondefense items, which constitute this 5 percent base.

Let me say to the Senator that the Appropriations Committee reduced these nondefense measures or programs by about $6 billion. But the Appropriations Committee, rather than reducing the military budget by $2 billion, increased it by $8 billion over the President's request.

That is a very brief thumbnail sketch of where we have come and where we are today. So when we talk about further reductions in Government spending, let us bear in mind what we are talking about. We are not talking about reductions in military spending. That has been exempt, and that has been increased. That has been one of the greatest growth factors in this whole fiscal picture.

Second, we are not talking about uncontrollables, which constitute 78 percent of the budget, that is, revenue sharing, guaranteed student loans, social security, pension programs, veterans programs, et cetera, et cetera, 78 percent.

I would say to the Senator from Virginia further—as he is well known as the fiscal watchdog, and these are repetitive and redundant figures, well known to him—that until we really address the issue of uncontrollables, and until we develop a blueprint of what kind of a military organization we are really trying to build, instead of just throwing money at it and saying that dollars are equated to security, which is a fallacious thing to believe in, whether it is on a social program, a military program, or any other program—dollars are a means to an end, they are not an end in themselves—but the point is that until we address those two factors, we are not really going to get control of Federal spending or of the Federal budget, and the money market is not going to perceive that we have control over our debt and all factors, and the interest rates are not really going to significantly drop until they perceive us as having control of the fiscal house that we are supposed to be in charge of.

And I think the Senator would agree that we have a long way to go. That does not mean we should not continue to try to reduce and save and demand cost-effectiveness in all nonmilitary appropriated accounts. But I am saying to the Senator that is precisely what the Appropriations Committee has been doing.

We have been bearing the full brunt of this whole effort to bring control to the fiscal household. If we could have gotten some support, major support, out of entitlement programs not under our jurisdiction, and if we could get some kind of restraint and some kind of restriction on the voracious appetite of the military machine, until we can do those two things, let us not kid the public that we are really doing anything to control—fully control—our fiscal problems. We are not. We are letting it control us.

I have, for one, supported the increase in military pay. I supported the increase in infrastructure for the military, operation and maintenance, spare parts, conventional weaponry and reserve programs. Those readiness programs are where we are really weak, in many instances. But we are so mesmerized, so fascinated by exotic weapons programs that have 50- and 60-percent, 400-percent overruns in 1 year, that we just go on and plow money after money after money in, because we are so fascinated by this kind of fictional activity. But that is another issue.

I only wanted to point out where the budget was, where the cuts have been made, and where the cuts will ultimately have to be made if we are really going to gain control.

Mr. HARRY F. BYRD, JR. May I say that I agree with a great deal that the able Senator from Oregon has stated.

I have said in speech after speech throughout Virginia, and I have said it on the floor of the Senate, that the Defense Department cannot and should not be exempt from having its expenditures as carefully scrutinized as any other department of Government. I think it is very important that there not be a blank check given to the Pentagon. It must not be given to any department of Government, including the Pentagon.

I happen to be a strong advocate of a strong national defense. I think it is vital to the preservation of our Nation that we do have a strong defense. But, as the Senator from Oregon pointed out, merely throwing money at the problem does not, in itself, get us a strong defense. So I agree with a great deal of what the Senator from Oregon had to say, but it is important to remember that the big increase in the cost of Government in recent years has been in the domestic social programs.

The problem we are facing on this resolution is that President Reagan has indicated that unless there are reductions in the total figures that he probably will veto the bill. Now the purpose of this amendment is just one effort to bring about an adequate reduction in spending—and to do it in what appears to me to be a reasonable way. This would forestall the need for a veto and at the same time preserve the prerogatives of the Congress itself.

Mr. HATFIELD. Will the Senator yield at that point?

Mr. HARRY F. BYRD, JR. Yes.

Mr. HATFIELD. I would like to urge the Senator to consider what the parliamentary situation is that we find ourselves in. And that is we have adopted the committee amendments en bloc with one exception, and, therefore, any amendments that are offered on the floor we have to have the approval of the managers in order to entertain that amendment because it is being blocked, in effect, by that one exception of the committee amendment.

If the Senator from Virginia should offer his amendment at this time, then that would require unanimous consent to set it aside and receive other amendments, in addition to the managers having to set aside the committee amendment in order to receive other amendments. It does really somewhat complicate the parliamentary procedure here on the floor.

I wonder if the Senator would withhold offering his amendment at this time, without any prejudice and with the full support of the managers of the bill to make time available at any moment the Senator can be worked into the procedures here, instead of offering it now and then requiring the unanimous consent to lay it aside to take up another amendment and to have to get the managers' consent to take up another amendment.

I think the Senator understands the parliamentary obstacle course we are developing here if we lay down another amendment at this time and have to set it aside by unanimous consent.

Senator STEVENS is to follow the Senator from Virginia with an amendment on which I think there is a time agreement. I wonder if in that way the Senator would be willing to withhold the laying down of his amendment at this time.

Mr. HARRY F. BYRD, JR. Any way that the Senator from Virginia can cooperate with my distinguished and able friend from Oregon and my distinguished and able friend from Wisconsin I certainly want to do it. I will withhold the formal presentation of the amendment for the time being.

As I say, it may well be that another amendment or other amendments may accomplish the purpose of the Senator from Virginia. If that is the case, the Senator from Virginia has no pride of authorship. All I want to do is to do whatever one Senator can do in an effort to bring about a reduction in the total figure of this bill. So I will not at this time present the amendment.

Mr. HATFIELD. I thank the Senator. He has my full assurance of cooperation in getting his amendment up at a time later during the day.

Mr. President, there was an expectation that the assistant majority leader, Mr. STEVENS, would be arriving to offer his amendment. I, therefore, suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

DISTRICT OF COLUMBIA APPROPRIATIONS, 1982—CONFERENCE REPORT

Mr. D'AMATO. Mr. President, I submit a report of the committee of conference on H.R. 4522 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4522) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 12, 1981.)

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, I ask unanimous consent to lay aside the pending business in order to take up a conference report on District of Columbia appropriations.

The PRESIDING OFFICER. A conference report is privileged.

Is there objection? Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, the conference report now before us contains a total of $557.2 million in Federal funds, for the operation of the District of Columbia during fiscal year 1982. This is the same as the Senate-passed version and $36.6 million more than the House allowance. This is accounted for by an additional budget request of this amount that was transmitted following House action. As explained at the time of Senate consideration, this bill is $13 million below the President's request.

Mr. President, turning to the District of Columbia funds portion of this bill, the conferees have agreed to the appropriation of $1.9 billion. This includes all local revenues in addition to the above Federal appropriation. The entire conference report and statement of the managers appears in the CONGRESSIONAL RECORD of November 12, 1981 at pages 27246 to 27249. Thus, I shall not ask that it be reprinted here but will summarize its key provisions for my colleagues.

For the Metropolitan Police Department, we are providing for a total police force of 3,880 which is 259 more than they now have on board. This will assist in the recently implemeted program to reduce crime in the Nation's Capital.

For the Commission on the Arts and Humanities, the conferees have included $87,500 cut by the House in their grant-in-aid programs. While their budget from city funds shows an increase, this is the result anticipated reductions in funds from other sources. The city is attempting to pick up some of the more important programs of the Commission, this will allow them to do this.

For the Lottery and Charitable Games Control Board, the conferees included the $628,000 for the operation of the Board. The Board will be responsible for instituting a lottery pursuant to D.C. Law 3–172 as well as regulating charitable games in the District. The conferees included Senate language which insured that no Federal funds would be used for this purpose and established a special enterprise fund to make sure that these funds are kept separate and accounted for separately from other revenues and expenditures. At the request of the House, we also have included some restrictions on advertising in the Federal enclave, on public transportation, and historic areas of the city. We have also provided for an annual audit of the Board's activities and will have to approve their administrative budget each year.

This is not, as I explained during Senate consideration, an endorsement of lotteries. This simply allows city officials to carry through on the preference of 64 percent of the voters in a referendum a year ago. This does not mean that the District will have for-profit bingo parlors or professionally operated raffles, but rather will allow churches, hospitals, and other such organizations to use these mechanisms to raise funds to further their charitable goals.

Mr. President, under the Department of Human Services, the conferees have provided $104,000 above the budget for the District's runaway and homeless youth program. This will insure the continuation of this program, which assists 300 families annually.

The conference agreement included an amendment, No. 42, which would have allowed the Mayor to recommend a pay increase for the City Administrator. On this amendment, the House earlier today voted 210 to 186 to further insist on its position, in other words no pay raise for the City Administrator. At least two other cities have actively recruited him. However, because of the other critical matters contained in this bill, I shall move at the appropriate time that the Senate recede from amendment No. 42 and send this bill to the President.

I hope that this key member of the city government will not be lured away by offers of additional money at this critical juncture in the city's financial development.

The conferees also have approved a change in the submission date of the fiscal year 1983 city budget to Congress. We have approved the date of April 15, 1982, as provided by the Senate, rather than the February 1 date the House had in- [illegible] later date is being tried on a 1-year trial basis in order to allow more time for the collection of more accurate expense and revenue data.

Mr. President, this is a historic conference report. For the first time in the history of the District of Columbia, they will have the fully authorized Federal payment available to them for the major portion of the fiscal year. Because of the financial vulnerability of this and all other cities, this should give city administrators the tools to manage the city's resources so as to insure that a balanced budget is once again attained. This is fully supportive of the President's efforts to create a climate in which the city no longer must look to the Federal Treasury for needed borrowing. The mayor agrees and has made provisions in this budget to reduce the accumulated deficit by $10 million. So, Mr. President, we are making progress and this conference report is another step in that direction.

Mr. President, before yielding, I want to make note of the fine spirit of cooperation and compromise that characterized the conference on this bill. Congressman DIXON, the chairman of the House Committee, and Congressman COUGHLIN, the ranking Republican member, were most helpful and agreeable in our negotiations. In addition, their staff, Migo Miconi, Mary Porter, and Kenny Kraft conducted themselves in a professional and knowledgeable manner, as usual. I also want to express my sincere appreciation to the Senator from Vermont for his help and support throughout our consideration of this bill. Also the Senate staff, Tim Leeth, Lula Joyce, and Jim Cubie have assisted us most ably and deserve our appreciation.

Mr. President, I am prepared to yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, unfortunately, the Senator from Vermont (Mr. LEAHY) who is the ranking minority member on the subcommittee, is ill, as we all know, and cannot be here.

I congratulate the Senator from New York, the chairman of the District of Columbia Appropriations Subcommittee, for the excellent job that he has done in gaining passage of this appropriations bill this year.

In this year, when budget matters have involved such great controversy, it has taken great effort and foresight to gain passage of this legislation.

The Senator has consistently operated the subcommittee in a nonpartisan fashion that recognizes both our responsibility to see that the Federal payment is lawfully and wisely used and to respect the decision of the Congress to grant the District home rule.

Also, Mr. President, the bill is $13 million below the President's request, which, of course, is very good news. The total Federal payment is $336 million.

The District will be sustaining major decreases in other Federal funds as a result of cuts to all Federal funds that provide something to the States. These cuts probably reach $46 million in fiscal year 1982.

Mr. President, I also recognize the fine work of Tim Leeth and Jim Cubie and the assistance of Mrs. Lula Joyce and Mr. Jayne McMullan. Without the work of these fine staff members, the appropriation today would not be before the Senate.

I am happy to support the appropriation for fiscal year 1982 for the District of Columbia.

Mr. D'AMATO. Mr. President, before I move adoption of the conference report, I should like to give my own personal thanks not only to the staff, who has done an outstanding job in a bipartisan manner, but, indeed, for the help the chairman of the Appropriations Committee (Mr. HATFIELD) has given me with many of the problems that may not be tied directly to appropriations matters, but concern policy matters. They were resolved in a way that I think brings great credit to this body. Hopefully, they will make it possible for the city to put itself on a sound financial business basis.

(By request of Mr. CRANSTON the following statement was ordered to be printed in the RECORD:)

● Mr. LEAHY. Mr. President, I would like to point out that both the House and Senate reports on H.R. 4522 contain language which restates the intent of Congress that the D.C. Convention Center not be used for entertainment purposes. I regret that I was unable to participate in the conference committee deliberations by reason of illness. Had I participated I would have proposed that this conference report before us today contain a similar prohibition against entertainment uses of the D.C. Convention Center.

I would especially like to congratulate the gentleman from New York for the excellent job that he has done in his first year as chairman of this subcommittee. He has demonstrated both outstanding legislative skill and statesmanship in gaining passage of this Appropriations Committee this year.

He has conducted each hearing markup and conference in a nonpartisan fashion that characterizes the best of the tradition of the Appropriations Committee.

I support passage of the District of Columbia appropriations bill.●

Mr. HATFIELD. Will the Senator yield?

Mr. D'AMATO. I certainly will yield, Mr. President.

Mr. HATFIELD. Mr. President, I want to add my words of commendation to the words that have already been stated relating to the outstanding performance of the Senator from New York (Mr. D'AMATO). I suppose any first-term Senator, especially as he is assigned to the Appropriations Committee, if he were to have his choice on a ranking of the various 13 subcommittees, would not necessarily have picked the D.C. Committee as first choice.

That seems to be a historic tradition of the committee. But the Senator from New York not only accepted that assignment; he undertook it with great vigor and brought a great background and perception and understanding of urban life, urban problems, from his own constituency base, New York. He has applied that with fairness, with great judgment.

Mr. President, I have had good reports from everyone in the D.C. Government with whom I have a long association—Mayor Barry, members of the D.C. Council, leaders of the community—who, without exception, have commented about the excellent working relationship they have with the Senator from New York, the chairman of the Subcommittee on the District of Columbia. I commend him, Mr. President, not only for the work he has done on this bill but the general work he has done on the full committee. I thank him for his leadership.

Mr. D'AMATO. Mr. President, I thank the distinguished chairman of the Committee on Appropriations for those remarks. Again, I state that without his sensitivity and wise counsel, very little of this could have been achieved. So it really has been a total effort.

Mr. President, I move adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. D'AMATO. I move to reconsider the vote by which the conference report was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 7 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: not to exceed $1,035,600

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 11 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

: *Provided further*, That the District of Columbia will establish a special fund to assure that any moneys available to the Lottery and Charitable Games Control Board shall be derived from non-Federal District of Columbia revenues.

LOTTERY AND CHARITABLE GAMES ENTERPRISE FUND

For establishment of the Lottery and Charitable Games Enterprise Fund for the purpose of implementing D.C. Law 3–172 and for the budgeting and accounting of all revenues and expenses of the Lottery and Charitable Games Control Board, $628,000, to be derived from non-Federal District of Columbia revenues: *Provided*, That the District of Columbia will identify the source of funding for this appropriation from its own locally generated revenues when the Enterprise Fund is established and that no revenues from Federal sources shall be used to support the operations of the Lottery and Charitable Games Control Board: *Provided further*, That the level of administrative expenses to be incurred by the Board shall be appropriated in the District's General Fund budget as a transfer from locally generated revenues; administrative expenses being defined as all anticipated expenses of the Board for the coming fiscal year excluding moneys necessary for the payment of prizes to the winners of the games specified in D.C. Law 3–172: *Provided further*, That the Board shall have the authority to expend, from revenues generated by its operations, funds necessary for the payments of prizes: *Provided further*, That the annual expenses for prizes and administration of the Board shall not exceed resources available to the Board from appropriated authority or revenues generated by the operations of the Board: *Provided further*, That all revenues received by the Board in excess of the funds used by the Board for prize money in a given month shall be transferred to the General Fund from the Lottery and Charitable Games Enterprise Fund through a general operating transfer, promptly after the first of the month for the preceding month: *Provided further*, That the Board may establish a reserve not to exceed 2 percent of projected annual prize payments to provide for prizes awarded in any month which may exceed the revenue generated during that month: *Provided further*, That the Mayor may approve a change in the reserve limit, as necessary, upon the request of the Board: *Provided further*, That the financial operations of the Board with respect to the amount appropriated for administrative expenses shall be in accordance with all laws, regulations and policies of the District of Columbia government regarding appropriated funds: *Provided further*, That for the fiscal year ending September 30, 1982 and for each fiscal year thereafter, the District of Columbia Auditor shall conduct a comprehensive audit on the financial status of the Fund, including but not limited to all appropriations, revenues and transfers to the Fund, and provide such report to the Mayor, Chairman of the District of Columbia Council, and to the Subcommittees on District of Columbia Appropriations of the House of Representatives and the Senate: *Provided further*, That in addition to current restrictions, advertising on public transportation and at stations and stops is prohibited: *Provided further*, That the advertising, sale, operation, or playing of the lotteries, raffles, bingos, or other games authorized by D.C. Law 3–172 is prohibited on the Federal enclave, and in adjacent public buildings and land controlled by the Shipstead-Luce Act as amended by 53 Stat. 1144, as well as in the Old Georgetown Historic District: *Provided further*, That the Board shall make an annual report to the Subcommittees on District of Columbia Appropriations of the House of Representatives and the Senate at the end of each year detailing the receipts and disbursements of the Board and summarizing measures of regulation and enforcement enacted as well as other information and recommendations deemed of value or which may be requested.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 12 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $366,396,200

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 22 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $36,279,100

Resolved, That the House insist on its disagreement to the amendment of the Senate numbered 42 to the aforesaid bill.

Mr. D'AMATO. I ask unanimous consent that the amendments in disagreement be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the Senate concur in the House amendments numbered 7, 11, 12, and 22, and recede from amendment No. 42.

The PRESIDING OFFICER. Without objection, the Senate will concur in House amendments to Senate amendments numbered 7, 11, 12, and 22 and will recede from its amendment No. 42.

Mr. D'AMATO. Mr. President, I move to reconsider the vote by which the amendments in disagreement were agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. D'AMATO. Mr. President, I yield the floor.

SECOND CONTINUING APPROPRIATIONS, 1982

Mr. HATFIELD. Madam President, what is the pending business?

The PRESIDING OFFICER. The clerk will state the pending business.

The legislative clerk read as follows:

A House joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year 1982, and for other purposes.

The Senate continued with the consideration of the House joint resolution.

Mr. HATFIELD. Madam President, I yield to the Senator from Missouri for the purpose of presenting an amendment and on behalf of the minority manager and myself, I ask unanimous consent that we set aside the pending amendment for that opportunity.

The PRESIDING OFFICER (Mrs. HAWKINS). Without objection, it is so ordered. The Senator from Missouri is recognized.

UP AMENDMENT NO. 662

(Purpose: To provide $98,560,000 for training, job search, and relocation allowances under the Trade Act of 1974)

Mr. DANFORTH. Madam President, I thank the Senator from Oregon. On behalf of myself and Senators MOYNIHAN, ROTH, BRADLEY, EAGLETON, HEINZ, MITCHELL, and SPECTER, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself, Mr. MOYNIHAN, Mr. ROTH, Mr. BRADLEY, Mr. EAGLETON, Mr. HEINZ, Mr. MITCHELL, Mr. SPECTER, Mr. BENTSEN, and Mr. RIEGLE, proposes an unprinted amendment numbered 662.

Mr. DANFORTH. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of section 101(a) add the following new paragraph:

(6) Notwithstanding any other provision of this joint resolution, in addition to any sums otherwise appropriated there is appropriated an additional sum of $98,560,000 which shall be made available for training, job search allowances, and relocation allowances, under sections 236, 237, and 238 of the Trade Act of 1974.

Mr. DANFORTH. Madam President, I rise today to offer an amendment that would insure $98.6 million in funds requested by the administration is available for job training under the trade adjustment assistance (TAA) program.

During consideration of the Omnibus Reconciliation Act of 1981, the Finance Committee considered at great length the administration's proposals to alter significantly the trade adjustment assistance program.

The stated intent of the administration in proposing these changes was to shift the program's traditional emphasis on cash benefits for workers displaced by imports toward a much stronger emphasis on retraining and relocation.

This was to be accomplished by reducing the class of workers eligible for any benefits—cash or training—by tightening eligibility criteria and then spending $112 million on retraining these workers.

As a result of the changes made by the Congress in the Budget Reconciliation Act, the total cost of the TAA program for fiscal year 1982 was expected to fall from the original projection of $1.5 billion to slightly over $300 million, including an expanded training program.

The administration's September budget request for the Employment and Training Administration in the Department of Labor specifically included the $112 million—adjusted to $98.6 million to reflect an added 12 percent cut—for additional training, job search, and relocation assistance for TAA recipients.

Unfortunately, the request arrived after the Labor Subcommittee had marked up the appropriation and was never considered by the committee. In fact, the committee's final appropriation level for employment and training assistance (ETA) for the Department of Labor falls $123 million under that requested by the administration in September.

Now we are faced with a situation where authorization exists for additional training, but the funds are not included in the continuing resolution.

We are not asking for money for a new program. The training apparatus has existed and been improved upon for almost 20 years.

Some 2,500 local job services offices, many already connected with State unemployment insurance (UI) offices will assist certified TAA recipients to obtain training in vocational education classes, private vocational schools, on-the-job training or other programs.

In the past, funding for training TAA recipients has been taken out of the CETA title III account. However, the $7 to $15 million used for this purpose has always been far too little to accommodate the thousands of training requests. So, many have had to be turned away.

Now, as we seek to change fundamentally the character of the TAA program, we need to insure the money is appropriated for this purpose.

I have with me a copy of a letter from Labor Secretary Donovan to Senator HATFIELD, chairman of the Appropriations Committee, urging the appropriation of the $98.6 million which I ask unanimous consent to have printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF LABOR,
Washington, D.C., November 16, 1981.

Hon. MARK HATFIELD,
Chairman, Senate Appropriations Committee, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing to you to express my concern about funding for training, job search, and relocation assistance for Trade Adjustment Assistance (TAA) beneficiaries in Fiscal Year 1982.

In the Administration's original March budget for Fiscal Year 1982, no funds were specifically requested for these trade activities, since these activities had previously been funded by title III of the Comprehensive Employment and Training Act. However, the Omnibus Budget Reconciliation Act of 1981 provided a specific authorization for trade training and related activities and therefore necessitates the specific funding of these trade activities within our appropriations.

In the President's September budget amendments, which reflected an across-the-board 12 percent reduction in most Department of Labor accounts, there was included an amount of $112 million in the Employment and Training Assistance account for training, job search and relocation for trade adjustment assistance recipients. With the 12 percent reduction, this amount is reduced to $98.6 million.

In the Full Committee mark-up of H.R. 4560, the Labor appropriation bill, no provision was made for the added $98.6 million requested by the President for these trade activities. Moreover, the total for the Employment and Training Assistance account is over $100 million less than the President's request.

It is important that the Department have resources to provide training, job search and relocation assistance to those persons displaced from employment due to the impact of trade. Without specific appropriations, we are not able to provide this assistance. On behalf of the Administration I am therefore requesting that language be provided in floor action on either the Department of Labor title of H.R. 4560, or other appropriating legislation, increasing the Employment and Training Assistance appropriation by $98.6 million and earmarking this amount for activities under the Trade Act.

I have enclosed draft language which I believe would achieve the desired results. I am requesting that you facilitate the introduction of the suggested language. However, we would have to oppose such an amendment unless offsetting reductions are made elsewhere in H.R. 4560, or such other appropriating legislation, that do not reduce any item below the amount requested by the President.

Sincerely,

RAYMOND J. DONOVAN.

Enclosure.

EMPLOYMENT AND TRAINING ASSISTANCE

For expenses necessary to carry into effect the Comprehensive Employment and Training Act, as amended, sections 236, 237, and 238 of the Trade Act of 1974, as amended (19 U.S.C. 2101), section 51 of the Internal Revenue Code of 1954, as amended (26 U.S.C. 51), sections 210, 211, and 212 of Public Law 95-250, and the Veterans' Employment and

Readjustment Act of 1972, as amended (38 U.S.C. 2003A), including the purchase and hire of passenger motor vehicles, the construction, alteration, and repair of buildings and other facilities, and the purchase of real property for training centers as authorized by the Comprehensive Employment and Training Act, as amended, $3,212,728,000 plus reimbursements, including $2,001,000 for the National Commission for Employment Policy and $98,560,000 for activities authorized by sections 236, 237, and 238 of the Trade Act of 1974, as amended: *Provided*, That no funds from any other appropriation shall be used to provide meal services at or for Job Corps centers: *Provided further*, That an amount not to exceed $41,318,000 shall be made available for Native American Employment and Training Programs authorized by section 302 of the Comprehensive Employment and Training Act, as amended, from amounts provided under Public Law 96-369, as amended, obligated under sections 233 (c) and (d) of the Comprehensive Employment and Training Act, as amended and remaining unexpended.

Mr. DANFORTH. Madam President, this is indeed a moderate request, Yet, it offers an opportunity to thousands of workers in the form of job training, job search and relocation. The Department of Labor estimates that with the $98.6 million 21,446 workers could be trained, 2,400 workers could be relocated, and 16,666 workers could benefit from job search assistance.

Do not think for a moment that the demand is not there. In fiscal year 1981, an estimated 18,000 TAA recipients received training. Of these, 16,000 had to pay for the training on their own.

Madam President, the TAA program already has undergone an 80-percent funding cut. The remaining funds should be used in the most efficient way possible—to retrain and relocate workers displaced by imports.

Trained workers are needed to increase the productivity and competitiveness of our industries.

If indeed we want to take people who are permanently displaced and get them permanently adjusted, providing these training funds is the best chance we have.

Madam President, in a nutshell, here is the situation we have with this amendment:

The trade adjustment assistance program traditionally has been geared to providing transfer payments of its entitlement program, geared to provide payments to workers who had been laid off because of foreign imports. Under the existing state of the law—at least, the laws that existed prior to the reconciliation bill—that program was going to spend an estimated $1.5 billion in fiscal year 1982.

The administration made the decision that the program was getting out of hand and that it had to be recast substantially. The administration decided to turn trade adjustment assistance from what primarily had been a cash payment entitlement program for workers who were laid off to a much greater emphasis on retraining.

The projected change in the total cost of the trade adjustment assistance to be accomplished by the administration's proposed changes was a reduction from the $1.5 billion which had been estimated to about $300 million; and of that $300 million, a little more than one-third was to be used for retraining. That was the situation that the Finance Committee understood to exist at the time we dealt with the reconciliation package, and it was the situation that was understood by the President when he submitted his budget.

Now we find that in the measure that is before us, in the reconciliation bill, the amount for retraining is not there. Therefore, the effect of not having it there is that not only do we not stay on target in reducing to 20 percent of the original program, the trade adjustment assistance program, but also, in essence, we gut the whole thrust of the administration's program. So what is at stake is the program of the administration in trade adjustment assistance.

Madam President, the last thing I want to do is to stand in the Senate today and ask for more money in this resolution, but here is a case of gutting the administration's own program, which, in essence, was a money-saving program.

Mr. SCHMITT. Madam President, the Subcommittee on Labor, Health, Human Services, and Education and the full Committee on Appropriations did not ignore the problem brought to us by this amendment of the Senator from Missouri.

In fact, we were acutely aware in our initial deliberations of the fact that the administration had not requested at that point moneys under the Reconciliation Act provisions to which the Senator has referred.

Even now, even though the President's September request included this $98.56 million for retraining, we do not have before us any justifications and specifically any program details on how it is going to be administered and how these funds would be utilized.

In the absence of specific hearings on this subject that would deal with those types of plans and procedures, the committee would have, in effect, been writing a blank check to the Labor Department and almost certainly acquiescing to significant duplication and overlap by that department in their training programs.

Several other Senators with other programs have made entreaties to the committee and to me personally and the ranking minority member, Senator PROXMIRE, to fund programs that have been authorized under reconciliation, for which it has been impossible to schedule hearings in the rush of events in the last few weeks and months. It has been impossible to schedule hearings to find out the details of how these programs would operate, which is the normal procedure of the Appropriations Committee and its subcommittees.

So it was the conclusion of the Appropriations Committee that the recommendation of the subcommittee was a good one and that we should proceed to have hearings at the earliest possible time but that we should not fund this program until such hearings had been conducted.

We all know the reconciliation process moved very, very rapidly without an extensive hearing record of its own, and we think that for those programs substantially altered in size or scope under reconciliation, the Appropriations Committee does have an obligation to Congress, and to the Senate specifically, to conduct a thorough examination through formal hearings.

As a matter of fact, we do not have information from the Labor Department on where the program will be administered, whether it be through State employment service offices or by CETA prime sponsors, or out of some mechanism derived from the Secretary's discretionary fund.

Madam President, the committee, though, was not completely blind to the potential needs for retraining of workers dislocated by adverse trade situations that have developed between us and our "allies."

In fact, the committee report in the Labor-HHS bill, which is referenced by this continuing resolution, authorizes the use of part of the $47 million in the Secretary's discretionary funds for trade retraining activities.

No amount was earmarked and so it is up to the discretion of the Secretary to move forward with this program, and if he feels as strongly as his letter to the chairman of the Appropriations Committee (Mr. HATFIELD), indicates then I suspect that he would want to do that. In addition, the Senate regular bill provides $1.2 billion which will be the operative amount under the continuing resolution, since the House amount is somewhat higher for retraining activities under title II, A, B, C of CETA.

I do not want to mislead my colleagues that this is entirely a substitute for what the Senator from Missouri is asking for, because this title of CETA deals with disadvantaged workers. But I think what should be our immediate concerns are those dislocated workers who in fact are disadvantaged.

The reason I say that is in reference to a report, the seventh annual report by the National Commission for Employment Policy, entitled the Federal Interest in Employment and Training, where they make the following conclusions:

The data presented in this paper fail to provide strong support for any such action.

And that is action for the use of Federal employment and training resources relative to disadvantaged workers.

Among the key findings contributing to this conclusion are the following:

Defining economic dislocation as we have, the overall magnitude of the dislocated worker population is not strikingly large. This finding holds whether we look at the number of dislocated workers, that number as a proportion of the labor force, or that number as a proportion of the unemployed.

The category of dislocated worker itself is at best a weak predictor that an unemployed person will suffer long periods of unemployment, special difficulties becoming reemployed, or extreme economic hardship while unemployed. Alternative targeting criteria such as workers from low-income families or workers experiencing unemployment of long duration identify such persons much more effectively.

To the extent that dislocated workers do experience unusually long periods of unemployment, the causes of this long duration

generally reflect past and present affluence rather than past or present distress. These "disabilities of affluence" include geographical immobility arising from homeownership; financial incentives to wait inordinate periods for possible recalls from layoffs, created by high wages and generous fringe benefits enjoyed on their previous jobs; and lack of financial pressure to seek immediate employment, because of generous coverage by wage replacement programs and the presence of other earners in the family.

Madam President, this October 1981 report concludes with the following paragraph:

Such activities—ad hoc, short-term interventions in local "crisis" situations and longer term regional economic development initiatives—may be appropriate responses to the problems of workers dislocated by economic change. Creation of a major ongoing Federal program of employment and training targeted on dislocated workers, or substantial retargeting of existing Federal activities toward this group, does not seem an appropriate response to the nature and magnitude of the problem described in this paper.

Madam President, I ask unanimous consent to have printed in the RECORD this entire section of this report to which I am referring.

There being no objection, the section of the report was ordered to be printed in the RECORD, as follows:

[From the Seventh Annual Report: The Federal Interest in Employment and Training]

IMPLICATIONS FOR THE USE OF FEDERAL EMPLOYMENT AND TRAINING RESOURCES

Should workers dislocated by economic change become a new, high-priority target group for Federal employment and training programs? Are their needs sufficiently urgent, and the potential returns to that investment sufficiently high, to justify serving their needs at the expense of disadvantaged workers who currently are the main focus of such activity?

The data presented in this paper fail to provide strong support for any such action. Among the key findings contributing to this conclusion are the following:

Defining economic dislocation as we have, the overall magnitude of the dislocated worker population is not strikingly large. This finding holds whether we look at the number of dislocated workers, that number as a proportion of the labor force, or that number as a proportion of the unemployed.

The category of dislocated worker itself is at best a weak predictor that an unemployed person will suffer long periods of unemployment, special difficulties becoming reemployed, or extreme economic hardship while unemployed. Alternative targeting criteria such as workers from low-income families or workers experiencing unemployment of long duration identify such persons much more effectively.

To the extent that dislocated workers do experience unusually long periods of unemployment, the causes of this long duration generally reflect past and present affluence rather than past or present distress. These "disabilities of affluence" include geographical immobility arising from homeownership; financial incentives to wait inordinate periods for possible recalls from layoffs, created by high wages and generous fringe benefits enjoyed on their previous jobs; and lack of financial pressure to seek immediate employment, because of generous coverage by wage replacement programs and the presence of other earners in the family.

Although the magnitude of the dislocated worker population is not large relative to the entire U.S. labor force, it is large in relation to the population served in current Federal adult employment and training programs. For example, in fiscal year 1979, 1,183,000 persons were served under titles II (B) and II(C) of the Comprehensive Employment and Training Act (CETA), one of the main existing vehicles for combatting adult structural unemployment.[20] The estimates of the dislocated worker population presented earlier in this report ranged from 90,000 to 890,000. Thus, these estimates range from 8 percent to 75 percent of the population served by CETA parts II(B) and II(C).[21] If such programs, currently reserved primarily for disadvantaged workers, were opened to dislocated workers, the extent of displacement of resources from disadvantaged workers might well be substantial.

Such negative conclusions, however, leave unaddressed three dislocated-worker problems which our empirical data suggested were possibly serious enough to require a Federal response:

Economic dislocation defined in terms of regional economic decline;

The uniquely massive unemployment problems of the motor vehicle manufacturing industry; and

The high levels of unemployment in a local area immediately following a mass layoff.

With respect to the first of these problems, the reemployment difficulties of workers arise largely from their geographical immobility in combination with lack of local demand for workers of any type. Such problems generally are not addressed effectively by employment and training initiatives; rather, they typically require locationally focused economic development efforts. Such programs have been undertaken in the past by such Federal agencies as the Economic Development Administration and the U.S. Department of Housing and Urban Development.

As for the second problem, the uniqueness of the automobile industry situation may suggest an ad hoc approach. A special initiative for this industry alone could be established either by explicit congressional action or by executive branch action to mobilize various discretionary funds.

Alternatively, a Federal system could be created to, in effect, institutionalize ad hoc aid. This system could be applied first to the automobile industry but then be available when such large-scale problems arise in the future and when they recur in local areas in the wake of mass layoffs. Such a system might involve intensive employment placement and retraining efforts for a limited period of time (e.g., 6 months) to supplement ongoing services (CETA prime sponsors, the Employment Service, and others). The Canadian Government's Manpower Consultative Service is a model of such a system in operation and merits examination for its applicability to the American situation.[22]

Such activities—ad hoc, short-term interventions in local "crisis" situations and longer term regional economic development initiatives—may be appropriate responses to the problems of workers dislocated by economic change. Creation of a major ongoing Federal program of employment and training targeted on dislocated workers, or substantial retargeting of existing Federal activities toward this group, does not seem an appropriate response to the nature and magnitude of the problem described in this paper.

[20] This figure encompasses classroom training (549,425 individuals), on-the-job training (156,787 individuals), and work experience (391,243 individuals). Public service employment is excluded. See *Employment and Training Report of the President* (Washington, D.C.: U.S. Government Printing Office, 1980), p. 351.

[21] Of course, many of the dislocated workers would probably not elect to participate in an employment and training program, particularly if participation were not required to receive wage replacement payments such as Unemployment Insurance.

[22] The Canadian system is described in *Workers' Adjustment to Plant Shutdowns and Mass Layoffs: An Analysis of Program Experience and Policy Options* (Washington, D.C.: ICF, Inc., forthcoming), especially chapter 4.

Mr. DANFORTH. Madam President, could I just ask the Senator to yield for a point of clarification?

Mr. SCHMITT. I am happy to yield to my friend from Missouri.

Mr. DANFORTH. It is my understanding that the Senator from New Mexico takes the position that this is an untested new program. I simply point out that that is not in fact the case. This is additional money for an established program, the established program being the Employment and Training Administration of the Department of Labor. It is new with respect to an alternative to the existing entitlement program under trade adjustment assistance. But it is the utilization of an existing and time-honored program in the Department of Labor to actually provide training.

Furthermore, the total appropriation for the employment and training assistance program in the Department of Labor is some $123 million under the amount that was requested by the Administration in September. So, in fact, there is no other pocket in this program which is available to provide for trade adjustment assistance training.

Mr. MOYNIHAN addressed the Chair.

Mr. SCHMITT. Madam President, if the Senator will yield so I can complete my response to that question, and the Senator from New Mexico does have the floor at this point, the Senator from Missouri may be correct. We have had no indication from the Secretary that that, in fact, is what he plans to do relative to this specific initiative that they are asking for.

I realize, like every other program in this budget that we are all very interested in, the discretionary programs, there are funds less than what individuals and groups, in fact the whole Senate, would desire to have.

I would remind him that the regular Labor-HHS money bill, the bill to which this resolution is referenced, is estimated by the Office of Management and Budget as being $3.2 billion over the September request of the President in budget authority, and $2.6 billion over in outlays.

So even though the administration may have requested this increase, they requested it in the face of a letter that I have right here from Mr. Stockman that says, "We are in trouble with respect to the total amounts in this bill."

Now, Madam President, I will conclude finally by saying that the House regular bill did not include the President's request for the $98.56 million. In fact, a House floor amendment to add $20 million, only $20 million, for trade retraining activities was defeated.

So the difficulties of retaining the amount asked for by the Senator from

Missouri in conference should be obvious, on top of our already untenable position with respect to the total budget proposals contained in the committee bill.

With that I would be happy to yield——

Mr. PROXMIRE. Madam President, will the Senator yield briefly to me?

Mr. SCHMITT (continuing). To the Senator from Wisconsin then we can yield briefly to the Senator from New York.

Mr. PROXMIRE. I would just like to commend the distinguished Senator from New Mexico. He has one of the most difficult and painful jobs in the Senate. There is nothing harder than to hold down spending on health and human services, education, and he supports all of these things, he really does, and he has made a gallant fight to try to handle this as fairly as he possibly can.

Now he is told by the Office of Management and Budget, as he has just told us, that this is $3.2 billion in budget authority and $2.6 billion in outlays over the administration's position, their request.

I think the case made by the Senator from Missouri, and I sure by the Senator from New York and others, will make a very powerful case for this, and it is very compelling. This is most appealing.

But I suggest that if we do this, we should take the money out of something else—hard to do but something else—in this bill. That is what the Senator from New Mexico has had to do, and do it for weeks now, and he has done a top-flight job. Maybe we cannot win on this. It has some very impressive sponsors and cosponsors. But if we are going to really mean business about holding down the budget, this is the kind of restraint that, it seems to me, we have to have.

Mr. SCHMITT. Madam President, will the Senator yield?

Mr. PROXMIRE. Yes.

Mr. SCHMITT. He brings up a very important point, one which I think broke the hearts of many people last night when, after a very short debate—but where the issues were obviously very clear—we turned down Senator KENNEDY'S amendment for $335 million additional for a program that we know absolutely needs additional assistance, and that is the youth unemployment programs.

We just cannot do it. We just cannot continue to pile money into a bill that is already going to be subject possibly, and I think quite likely, to a Presidential veto, unless we can figure out some way to reduce the growth and cap the growth of the entitlement programs.

But to now look at almost $100 million as an add-on for dislocated workers who have been shown in a study by the Commission with which the Secretary of Labor is associated, to not need retraining at a significantly high level compared to the young people, the unskilled young people, we were talking about last night, seems to me to be the height of folly when added to the total budgetary difficulty we have today.

I appreciate the Senator from Wisconsin bringing up that point.

Mr. MOYNIHAN. Madam President, first of all I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. Madam President, I join my colleague from Missouri in an amendment to correct a truly unfortunate oversight that has been made in this continuing resolution. Although this administration has requested $98.56 million for training, job search, and relocation assistance for workers in the trade adjustment assistance program, no such funds are included in this joint resolution. Our amendment would simply reinstate these moneys.

I think it best to let the administration explain. I have with me a letter from Secretary of Labor Donovan to the chairman of the Senate Appropriations Committee. He writes:

> In the Administration's original March budget for Fiscal Year 1982, no funds were specifically requested for these trade activities, since these activities had previously been funded by title III of the Comprehensive Employment and Training Act. However, the Omnibus Budget Reconciliation Act of 1982 provided a specific authorization for trade training and related activities and therefore necessitates the specific funding of these trade activities within our appropriations.

He continues:

> In the President's September budget amendments, which reflected an across-the-board 12 percent reduction in most Department of Labor accounts, there was included an amount of $112 million in the Employment and Training Assistance account for training, job search and relocation for trade adjustment assistance recipients. With the 12 percent reduction, this amount is reduced to $98.6 million.

Alas, Madam President, the administration's September budget request for these training moneys arrived after the Labor Subcommittee had marked up the appropriation, and therefore was never considered by the committee. Such were similar circumstances facing the House, and as such no money was appropriated by that body as well.

It is no surprise then, that the committee's final appropriation level for employment and training assistance for the Labor Department falls $123 million under the level requested by the administration in September. This body could add the $98.6 million for TAA training requested by the administration without exceeding the level requested by the President in September.

In fact, Secretary Donovan has requested that the continuing resolution be amended to include these funds.

> It is important that the Department have resources to provide training, job search and relocation assistance to those persons displaced from employment due to the impact of trade. Without specific appropriations, we are not able to provide this assistance. On behalf of the Administration I am therefore requesting that language be provided in floor action on either the Department of Labor title of H.R. 4560, or other appropriating legislation, increasing the Employment and Training Assistance appropriation by $98.6 million and earmarking this amount for activities under the Trade Act.

While Secretary Donovan's letter indicates that the administration would want an offsetting budget reduction somewhere else in the continuing resolution, his letter makes clear the administration's commitment to TAA training.

Indeed, retraining workers who lose their jobs because of imports is the very heart of the TAA program. The TAA program does not just compensate these workers, but more importantly invest in assisting this experienced work force to adjust to new competitive conditions. It is simply good economics. It is why this Congress has been committed to the TAA program for over 18 years.

The changes we made in the Budget Reconciliation Act brought the total cost of the TAA program for fiscal year 1982 down from $1.5 billion to slightly over $300 million. While this body knows that I had serious misgivings about some of these changes, I must emphasize that this program has already undergone an 77-percent funding cut. It was the stated intent of the administration and the understanding of members of the Finance Committee when this drastic reduction was made that over one-third of the remaining funds would be spent on retraining workers in the TAA program.

If the $98.56 million requested by the administration for this training assistance is not provided for in this continuing resolution, this Senate would in effect cut the TAA program by 84 percent and, I am devastated to think, undermine the very purpose of the new reforms that we made to the program just a month or two ago.

I remind this body that an understanding was reached with the American labor movement at the time that the Tokyo round of multilateral trade negotiations was considered by the Congress. The understanding was that trade adjustment assistance would be available to ease the shock of shifting economic activities brought about by American national policy to open our domestic markets to free trade.

We have an obligation to those workers and would at least not be breaking that obligation if this amendment can be accepted and adequate funds for training assistance can be provided.

I would like to respond to three points made by my friends from Wisconsin and New Mexico.

First of all, Madam President, we are looking at a 84-percent budget cut for fiscal year 1982. This is not 12½ percent or 4¼ or 15⁹⁄₁₀ths. The request of President Carter was $1.5 billion and it is reduced now to $238 million.

No program in this budget that I know, of this magnitude and consequence, will have been reduced by this exorbitant amount. Decimated is not the word—decimated would be a 10-percent cut. What is the opposite, at the other end of the spectrum from decimated? Destroyed and betrayed. Madam President, this reduction breaks the word of the American Government to the American workers. These men are out of work in

consequence of policy decisions by the American Government to put them out of work through changes in tariffs.

This Congress gave the President the right to make such a policy decision on condition that persons so displaced; first, would have unemployment insurance for a longer period; but second, would be retrained.

Madam President, I assert no larger competence in this field than many of the Members of this body, but I was an Assistant Secretary of Labor in the administration of President Kennedy when the Manpower Development and Training Act of 1962 was adopted, and the training program of the Federal Government, as we know it, began.

They have had widely varied degrees of success, and correspondingly, of failure. They have invariably been most effective when trained workers with an attachment to the work force are retrained. Those are your optimal targets for such programs. That is where your highest, clearest, most immediate benefits come. This is what we are taking out of this budget, the training.

It is one thing to take a person in his fifties, abolish his job because of tariff policy, give him 52 weeks of unemployment insurance, and then what? They do not need unemployment insurance. They will not use it to get a job. Retraining is what this is all about.

I do not speak to the present administration. This President made no such commitment, but the Presidency did.

The Trade Adjustment Act would not have passed the Senate without this commitment. I think the Senator from Missouri would agree.

Mr. DANFORTH. I wonder if the Senator from New York will yield, Madam President?

Mr. MOYNIHAN. I would be happy to yield.

Mr. DANFORTH. The Senator from New York and I are both members of the Committee on Finance, and my recollection of the deliberations in the Committee on Finance with respect to trade adjustment assistance in the reconciliation bill was essentially this: The administration took the position, like we now have a trade adjustment assistance program which is too expensive, it is essentially an entitlement program, that we want to change that. We want to reduce the cost to about 20 percent of the original program, and we want to do that by substituting for most of the entitlement program a retraining program.

Mr. MOYNIHAN. That is correct.

Mr. DANFORTH. And it was the position of the Finance Committee, reluctantly on the part of some of us, that fine, we agree to the substitute. Now we find out that the Appropriations Committee kills the substitute.

Mr. MOYNIHAN. Exactly. And why did we agree? I do not want to speak for others, but I think I can speak for the Senator from Missouri and myself. Retraining is the surest approach to the displacement of import-injured workers from their previous jobs. These are already trained workers. They are employed. They have attachments to the labor force.

I just want to say to the Senator from New Mexico, who is in no way responsible for this, but the American workers, in the form of the trade unions that represent them and that speak in these Halls with the authority of their membership, undertook to accept and support the Trade Agreements Act of 1979, that was the result Tokyo round of multilateral trade negotiations, on the condition that this adjustment assistance would be made available. It was the last moment, I fear, when the American labor movement will be for a trade expansion bill. And they did it because a commitment was made to them. If that commitment is broken, I fear an economic policy that begins with the Smoot-Hawley tariff and the crash of the 1930's and then with Cordell Hull revived. Accordingly, every President from Franklin D. Roosevelt on—Eisenhower, Kennedy, Johnson, Nixon, Ford, and Carter—have pursued this commitment.

Are we going to go break that tradition on the floor of the Senate by breaking our commitment? I hope not. I see the Senator from Delaware, our distinguished colleague from the Finance Committee, has risen. I am happy to yield to him.

Mr. ROTH. I appreciate very much the Senator yielding to me. I would just like to reaffirm what the Senator said with respect to the Trade Act of 1979. As the Senator may recall, the distinguished chairman of the Subcommittee on Trade, Senator Ribicoff, and myself, as the ranking member of that subcommittee, worked very hard to get as broad approval as we could of that legislation. I am sure the Senator also will recall at that time that there was a great deal of concern that it would prove impossible to get the Congress to adopt the Tokyo round.

Mr. MOYNIHAN. If my distinguished friend would allow me to interrupt, it seemed an altogether hopeless cause.

Mr. ROTH. No question about it. And one of the reasons I think we succeeded in getting the adoption—and I must say it was in an afternoon with very little debate—was that we did make commitments to the labor movement that, in return for their support, we were going to do something about trade adjustment. And for that reason, I am strongly in support of what the distinguished Senator from Missouri and the distinguished Senator from New York are doing. I think we have made a commitment. I think we should keep that commitment. Like the distinguished Senator from New York, I am very concerned that if we are going to continue on the road of liberal trade policies, we have got to make sure that the workers that are impacted are taken care of.

I thank the Senator for yielding to me.

Mr. MOYNIHAN. Madam President, if I may just make one last comment. The role of the Senator from Delaware in bringing that legislation about was singular. And a man of his sense of honor cannot but be devastated by the thought that a commitment he made to insure that adjustment assistance would be available, a commitment he made with the understanding that the Senate was behind him, should turn out to be so fragile. We are a stronger institution than that. We should be careful about how we cast our vote on this occasion.

TRAINING FOR TRADE ADJUSTMENT

Mr. ROTH. Madam President, I rise in support of the amendment offered by my colleague from Missouri to include in the continuing resolution the $98.56 million in training funds requested by the administration for the trade adjustment assistance (TAA) program.

Madam President, during Finance Committee consideration of the Omnibus Reconciliation Act of 1981, I pressed strongly for the development of a trade adjustment assistance program that would enable workers to retrain and find jobs in other, perhaps more advanced sectors of our economy. I supported a program that would emphasize adjustment over assistance. As I have argued repeatedly in the past, I argued during those Finance Committee hearings that much of labor's support for the free trade policies of the United States is based on the availability of an adjustment program that will help displaced workers get back on their feet.

During the hearings, I was promised by the administration that its revised TAA program would emphasize adjustment over assistance. I was promised a program that would help displaced workers get back on their feet.

The administration offered a plan to provide over $100 million in additional training money for TAA for fiscal year 1982. While this figure was eventually reduced to less than $99 million to comply with the President's September budget request, it still represented a commitment to labor. It represented a commitment to help labor adjust to rapidly increasing imports with a positive program of training, job search, and relocation.

Madam President, I believe Congress should agree to make such a commitment, as well. Congress should include the $99 million requested by the administration for TAA training.

This funding is critical. Worker displacement due to increasing imports is not a problem that will simply go away if we ignore it. Only last week, 3,500 workers in the Newark, Del., Chrysler plant were laid off. While I hope this serious situation is a temporary one, it serves as further proof of the precarious condition of our automotive industry. It is also proof of the crying need to have a program in place that will insure a stable environment for workers should they be permanently displaced by imports.

Madam President, this is not just a question of narrow import-related interests. Rather, we are facing a policy decision here in Congress over whether we want to take positive action to reverse the productivity decline in this country. While the Government should not in any way take over the role of management and workers in improving the output and efficiency of our plants and factories,

Government can take some constructive steps to set the tone for productivity enhancements and long-term job stability.

An aggressive, albeit modest, program of training for worker adjustment to changed worldwide market conditions under TAA would set such a positive tone.

Surely, Madam President, we must establish priorities for the limited funds available for Government plans. I believe, however, that one of those priorities must be training under TAA.

I therefore urge my colleagues to support this amendment to reinstate nearly $98.6 million in TAA training money.

Mr. SCHMITT addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Madam President, the Senate and the Congress as a whole has decided, under the Omnibus Reconciliation Act, to reduce trade adjustment payments by sequencing them after those unemployment benefits paid through the unemployment trust fund. I think that was a considered decision by the Congress in which the Senate concurred and has at least reduced this ever-increasing drain on the Treasury that trade adjustment assistance, paid on top of unemployment benefits, had caused.

In addition, Madam President, I bring up once again the fact that we do not know what the size and the scope of this program is going to be. I call my colleagues' attention to the fact that previously the employment and training administration for these kind of programs was spending about $5 to $10 million out of discretionary funds available to the Secretary. And we have continued, through report language, to encourage that that be done. But we do not know how they are going to expand almost 10 times that amount if the request of the Secretary of Labor is agreed to by the Senate through the passage of the amendment offered by the Senator from Missouri.

I also would remind my colleagues who are here and may be listening that the impact of this is not national. It is confined primarily to those States which are experiencing some serious dislocations as a consequence of the downturn principally in the automobile industry but related supporting industries.

Again, there are provisions in law and in this bill which provide for not only unemployment compensation for those that have not yet found employment, but for retraining of those who are disadvantaged. And the report of the National Commission for Employment Policy, which I put into the RECORD, did not conclude that dislocated workers of this type are generally or even specifically in need of retraining activities; nothing to the extent that youth who have never been employed or only marginally employed need such help.

Now, I would fully expect that in the course of hearings on this subject which the Subcommittee on Labor, Health and Human Services and Education will hold, that we will see what the administration has in mind, how they plan to expand this program of retraining over and above what they can do right now with existing authority. And if they make the case that I suspect they will try to make and if they can also explain the discrepancy between the conclusions of the National Commission for Employment Policy and the conclusion implicit in the letter from the Secretary of Labor relative to this subject, then I suspect we are going to see some increase in funds made available for retraining.

But until that is done, I think it would be terribly unwise for the Senate to proceed to essentially again write a blank check of almost $100 million for retraining for which specific justification has not yet been specifically provided.

Mr. BRADLEY. Madam President, I rise in support of the Danforth amendment to reinstate $98 million for the training of workers who have lost their jobs because of competition from abroad.

This is not a regional issue, as the Senator from New Mexico has tried to paint it; this is a national issue. The question is whether we will continue to be able to compete on the cutting edge of change in a growing world economy or whether pressures will begin to grow in this country which will push us further and further to the brink of the protectionist abyss. It is that simple.

We operate in a world economy which was organized in the post-World War II years upon the principles of free trade and the free flow of capital. That system has worked exceedingly well. Since about 1971 we have had a lot of stresses on that system ranging from protectionist pressures to increased competitiveness of our allies to floating exchange rates to oil shock.

But the point is there is still a commitment on the part of most Americans, working people and managers, to look to the future with belief that America can continue to compete and can continue to remain on the cutting edge of change.

If we are to do that, we will find some of our workers who will be displaced because their industries, as a part of the world economy, will have lost their competitiveness.

The question that faces our country, not a region but our country, is whether we will be able to assure those workers—not their institutions but those workers—some reason to believe that they can get a job in a growing sector of the economy.

The traditional response—and this has been a response in both Republican and Democratic administrations—has been to subsidize the dying institution, to protect the worker's job in an institution that has lost its competitiveness, thereby assuring to most American consumers higher prices.

Let me say that I think that route is approaching a dead end and that we have to focus on the individual who finds himself at age 50 and 55 caught in a dying industry. What do we do with that individual, not what do we do with a dying company. The kind of an answer has to be that we allow the kind of assistance that will allow that individual to move to a growing sector of the economy.

This amendment is very modest. The Senator from New Mexico made the point, "How will they be able to spend $98 million when last year they only had $12 million and it was spent but was not spent fully?"

I would simply point out that last year there were 18,000 Amercans who were on trade adjustment assistance and 16,000 of them had to pay for their retraining themselves.

In my view, the Government has a role in assuring that skills are acquired. If this transition is not made, you will find those workers and their unions arguing more and more vehemently for trade barriers, first.

Second, they will be arguing more and more for Government subsidies to their company or institution.

This amendment says very clearly that there is another route, that we believe that that route is essential to maintaining U.S. competitiveness and to assure that workers have some opportunity for growth in a decade where that growth is essential for all of us to prosper.

So, Madam President, I rise in support of the amendment. I would hope my colleagues would not be put off by the argument that yesterday we rejected the human capital amendment that dealt with young minority students in our cities and, therefore, today we should reject the human capital amendment that deals with older workers.

These are two separate problems. They are each equally pressing. Today's merits the Senate's affirmative vote. I hope the Senator from Missouri will see fit to vote in due course.

(Mr. HEINZ assumed the chair.)

Mr. DANFORTH. Mr. President, I do not have very much more to say except this: This program is not Senator BRADLEY'S program, Senator DANFORTH'S program, Senator ROTH'S program, or Senator MOYNIHAN'S program. We are not arguing for appropriations for some new innovation on our part, nor are we arguing that some programs should be expanded beyond the request of the Reagan administration.

We are here arguing for the Reagan program. We are asking that the trade adjustment assistance program suggested by the administration, supported by its Secretary of Labor, requested in its own budget, requested in its letter to Senator HATFIELD, of the Appropriations Committee, be funded.

The administration asked the Congress to substitute one kind of program for another. We said, "Fine. Change the existing trade adjustment assistance program and substitute your version," which is a training program.

Now we are saying, "Scrap that as well, unless we appropriate the funds to do it."

Mr. President. if no one else cares to speak on the subject, I move adoption of the amendment.

Mr. SCHMITT. Mr. President, I do not know of anyone else who wishes to speak on this subject. If there is nobody, I move to lay the amendment on the table.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The

question is on agreeing to the motion to lay the amendment of the Senator from Missouri on the table.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

I also announce that the Senator from Oklahoma (Mr. NICKLES) is necessarily absent due to a family emergency.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. NICKLES) would vote "yea."

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 49, nays 46, as follows:

[Rollcall Vote No. 400 Leg.]

YEAS—49

Abdnor	Gorton	Percy
Andrews	Grassley	Pressler
Armstrong	Hatch	Proxmire
Baker	Hatfield	Quayle
Boschwitz	Hawkins	Rudman
Byrd, Harry F., Jr.	Hayakawa	Schmitt
	Helms	Simpson
Chiles	Hollings	Stafford
Cochran	Humphrey	Stennis
Cohen	Jepsen	Stevens
D'Amato	Kasten	Symms
DeConcini	Laxalt	Thurmond
Denton	Lugar	Tower
Domenici	Mattingly	Wallop
East	McClure	Warner
Exon	Moynihan	Zorinsky
Garn	Murkowski	

NAYS—46

Baucus	Ford	Mitchell
Bentsen	Glenn	Nunn
Biden	Hart	Packwood
Boren	Heflin	Pell
Bradley	Heinz	Pryor
Bumpers	Huddleston	Randolph
Burdick	Inouye	Riegle

Durenberger	Melcher	
Eagleton	Metzenbaum	

NOT VOTING—5

Byrd, Robert C.	Leahy	Nickles
Goldwater	Matsunaga	

So the motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. SCHMITT. Mr. President, I move to lay that motion on the table.

Mr. MOYNIHAN. Mr. President, I ask for the yeas and nays.

Mr. BAKER. Mr. President, on what?

The PRESIDING OFFICER. On the motion to lay on the table.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider the vote by which the motion to lay on the table the amendment of the Senator from Missouri was agreed to.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ZORINSKY (after having voted in the affirmative). Mr. President, on this vote I have a pair with the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD). If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "aye." I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Oklahoma (Mr. NICKLES) are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. NICKLES) would vote "yea."

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

Mr. MOYNIHAN. Mr. President, may we have regular order?

The PRESIDING OFFICER. Are there any other Senators who wish to vote?

The result was announced—yeas 47, nays 47, as follows:

[Rollcall Vote No. 401 Leg.]

YEAS—47

Abdnor	Garn	Murkowski
Andrews	Gorton	Percy
Armstrong	Grassley	Pressler
Baker	Hatch	Proxmire
Boschwitz	Hatfield	Quayle
Byrd, Harry F., Jr.	Hawkins	Rudman
	Hayakawa	Schmitt
Chiles	Helms	Simpson
Cochran	Hollings	Stafford
Cohen	Humphrey	Stennis
D'Amato	Jepsen	Stevens
DeConcini	Kasten	Symms
Denton	Laxalt	Thurmond
Domenici	Lugar	Tower
East	Mattingly	Wallop
Exon	McClure	Warner

NAYS—47

Durenberger	Melcher	Williams
Eagleton	Metzenbaum	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Zorinsky, for.

NOT VOTING—5

Byrd, Robert C.	Leahy	Nickles
Goldwater	Matsunaga	

So the motion to lay on the table was rejected.

Several Senators addressed the Chair.

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPRESSION OF SUPPORT FOR THE PRESIDENT'S PEACE INITIATIVE

Mr. BAKER. Mr. President, I ask unanimous consent that the pending motion to reconsider be temporarily laid aside so that the Senate may proceed to the consideration of a resolution passed by the House, House Concurrent Resolution 224, whch is at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (H. Con. Res. 224) to express the support of the Congress for the President's initiatives for peace.

Mr. BAKER. Mr. President, I ask for the yeas and nays on the resolution.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, it is my hope that the debate on this resolution can be very brief. It has been passed by the House of Representatives overwhelmingly. I think it would be a major contribution by the Senate to the cause of peace and the furtherance of the effort to negotiate an accord on arms limitation and reduction if the Senate promptly goes on record in support of this resolution as passed by the House of Representatives. I urge Members who wish to make statements to put their statements in the RECORD if they wish to do so and if it is possible for them to do so, so that we can proceed to a vote on this measure as promptly as possible.

Mr. JACKSON. Will the Senator yield?

Mr. BAKER. I yield to the Senator from Washington.

Mr. JACKSON. Mr. President, I will just take a moment to say that I commend the President of the United States for his speech of yesterday. I think he has addressed the central issue facing the Western World by his far-reaching proposals for the mutual reduction of nuclear weapons in a stabilizing manner, based on sensible methods of verification.

I believe the American people are now determined to fortify our defenses and enhance deterrence. But as I have often said, we do this because the defense of freedom leaves us no alternative. We are a people of peace. We do not rejoice in devoting our resources and talents to the building of armaments. We would far rather participate in programs for improving the quality of life and ending poverty and disease for people everywhere. This is the basic truth that President Eisenhower conveyed in his historic address of April 16, 1953, and that President Reagan has again emphasized in his call for serious mutual arms reductions.

The unity of this country behind the President's initiative is very, very im-

portant. I see his speech as the kickoff of an effort that is bound to take hard bargaining, patience, and time. The endeavor must be pressed month after month, year after year, if necessary. I want to say that I shall do everything I can to assist the President in his drive on behalf of what all people yearn for, and that is the mutual, balanced reduction and the eventual removal of all nuclear weapons.

Mr. STENNIS. Will the Senator yield to me?

Mr. JACKSON. Yes.

Mr. STENNIS. I heartily agree with the substance of his statement. I also commend the President for the start he has made in what I think is the most important business before him.

Mr. BAKER. Mr. President, I yield to the distinguished chairman of the Foreign Relations Committee.

Mr. PERCY. Mr. President, yesterday hundreds of millions of people in America and around the world were witness to a speech of historic dimensions. Speaking via a global radio and television hookup, President Reagan outlined a bold four-point agenda affirming America's commitment to the pursuit of peace and meaningful arms reduction agreements. The thrust of the President's address is remarkably straightforward: The United States proposes substantial, militarily significant reductions in conventional, intermediate-range nuclear, and strategic forces, with equal ceilings for similar types of weaponry and adequate provisions for verification.

I join my colleagues in applauding the President's announcement that the NATO alliance is prepared to forgo the deployment of new land-based intermediate-range missiles in Europe, provided the Soviets agree to scrap their enormously hostile and destabilizing force of SS–20, SS–4, and SS–5 missiles. Taken in full consultation with our NATO allies, this decision should once and for all reassure the people of Europe and the world that the United States is committed to the twin goals of security and stability in its relationship with the Soviet Union.

In my judgment, this eminently reasonable NATO offer will appropriately test the Soviets' self-declared dedication to a peaceful and harmonious relationship with the Western Alliance. I can only hope that the Soviet Union will in time recognize and act on this historic opportunity to reverse what otherwise could prove to be another costly spiral in the nuclear arms race.

To my regret, we have already heard scattered accusations that there is no substance to the President's proposal on European-based nuclear missiles, that the United States is more interested in scoring a public relations triumph than in decreasing the level of weaponry deployed in Europe. Some nay-sayers have even gone so far as to suggest that it is somehow not fair to ask the Soviet Union to dismantle its deployed missiles.

To those making these accusations, I would ask where is the fairness in the Soviet's deliberate effort to intimidate NATO with a massive missile force whose mission in war would be none other than the total nuclear devastation of Western Europe? What is fair about the Soviet Union deploying hundreds of modern SS–20 missiles during a period when NATO has not deployed a single new intermediate-range nuclear missile on European soil and when, in fact, NATO has unilaterally withdrawn 1,000 nuclear warheads?

Mr. President, I would suggest that it is incontestably fair for the NATO alliance to insist that no such missiles are needed on either side. There is a marvelous simplicity to the concept of reducing weapons of this type to the level of zero. How ironic and misguided that some leaders of the nuclear disarmament movement in Europe have chosen to defend the Soviet Union and speak out against a proposal that would provide, for the first time in history, for the total elimination of a particular type of deployed nuclear weaponry.

Mr. President, I am confident that the overwhelming support being afforded this resolution in the House and the Senate will send a message to Moscow. That message is that the U.S. Congress stands firmly behind the NATO theater nuclear force proposal and would quickly approve any agreement that incorporates its terms. Let there be no mistake, we in the Congress regard this proposal as serious, constructive, and enormously promising.

One other element in the President's address deserves special note and commendation. The President's announcement yesterday that he has directed Secretary Haig to begin the new strategic arms reduction talks (START) as soon as possible in the new year is good news indeed. While we must not underestimate the difficulty of the negotiations that lie ahead, I fully expect that the President will achieve an agreement with the Soviet Union that will, for the first time in the nuclear age, provide for genuine reductions in the awesome strategic weaponry deployed by both sides. In concert with the President's initiatives on the mutual and balanced force reductions talk and the conference on disarmament in Europe, the proposals on TNF and START establish a sound blueprint for promoting arms control and preserving the peace.

Mr. President, for 10 years on the Senate Foreign Relations Committee, serving under or with Democratic Presidents, I have urged bipartisan foreign policy. I think the statements just made by our distinguished colleagues on the other side of the aisle, including the brilliant and immediate response by the distinguished minority leader, Senator ROBERT BYRD of West Virginia, is the essence of the best of the U.S. Senate.

In commending the President on the initiative, creativity, and boldness with which he has moved forward the distinguished assistant minority leader, Senator CRANSTON, continues his leadership in the Senate for so many years now in the area of arms reduction and arms control. I am proud of the dedication Senator LARRY PRESSLER, chairman of the Subcommittee on Arms Control of the Senate Foreign Relations Committee, has for this cause. We thank our distinguished colleagues for the bipartisan spirit in which they have approached the brilliant arms control initiative undertaken by the Reagan administration.

Mr. BAKER. Mr. President, I yield to the distinguished ranking minority member of the Foreign Relations Committee.

Mr. PELL. Mr. President, I join in endorsing the President's speech which changed the climate. I hope it is a precursor of good things and successful negotiations to come. President Reagan has made a correct and commendable decision to seek the total elimination of Soviet and NATO long-range theater nuclear weapons in Europe in the forthcoming negotiations with the Soviets.

This decision, if pursued vigorously in the negotiations beginning later this month, will help us regain the high ground from the Soviet Union in demonstrating that the danger of nuclear war can be reduced through arms control. In particular, the President's proposal underscores the critical fact that the nuclear weapons problem in Europe is a mutual one—the NATO program to deploy 572 long-range cruise missiles and Perishing-2 missiles was conceived in response to the Soviet deployment of SS–20 and other new missiles aimed at Western Europe—and the only way to prevent a dangerous nuclear arms race in Europe is through mutual reductions and not through unilateral reductions in NATO's deployments which have yet to take place.

The President's decision comes at a time of a rising tide of concern, not only in Western Europe but also in our own country, that nuclear war is becoming more likely. Last week, meetings sponsored by the union of concerned scientists at 151 college campuses across the country revealed how deeply Americans fear that a nuclear holocaust destroying life as we know it could really happen.

For some time I have feared that we were on a collision course of military competition with the Soviet Union highly reminiscent of the military buildup that preceded World War I, the war that nobody wanted but which came anyway and dramatically changed the history of the world. The buildup currently underway threatens to change future history even more dramatically if not curbed now.

It is my hope that the proposals set forth by President Reagan today will reverse the unimaginably dangerous course that we are on now. In this connection, I am delighted that President Reagan linked his proposals for the elimination of long-range nuclear weapons in Europe to proposals to resume SALT negotiations at an early date, to reduce conventional forces in Europe, and to take other measures to reduce the risks of surprise attack.

These are commendable objectives, and I support them; but they must be pursued realistically with a view toward achieving meaningful results and not just to score a propaganda victory. As a first step toward achieving eventual reductions in strategic weapons, I urge the President to go beyond what he said to-

day and propose a mutual freeze—by both the United States and the Soviet Union—on further production and deployment of strategic nuclear weapons pending the conclusion of more time-consuming negotiations to make substantial reductions in these weapons.

As Archbishop John R. Roach, president of the National Conference of Catholic Bishops said yesterday, "the most dangerous moral issue in the public order today is the nuclear arms race." I wholeheartedly agree with that. Now is the time to say "no" to nuclear war and to make superhuman efforts to insure that a nuclear weapon is never again exploded. The future of our children and grandchildren demands no less.

Mr. NUNN. Mr. President, I wish to join those who are complimenting the President's speech. I think it was a very fine speech. I think it was well thought out. I particularly applaud the relationship that he has clearly explained between strategic nuclear forces, theater nuclear forces and conventional forces. He made it clear that all of those forces are important. He made it very clear that you cannot negotiate the strategic weapons in a vacuum and separate those from theater and conventional forces.

So I join those who commend the President for an excellent presentation for this country and for the world.

Mr. BAKER. Mr. President, may I say that on yesterday I discussed this resolution with the distinguished minority leader, who is necessarily absent today. He indicated to me that he wished to join in support of this measure as it was passed by the House of Representatives.

I would note for the record that House Concurrent Resolution 224, which was passed by the House, was sponsored by the distinguished chairman of the Foreign Affairs Committee and was offered on behalf of himself for the Speaker and a number of other Members on both sides of the aisle.

Mr. President, I appreciate the statements of bipartisan support of this resolution. I urge its adoption.

Mr. PRYOR. Mr. President, I wish to take this occasion to commend President Reagan for taking yesterday a bold and courageous four-point approach to United States-Soviet arms negotiations. It is encouraging to see the favorable response the President's announcement has brought from all quarters of the world, both in this country and abroad.

The President's four points are these:

First, a proposal under which the United States would drop its plans to deploy 572 new cruise and Pershing II missiles in Europe, on the condition that the Soviets dismantle the 600 SS-20, SS-4, and SS-5 intermediate-range missiles deployed in the western Soviet Union.

Second, the President suggested to President Brezhnev that the United States and the Soviet Union resume strategic arms talks in January. He noted, in addition, that these talks will be called START—with emphasis on reduction—rather than SALT—or limitation talks.

Third, a proposal calling for a reduction in nonnuclear forces throughout Europe.

And finally the President renewed our call for an international conference to reduce the risk of surprise attacks or of a war arising from miscalculation.

Mr. President, these are all commendable points. They are substantive and meaningful. What is even more heartening to me is the manner and spirit of the President's proposal. He made his suggestion in a personal letter to President Brezhnev some 24 hours before the speech was delivered. In taking this step, President Reagan made a historic move:

He broke a 20-year pattern in which Washington and Moscow have moved only through diplomatic channels.

He proposed a radical change in dialog between the major two powers in the world.

He made extraordinary efforts to reach Europeans who recently have shown concern over the proliferation of nuclear weapons—an effort that needed to be made.

I also wish to commend President Reagan for taking the high road in his first major foreign policy address. This speech was the first Presidential address ever beamed live by satellite by the American Government to the countries of Western Europe. The President has let the world know that the United States is serious about the pursuit of peace, that we are not characterized entirely by increasingly bloated defense budgets, that we are still led by those passions for justice and security and freedom and peace that settled our country in the first place.

These are positions of strength and courage. Let me quote from President Reagan's speech of yesterday:

> There is no reason why people in any part of the world should have to live in permanent fear of war or its specter.

He said:

> I believe the time has come for all nations to act in a responsible spirit that doesn't threaten other states. I believe the time is right to move forward on arms control and the resolution of critical regional disputes at the conference table.

We are entering the first stage of talks on November 30 in Geneva. Then, on January 26 and 27, Secretary Haig and Foreign Minister Gromyko will hold their first round of negotiations on strategic weapons, also in Geneva. I hope the support and encouragement of the world will be with these negotiators as their crucial talks begin. An anxious and waiting world hangs on their decision.

Mr. NICKLES. Mr. President, the foreign policy speech by President Reagan yesterday demonstrated one more time his strong leadership ability by telling Russia and the world that the United States is serious in its commitment to world peace and defusing the madness of the present arms race.

The offer to cancel the deployment of Pershing II and ground-launch Cruise missiles in Europe if the Soviets will dismantle their SS-20, SS-4, and SS-5 missiles will reassure our European allies and challenge the Russians to prove their claims of amassing tremendous military arms supply simply for defensive reasons.

The irrefutable fact voiced by President Reagan is that the United States has always strived for world peace. When at our military heights after World War II, we never attempted to dominate the world. Instead, we provided assistance to all our allies and even our former enemies to rebuild their countries. We continue today to contribute to economic independence for developing countries all over the world.

I wish I could believe that Soviet Russia would respond in good faith to the President's positive initiatives to achieve the necessary steps to lasting world peace. Hopefully, the United States and Russia will sit down at the conference tables early next year and come to agreement for bilateral arms reductions of equal level and with true verifiability.

Mr. President, I strongly support this resolution which demonstrates the strong resolve of the U.S. Senate to stand behind the President in his constructive attempts toward world peace.

Mr. RANDOLPH. Mr. President, the arms reduction proposals outlined by President Reagan on Wednesday merit the support of the Congress and the citizens of our Nation.

In significant degree, the Chief Executive's plan will relieve the anxieties of the American people and our European allies who for 10 months have heard only about increases in defense spending, weapons stockpiling, and references to so-called limited nuclear war. The President said:

> I understand their concerns. Their questions deserve to be answered.

President Reagan reaffirmed America's commitment to continuing what he termed "the longest European peace in this century." He further pledged his administration, himself, and our country to achieving arms-reductions agreements based on the principles outlined throughout his proposal to the Soviets. He asked them to share our commitment and to match their often-repeated professions of concern for peace by positive action.

The President stated that the American concept of peace goes well beyond the absence of war.

Having heard his statement of foreign policy with regard to arms reductions and an end to the unhealthy and unconscionable competition between the two world powers, let us support the President as he and his negotiators go to the bargaining table. This is not a time for suspicion that his proposals were merely for propaganda purposes. Ths is a time for hope and cooperation.

It will not be easy—and the President knows this. He also knows he has made a sincere start toward a renewal of our country's commitment to world peace.

Thus, it is a privilege to support the pending resolution.

THE FINEST SPEECH OF THE REAGAN PRESIDENCY

Mr. EAGLETON. President Reagan has, in my opinion, delivered the finest speech of his Presidency. He waited 10 months into his term to deliver a major foreign policy address and he selected as his topic the foremost concern of our

age: the containment and control of nuclear arms so as to avoid the incineration of mankind.

Geopolitically, the President spoke in the nick of time. A rapidly accelerating body of world opinion was developing that the Reagan administration was blustering recklessly down a bellicose road in quest of a nuclear arms buildup.

In casual, imprudent remarks both President Reagan and Secretary Haig left the impression that nuclear war had somehow become thinkable.

On October 16, 1981, President Reagan made the remark that a limited nuclear war could be fought in Europe "without bringing either one of the major powers to pushing the button."

On November 4, 1981, Secretary of State Haig stated:

For example, there are contingency plans in the NATO doctrine to fire a nuclear weapon for demonstrative purposes to demonstrate to the other side they are exceeding the limits of toleration in the conventional area.

The United States should never forfeit its leadership role in pursuing a rational nuclear arms control policy.

President Reagan's speech begins to rectify the inattention and the offhanded miscues of the past 10 months.

The current Soviet "peace offensive" has convinced many in Western Europe that the United States is the obstacle to arms limitation. The drift toward neutralism has been noticeable and disturbing. True Soviet intentions with respect to nuclear weapons are questionable, but there is no question that the statements of the Reagan administration, until yesterday, gave the Soviets a "window of opportunity" in the battle of world opinion.

However, as the New York Times points out, "A speech is not a policy." The true test of the policy will be the vigor with which the administration pursues the precepts of President Reagan's speech initially at Geneva in the negotiations over theater nuclear weapons in Europe and subsequently in negotiations with the Soviets over limiting or reducing strategic nuclear weapons.

The PRESIDING OFFICER. The question is on agreeing to the resolution. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Oklahoma (Mr. NICKLES) are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. NICKLES) would vote "yea."

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Vermont (Mr. LEAHY), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from West Virginia (Mr. ROBERT C. BYRD) would each vote "yea."

The PRESIDING OFFICER (Mr. KASTEN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 95, nays 0, as follows:

[Rollcall Vote No. 402 Leg.]

YEAS—95

NOT VOTING—5

Byrd, Robert C.	Leahy	Nickles
Goldwater	Matsunaga	

So the concurrent resolution (H. Con. Res. 224) was agreed to.

The preamble was agreed to.

The resolution (H. Con. Res. 224), with its preamble, is as follows:

H. CON. RES. 224

Whereas President Ronald Wilson Reagan has called upon Soviet leader Leonid Brezhnev to engage in Strategic Arms Reduction Talks (START);

Whereas the President's willingness to cancel deployment of Pershing II and ground-launch cruise missiles if the Soviet Union dismantles its SS-20, SS-4, and SS-5 missiles is a dramatic and bold step toward real nuclear arms reduction;

Whereas the President's call for "equality at lower levels of conventional forces in Europe" is a necessary part of his goal of reducing the threat of war;

Whereas the President's invitation to President Brezhnev to join in a conference that would "develop effective measures that would reduce the dangers of war arising out of uncertainty and miscalculation" demonstrates this Nation's belief in the need for mutual restraint between the superpowers; and

Whereas the President's goal of "mutual reduction of conventional, intermediate range nuclear and strategic forces" is in the great American tradition of seeking and keeping the peace through realistic methods; Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress expresses its commendation of and support for the President's initiatives for peace and reaffirms its desire to work with him so that the threats of nuclear war can be reduced and, perhaps, eliminated in our lifetime.

DEFENSE APPROPRIATIONS

Mr. HATFIELD. Mr. President, I have been authorized by the Committee on Appropriations to offer the committee's recommendations on the Defense appropriations bill for fiscal year 1982 as reported in S. 1857, as amendments to the House-passed bill on defense appropriations, H.R. 4995, wherever they differ from the House allowances and provisions.

I do so now, and I ask unanimous consent that they be printed with the Senate committee recommendations in line type and italicized.

Mr. President, the purpose of this request is simply to get the traditional appropriations process back on track. The committee had to report a Senate bill for defense appropriations, S. 1857, because there was no House-passed bill at the time we marked up. The House bill was passed by that body last night and is now on the Senate calendar. Shifting our recommendations to the House-passed bill will permit us to take up that measure instead of the reported Senate bill when the time comes for the Senate to act.

This action in no way amends the House bill or changes the committee's reported recommendations. It merely consolidates them in one bill to be printed and available to all Senators when we do take up defense appropriations. The bill will remain subject to all the usual procedures, including adoption of the committee amendments.

Mr. PROXMIRE. Mr. President, will the distinguished manager of the bill yield?

Mr. HATFIELD. Yes.

Mr. PROXMIRE. As I understand it, this was strictly an adjustment for the fact that the House has acted.

Mr. HATFIELD. That is right.

Mr. PROXMIRE. We would still have the lower of the House- or the Senate-passed bill in this case?

Mr. HATFIELD. The Senator is correct.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from Oregon? The Chair hears none, and it is so ordered.

SECOND CONTINUING APPROPRIATIONS, 1982

The Senate continued with the consideration of House Joint Resolution 357.

Mr. HATFIELD. Mr. President, I ask that we temporarily set aside the motion to reconsider the matter which was pending, in order to take up a technical amendment and another amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I yield to the Senator from New York.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the name of the Senator from Michigan, Mr. RIEGLE, be added as an original cosponsor of the amendment that has just been laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, as a comanager of the bill, I set aside the pending technical committee amendment in order to receive a technical

amendment by the chairman of the Subcommittee on HUD, Mr. GARN.

UP AMENDMENT NO. 663

(Purpose: Technical correction in the contract authority amount available for HUD's Assisted Housing Program)

Mr. GARN. Mr. President, on September 24 and 25, when the first continuing resolution (H.J. Res. 325) was being considered in the Senate, I described the conference agreement reached on the HUD-independent agencies appropriations bill (H.R. 4034). Since then, the President has announced his second round of budget reductions. The adoption of these recommendations would result in numerous changes in the conference agreement on H.R. 4034. In fact, most of the administration's proposals have been incorporated in the measure now before us. At the same time that we are recommending these changes, we also want it to be understood that the terms and conditions, including specific earmarkings, contained in the conference agreement and the statement of managers (H. Rept. 97–222), still represent the legislative history and intent. The committee expects the agencies funded through H.R. 4034 to act accordingly.

Mr. President, I would like to highlight some of the more significant changes being proposed in the conference agreement.

TITLE I—DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

ANNUAL CONTRIBUTIONS

The conference agreement provided $17,939,370,000 in budget authority and $916,233,800 in contract authority for assisted housing. The amended conference agreement would reduce budget authority to $17,373,528,040 and reduce contract authority to $885,735,427. However, the new and existing housing mix would be essentially the same as contained in the conference agreement, rather than the September request.

HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

(LIMITATION ON DIRECT LOANS)

The conference agreement provided a loan limitation of $830,848,000 for the section 202 housing program for the elderly or handicapped program. While the administration's proposal would reduce the loan limitation to $728,746,000, the amended conference agreement would retain funding at $830,848,000.

In March, the request by the administration was $830,848,000 which was the same as that available in fiscal year 1980 and fiscal year 1981. Due to inflation, however, the number of units would decrease from 18,000 in fiscal year 1981 to 17,200 under the March level. The 12 percent reduction proposed by the administration would further reduce the number of units to 15,100.

Data compiled in August 1979 indicated that the potential eligibility for section 202 of individuals 62 years or older is over 9.3 million. In fact, during fiscal year 1981, HUD received over 1,200 applications totaling $33 billion for approximately 75,000 units.

PAYMENTS FOR OPERATION OF LOW-INCOME

The conference agreements provided $1,204,600,000 for the operation of low-income housing projects. As proposed by the administration, the amended conference agreement would reduce funding to $1,060,048,000. If this amount proves unsatisfactory, I will consider providing supplemental appropriations at a later date. I should note that the $148,000,000 supplemental for fiscal year 1981 operating subsidies added by the Congress has been maintained in the amended conference agreement.

The provision of an additional $148 million for public housing operating subsidies for fiscal year 1981 is intended to alleviate the distressed financial situation of many public housing authorities. The committee also wants to remove any ambiguity as to its intention that the amounts appropriated shall be obligated and made available to PHA's within the shortest time possible. Therefore, it has included language which assures that any amounts which the Secretary is unable to obligate to specific PHA's within 45 days after enactment of this joint resolution are deemed obligated by law in any case. The Department is directed to distribute the obligated funds to the housing authorities with a minimum of delay to avoid further depletion of PHA reserves.

TEMPORARY MORTGAGE ASSISTANCE PROGRAM HOUSING PROJECTS

The conference agreement deleted language proposed by the Senate which would have provided $75,960,000 for the temporary mortgage assistance program. The amended conference agreement would reinstate the language proposed by the Senate, thereby permitting possible savings in the FHA fund during fiscal year 1982.

COMMUNITY PLANNING AND DEVELOPMENT

The conference agreement provided $3,666,000,000 for community development block grants. The amended conference agreement would reduce funding to $3,450,000,000.

The conference agreement also contains a $225-million loan limitation for the section 108 loan guarantee program administered by HUD in fiscal year 1982. This program has enabled dozens of communities in the past to leverage their community development block grant funds through federally guaranteed taxable obligations to finance acquisition of real property for use in local housing or economic development projects.

The committee believes that this program combines many of the best aspects of a Federal-local partnership for private development in our cities. The notes are issued locally. Each participating community must pledge as collateral for the loan guarantee future proceeds under the CDBG program. Thus, even if the local program fails to generate enough income to cover the balance of the loan, the Federal Government incurs no additional costs because the community must pay the balance from its CD funds. This encourages realistic appraisals at the local level of risk. In effect, the program helps local communities help themselves to develop programs to generate private reinvestment through short-term loans.

The administration announced on November 5 its intention to terminate this program in fiscal year 1982. The committee notes that it has retained the $225 million ceiling to assure that applications will be accommodated up to that level on the basis of merit. The committee would view any arbitrary administrative restriction of this loan guarantee program as counter to the intent and custom of Congress in establishing ceilings.

Finally, the conference agreement also provided $500,000,000 for urban development action grants. The amended conference agreement would reduce funding to $440,000,000.

TITLE II—INDEPENDENT AGENCIES

ENVIRONMENTAL PROTECTION AGENCY

The conference agreement provided $583,747,000 for EPA's salaries and expenses. As proposed by the administration, the amended conference agreement would reduce funding to $512,837,000. The conference agreement also provided $421,840,500 for EPA's abatement, control, and compliance. The amended conference agreement would reduce funding to $377,194,200.

The committee intends that the $12,937,200 added above the request for abatement, control and compliance be used as follows:

To fund the conference report earmarkings	$7,912,500
Stationary source enforcement	2,035,900
Environmental emergency response and prevention	525,000
Pesticide certification and training	1,050,000
Energy review and permitting	1,413,800
Total restoration	12,937,200

Although the administration has proposed reducing the funds available for the hazardous substance response trust fund by $24,000,000, the level proposed in the Senate amendment retains the original conference agreement of $200,000,000. Currently, EPA estimates that between 10,000 to 15,000 sites will require specialized assessments or investigations to determine if a significant public health problem exists and 1,000 to 2,000 of these sites may prove to be major health or environmental problems. The 12-percent reduction proposed by the administration could reduce the number of sites where immediate removal action is planned from 125 to 110; reduce site inspections from 1,500 to 1,000. And reduce site investigations from 300 to 200.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The conference agreement provided $4,973,100,000 for NASA's research and development. While the administration has proposed reducing funding to $4,591,900,000, the amended conference agreement provides $4,791,900,000.

The proposed 12-percent cut by the administration of $311 million comes on top of the March reduction of $603.5 million. Cuts of this magnitude would fundamentally change the character of NASA through the elimination of the space science and applications programs. In providing an additional $200,000,000 above the administration's proposal, the amended conference agreement would continue to provide $70,000,000 for programs earmarked in the original conference agreement (H.R. 97–222, page 9). The remaining $130,000,000 would go for aeronautics, space sciences, space and

terrestrial applications, and space technology.

In addition, the conference agreement provided $1,114,300,000 for NASA's research and program management. While the administration has proposed reducing funding at $1,083,300,000, the amended conference agreement provides $1,099,300,000.

FEDERAL EMERGENCY MANAGEMENT AGENCY

The conference agreement provided $134,789,000 for State and local assistance. As proposed by the administration, the amended conference agreement would reduce funding to $122,134,320. In addition, the conference agreement also provided $65,456,000 for emergency planning and assistance. As proposed by the administration, the amended conference agreement would reduce funding to $65,087,440. However, in accepting the administration's recommendation, the committee did not agree that FEMA's fire research effort at NBS should be terminated and, therefore, directs that FEMA make $4,000,000 available for this effort as envisioned in the March budget revisions.

NATIONAL SCIENCE FOUNDATION

The conference agreement provided $1,040,000,000 for NSF's research and related activities. The administration has proposed reducing funding to $897,688,000, a 12-percent reduction from the March request of $1,020,100,000. The amended conference agreement would provide $950,000,000. Providing $52,300,000 over the administration's proposal, would result in the awarding of 9,446 grants or an increase of 457 grants over the requested level and a decrease of 879 grants below the March level. This level of funding would maintain NSF's research and related activities at slightly above the fiscal year 1981 level.

In addition, the conference agreement provided $27,450,000 for science education and engineering activities. The administration has proposed reducing funding to $8,712,000, a 12-percent reduction from the March request of $9,900,000. The amended conference agreement would reduce funding to $20,000,000. Providing $11,288.000 above the administration's proposal, would result in the awarding of 2,222 grants or an increase of 1,206 over the request level and an increase of 1,106 grants above the March level.

VETERANS ADMINISTRATION

The conference agreement provided $12,881,600,000 for compensation and pensions. As proposed by the administration, the amended conference agreement would increase funds to $13,824,000,000. This increase, which usually is transmitted as a supplemental, covers the full year costs of the activities under this account.

The conference agreement also provided $1,638,300,000 for readjustment benefits. As proposed by the administration, the amended conference agreement would increase funds to $1,938,800,000. As indicated before, this increase also covers the expected full year costs of this account.

In addition, the conference agreement provided $6,966,418,000 for medical care. Although the administration has proposed reducing funding to $6,669,491,000, the amended conference agreement would retain funding at $6,966,418,000.

Furthermore, the conference agreement provided $659,512,000 for the VA's general operating expenses. The administration has proposed reducing funding to $603,728,000. The amended conference agreement, however, would retain funding at $659,512,000. If the proposed reduction were taken, the results would be to reduce payments to State approval agencies; consolidate regional offices; and close the St. Paul Data Processing Center.

Finally, the conference agreement provided $434,603,000 for the construction of major projects. As proposed by the administration, the amended conference agreement would reduce funding to $378,338,000.

NATIONAL INSTITUTE OF BUILDING SCIENCES

The conference agreement provided $1,500,000 for the salaries and expenses of the National Institute of Building Sciences, rather than $500,000 as proposed by the administration and the House. While the administration has proposed a 12-percent reduction from the March request of $500,000, the amended conference agreement would retain funding at $1,500,000.

A final $1,500,000 appropriated in fiscal year 1982 will save administrative costs for the Institute, the executive branch, and the Congress. In addition, with a final appropriations of $1,500,000, the Institute will have adequate resources to achieve permanent funding.

GENERAL SERVICES ADMINISTRATION

CONSUMER INFORMATION CENTER

The conference agreement provided $1,344,000 for the Consumer Information Center, as proposed by the Senate, rather than $1,314,000 as proposed by the House and the administration. The additional $30,000 would be used to conduct a study to determine the feasibility of charging customers a handling fee on free publications. While the administration has proposed a 12-percent reduction from the March request level, the amended conference agreement would retain funding at $1,344,000.

NEIGHBORHOOD REINVESTMENT CORPORATION

PAYMENT TO THE NEIGHBORHOOD REINVESTMENT CORPORATION

The conference agreement provided $14,450,000 for payments to the Neighborhood Reinvestment Corporation, rather than $14,950.000 as proposed by the Senate and the administration. While the administration proposed a 12-percent reduction from the March request of $14,950,000, the amended conference agreement would retain funding at $14,450,000.

A further reduction of $1,294,000 would result in the elimination of 10 new neighborhood programs as well as 4 new NHS program starts with an estimated reduction of $40,000,000 in private investments. In addition, there would be a reduction in training and assistance which help maintain the effectiveness of existing programs.

CONSUMER PRODUCT SAFETY COMMISSION

The conference agreement provided $32,983,000 for the salaries and expenses of the Consumer Product Safety Commission. While the administration has proposed reducing funding of $29,025,000, the amended conference agreement will retain funding at $32,983,000.

The January budget request was for $44 million and 880 FTE. The March request reduced CPSC's budget to $32,983,000 and 697 FTE. A further 12-percent reduction as proposed in September would leave only 219 FTE.

Mr. President, I send to the desk a technical amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Utah (Mr. GARN) proposes an unprinted amendment numbered 663.

Mr. GARN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 8, line 7 strike "$885,357,427" and insert "$897,177,848."

Mr. GARN. Mr. President, the technical amendment I have sent to the desk is merely a change in a number. HUD, in providing the committee with information on the administration's September budget, made an error. This amendment provides the amount requested by the administration for contract authority and corrects a previously calculated number for contract authority that was in error. The amendment provides that the anticipated 142,000 housing units will be reserved. Without the amendment, approximately 1,400 of these housing units would not be reserved.

Mr. HATFIELD. There is no objection, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 663) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, exercising my responsibility as a comanager of the bill, I set aside the pending committee amendment in order to yield to the Senator from Alaska to present another amendment.

UP AMENDMENT NO. 664

(Purpose: Relating to the "pay cap" on Federal salaries)

Mr. STEVENS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 664.

Mr. STEVENS. Mr. President, I ask

unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of section 101 insert the following new subsection:

( ) Notwithstanding those provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section, nothing in such provisions shall (or shall be construed to) require that the rate of salary or basic pay, payable to any individual for or on account of services performed after November 30, 1981, be limited or reduced to an amount which is less than—

(A) $59,560.00, in case such individual has an office or position the salary or pay for which is (I) fixed at a rate which is equal to or greater than the rate of basic pay for level III of the Executive Schedule under section 5314 of title 5, United States Code, or (II) limited to a maximum rate which is equal to or greater than the rate of basic pay for such level III (or to a percentage of such maximum rate) by reason of any provision of law (other than any of the provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section) or congressional resolution;

(B) $58,500.00, in case such individual has an office or position the salary or pay for which is (I) fixed at a rate which is equal to or greater than the rate of basic pay for level IV of the Executive Schedule under section 5315 of title 5, United States Code, or (II) united to a maximum rate which is equal to or greater than the rate of basic pay for such level IV (or to a percentage of such maximum rate) by reason of any provision of law (other than any of the provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section) or congressional resolution; or

(C) $57,500.00, in case such individual has an office or position the salary or pay for which is (I) fixed at a rate which is equal to or greater than the rate of basic pay for level V of the Executive Schedule under section 5316 of title 5, United States Code, or (II) limited to a maximum rate which is equal to or greater than the rate of basic pay for such level V (or to a percentage of such a maximum rate) by reason of section 5308 of title 5, United States Code, or any provision of law (other than any of the provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section) or congressional resolution.

The PRESIDING OFFICER. Before the Senator proceeds, the Senate will come to order.

UP AMENDMENT NO. 665

Mr. STEVENS. Mr. President, I now send to the desk an amendment to that amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 655 to his unprinted amendment numbered 664.

Mr. STEVENS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

a. Insert before "Notwithstanding" a "(1)".

b. Insert after the phrase "which is less than" the following:

(1) an amount which is equal to 104.8 percent of the rate (or maximum rate, if higher) of the salary or basic pay payable for such office or position for November 30, 1981, or

(2) if greater, an amount equal to whichever of the following is applicable:

(A) $72,972.00, in case such individual has an office or position the salary or pay for which is (I) fixed at a rate which is equal to or greater than the rate of basic pay for level I of the Executive Schedule under section 5312 of title 5, United States Code, or (II) limited to a maximum rate which is equal to or greater than the rate of basic pay for such level I (or to a percentage of such maximum rate) by reason of any provision of law (other than any of the provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section) or congressional resolution;

(B) $63,574.30, in case such individual has an office or position the salary or pay for which is (I) fixed at a rate which is equal to or greater than the rate of basic pay for level II of the Executive Schedule under section 5313 of title 5, United States Code, or (II) limited to a maximum rate which is equal to or greater than the rate of basic pay for such level II (or to a percentage of such maximum rate) by reason of any provision of law (other than any of the provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section) or congressional resolution:

c. Strike the "(A)" and insert in lieu thereof "(C)".

Strike the "(B)" and insert in lieu thereof "(D)".

Strike the "(C)" and insert in lieu thereof "(E)".

d. At the end thereof, add the following:

(2) If the amount of salary or basic pay, payable on account of services performed for any period by an individual in any office or position, is by reason of the provisions of paragraph (1) of this subsection increased over the amount of salary or basic pay which would have been payable on account of such services if such paragraph (1) had not become law, then, notwithstanding any other provision of law, beginning with the first day of such period the rate of salary or basic pay (as the case may be) for such office or position—

(A) shall be the amount payable for such services in such office or position, as increased by reason of the provisions of paragraph (1) of this subsection, and

(B) shall not be subject to any increase (other than the increase brought about by reason of the provisions of paragraph (1) of this subsection) by reason of salary adjustments which became effective prior to the date this joint resolution became law under the Federal Pay Comparability Act of 1970, the provisions of subchapter 1 of chapter 53 of title 5, United States Code, relating to pay comparability, or any related provisions of law.

Mr. STEVENS. Mr. President, the basic amendment I have offered is the amendment that the Senate agreed to previously on executive pay. As a matter of fact, on several occasions we have adopted an amendment and sent it to the House to trv to correct the situation that exists in the executive branch concerning premature retirements and the massive exodus due to resignations at midlevel and in Government career.

In this connection, I call the attention of Members of the Senate to two editorials which I have asked to be placed on the desk of each Senator. One is an editorial from the New York Times of November 18, entitled "Top Officials Need A Raise," and the second is from this morning's Washington Post, entitled "Free the Federal Hostages," both of which discuss this basic amendment.

In the past, when we have taken this amendment to the House, we have attempted to work out a situation whereby the two levels that are not covered by this amendment, executive levels I and II, would be included. In the last month of the 1980 session, we actually obtained an agreeemnt and brought it back to the floor, and it was defeated in the Senate.

Last time, we again took the amendment to the House, and we had repeated votes in conference. We were unable to get the House to agree to our amendment unless we attempted to put on that amendment the second amendment which is here now, which also adjusts congressional salaries.

So, the second amendment is the congressional pay raise. The second amendment is an amendment to my amendment on executive pay. What I seek is an expression of the Senate as to whether the Senate is willing now to consider a raise in congressional pay. It is a subject that has been discussed, and there is no question that it is a valid subject to have discussed, and I intend to vote for my amendment to the basic amendment.

However, I also want to establish the record, before we go to the House from the Senate on the basic amendment, as to the sentiment here, as to whether we will or will not accept a pay raise for Congress this year.

Mr. LONG. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. LONG. What is the amount of the increase?

Mr. STEVENS. It is the basic raise advocated in the President's budget. It is a request from the administration for a 4.8-percent cost-of-living adjustment.

Mr. PROXMIRE. Mr. President, as I understand it, the editorial in the Post—I have not had a chance to read the one in the Times—recommended that we separate congressional pay from the executive branch pay. They argued that there are many arguments in favor of congressional pay but it was complicated and it should be considered separately.

The Senator, as I understand it, is offering two amendments. The second amendment would provide for an increase in congressional pay; and if we agree with the viewpoint that that should be treated separately, we should vote "No" on that, I take it. If we feel that we can approve the increase in congressional pay, we vote "Aye."

Mr. STEVENS. The Senator is correct.

The reason I have offered it in this manner is to avoid the problem of having a vote on the pay raise for the executive branch and the Members of Congress, so that the former might lose, too. This separates the two issues, as has been suggested.

I have had discussions with members of the White House and the executive branch, and I intend to go into some of this. There is no question that the administration stands behind this budget. The budget request is that there should be a 4.8-percent pay raise for the members of the executive branch and for

Congress, those people who have not had it in the past.

Mr. President, we talk about indexing entitlements and indexing other things. I want Senators to know that we did index pay for the executive branch and we did index pay for the Members of Congress. The mechanism for that indexing was a report to be made to Congress each year by the President, yet the Congress has disapproved it. In fact, Congress has disapproved that pay raise for itself in all the years it has been suggested, but one. As a consequence, Congress has put a pay cap not only on itself but also on the executive branch, because we are tied to the level of executive II. What I am trying to do is to separate them. Let us have a vote on whether or not congressional pay should be raised, and at the same time, after that, let us once again address the question of whether we are going to solve this difficult problem of the executive branch.

Mr. PROXMIRE. If we do not provide the 4.8 increase for Members of Congress but do provide it for some people in the executive branch, would there be any effect on the budget? Would this require additional funds, or would they have to make the pay increase within the budgetary limitations they have?

Mr. STEVENS. I am pleased that the Senator has raised that question.

Mr. President, I shall ask unanimous consent to have printed in the RECORD the letter I received from the Comptroller General of the United States in which he has pointed out that there is no cost or virtually no cost, let us put it that way, to the amendment to adjust executive salaries because of the problem of resignations and early retirements and the increased compensation that people get in retirement because retirement pay for retired Federal executives is indexed and is not capped. The interesting thing is, and I will have a chart here in a minute to show to Members of the Senate, Members of the Senate who retired in 1977 are in much better position really than those who are still here as their pay is increasing on a cost-of-living adjustment that is indexed, and we have not been indexed in that whole period.

Similarly, the real problem is the executive branch is that there is an incentive to retire. There is 4.8-percent adjustment for a person who is at a level to achieve it right now to take it. It is not capped. But if that same person retired, he would get the full 9- or 10-percent cost-of-living adjustment. A person who is under the pay cap now at $50,112, if that person retires, he automatically gets the indexing of the annual year cost-of-living adjustment, so that he can get out from under the cap today by retiring; whereas, we cannot lift the cap to give him an incentive to stay.

Mr. President, I ask unanimous consent to have this letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., November 10, 1981.

Hon. TED STEVENS,
Chairman, Subcommittee on Civil Service, Post Office, and General Services, Committee on Governmental Affairs, U.S. Senate.

DEAR MR. CHAIRMAN: This letter is in response to your request that we evaluate your proposal to raise the "pay cap" for Federal career executives by 14.7 percent to $57,500. Your proposal also would raise the pay limitations for Executive Level III and IV positions to $59,500 and $58,500, respectively. Salary levels for Members of Congress, Cabinet officials, and equivalent positions in the executive, legislative, and judicial branches would not be changed.

While your proposal to raise but not lift entirely the pay restrictions for career executives and certain other Federal executives, excluding Members of Congress, would not fully alleviate the critical pay compression problem, it would provide a much-needed measure of relief. Moreover, if it encourages affected executives to delay their retirements for 3 years, the savings would offset virtually all of the additional salary costs involved.

The proposed raise would relieve some of the existing pay compression among career executives and senior managers, provide needed pay increases to most Federal executives, and preserve the small but important pay distinctions among the various executive levels. Raising the pay limitations and allowing a portion of the scheduled pay increases to become effective should have a positive effect on the Senior Executive Service (SES); the recruitment, retention, and morale of Federal executives and senior managers; and, ultimately, the management and operation of Government programs.

In our opinion, the executive pay dilemma is one of the most critical but perhaps least understood and appreciated problems facing the Government today. Since March 1977, the executive pay ceiling has been increased by only 5.5 percent. During that same period, retired Federal executives received annuity cost-of-living adjustments totaling 55 percent; Federal white-collar pay rates have been increased by 38 percent; and private sector executive pay has gone up about 40 percent.

Federal executives have been denied scheduled increases totaling 22.4 percent in the last 3 years. Executives were due pay raises of 7.02 percent, 9.1 percent, and 4.8 percent in October 1979, October 1980, and October 1981, respectively, but appropriation act language prohibited payment of these scheduled increases. The current appropriation restriction on the payment of the legal salaries of career executives and other top Federal officials expires on November 20, 1981. If the restriction is not reimposed, executive salaries, including those for Members of Congress, will rise by 22.4 percent to their legal levels.

Because of appropriation act pay restrictions, about 46,000 career executives at eight different levels of responsibility now receive the same salary—$50,112.50. As we stated at your Subcommittee's September 14, 1981, hearing on "Government Brain Drain," this absurd situation creates a multitude of recruitment, retention, morale, and other problems. If allowed to continue, executive pay compression and its resulting adverse effects threaten to undermine the SES and other important reforms the Congress mandated in the Civil Service Reform Act of 1978. More critically, the effective management and operation of Government programs is at stake.

The Government is losing its most valuable, experienced career executives at a time when our country can least afford it. Experienced Federal executives at the peak of their managerial career are retiring at alarmingly high rates; 3,137 top executives retired in 1980, compared with only 508 in 1977. Besides the lost expertise and continuity, such retirements are very expensive. Not only must executives' retirement annuities be paid for a longer period, but salaries must be paid to their replacements as well. Thus, for each executive who retires, the Government must actually pay two persons—the retiree and his or her replacement—to get one job done.

We estimated the cost effects of raising the pay cap for the 34,000 Federal executives and senior managers who at September 30, 1981, were at the $50,112.50 pay ceiling. Raising the pay cap from $50,112.50 to $57,500 would result in a pay raise averaging about 11 percent for that group. A basic premise was that an 11 percent pay increase would cause executives to defer their retirement for 3 years. Conversely, with no immediate pay raise, we assumed that retirement-eligible executives wolud retire and be replaced.

According to our analysis, raising the pay cap to $57,500 would be cost effective. The net estimated present value of the additional salaries and retirement annuities, including income tax considerations, that would be paid over the remaining lifespans of the 34,000 executives and their replacements would be only about $230 million. The net additional long-range cost would represent an increase of less than 1 percent over the total cost if the cap is not raised. Granting the raise would reduce Federal outlays for the first 3 years because executives at the pay cap would not retire and replacement salary costs would be avoided.

Our analysis did not consider several other important factors such as the value of executives' experience, training, and morale, but if quantifiable, they would serve to enhance the cost effectiveness of raising the pay cap.

We trust that this letter is responsive to your request and will assist the Congress in evaluating the merits and cost effectiveness of lifting or raising the executive pay cap.

Sincerely yours,

CHARLES A. BOWSHER,
Comptroller General.

Mr. STEVENS. Mr. President, let me state that and I will welcome the comments of my distinguished colleague from Virginia who I understand wishes to cosponsor the basic amendment but not the amendment to the amendment, and I ask unanimous consent that he be listed as a cosponsor of the basic amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN. Mr. President, will the Senator yield for a question?

Mr. STEVENS. I yield. I see my friend on his feet.

Mr. BIDEN. Could it be interpreted that a vote against the pay raise for Congress would be a vote to encourage Senators to retire? Could it be interpreted that way because as I understand it, the Senator just said that if in fact a Senator were to retire today he or she would get out from under this cap. Is that correct? That may be one way for Democrats to get back in the majority if we can encourage a number of Senators to retire.

Mr. STEVENS. I say to my friend, the amazing thing is those of us who have

this retirement, and I am one of them, by the way—I am at that age where I could retire with 20 some odd years in Government.

Mr. BIDEN. I am being facetious. I have a serious question.

Mr. STEVENS. We now have this situation strangely that Members should consider: Does the Senate realize that for the first time since reconstruction days there are 54 Members of this body who have not been reelected? There are 54 Members who have served 5 years or less. A majority of the Senate is in its first term. Let us put it that way.

The disincentive of pay is here as well as in the executive branch because we have had a higher number of resignations and retirements in the last 10 years than in the prior history of the Senate.

It is an interesting thing, but it is true, and I will be glad to document that for the Senator if he wishes.

Mr. BIDEN. I do not doubt it. It was a very interesting comment.

Mr. STEVENS. It is.

I assure the Senator that I do not believe that is enough incentive for me to retire and give him a chance at my seat.

But I do think this, Mr. President, and again I wish to yield to my good friend and will in just a minute, that the Senate must address the problem of the executive branch.

Here we are increasing the expenditures of the Department of Defense literally by billions of dollars and yet the Department of Defense is increasingly being run from the level of grade 14. I have two charts here that I invite Members of the Senate to come by and look at, or I will have them copied if they wish.

Here is the inner grade pay compression within the Department of Defense. Here is a chart that has been prepared. It is a chart showing the flow of command, one might say, in two areas of the Department of Defense; it shows that the same rate of pay is received by the research psychologist or a research analyst that is being received by the Chairman of the Joint Chiefs of Staff, and we can go through 10 levels of the Department of Defense in terms of responsibility.

What incentive is there for a person here who has reached a level of compression grade 14, step 10 to ever accept a promotion to accept the increased problems?

In our committee we had hearings on the effects on the FBI. An agent transferred from Las Cruces, N. Mex., to New York City, actually faces a reduction in compensation as far as his total take-home pay for his family when one considers the commuting cost, the increased cost of his housing in the New York area, the longer hours that he spent working at a job of more intense responsibility. His family suffered and he suffered. Yet he could get no increase in compensation by taking that increased responsibility.

I think the worst problem we face is in the area of scientific and technical competence. Here is a functional pay compression chart that demonstrates 13 levels under the Assistant Secretary of Research, Development and Logistics in the chain of command of the Department of Defense, and if Senators examine this, they will find some of them vacant, and it is obvious why. It is because the person down here at the bottom of the chart receives the same pay as grade 14 step 10 as the person at the top, the principal Deputy Assistant Secretary for Research and Development, and, incidentally, the job is vacant and has been vacant for some time. Obviously, this is why we have had a brain drain and we have had a period of time with this massive hemorrhage as far as the midlevel career people who are retiring. They know they can get promotions and they can get increased compensation in the private sector and take care of the needs of their developing families, their young families, which they cannot expect to achieve in the Department of Defense.

I am not saying all these people retiring are receiving $50,000. Do not misunderstand me. They are the people who reached the level of $35,000 and $40,000, and they see that if they stay for 10 or 15 or 20 years more they would get an increased compensation over that period of time of $10,000, where most of them can go into the private sector now and get the increase of $10,000.

I really think that it is time that we address this problem.

And let me address the second one just briefly and tell Senators that the first vote I cast in the Chamber in 1969 was a vote on the new bill that changed the salary structure, and I was an appointed Senator and everyone said, "If you vote for that you will never come back."

I wish to tell Senators I do not think with all of the hullabaloo around it people really are as concerned about the votes for increased compensation for Members of Congress as they are concerned with the results of what we do.

I think it is time for us to recognize that we are a changing, evolving body, and there is disincentive for continuation of service here.

I can name any number of people who came to the Senate with me who have already voluntarily retired, and each one of them is receiving in terms of compensation more money than Senators are now.

That is a fact. There is a disincentive here now to come to the Senate because we still live under a pay cap, and apparently until we change it we will continue to live under a pay cap. We will have a continually depressed rate of compensation as compared to the rest of the economy.

I do not know of any way to defend it in terms of the actions of the Congress in the past except to say we have linked together the rate of compensation in the executive branch and the rate of compensation of the Members of Congress, and I am asking you today to uncouple that, to vote first on the Members of Congress and then to vote on the executive pay change, and I hope——

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. STEVENS. I will yield for a question.

Mr. MATHIAS. I really want the Senator to yield for a comment because I think the Senator from Alaska has taken a courageous position here and not an easy position.

What is clear is that you can hire cheaper people, there is not any doubt about that, whether you are talking about the civil service or whether you are talking about the Congress. You can hire people cheaper than at the present rate, let alone the rate after some decent cost-of-living adjustment.

But whether you get better people or whether you get people who are as good or whether you get the kind of quality that the American people expect in their public servants is another thing.

What I hear the Senator from Alaska saying is that the American people do not necessarily want cheaper employees. They want qualified and competent employees, and if they are going to get them there has to be comparability with the private sector market, and that is all he is saying.

Mr. STEVENS. That is all.

Mr. MATHIAS. I think, it seems to me, if we are deaf to his argument the losers here are going to be the American people whose business has to be handled by less competent, less qualified, and less experienced people. So let us pay the bill and get the service we are paying for.

Mr. STEVENS. Let me just say one more thing and then I will yield the floor.

The effect of the second amendment, I call your attention to the fact that it wipes out the accrued 25-percent increase in congressional salaries which would take place if this continuing resolution is not enacted by midnight on November 20th. The pay cap expires on November 20th. The accrued increases that Members of Congress are entitled to are approximately 25 percent. This amendment says the cost-of-living increase granted to those Government employees who are not capped, the 4.8 percent, will be extended to Members of Congress. But all of those in the past are wiped out, that they can never come into effect if there is a period when a continuing resolution is not passed at the precise time as required by the preceding continuing resolution.

I hope the Senate realizes that that is a substantial change, one I think that makes sense if we are to grant the 4.8-percent pay increase, and I hope the Members of the Senate will consider very seriously the impact of their vote on the congressional pay increase as far as the House is concerned in view of their past rejection on at least three occasions of the adjustment, the cost-of-living adjustment, for the executive branch. They have refused to do it unless we made some provision for a cost-of-living adjustment for Members of Congress.

Mr. President, I yield to the Senator from Virginia.

Mr. WARNER. Mr. President, I wish to commend my distinguished colleague from Alaska and to join him as cosponsor of his amendment in the first degree.

I can speak with some firsthand experience with respect to the Department of Defense, having served in that Department for over 5 years in two of the senior policy level positions.

I worked right alongside the individuals, many of whom have left already, regrettably, as a consequence of this pay compression problem.

Frankly, I have maintained associations with the remainder, a constant dialog, in the 3 years I have been in the Senate, and I have joined in every opportunity to see what we can do to remove this pay compression because they have informed me, and I have clearly verified their cases, that we are suffering more in terms of our national defense through the departure of these valuable people, particularly in the technical areas and in the areas of intelligence, than we are in cuts in dollars for programs in national defense. We are losing the talent we need to make America's defense work.

Mr. President, the intelligence field is not the only area of Government service where this problem exists. In every area of Government management we face a crisis. At a time when we talk of increasing incentives for effective, imaginative management, when we are preoccupied with problems of the economy, energy, and defense, we are losing our best managers. Further, we are failing to attract the most qualified people to higher executive service.

Since 1977, the highest level Federal executives have received only a 5.5-percent pay increase. Other white-collar Federal employees have received increases totaling 3.5 percent. Yet, the cost of living has risen 55.2 percent.

Time and time again, when I meet with senior level Federal managers and when I talk with individuals who have been asked to accept service in the senior levels of our Government—because of their particular expertise I am told: "Do something about the salary, and I may consider it."

We ask these people to live in the third most expensive city in the country. We ask them to devote 14 to 20 hours a day in service to their country. We ask them to accept a salary well below what they could earn at a comparable job in other sectors of the economy. And we further restrict them by limiting their outside income.

Recently I received several letters from my constituents expressing their concern and frustration at their plight as senior level Federal managers. I share their comments for the edification of my colleagues.

From Falls Church a man writes:

Senator, you must not allow this unfair situation to continue. During the past four years we have been voted COLA's totalling 21.6 percent, but have been denied every cent, while other employees—including Congressmen have been given relief.

From Hume, Va., a man writes:

The country apparently wants and is going to get less government, but I think what it does get should be the best available. In my 36 years in government, I have never seen morale so low, and I am in defense. Unless a substatial increase is provided in the pay ceiling, we are going to end up with a very mediocre civil service, whatever size it may be.

Finally, from Herndon, Va., comes the following:

Since 1977, the purchasing power of the senior executives has fallen by 32 percent. During the same time the private sector executive salaries have increased by 49 percent. A New York executive recruiting firm . . . pointed out that if one's gross income in 1981 is $50,000, the annual raise needed just to keep pace with inflation is $7,610. Retirement rates of career employees at the pay ceiling who were eligible to retire in 1980 soared to 67 percent. It is higher in the fields of engineering, science and medicine. Recruiting qualified persons from the private sector to fill these vacancies is next to impossible.

Mr. President, George Washington, himself a man of means, in his annual message of 1796 urged Congress to improve the pay scale for officers of the United States, lest we—

Contract the sphere within which the selection of characters for office is to be made, and . . . proportionately diminish the probability of a choice of men able as well as upright.

Otherwise, he feared, we would,

Virtually exclude from public trust, talents and virtue unless accompanied by wealth.

President Washington's words were as true then as they are today. I urge my colleagues to listen to Washington's wisdom and support this amendment.

● Mr. CHAFEE. Mr. President, a pay raise for Members of Congress is inappropriate and unwarranted. Just 2 months ago, Members of Congress voted themselves benefits over and above their salary. I do not believe that these changes—lifting the limit on outside earned income and removing the $3,000 tax deduction—would have been made had Members known that they would be receiving a pay raise.

We are now debating budget cuts for many Government programs, and, unless we act soon, will be facing the inability of the Federal Government to pay its bills. Voting ourselves a pay raise under these conditions is unconscionable.

I do, however, support a pay for the Federal executives whose salaries have been capped by congressional fiat.

The loss of qualified and experienced personnel in the Federal work force is a severe—and no longer quiet—crisis.

The artificial pay cap placed on high-level Federal executives causes a number of problems. First, it is difficult to attract top-notch people to Government service.

Since 1977, Federal level executive pay has increased 5.5 percent. During this same period, comparable private sector pay has increased by 25 percent. general schedule civil service pay has increased by 32 percent, and the Consumer Price Index has gone up 45 percent.

Second, it inhibits ambition. Seven grades of high-level civil service are now paid the same. Each year the pay cap is in effect, more grade levels bump up against the pay ceiling. Without the incentive of a pay raise, these people are becoming increasingly reluctant to accept the additional responsibility or the need to relocate that a promotion may bring.

Finally, the pay cap provides an incentive for executives to retire early. As of March 1980, 75 percent of Federal executives who were at the pay cap, and who were eligible for retirement, did so. This results in an incalculable loss of both experienced and knowledgeable talent within the Federal Government. In addition, it costs the Federal Government a significant amount of money.

For each Federal executive who retires, the taxpayers must not only pay for a replacement—who may or may not be as skilled and experienced—but they also pay the pension of an executive who in many cases would prefer to have remained on the job. And all because Congress is unwilling to grant these people the pay raise that a variety of commissions and studies have documented that they deserve.●

Mr. PROXMIRE. Mr. President, I want to ask my friend from Alaska—I do not want to detain the Senate any longer—but as I understand it this year we have already acted to lift the honoraria limitation?

Mr. STEVENS. Yes.

Mr. PROXMIRE. No. 2, we also acted to eliminate the $3,000 limitation on expenses Members of Congress incur in Washington?

Mr. STEVENS. Yes.

Mr. PROXMIRE. Those have been the expenses which have been construed by some to be worth $10,000 or $12,000—maybe that is an exaggeration, but it is a substantial amount?

Mr. STEVENS. It is an exaggeration. It would be about $15,000 maximum as a deduction, which has the equivalence of what, $5,000 in terms of actual impact. But I agree we have acted on that also.

Mr. PROXMIRE. We acted on the $5,000 then or $6,000, whatever it is, plus lifting the honoraria and on top of that we have a 4.8-percent increase in our pay that would go into effect when?

Mr. STEVENS. December 1.

Mr. PROXMIRE. December 1.

It seems to me, Mr. President, that this is excessive under the circumstances, and I hope we will not approve the second amendment I think the amendment the Senator from Virginia just spoke in favor of makes sense, and I certainly will vote for that. But to move ahead with our own pay under the circumstances, with a very short debate, and having already acted so favorably on our income earlier this year seems to me to be excessive.

Mr. STEVENS. I want to say this: to a new Member of the House or Senate the honoraria are meaningless. They do not even get a request to make such appearances at a dinner for a while.

So far as expenses away from home, that, too, is not as important until you have moved your family and have been here for a while. So, I think the pay increase has more to do in attracting new qualified people to the Congress more than anything else that I know.

Mr. President, I ask for the yeas and nays on the amendment to the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Is it in order, Mr. President, to also ask for the yeas and nays on the basic amendment?

The PRESIDING OFFICER. That would require a unanimous-consent request.

Mr. STEVENS. I do ask unanimous consent that we have a rollcall vote. I ask unanimous consent that it be in order to order a rollcall vote on the basic amendment, the amendment in the first degree.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. STEVENS. I now make that request.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WARNER. Mr. President, I thank my distinguished colleague from Wisconsin for his support of the basic amendment.

I think here is one statistic that each Member should bear in mind before he casts his vote on the basic amendment, and that is that since 1977 the highest-level Federal executives received only a 5.5-percent pay increase. Other white collar Federal employees have received increases totaling 33.5 percent in that same period of time.

Mr. President, I yield the floor at this time.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Oklahoma (Mr. NICKLES) are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. NICKLES) would vote "nay."

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present, and voting, the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Hawaii (Mr. MATSUNAGA) would each vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 5, nays 90, as follows:

[Rollcall Vote No. 403 Leg.]

YEAS—5

D'Amato	Mathias	Stevens
Inouye	Murkowski

NOT VOTING—5

Byrd, Robert C.	Leahy	Nickles
Goldwater	Matsunaga	

So Mr. STEVENS' amendment (UP No. 665) was rejected.

Mr. STEVENS. Mr. President, I am saddened by that result because of the feeling that I know exists in the Congress about decoupling executive pay and congressional pay. But I hope now that the Members of the Senate, having given this overwhelming signal that we will not raise congressional pay, will join us now in giving an overwhelming signal to the House that we do want pay increase in the executive structure. A number of people are leaving; there are resignations and retirements. It is really overwhelming, the problems being faced. I know some Members in the past have voted against this amendment but I plead with Members to vote for the executive pay decoupling on this second amendment.

Mr. BAKER. Mr. President, I support the first-degree amendment. I oppose the second-degree amendment. I do not think it is institutionally possible for Congress to adjust its salary, at least at the moment, but I think we have to get on with the business of making it possible to retain competent people in the upper levels of Government. Therefore, I urge Members to support this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. PROXMIRE. Mr. President, let me just say a quick word on this.

I enthusiastically support the Stevens amendment. I think we should recognize that it is not going to cost the Federal Government a nickel. The Senator from Alaska has pointed out that we shall lose money, actually lose money, if we do not pass this kind of amendment to retain the people we have. Otherwise, they retire; they get more when they retire and we have to hire others to take their place. The logic is very clear for supporting the Stevens amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Oklahoma (Mr. NICKLES) are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. NICKLES) would vote "nay."

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting the Senator from Hawaii (Mr. MATSUNAGA) would vote "yea."

I further announce that if present and voting, the Senator from West Virginia (Mr. ROBERT C. BYRD) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 54, nays 41, as follows:

[Rollcall Vote No. 404 Leg.]

YEAS—54

Andrews	Hart	Packwood
Baker	Hatch	Pell
Baucus	Hatfield	Proxmire
Bentsen	Hayakawa	Quayle
Boschwitz	Hollings	Randolph
Chafee	Inouye	Rudman
Cochran	Kassebaum	Sarbanes

NOT VOTING—5

Byrd, Robert C.	Leahy	Nickles
Goldwater	Matsunaga	

So the amendment (UP No. 664) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, in order to clear the situation for the Sena-

tor from Alaska to offer a minor amendment that has been cleared on all sides, I ask unanimous consent that the pending motion by Mr. BRADLEY to reconsider be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, as comanager of the bill I set aside the technical amendment pending on the committee amendment in order to receive an amendment from the Senator from Alaska.

UP AMENDMENT NO. 666

(Purpose: to obtain from the General Services Administration the services of a professional archivist)

Mr. STEVENS. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 666.

At the appropriate place in the resolution, insert the following:

SEC. . For each fiscal year (beginning with the fiscal year which ends September 30, 1982), the Secretary of the Senate is authorized to expend from the contingent fund of the Senate such amount as may be necessary to enable the Secretary to obtain from the General Services Administration the services of a professional archivist. Such services shall be obtained on a reimbursable basis and shall not be obtained except with the consent of the General Services Administration and the Committee on Rules and Administration.

Mr. STEVENS. Mr. President, this is a technical amendment. It is in the legislative portion of the bill.

I have discussed it with the chairman of that committee. I understand it has been cleared on both sides. I hope he will agree with this.

It does give the Secretary of the Senate the right to use existing funds to pay a trained archivist from the Archives to deal with the official papers of the Senate strictly on a reimbursable basis with the consent of the head of the Archives and the Rules Committee.

Mr. MATTINGLY. Mr. President, it has been approved by both the majority and minority leaders of the legislative branch.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 666) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I ask unanimous consent once again to lay aside the pending motion for reconsideration in order to take up another amendment.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, as floor manager of the bill, I set aside the pending committee amendment in order to take up an amendment by the Senator from Nevada.

UP AMENDMENT NO. 667

Mr. CANNON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment wil be stated.

The assistant legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) proposes an unprinted amendment numbered 667.

Mr. CANNON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the joint resolution, add the following new section:

SEC. . Notwithstanding any other provision of this joint resolution, the funds made available by this joint resolution shall not be subject to any limitation contained in section 324 (amendment 99) as set forth in the conference report and the joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriations Act, 1982 (H.R. 4209), filed in the House of Representatives on November 13, 1981 (H. Rept. No. 97-331).

Mr. CANNON. Mr. President, this is an amendment to the adoption in the resolution of the conditions agreed to in the DOT appropriation conference report. Included in that conference report is a provision which tells the Civil Aeronautics Board they must, let me repeat, must provide U.S. airlines antitrust immunity for joining an international cartel to engage in ratesetting by agreement among companies. I want to be sure that each Senator understands that this resolution at present demands cartel pricing.

This is a clear case of unwarranted and uninformed legislating in an appropriation bill. Worse yet is the fact that it is being done by a committee which has not held one day of hearings on the subject and has no expertise whatsoever in international aviation.

The real issue on the vote, however is not the arguments over the merits of this CAB order. Indeed the order is not effective until January 15, and the new CAB chairman has said he intends to review the issues involved in the case before that time. The question we must ask ourselves is, Can the Appropriations Committee do whatever it pleases in other committees' jurisdictional areas? I intend to say they must stick to appropriations and not legislatively expound on some other subject.

The Commerce Committee and the Aviation Subcommittee have not acted on this individual order because the CAB has been properly exercising its authority in this complex case. The CAB has devoted 4 years of careful consideration by experts. The appropriations conference took less than a few minutes to negate what had taken the experts years to decide, and they ask the Senate to endorse their conclusion.

This restriction on the CAB is opposed by the administration, it is opposed by the CAB, it is opposed by the chairman of the Commerce Committee which does properly have jurisdiction, it is opposed by the chairman of the House Aviation Subcommittee, and it should be opposed by all those who believe in free market competition. But, most important, this amendment should be supported by all Senators who believe in committees of the Senate confining their legislative activities to areas under their jurisdiction and expertise.

Mr. President, I yield the floor.

Mr. PACKWOOD. Mr. President, I wonder if the Senator from North Dakota will yield for two or three questions that I wish to propound?

Mr. ANDREWS. I am glad to yield to my colleague.

Mr. PACKWOOD. I wish to make sure I understand what this amendment does before I speak further.

The Civil Aeronautics Board at the moment, am I correct, has an order outstanding that will go into effect on January 15 prohibiting U.S. airlines, and I use that in the generic sense, from participating in the price-fixing mechanism of the International Air Transport Association?

Mr. ANDREWS. The Senator is correct.

Mr. PACKWOOD. And this portion of the bill, would prohibit the Civil Aeronautics Board from, in essence, putting into effect that order.

Mr. ANDREWS. The Senator is correct.

Mr. PACKWOOD. I ask what the reasoning of the Appropriations Committee was for this inclusion?

Mr. ANDREWS. I point out to my colleague that as a member of the Subcommittee on Appropriations I have to inform the Senator that this was a provision not of the Senate bill but of the House bill. This was put in as a floor amendment in the House of Representatives. When we went to conference with the House of Representatives, as we pointed out in our conference report, we were faced with this amendment that was an accomplished fact in the House version.

We then took the amendment in the conference report because the House was determined to retain this amendment, however, we put in language that certainly should give the Senator from Oregon and the Senator from Nevada total confidence in our deferring to the appropriate authorizing committees. We say in the conference report that we go along with the House language that none of the funds shall be used to implement the order, and then we add this language, and this is the only language that I had anything to do with adding:

Provided, That this limitation may be terminated by an appropriate resolution adopted by the House Public Works and Transportation Committee or the Senate Commerce Committee.

When you are faced with a conference with the gentlemen from the other body, Mr. President, and they decide they want to stick by an amendment that was adopted on the floor in that other body, and you are able to modify that amend-

ment by saying it will be terminated through a simple vote of either the House authorizing committee or the Senate authorizing committee, I think the Senate conferees made a darned good deal.

I would like to point out to my colleague and good friend from Nevada that under this conference agreement he has only to convene his Senate Commerce Committee, get a simple majority vote negating this, and he has overcome the language the House put in.

When you are trading horses for horses I think we got about two for one in that particular agreement, and I think the authorizing committee is totally supported in this conference agreement.

I would like to point out one other thing: That the Secretary of Transportation at the present time, Mr. Drew Lewis, has said that he has concern about not allowing the American airlines to participate in IATA. I might also point out to my colleagues from both sides of the political aisle that his predecessor, Brock Adams, the former Secretary of Transportation, in an article in today's Washington Post, points out the disadvantage to American airlines by not being allowed to participate in IATA. This is indeed an issue that is of considerable importance, but we have protected, I would point out to my friend from Oregon, the prerogatives of the Senate authorizing committee by the language I just read which we had inserted into the conference report.

Mr. PACKWOOD. Mr. President, if I could continue on, I appreciate the answer to the question by the Senator from North Dakota. I am overwhelmed by the generosity of the Appropriations Committee that is giving to the Commerce Committeee the right to do that which it already has the right to do absent this legislation.

For 3 years the Civil Aeronautics Board has been working on the issue as to whether or not American consumers who fly are better served by American airlines' participation—and again I do not mean that in the name of an individual airline but all airlines generically—in participation in an international fare price-fixing device or whether the consumers are better served by the competition that this order will move them toward.

The Senator from North Dakota made reference to the Secretary of Transportation having some concern. Indeed he has some concern, but not enough, that the administration is going to attempt to stop this order. This order is going through. The Commerce Committee is well aware of the situation. It is one that we have followed for a lengthy period of time. There are a few airlines in this country that fly international routes that like the price-fixing mechanism of the International Air Transport Association. The only time that association ever manages to lower transatlantic fares is when some charter airline comes along and lowers the fares, and they have to lower them, the rest of the airlines, to meet this competition.

Mr. President, not only is this, in essence, legislating on an appropriation bill, although I am not going to raise that point of order because I realize it says "No money shall be used for" et cetera, et cetera, but, in essence, it is legislating on an appropriation bill. In essence, it is legislating an issue that the Commerce Committee watches closely, is well aware of, and we have decided not to act to stop the Civil Aeronautics Board from issuing this order because we think they are going in the right direction, and the direction is that consumers will be treated better and will get lower fares and better service if this order is issued than if it is not.

So, for a variety of reasons, whether it be the committee's jurisdiction, whether it be conspiracy in price-fixing or whether it be a concern for the consumers in the amount of money they pay to fly principally on transatlantic routes, I would urge that you support the amendment of the Senator from Nevada.

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. As the chairman of the Aviation Subcommittee, it grieves me to have to disagree with the ranking minority member of the Commerce Committee, whose expertise in aviation matters I regard highly.

But I am supportive of the Transportation Subcommittee's approach, and I agree with the Senator from Oregon that that right does exist.

On the other hand, they have very carefully spelled that out, if indeed there is a problem.

Unfortunately, the competition in and freedom of trade routes do not exist in the international market as it does in our domestic market, and until we can give some careful thought to working out agreements in a better way than so far we have, by just opening the door, I believe we need to adopt the approach which will give us more time to carefully study the effect of the competition in the international market.

It is true that there are some carriers that are quite concerned because they have been losing a great deal of money in the competition that exists. Many of our foreign competitors enjoy a freedom which we do not enjoy, and I think this is an approach that at this time will be beneficial to our own international aviation industry.

Mr. CANNON. Mr. President, if I may respond very briefly, the statement was made concerning Mr. Lewis, the Secretary of the Department of Transportation. I have here a letter signed by Judith T. Connor, Assistant Secretary for Policy and International Affairs, dated November 9, 1981, which says:

> Since the board took action on the President's letter of September 11, 1981, postponing the effective date until next January 15, the Levitas amendment would appear to be unnecessary at this time. Therefore, this department requests the deletion of the amendment from the bill to be reported by the conference.

The Levitas amendment is the amendment that is in question here.

Also a letter from Dan McKinnon, Chairman of the CAB, dated November 10, 1981:

> The Board is working with DOT and the State Department to assure our aviation policy will best serve the overall public interest. Adoption of the Levitas amendment will tie the hands of the Board and the administration in setting our international aviation policy at a time when we must preserve our flexibility to deal with our trading partners.
>
> We ask you to join the Board and the administration in opposing the Levitas amendment and allowing the process of international aviation policy formation to take the carefully considered course that it should.

That pretty well explains what the position of the administration is, Mr. President, and I simply say that what we are talking about here now is the jurisdictional aspect, and the amendment should be defeated on that ground and not try to decide a policy matter where no hearings—no hearings, I repeat—have ever been held by either House through a committee that has jurisdiction in this matter to justify this action.

Mr. ANDREWS. Mr. President, again let me urge the defeat of this amendment. I am glad my colleague from Nevada has a letter from the administration saying we should oppose the Levitas amendment. I find it a little strange that the administration writes to someone who is not a conferee on that particular point to take out the Levitas amendment, and sent no letter whatsoever to those of us who are conferees.

In fact, the conversation that I had, Mr. President, with the Secretary of Transportation was that what we had done is not inconsistent with the administration's desires and the administration's decision.

Mr. CANNON. Mr. President, will the Senator yield?

Mr. ANDREWS. I yield.

Mr. CANNON. The letter was not a letter to me. It was to Norman Y. Mineta, Subcommittee on Aviation of the Committee on Public Works and Transportation in the House.

Mr. ANDREWS. Again, when the administration is taking a position on an amendment that has been put on an appropriation bill it seems strange that they would write to a House member of the legislative committee. No one gave us this position. The only position that we have is one from the administration saying they felt what we achieved in conference is an excellent way of resolving the situation.

The last letter we had from the administration comes from the spokesman for the administration, Mr. David Stockman. Granted, it was written back in the middle of September. He pointed out that the administration has not yet developed a position on the CAB's action.

Let me point out, however, Mr. President, to my colleagues, that this administration bill we are now considering is one that includes many facets of our Government operation. I have no doubt, Mr. President, that we are going to be debating the resolution into the wee small hours of tomorrow morning.

I might point out to my colleagues that this language that is being objected to by my good friend from Nevada and my good friend from Oregon did not originate with those of us in the Senate Appropriations Committee. In deference to the House Appropriations Committee, it did not originate with the members of the House Appropriations Committee. It was an

amendment put on in debate on the floor of the House. And it was an amendment tenaciously held to by the conferees that sat across the table from us during that conference.

Now, if we want to delete the action that we took and change it, that will give us another hour, hour and a half, 2 hours worth of conversation with our House conferees when we eventually take this continuing resolution to them in conference.

What for? That is the thing that bothers me. Why, Mr. President, do we need this amendment when we quite carefully put into the conference report the language I mentioned a moment ago, that this limitation may be terminated by an appropriate resolution adopted by the House Public Works and Transportation Committee or the Senate Commerce Committee?

Might I point out again to my good friends and colleagues from Oregon and Nevada: Go back to your Senate Commerce Committee, hold a simple majority vote, if the votes are there in the authorizing committee where you do in fact have the expertise, and you resolve the problem. We are not bound by the language of the authorizing committee. We got, I think, a darn good bargain with our colleagues on the other side of the aisle.

Perhaps, I am ill-advised or not quite totally informed, but it is difficult, Mr. President, for this Senator, as one of those conferees—and I am sure that feeling is shared by my other colleagues who were in that conference from both sides of the political aisle—to understand what we would gain by adopting this amendment, other than to exacerbate one more point of difference between ourselves and the House conferees when we finally take this overall bill back to conference.

Mr. President, since protection is here very clearly set out for the proper authorizing committee and since it is a modification of an amendment adopted by the other body on the floor, I would urge my colleagues to vote against the amendment so we do not have this bill further cluttered up with an amendment that will do I think little good and raise considerable problems.

Mr. PACKWOOD. Mr. President, I am not struck by the logic of the argument that this amendment should be turned down to ease the burden of the conferees. Under that theory, the best thing the Senate Appropriations Committee could do would be to adopt the House appropriation bill and the conference would take almost no time at all. We would not even have to have a conference—do not let this Senate work any will; do not make any differences with the House; do not make any differences with the Senate Appropriations Committee. The principal function of this body is to make the conference easier. Well, that is not the principal function of this body. And of all the arguments that have been raised, I would hope that would not be the one to dissuade this Senate to vote against this amendment.

Mr. ANDREWS. Mr. President, maybe I did not make myself clear. I have stressed twice what the agreement was which we made with the House. I am not saying that we have to yield to the House position. But might I point out to my colleagues that if we strike the language we put in, we go back to conference with no guarantees whatsoever that we can get as good a deal as we got in this particular conference.

The thing that amazes me is why my colleagues on the Senate authorizing committee would object to the total protection they are given by the accommodation, Mr. President, we were able to strike with our colleagues from the House.

If this amendment, as proposed, is adopted and we go back to conference, there is no guarantee whatsoever that we can achieve the protections of the Senate legislative committee that is in the language that is being objected to now by the members of that Senate legislative committee.

That is the concern that this member of the conference has and that is the concern I would point out to my colleagues.

Mr. PACKWOOD. Will the Senator yield?

Mr. ANDREWS. I am glad to yield.

Mr. PACKWOOD. Was this language from the House in the continuing resolution?

Mr. ANDREWS. This language from the House was in their House-passed bill on the transportation appropriations. We have folded into the continuing resolution the complete text of the conference held between the House and the Senate conferees in the Subcommittee on Transportation. This is in that conference report. It does reflect agreements that we were able to work out in conference and stands as it would have stood as a conference report had we brought it back on that separate individual appropriations bill.

Mr. PACKWOOD. But it was not in the continuing resolution as it came to us?

Mr. ANDREWS. It is folded in by reference to the conference report on the transportation appropriations bill.

Mr. PACKWOOD. I want to know about the language of the amendment, as to whether it is in the continuing resolution as it came from the House.

Mr. ANDREWS. No, it is not.

Mr. PACKWOOD. It is not in the continuing resolution.

Mr. ANDREWS. Because, might I point out to my colleague, the conference had not been held in time for the House to put it in the continuing resolution. Had the conference on the transportation subcommittee been held on a day early enough to have it included in the continuing resolution, it would have been included in their text of the continuing resolution.

Mr. PACKWOOD. I want to make sure I understand this. If this amendment passes, and is stricken from this bill and you go to conference with the House on the continuing resolution, will this language be in either bill?

Mr. ANDREWS. The Senator's amendment would be a subject of the conference which could be changed by the conferees.

Mr. PACKWOOD. But that language is not in their continuing resolution. And if this passes it will not be in our continuing resolution.

Mr. ANDREWS. Under the unique situation that we are handling this continuing resolution, given the problems of time——

Mr. PACKWOOD. I want to know about conferenceability when it would not be in either resolution.

Mr. ANDREWS. Conferenceability, in my judgment, would be that conferees can do most anything they set their minds to, as my colleague and good friend knows. It is my feeling we would have considerable jeopardy going to that conference.

Mr. PACKWOOD. Are we agreed that it is not in the resolution as it came from the House?

Mr. ANDREWS. It is not in the resolution that came from the House because the conference had not yet been held.

Mr. PACKWOOD. Then, Mr. President, I would like to rest my case on the hope that we stick with the rules that bind conferees, which is when there is nothing in either bill touching on the subject from either House, the conferees do not add language beyond the parameters of what their House has done. This language, this amendment is not in the continuing resolution. And if we defeat it here, it will not be in our continuing resolution. And I would make the point that it is not subject to conferenceability in that circumstance.

Mr. ANDREWS. Mr. President, in conclusion—and I know the Senate wants to vote—let me make this point: The Senator's amendment would be a part of our continuing resolution as it went to conference. It would, therefore, be a conferenceable item. I think we struck a good deal in the original conference. I think the Senator's committee was well protected. During this debate, no one has pointed out where we failed to protect the interests of the Senate Commerce Committee. And I would hope that the amendment would be voted down because I think it would extend the time of the conference and make a more difficult situation out of one that I think has been resolved.

Mr. D'AMATO. Mr. President, as a member of the Transportation Subcommittee and a Senate conferee on the transportation appropriations bill, I must speak out against this amendment.

The transportation appropriations bills which have been passed by both the Senate and the House would prohibit the enforcement of a CAB order dealing with American carriers' participation in the International Air Transport Association. The International Air Transport Association consists of 114 carriers from 90 countries. The reason both the Senate and the House took action to prohibit the enforcement of the CAB order, which prevents our carriers from participating in this conference, is to help our international carriers which are presently suffering staggering losses.

Why must our carriers be able to participate in this association? The answer is simple. They need to participate to survive. Pan Am has lost over $320 million in the first 9 months of 1981. Its

problems are illustrated by the fact that it needed to sell property in New York and a hotel chain to minimize its losses. Participation in this association will allow our carriers to assure that they recover their fair share of their costs, particularly on interlined routes. For example, airlines frequently interline passengers; that is, one airline will take a passenger part of the way, where the other airline will pick him up and take him to his final destination. At the IATA conference, the percentage of the interlined fare which will go to each carrier is discussed. The fact is that when TWA did not participate in this conference, out of a $500 fare which was interlined with KLM Airline, TWA recovered only $50; this in spite of the fact that TWA took the passenger across the Atlantic while KLM transported the passenger a far shorter distance.

IATA is not a price-fixing cartel. No member is forced to accept any fare. In fact, the CAB still retains the authority to approve fares, and can disapprove them if they feel they are unreasonable.

Mr. President, in the report that accompanies our transportation appropriations bill, we specifically state that:

> The free market of our U.S. environment does not exist in international markets—and while our own international carriers are in dire financial straights, not withstanding their efficiency edge, foreign carriers continue to expand and acquire equipment.

While foreign carriers are subsidized by their governments, what this amendment proposes to do is to affirmatively hinder our own international carriers.

The Senate authorizing committee has neither held hearings on this issue nor reached a concensus on this matter. The fact that an amendment is coming to the floor today without a committee position indicates a lack of concensus. Mr. LEVITAS, chairman of the Subcommittee on Investigations and Oversight of the Public Works and Transportation Committee has conducted extensive hearings on this subject. It was he who introduced the measure in the House which would prohibit the CAB from enforcing its order.

I fully support the efforts of the Senate Commerce Committee to hold hearings on this issue and take testimony from our beleaguered international carriers which are in terrible financial shape. Until that occurs, and until this country develops a coherent international aviation policy, we must let the determination of the Appropriations Committee stand. We must defeat this measure.

Mr. PACKWOOD. I would hope, Mr. President, that if this Senate strikes this down it will infinitely improve our bargaining position with the House and they have nothing. And if you struck this down, and I would hope on this Senate floor this amendment passes, that indeed our conferees would stand firm and they would say the Senate does not want this in; that our floor has acted; your resolution does not have it at all; and they would pass it.

Mr. CANNON. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The question is on agreeing to the amendment of the Senator from Nevada. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY (when his name was called). Present.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from New York (Mr. MOYNIHAN) would vote "nay."

The PRESIDING OFFICER (Mr. MURKOWSKI). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 60, nays 35, as follows:

[Rollcall Vote No. 405 Leg.]

YEAS—60

Armstrong	Garn	Nickles
Baker	Glenn	Nunn
Baucus	Gorton	Packwood
Bentsen	Hart	Pell
Biden	Hayakawa	Percy
Bradley	Heflin	Pressler
Bumpers	Helms	Proxmire

Eagleton	McClure	

ANSWERED "PRESENT"—1

Humphrey

NOT VOTING—4

Byrd, Robert C.	Leahy
Goldwater	Moynihan

So Mr. CANNON's amendment (UP No. 667) was agreed to.

Mr. CANNON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will please come to order.

Mr. CANNON. Mr. President, will the Senator yield so I can make a motion to reconsider?

Mr. HATFIELD. I yield.

Mr. CANNON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, as we have been trying to move in an orderly way through these amendments, I have at this time about 24 amendments that I know of. We are trying to list these amendments in accordance with the requests made by the movers of the amendments.

So at this time I again ask unanimous consent that we temporarily lay aside the pending motion for reconsideration, in order to proceed with other amendments.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HATFIELD. Mr. President, as a comanager of the resolution, I hereby lay aside the pending committee amendment, in order to clear the deck for other amendments.

I yield to the Senator from Connecticut (Mr. WEICKER), who is next on the list. He is to be followed by Mr. METZENBAUM, then Mr. BYRD, Mr. PELL, Mr. DURENBERGER, Mr. SASSER, Mr. BRADLEY, Mr. BUMPERS, Mr. HATCH, Mr. SPECTER, Mr. DECONCINI, Mr. JEPSEN, and Mrs. HAWKINS. Those are the names I have received thus far.

Mr. LEVIN. Mr. President, will the Senator yield before yielding to the Senator from Connecticut?

Mr. HATFIELD. For what purpose?

Mr. LEVIN. For the purpose of adding an amendment to that list.

Mr. HATFIELD. I cannot hear the Senator.

The PRESIDING OFFICER. The Senate will be in order.

Mr. LEVIN. Mr. President, I think others in the Senate should be informed of this, in all fairness.

I do intend to offer an amendment which would transfer the money we have in the bill, the DOD bill, the number of which is in this bill, from the B–1 bomber to readiness accounts, particularly restoring the Indian Ocean presence, restoring the Army.

I expect to debate that amendment at great length, and in the event it is tabled, I would make the same arguments on the bill itself.

I thought it only fair to my colleagues to know in advance that the issue raised here is really the basic issue of whether the continuing resolution can, in fairness to the country and the Senate, be for a full year. That will be extensive debate, and I want to warn as many of us as are on the floor and can hear that I intend to do that when my turn comes.

Mr. HATFIELD. Then, the Senator is requesting a position on this pecking list?

Mr. LEVIN. I am.

Mr. HATFIELD. I also say, for the information of Senators, that the latest information I have from the leadership is that, considering the constriction of time under which we are working, we will pursue and persevere and finish this continuing resolution tonight, tomorrow morning, or whenever; because, as we act upon these amendments this afternoon and all day today, we are sending them to the House staff people, so that we can have the paperwork done in the morning,

in order to go to conference with the House on this continuing resolution tomorrow afternoon, and thereby await House action and, following that conference, take the final action on the Senate floor, which we hope will not be pressing us against the midnight hour.

Mr. LEVIN. I understand what the Senator is saying, in his usual genteel way, and I accept it. I am saying, in the same genteel way, that because of the impact of that process on our appropriations process, I intend to do what I can, as one individual, to stop this from happening—what the Senator has just described—so that we can preserve the historic appropriations process in Congress, and not ship the purse down Pennsylvania Avenue to the White House.

Mr. HATFIELD. I urge the Senator to seek a seat on the Appropriations Committee at the first opportunity. We would welcome his kind of service.

Mr. PRYOR. Mr. President, will the Senator yield?

Mr. HATFIELD. I yield.

Mr. PRYOR. I thank the distinguished chairman for yielding. I, too, should like to have on the list an amendment that I plan to offer to this measure.

Mr. HATFIELD. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. HATFIELD. For what purpose does the Senator from Arkansas wish me to yield?

Mr. PRYOR. I should like to inform the distinguished chairman and my colleagues that I also have an amendment, which will deal with disapproval of the MX missile. I do not know how much debate this is going to take, but I do think that the MX missile decision, as of October 1, needs a full debate, one that assures that both sides are heard on this issue.

I do have an amendment that will be at the desk at the proper time asking disapproval of the MX missile.

Mr. HATFIELD. All right. I will reserve a slot for that amendment.

Mr. GLENN. Mr. President, will the Senator yield for a question?

Mr. HATFIELD. I yield.

Mr. GLENN. Mr. President, with regard to the Levin question, there was a mood around here awhile ago, as I understand it, to try to get an agreement on a date certain beyond which we would not go because the Department of Defense appropriations bill passed separately would then supersede the continuing resolution.

My question is, Was there an agreement arrived at pursuant to that?

Mr. HATFIELD. No, there has not been an agreement arrived at.

Mr. LEVIN. Mr. President, will the Senator from Oregon yield on that point?

Mr. HATFIELD. I am happy to yield for a question.

Mr. LEVIN. I wish to respond to the Senator from Ohio. I do not believe an agreement has been reached. I think an agreement will be reached on this point. It will not, however, eliminate the basic problem which is that unless these issues are resolved on the continuing resolution, because there will be a continuing resolution, as projected, that goes clear around, it will not make any difference what we do on the appropriations process. We will be substantially stripped of legislative power in the appropriations process.

So I wish to assure the Senator from Ohio that I am not going to stand in the way of that agreement being reached on the DOD appropriation bill coming up next Monday.

I hope it does, but that does not answer the basic problem that has been outlined here for the last 2 days.

Mr. GLENN. Even though in the appropriations process once we pass that bill it would supersede the continuing resolution?

Mr. LEVIN. That assumes that the appropriations process becomes law.

If the amendment which was originally designed by Senator HOLLINGS and others is adopted which says that no money for the MX or the B–1——

The PRESIDING OFFICER. There is entirely too much conversation in the well.

Mr. HATFIELD. Mr. President, when we get the amendment up and begin the debate at that point we could expedite, I think, the whole process.

I now yield to the distinguished Senator from Connecticut who has three in one, I believe, to be followed back to back.

Mr. MATHIAS. Mr. President, will the Senator from Connecticut yield?

Mr. WEICKER. Mr. President, I yield a minute here to our distinguished colleague from Maryland.

UP AMENDMENT NO. 668

(Purpose: To appropriate $60,000,000 for the reconstruction, resurfacing, restoration, or rehabilitation of the Woodrow Wilson Bridge.)

Mr. MATHIAS. Mr. President, on behalf of the Senator from Maryland (Mr. SARBANES), the Senator from Virginia (Mr. WARNER), and myself, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Maryland (Mr. MATHIAS), for himself, Mr. SARBANES, Mr. WARNER, and Mr. HARRY F. BYRD, JR., proposes an unprinted amendment numbered 668.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the Joint Resolution, add the following:

SEC. . (a) Notwithstanding any other provision of this joint resolution, there is appropriated out of the Highway Trust Fund $60,000,000 to be available until expended for the reconstruction, resurfacing, restoration, or rehabilitation of any bridge on the Interstate System which is owned by the United States Government and which is located in two States and the District of Columbia. Such sum shall be available for obligation in the same manner and to the same extent as if such funds were apportioned for the Interstate System under chapter 1 of title 23, United States Code. The Federal share of the cost of any project for such reconstruction, resurfacing, restoration, or rehabilitation shall be 100 per centum.

(b) The Secretary of Transportation may approve any project for the reconstruction, resurfacing, restoration, or rehabilitation described in subsection (a) whenever the two States concerned and the District of Columbia submit to such Secretary for approval appropriate plans, specifications, and estimates for such project. The Secretary of Transportation shall, prior to approval of such project, enter into an agreement with such States and the District of Columbia for future maintenance and rehabilitation of the bridge.

(c) In making any revised estimate of the cost of completing the Interstate System, which estimate is required by section 104(b)(5)(A) of title 23, United States Code, to be transmitted to the Congress after the date of enactment of this Act, the Secretary of Transportation shall not include any costs for any bridge eligible for approval under subsection (a). The Secretary shall reduce apportionments made under section 104(b)(5) of title 23, United States Code, to such States or District by an amount, if any, equal to amounts apportioned under such section to any such State or District with respect to any such bridge for any fiscal year ending before October 1, 1981. The reduction, if any, made by the preceding sentence for each State or the District shall be made out of apportionments under such section to such State or the District, beginning with the apportionment for the fiscal year ending September 30, 1983, and shall be made, in equal shares, over the number of fiscal years in which apportionments described in the preceding sentence were made.

Mr. MATHIAS. Mr. President, I would like to offer an amendment to the continuing resolution which would authorize the Federal Government to provide the funding for the reconstruction of the Woodrow Wilson Bridge across the Potomac River. The bridge, as everyone knows, connects the Maryland and Virginia sides of Interstate 95, the major north-south artery along the heavily traveled east coast.

Under normal circumstances, I would not attempt to add an amendment of this nature to a continuing resolution, but the urgency of the situation requires immediate action. The potholes on the bridge are so bad that unless the bridge is reconstructed, it will have to be closed. You can actually look down through some of them and see the Potomac River flowing to the Chesapeake Bay. If we do not take action now, interstate truck traffic will have to be curtailed from Maine to Florida, causing east coast interstate commerce to suffer major dislocations.

My legislation is consistent with the will expressed at one time or another by both Houses of Congress for 100 percent funding. During the 96th Congress, the House included a similar measure in the Surface Transportation Act of 1981, which never achieved final passage in the Senate. In the 97th Congress, the Senate has already included the measure in the Federal Highway Improvement Act of 1981, which has passed the Senate but is not expected to be taken up by the conference in time to solve the problem.

Present cost estimates for the total project are $60 million, but it is important to note that this amendment will not appropriate new funds. It simply authorizes the release of funds from the highway trust fund.

The bridge is owned by the Federal Government. In fact, it is the only fed-

erally owned interstate bridge. The responsibility, therefore, for keeping this vital link in the interstate system open and safe devolves on the Federal Government.

The States of Maryland and Virginia and the District of Columbia have no legal responsibility to invest local funds into this reconstruction project. They have shown their good faith, however, by sharing the maintenance cost over the years. And over and above the call of duty, they have also put up the design money so the reconstruction project could proceed without delay.

When the bridge first opened in 1961—I can remember it well because it was during my first term in Congress—it represented a landmark in the Interstate Highway System at a time when the system was in its infancy. Since then, it has proved to be a linchpin of the east coast Interstate System, and that is the problem. Traffic on the Woodrow Wilson Bridge has grown at such a fast pace during these 20 years that it now carries 104,000 vehicles daily, including both commuters and long-distance travelers. Twenty years ago, it carried 20,000 to 25,000 vehicles daily. This heavy use has taken its toll. The structure has significantly deteriorated throughout the concrete deck portion and has become a safety hazard. Hence, the need for the legislation, which will bring the bridge up to the standards of safety and design applicable to all bridges under the Interstate Highway System.

If we do not act swiftly, I am afraid that we could be faced with a major disaster in the very near future. If any of my colleagues have any doubts, I invite you to take a trip over this federally owned bridge with me anytime. I urge my colleagues to approve this amendment.

Mr. President, this amendment simply repeats what the Senate already did the other day in providing for the repair of the Woodrow Wilson Bridge.

I am offering it to the continuing resolution reluctantly, but I feel that it is urgent that we do so because we might lose a Member of the Senate due to holes in the bridge.

One can look down and see the Potomac River flowing gently and serenely to the Chesapeake Bay. I would not like to see a Member of the Senate following the course of the river.

So under those urgent conditions, we are offering this amendment. It simply repeats what the Senate did by authorizing the repair of the bridge.

Mr. WARNER. Mr. President, I join with my colleague and we appreciate the indulgence of our colleagues here. This is a life and death situation.

Mr. SARBANES. Mr. President, I am pleased to join in cosponsoring the amendment offered by my colleagues, Senators MATHIAS and WARNER, to provide the funds necessary to begin the urgently needed reconstruction of the Woodrow Wilson Bridge. This amendment incorporates the essential features of S. 459, legislation which I introduced earlier this year and which was included in the highway bill recently passed by the Senate.

The Woodrow Wilson Bridge connects the Maryland and Virginia segments of I-95 and serves as a vital link in the Interstate Highway System. Since the bridge first opened in 1961, traffic over the bridge has increased from 21,000 cars and trucks daily to over 100,000 daily. This heavy use has caused significant deterioration in the roadbed and substructure. It has now reached the point that the condition of the bridge is a matter of serious safety concern. In fact, due to its badly weakened condition, the bridge may have to be closed to heavy truck traffic before the end of this winter. Should this occur, the current truck traffic would have to be rerouted, resulting in a disruption of commerce up and down the east coast.

The Federal Government is sole owner of the Woodrow Wilson Bridge and, as such, clearly has ultimate responsibility for it. Since the bridge was opened, the jurisdictions of Maryland, Virginia, and the District of Columbia have carried out an agreement to assume joint responsibility for routine maintenance and operation of the bridge. Thus while the Federal Government has retained ownership of the bridge and ultimate responsibility for it, the three local jurisdictions have expended more than $450,000 annually for routine repairs and operating expenses. The bridge can, unfortunately, no longer be sustained with routine maintenance, but needs instead to have its deck totally rebuilt.

The amendment before us provides for an undertaking by the Federal Government to bring the federally owned Woodrow Wilson Bridge up to the standards of safety and design applicable to all bridges in the Interstate Highway System. In light of the serious safety problems already existing, and considering the pressing need for the bridge to remain open, I would urge that this amendment be enacted promptly so that the urgently needed rehabilitation work can begin.

Mr. ANDREWS. Mr. President, the logic and eloquence of our three fellow Senators is totally convincing, but let me add one other thing.

We checked this out with the Transportation Department and the Department of Transportation earlier today told me as we restructured the amendment it fits in fully with the program of the Department.

We have no objection to the acceptance of the amendment.

Mr. MATHIAS. We are grateful to the Senator.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. MATHIAS. I yield.

Mr. PROXMIRE. Has this a dollar figure?

Mr. MATHIAS. Yes; $60 million.

Mr. PROXMIRE. $60 million.

Mr. MATHIAS. Yes.

Mr. PROXMIRE. Is this an additional $60 million?

Mr. MATHIAS. No; this is no additional budget cost because it comes out of the highway trust fund. It is purely the designation out of the fund.

Mr. ANDREWS. Might I assure our colleague there is no additional cost in this bill. This is an earmarking of highway funds for an emergency situation.

This bridge, might I point out to my colleague from Wisconsin, is a unique structure. It is the only bridge on the Interstate Highway System that is still owned by the Federal Government because of the importance of evacuation and movement around the Capital area. Therefore, there is a special relationship. The need is urgent.

As our colleague from Maryland points out, he would not want to lose one of his colleagues. I suspect more importantly, he would not want to lose one his constituents. Neither would we.

So, there is no additional cost.

The Senator from Florida (Mr. CHILES) agrees that this is a needed project. We hope we can have the concurrence of our friend from Wisconsin.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the Senator from Virginia (Mr. HARRY F. BYRD, JR.) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. May we have a vote?

Mr. HATFIELD. I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maryland.

The amendment (UP No. 668) was agreed to.

Mr. MATHIAS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, I ask for the attention of our colleagues as I intend to send to the desk three amendments.

The PRESIDING OFFICER. The Senate will please come to order. Conversation in the well will please cease.

The Senator from Connecticut.

Mr. WEICKER. Mr. President, I shall send to the desk three amendments. The first deals with special education grants to the States.

The PRESIDING OFFICER. The Senate will please come to order.

The Senator from Connecticut.

Mr. WEICKER. The second deals with vocational rehabilitation, and the third deals with low-income energy assistance.

It is my intention to discuss these amendments, spending only a few minutes on each. Certainly anyone else desiring to speak can also do so. Then I shall ask for the yeas and nays and when the yeas and nays occur that they occur back to back on these three amendments.

UP AMENDMENT NO. 669

(Purpose: To increase the appropriation for State grants for Education of the Handicapped Act)

Mr. WEICKER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is the Senator asking that they be considered en bloc?

Mr. WEICKER. No.

I first ask that the amendment relat-

ing to special educational grants to the States, some additional $69 million, be stated.

Mr. SCHMITT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SCHMITT. Is there a unanimous-consent request made that these amendments be considered en bloc?

Mr. WEICKER. No.

The PRESIDING OFFICER. There has been no unanimous-consent request that they be considered en bloc. The Senator has not made that request.

Mr. WEICKER. I do not wish them to be considered en bloc.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER), for himself, Mr. STAFFORD, Mr. HATCH, Mr. RIEGLE, Mr. KENNEDY, Mr. RANDOLPH, Mr. WILLIAMS, Mr. JACKSON, Mr. PELL, Mr. HUDDLESTON, Mr. LEVIN, Mr. BAUCUS, Mr. LEAHY, and Mr. CRANSTON, proposes an unprinted amendment numbered 669.

Mr. WEICKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution add the following new section:

SEC. . Notwithstanding any other provision of this joint resolution, there is appropriated $69,800,000 for section 611 of the Education of the Handicapped Act which is in addition to amounts appropriated under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, as reported to the Senate on November 9, 1981, for such section 611.

Mr. WEICKER. Mr. President, I offer this amendment on behalf of Senators STAFFORD, HATCH, RIEGLE, KENNEDY, RANDOLPH, WILLIAMS, JACKSON, PELL, HUDDLESTON, LEVIN, BAUCUS, LEAHY, and CRANSTON.

My amendment seeks to increase the funding level for the special education basic State grant program from the Appropriations Committee recommendation of $900 million, to the level contained in the budget reconciliation bill of $969.8 million, as an increase of $69.8 million.

Public Law 94–142, the Special Education for All Handicapped Children Act, requires States to provide handicapped children with a free, appropriate education. The special education basic State grant program authorizes Federal funds for State and local grants to help the States pay for the excess cost of providing this special education, and I emphasize the word "help."

While Public Law 94–142 is a Federal law requiring that disabled youngsters receive the special education services they require to grow to their full potential, the fact remains that in this fiscal year the Federal Government paid for less than 9 percent of the cost of those special education services.

Even with my amendment we will be lucky to hold the line at 8 percent of the cost. Without my amendment, the result will be increased costs to the local and State school systems and probably a reduction in the even now less than complete services provided handicapped schoolchildren.

The Public Law 94–142 program currently serves 3.9 million handicapped children, however the Department of Education estimates that there are upward of an additional 3 million disabled youngsters that require special education services. These children are either unserved or underserved; either not in school at all, or in a regular classroom and not receiving the special education they need.

While the paramount goal of Congress in enacting Public Law 94–142 was to make an appropriate education available to every handicapped child in the United States, most local education agencies interviewed in a recent GAO study admitted that they are not meeting these objectives due to a shortage of funds.

What a tragedy. What a waste of human talent. Are we going to say to the third, fourth, and fifth graders of today who are unserved and underserved that they must put their progress on hold until some time maybe in the future when Congress might have more money?

Let us consider President Reagan's recent remarks about this program:

The implementation of Public Law 94–142 was perhaps the greatest stride made to date toward a workable plan for the education of handicapped children. As President, I will work to insure that the Education for All Handicapped Children Act is a success.

We have come a long way since Congress enacted Public Law 94–142 in 1975, but it is not far enough. The strides we have taken are only a beginning, and we must continue to maintain our level of commitment to the disabled youngsters in our Nation.

Nearly a decade of progress in protecting the rights of handicapped children is seriously threatened if we agree to accept the funding being proposed for this program by the Appropriations Committee.

How can we turn our backs on the 3 million children waiting to be served, particularly in this, the International Year of the Disabled?

While $69.8 million does not even come close to meeting the purchase price of one single tank today, it will allow 325,000 more handicapped children to receive educational services next year. That is a little more than a quarter of a million children that will come a little closer to becoming taxpaying, contributing members of our society.

This small investment now will reap vast savings later in decreased institutionalizations and dependency on expensive welfare programs for this population.

Mr. President, we must all work together to see that our Nation's handicapped children find a productive and secure role in the American mainstream. Voting for the higher funding level that Congress supported in the reconciliation budget bill for Public Law 94–142 will insure that we do so.

In essence, Mr. President, what this does is to provide the States with the barest possible funds to enable them to continue their special education programs. Everyone of my colleagues knows that as we go into the competition for these reduced appropriations, the scramble for funds at the State and local level will be fierce. The people who are going to suffer are those in the minority, and in this sense "minority" means those who are mentally retarded, those who are the beneficiaries of the special education programs in their communities.

We have mandated something that even now we only pay a small percentage of the cost. It would be intellectually far more honest if we took Public Law 94–142 off the books. But do not leave the law on the books, funded at a level which is gong to be devastating to those who are the intended beneficiaries.

Let me say one thing more and then I will sit down on this amendment. These people cannot wait. It is not a matter of once the economy straightens out everything will be all right for them in a year or two.

The majority of the people benefited from these funds, if you let a year go by, if a week goes by or a month goes by, you have stopped the course of their existence for the rest of their lives.

So I hope we will bring the funding to the level that was approved and negotiated out, I might add, between the committee and the administration as it occurred in the reconciliation bill.

I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Connecticut.

Mr. SCHMITT. Mr. President, I did not know that the Senator from Connecticut had relinquished the floor.

The Senator from Connecticut knows that the subcommittee, as well as the full Appropriations Committee, has been very much aware and very much concerned about the basic grant program for education of the handicapped. We demonstrated this support, I believe, by recommending an appropriation of $900 million for this program, and we did that in the face of a total Labor, Health and Human Services, and Education budget which the administration has said officially is $3.2 billion over in budget authority and $2.6 billion over in outlays relative to the President's September request.

This overage is one of the major reasons why we are facing the threat of a Presidential veto on this continuing resolution, and potentially on the regular bill as we bring it forward in the legislative process.

As the Senator from Connecticut knows, I tried diligently to work out an arrangement within our committee where we could gain some control over discretionary programs of this kind by providing some very modest caps on entitlement programs. If the Senator has an enemy in this process it is the entitlements, and their unrestrained growth, which has made it impossible for my subcommittee, and for the full Appropriations Committee, to move to

the limit of its desires in the discretionary programs such as the basic State grant program.

The $900 million recommendation that is in the bill is an increase of $24.5 million above the fiscal 1981 level, an increase of $162.4 million above the amount that the March budget request would have been had this program not been included in the block grant; and an increase of $250.912 million above the administration's revised September budget request.

Mr. President, as you can see, and I hope our colleagues are aware, any way you look at the committee recommendation it is a substantial increase and a substantial commitment to the basic State grant program for the handicapped.

Let us put this a little bit in individual perspective, that is individual perspective relative to the student. The committee recommendation of $900 million will provide an average grant of roughly $225 per student for an estimated 4 million handicapped students. The revised recommendation as proposed by the Senator from Connecticut, adding $69.8 million to this total, would provide an average grant of roughly $242.50 per student; in other words, each student might receive an additional $17.50.

The committee recommendation, and another way to look at this, of $225 average per student represents 9.8 percent of the excess cost of the education of a handicapped child. The revised amount proposed by the Senator from Connecticut's recommendation of $242.50 would cover 10.6 percent of this excess cost, on the average.

The Weicker amendment adds a few dollars spread over the entire country, and for some individual children it could be significant. But it cannot be considered significant in the overall picture of handicapped education in the United States.

The Appropriations Committee is committed to this program. I hope Congress is committed to giving us the latitude to fund programs like this at a level that can be justified. But right now we have a different problem. At a time of balancing many, many different, competing interests, all with their very, very obvious desirability, it is the position of the Senator from New Mexico and, I believe, of the Appropriations Committee, that we have gone as far as we can go at this time on this particular program.

Mr. PROXMIRE. Mr. President, will the Senator from New Mexico yield?

Mr. SCHMITT. I yield.

Mr. PROXMIRE. Mr. President, I think all of us greatly admire the distinguished Senator from Connecticut. He certainly is a great champion of these causes. Nobody has worked harder for them than he has.

But let me point out the figures here that I think we ought to underline. The fact is that this is one of the very, very few programs that is increased in this budget, and it is increased from $874 million in fiscal 1981 to $900 million.

The President recommended $649 million, and this is an increase, the committee's recommendation is an increase, of almost 40 percent—think of that, 40 percent—of what the President recommended.

The distinguished Senator from Connecticut's amendment would make it about 50 percent over what the President recommended.

We have to, at the same time recognizing the great appeal of this kind of a program, recall that this entire effort by the Federal Government is only a few years old. It only goes back 5 years or more, and we have gone from nothing to almost $1 billion during that short period of time.

While I think my friend from Connecticut, of course, makes a very appealing case, and if the Federal Government has any responsibility, it should be to help the people who cannot help themselves—and this is certainly one of those programs—still we have enormously increased this program in the past. We go substantially higher than it was last year, and it represents an enormous increase, the biggest increase perhaps in the budget, certainly one of them, over the President's request.

Under the circumstances, I would certainly support the manager of the bill, the Senator from New Mexico, in his opposition to the amendment.

Mr. WEICKER. Mr. President, only figures that should be before this body are the following figures, which are that this program under Public Law 94-142 currently serves 3.9 million handicapped children. The Department of Education estimates there are upward of an additional 3 million children who are either not being served or are underserved. All my amendment does is to assure that 325,000 of those 3 million will be served.

Now at the present time, the Federal Government pays for less than 9 percent of the cost of these special education services. What do you think is going to happen under the present scheme of things when matters have to be resolved by the local school boards? You know very well who is going to be left standing out in the cold outside the schoolhouse. They already are, at too great an extent.

All this does is bring it to the reconciliation level, which, I might add, was the agreement arrived at between a group of Senators and the administration.

I would like to read to you the President's promise which was made during the course of the recent campaign.

I quote Ronald Reagan:

> The implementation of Public Law 94-142 was perhaps the greatest stride made to date toward a workable plan for the education of handicapped children. As President, I will work to insure that the Education for All Handicapped Children Act is a success.

Now it is not just his responsibility. It is ours also. Otherwise, take the law off the books, which will be obviously even a greater tragedy.

I plead with you, in the moneys that we allocate around here, I think this is a crucial program and the children it serves cannot wait.

I did everything I can to plead with the chairman of the subcommittee as to the need involved in this area. It was rebuffed at every turn. You will notice there is no early education money. It was knocked out. Do you know what that means? If a child does not get that education, you have permanently set the course of their life. Whatever knowledge or ability they have to perform is determined when they are 2, 3, 4, 5, 6 months old. And after reaching 5 and 6 years, the learning process diminishes.

We had to pick only a few areas so I could stand the greatest chance of success, and that is why I now come to you with a request for this money, which is divided among all of the States. These funds go to that segment of our society, the young people, and especially those who need our special care, that need the dollars the most. My gosh, this amount is not enough to buy even one landing gear on one of our more sophisticated flying machines.

I am sorry it could not be worked out in committee, but it could not because we always had to come to some bottom line figure. I do not care if there was only one life involved in this program, I would still be out here fighting just as hard. It is 325,000 lives, and even there we are falling short.

So I hope that my colleagues will see fit to pass this amendment.

Mr. SCHMITT. Mr. President, I am sorry that the Senator from Connecticut thinks that he has been rebuffed on these issues. If there is anyone that I tried to work with, and who in fact influenced the totals of the committee in the areas of his interest, it is the Senator from Connecticut, because I, and everyone else involved in this process, am sympathetic with what he is trying to do.

Rebuff, no. I think that is an unfortunate choice of words. But realistic about other competing interests of education, of student financial aid, of low-income energy and many, many other discretionary programs, there was no rebuff, just a balance.

The full amount for preschool incentive grants was provided, $25 million. The full amount authorized in reconciliation. That is the 1981 level. This is precisely the kind of program the Senator from Connecticut has in mind when he speaks of programs to aid very young, handicapped children. There was, throughout the committee's and the subcommittee's consideration, great consideration for the problems raised by the Senator from Connecticut.

I do not believe that the Senator is entirely accurate that there would be over 300,000 new enrollees in the program under the conditions of his amendment. I may have misunderstood. I believe that eligibility of students for this program is determined first, and then the grants are distributed on the basis of grant money available.

As far as a reconciliation level is concerned, Mr. President, there is no way that the Appropriations Committee, under the budget allocations given the individual subcommittees and under the constraints of the budget resolution, is going to be able to fund up to the reconciliation level in every program. We just cannot do that. Even having not done that, I repeat, Mr. President, relative to the September budget, the administration has officially said we are $3.2 billion

over in budget authority, $2.6 billion over in outlays.

I hope that the Senator from Connecticut, having made once again his points in such an excellent and articulate way, would recognize that the subcommittee is on his side. It has been on his side. He has, in fact, done far better than almost any other interest in our budget. I hope that he would withdraw his amendment and accept the fact that the sympathy is there and in the long run if we can gain control of the entitlement growth, these programs will do a lot, lot better than they will under the present circumstances.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I rise to support all three of Senator WEICKER's amendments.

I am pleased to be a cosponsor of the bi-partisan amendment offered by Senator WEICKER to insure minimally adequate funding levels for two of the most critical Federal programs which serve our Nation's handicapped members—the Education for all handicapped children act and the Vocational Rehabilitation Act.

Senator WEICKER's amendments are necessary to prevent denial of critical services to thousands of handicapped people.

Under Senator WEICKER's amendments funding for special education and vocational rehabilitation is still below the levels agreed to during reconciliation and which received the bi-partisan support of the overwhelming majority of the Labor and Human Resources Committee.

The $69.8 million addition to special education is necessary to maintain the 11 percent Federal share of the States' extra costs to provide a free, appropriate education to their handicapped children.

Without these additional funds, the Federal share will fall to somewhere around 8 percent.

We cannot afford to gamble that State and local school systems will pick up the slack.

The stakes of the gamble are too high. At risk are the lives of the 4 million handicapped children who, prior to enactment of the Special Education Act, were left unserved or inadequately served by State and local school systems.

Failure by the Federal Government to insure that every handicapped child is extended the same educational opportunities afforded to nonhandicapped citizens would have disastrous results:

It is clear that special education programs can mean the difference between an adult able to contribute to society and a person who is a burden to society. Research has revealed that failure to shoulder the cost of providing necessary services during the developmental years when significant changes are possible will result in increased costs in later years as handicaps intensify, dependency becomes a pattern and institutionalization is often the end result. The average cost of institutionalization is now $25.000 per year per person. The average cost of providing a year of special education services to a handicapped child is approximately $200.

I am very familiar with the special education programs. My own State of Massachusetts is one of the few States in this country that has mandated special education programs for the handicapped and the mentally retarded. It is a costly program. And yet, Mr. President, we can say that the people of the Commonwealth of Massachusetts, time in and time out, have refused to turn their backs on that program.

Once these programs are out and working and really benefiting the people and once people within these communities see how these children have developed, how they have been able to keep these children out of institutions, how the children themselves have been able to develop and be productive and useful members of the society, the value of the program becomes apparent to not only the families but to the communities.

The Senator from Connecticut has, I believe, outlined the case for these programs and what the implications will be without the Senator from Connecticut's amendment on special education. Senator WEICKER's proposed addition of $44.7 million to the vocational rehabilitation program is necessary to reduce the number of people who will be denied specialized job training and placement in remunerative employment.

Even with the amendment, it is estimated that 40,000 fewer handicapped people will be served during fiscal year 1982 then were served during fiscal year 1981.

But without the amendment, that figure will more than triple and over 125,000 disabled people will be denied the opportunity to become productive members of this society. The facts are clear. An adequate Federal investment yields greater income to Federal, State and local governments: An inadequate Federal investment results in greater costs for these governments.

According to the Rehabilitation Services Administration, the estimated total tax returns and savings to the Federal Government in fiscal year 1979 as a result of the vocational rehabilitation program was $270,600,000.

Further, our 1979 investment in the vocational rehabilitation program will be paid off in 4 years.

Finally, RSA estimates that the lifetime earnings for persons rehabilitated in fiscal year 1979 has increased by $11 for every $1 spent through the vocational rehabilitation program.

It is clear that an adequate Federal investment in the special education and vocational rehabilitation programs leads to a substantial savings over the long run in financial and human costs.

I think there are very few Members of the Senate that have had the opportunity, as I have, to talk to many of these young people who have benefited from the special kind of skills they have been able to acquire from this kind of vocational training and find that they are gainfully employed and able to provide for themselves, continue their education, and, in many instances, be outstanding students and outstanding members of their communities—opportunities that would have been denied them if it were not for the programs supported by the Rehabilitation Act.

Now, we can say—and I hear the argument made here on the floor of the Senate—that we are only cutting these programs back a little bit from our reconciliation levels. But the fact remains, Mr. President, that in many States that have developed effective programs, there are inefficient resources to insure that these programs would continue.

Mr. SCHMITT. Will the Senator yield just for a point of clarification?

Mr. KENNEDY. Yes.

Mr. SCHMITT. We are not cutting back these programs. We have added $24.5 million to the fiscal year 1981 level. This is a program that has fared fabulously compared to other programs in our budget. I just wanted to make that point clear.

Mr. KENNEDY. The fact is, in the real terms, we see reductions.

I am familiar with the fact that in the handicapped area the ax has not swung as deeply as it has in other areas which affect, in many instances, the same families.

What we have heard a great deal about is that they were going to do an evaluation of these programs, support the programs that are effective, and then cut back on the programs that are ineffective.

That has not been done, I daresay, effectively. What we have seen on the authorizing committee in our review of these programs is that they are effective and they are providing important opportunities for the individuals who benefit from them. The fact remains that unless the amendment of the Senator from Connecticut is accepted in order to maintain these programs, there will have to be additional taxes at the local or State levels, and I do not think there are many of us who are confident that that will take place.

I saw an article the other day that indicated there was not one Governor in this country who was advocating additional taxes, and I do not believe there are many mayors who are prepared to do so either. The people who will suffer are the ones who are the beneficiaries of these programs.

The final point that I would like to make, Mr. President, is on the fuel assistance amendment of the Senator from Connecticut.

I was here on the floor of the Senate when we heard all of the comments made that we would provide up to 25 percent of the windfall profit tax to benefit people, particularly the elderly, who live in the northern tier of States from being severely and adversely impacted by the cold weather. That was a commitment that was made by the Congress and by the President. Since the time that that legislation was passed, this body has been in full retreat.

The Senator from Connecticut, in his amendment, is at least trying to insure that the retreat will not be as dramatic and will not be as cruel and severe as it otherwise would be. Without his amendment, I understand that the effective

reduction would be approximately 40 percent in terms of reduction in real terms. That is what we have to talk about, real terms, not just dollars, because we know how the numbers can be altered. We have different estimates on the rates of inflation, but when we talk about the numbers of individuals who will be covered, we know what the loss will be in real terms to many individuals unless the amendment of the Senator from Connecticut is agreed to. I am hoping it will be, and I urge my colleagues to support it.

Mr. KENNEDY. One of the first targets of the Reagan budget-cuts was the low-income energy assistance program. Last year, this program helped 125,000 Massachusetts families meet the rising cost of winter fuel bills. Last year, $1.850 billion was spent nationally for energy assistance. Despite the fact that only half the eligible families in Massachusetts could be served with these funds, cuts have been proposed this year.

This year the administration asked for only $1.4 billion, ignoring the rising costs of energy. Just last July, Congress rejected this request and authorized $1.875 billion to be spent this winter in order to maintain the low-income energy assistance program at roughly last year's level. This level would mean over $75 million in direct assistance for 400,000 elderly and needy citizens in Massachusetts.

But the resolution reported by the Appropriations Committee ignores the congressional mandate of last July. The resolution before us would cut $225 million from the level authorized in reconciliation. The impact on Massachusetts' citizens would be devastating. The $10 million in lost aid would mean another 15,000 families would be without fuel assistance this winter. A third of these households have elderly residents.

This program has made an enormous difference in the lives of families in Massachusetts. I have visited homes in winter where blankets and newspapers were the chief means of keeping warm. The fuel assistance program has enabled our low-income and elderly citizens to live without fear of having their electricity and gas cut off.

It is unconscionable to accept reductions in the fuel assistance program just 3 months after we voted to give $33 billion in tax breaks to the rich and powerful oil companies. We cannot stand by while the heart is cut out of fuel assistance to the poor and elderly. I hope my colleagues will once again reject cutbacks in this vital program and support the Weicker amendment.

Mr. RANDOLPH. Mr. President, I am grateful to the chairman of the subcommittee handling this legislation. I am in support of the three amendments.

Mr. President, as a cosponsor of the amendment offered by the diligent Senator from Connecticut (Mr. WEICKER) I support the increase in funding for this vitally important program. The needs of handicapped children have too often been overlooked in this Nation's history; Public Law 94–142, the Education for all Handicapped Children Act, has attempted to address this continued neglect. The $69,800,000 provided by this amendment will result in improved special education services to the handicapped children of this country and will assist in locating many handicapped girls and boys who are not presently being served.

Mr. HATCH. Mr. President, I would like to speak in support of Senator LOWELL WEICKER'S amendment to increase appropriations to reconciliation levels for education of the handicapped and rehabilitation State grants. Both of these programs merit restoration of funding and deserve our careful consideration.

The education of the handicapped State grants finance part of the extra cost to State agencies for expenses incurred in educating handicapped children aged 3 to 21. Under current funding level, it cost each taxpayer only $6.86 this last year to educate nearly 4 million handicapped youngsters. In my mind this is not excessive. Besides, by partially supporting special education and related services, the Federal Government saved at least $15,000 per student or $60 billion total this last year by not institutionalizing these children plus they have the opportunity of becoming contributing members of society and possible future taxpayers.

The current Federal share for State grants is 11 percent. Without this amendment, it will fall to 8 percent and the difference will have to be made up by State and local school systems which are already facing serious financial difficulties.

Rehabilitation State grants finance training of disabled adults for employment in either a competitive or sheltered workshop environment. Even with the increase proposed, rehabilitation agencies will only be able to serve 1.000,976 persons, which is 38,429 fewer disabled than in fiscal year 1981 for a 3.7-percent decrease in services.

Based on allocations of $854,259, which is the Senate appropriations figure, 125,-300 fewer disabled will be served in 1982, which represents a 12.05-percent decrease in clients. This would be a serious mistake, since for every $1 invested by the Federal Government in the past for rehabilitation, $10.80 has been returned when the disabled became taxpaying employees.

Because of these and many other justifications that I do not have time to mention, I encourage my colleagues to vote affirmatively to accept Senator WEICKER'S amendment to restore funding for rehabilitation and education of the handicapped State grants. Without these additional moneys, our Nation will likely overlook some important needs of its largest minority—our 36 million handicapped individuals.

EDUCATION FOR THE HANDICAPPED

● Mr. RIEGLE. Mr. President, I rise in support of the amendments offered by the Senator from Connecticut to restore funding for education for the handicapped and for vocational rehabilitation programs to the levels passed by this Congress in the Omnibus Budget Reconciliation Act. These amendments offer the handicapped and disabled an opportunity to overcome their dependence by gaining knowledge and skills to achieve some independence and become more productive citizens.

When the Congress passed Public Law 94–142, we made a commitment to handicapped children and their parents to assist States in providing free adequate public education for all handicapped children who were previously forgotten and discriminated against in our public schools. We have achieved many successes since its enactment, yet we have such a long way to go before the goals of Public Law 94–142 are fully realized. During the last Congress in oversight hearings held by the Handicapped Subcommittee, we heard over and over that the cost of implementation was high and States were simply financially unable to meet the needs of all handicapped students as required by law.

The Weicker amendment would also restore funding for vocational rehabilitation to the level established in reconciliation. I fully support this effort. Vocational rehabilitation programs provide essential services to thousands of disabled and handicapped citizens throughout our country. Their goal is to provide a vehicle by which these individuals can receive support and assistance in their efforts to return to work and become active productive members of their communities.

With the help of counseling, vocational guidance and training, handicapped individuals are afforded the opportunity to establish their independence, develop skills and offer valuable contributions to our society. As a consequence, we all benefit from these programs, which have also proven cost-effective as they encourage self-sufficiency and often eliminate the need for costly institutionalization.

I urge my colleagues to supoprt both of these amendments.●

HANDICAPPED EDUCATION PROGRAMS

● Mr. STAFFORD. Mr. President, I rise to support of Senator WEICKER'S amendment to increase the State grant funding in the Education of All Handicapped Children Act from $900 million to $969 million. The additional $69 million will bring the appropriation up to the March reconciliation levels.

It is the Nation's responsibility to provide equal educational opportunities for its children and they should not become a victim of reducing Federal spending. It has always been my view that providing Federal funds to help educate our young people represents the best investment we can make with our dollars.

We must all have a clear understanding that handicapped children have a right to education at public expense, without reservation. Handicapped children have always had the same right as their nonhandicapped peers. But, it has taken a long time to win broad acceptance of that fact.

In 1954, in the historic decision in the case of Brown against the Board of Education, the U.S. Supreme Court said, in part:

In these days, it is doubtful that any child may reasonably be expected to succeed in life if he is denied the opportunity of an education. Such an opportunity . . . is a

right which must be made available to all on equal terms.

That, of course, was part of the decision in the landmark antisegregation case. But, it should be noted here that the Supreme Court made no qualification by race. The Court said: "Any child."

Between that time and 1975, when the Congress was writing the Education of All Handicapped Children Act, courts had acted in 27 States to specifically guarantee the protection under law implicit to handicapped children in the Brown case.

This legislation is designed to support the right of handicapped youngsters to an equal educational opportunity. Mrs. Donna Carpenter of Barre, Vt. in testifying before the Subcommittee on the Handicapped last year stated the following:

My son happens to be the first retarded child to be integrated into a regular classroom there. This setting which is the most appropriate and least-restrictive placement for our child is a model of which we are extremely proud. We owe this success to a finely tuned educational plan with all component parts in place, the availability of funds to implement the plan and the desire of our school personnel to make it work. In fact, as Jeremy looks ahead to entering a second-grade classroom this fall, with the support system in place, his individualized education plan ready, his education is not markedly different from that of his older brother.

Through the implementation of the act progress is being made. The number of children served now surpasses 3.8 million, according to the Department of Education's report to Congress on the implementation of Public Law 94–142: The Education of All Handicapped Children Act, 1980. The report states that between 1978–79 and 1979–80 school years, 43 States reported increases in the number of handicapped children in their annual child count. According to the report, there is increasing evidence that significant numbers of unserved handicapped children are to be found in regular classrooms in the Nation's 16,000 school districts. A national survey is presently being conducted to determine how many children are waiting to receive special education services. Because of the emphasis to place handicapped children in a public school classroom, where appropriate, out-of-school placements tended to decrease as new public school programs were created.

Back in 1976, the estimate was that only 40 percent of Vermont's handicapped children were being served. Today, the State says it is serving 99.94 percent of all its handicapped children. Youngsters served by special education programs make up 11.9 percent of Vermont's school-age population. In time, Vermont and all States, will be serving 100 percent of their handicapped students.

The benefits of this program far outweigh the amount of money the Federal Government puts into it. With the ability to share classrooms and educational adventures, handicapped children and their peers receive more than just academics. Education is a total learning process; it is a humanistic approach. Friends mean just as much to a handicapped child as anyone else. We can no longer restrict these children to friends who are handicapped or leave them without friends. To be a contributing member of society starts at school through the experiences we have and the people we meet. By integrating handicapped children into public school their nonhandicapped peers perceive them as individuals. Able-bodied children can learn to accept people with limitations.

Mr. President, I urge my colleagues to support this amendment. One cannot measure human progress in terms of dollars.

Mr. President, I ask unanimous consent that the following two letters be included in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

CAMBRIDGE, VT.,
June 8, 1981.

DEAR SENATOR STAFFORD: It has come to my attention that the education of my sister and many other children is under serious threat of extinction through President Reagan's plan to repeal PL 94–142. This bill has helped with my sister's education without which my sister would never learn to talk correctly.

You see this bill has enabled Julie my sister to start to learn to talk over again. She was born 80% deaf in one ear and 75% deaf in the other. Thus she learned to talk the way she heard sounds. Now with the help of PL 94–142 she is starting to talk over again with the help of the Ira Allen Essencial Early Education Center who depend almost totally on the funds provided by the Government. Without EEEC Julie might never learn to talk.

I know the pressure you must feel to vote this way or that, but please, for the sake of my sister and those like her who could not afford private teachers, vote down the ask for repeal.

My family could not afford to send Julie to private schools due to the fact that there are 12 children in my family. My father is only a chemistry professor at St. Mike's College in Winooski and he doesn't make enough money to pay for our taxes and food and mortgage, much less to send Julie to private school.

I have met Julie's classmates, all of whom are good little kids and many of whom need EEEC more than she does.

One of Julie's classmates is 7 years old and is confined and strapped to a wheelchair because of multiple sclerosis (MS). Two more of her classmates are severely mentally retarded. Julie is the one with the least physical problems, but she needs her teachers just as the rest do. The other children's families are not well off and need the EEEC to help their children live as normally as possible.

Please help us defeat the ask for a repeal.

Thank you for your time,

Your Fellow Vermonter,

MARY JANE KILLNER.

P.S.—I'm only 14 years old and all 12 of us live at home. I am the oldest girl. I have three older brothers and three younger. I also have five younger sisters, of whom Julie is the youngest. God Bless.

JUNE 10, 1981.

DEAR SENATOR: I am 9 years old and physically handicapped. In school I learn lots of neat things. I am also learning to be independent. I want to grow up to be a useful, taxpaying adult.

Please don't do away with 94–142.

Thank you,

SCOTT KIEFER,
Silver Spring, Md.●

The PRESIDING OFFICER (Mr. HUMPHREY). The Senator from Tennessee.

Mr. BAKER. Mr. President, it is my understanding that there is a series of three amendments to be offered by the Senator from Connecticut and this is the first one. There are two others. What are they on?

Mr. WEICKER. Vocational rehab and low-income energy assistance.

Mr. BAKER. There are no time limitations on any of those, but I would like to propose, Mr. President, and I have discussed this with the acting minority leader, that the vetoes be stacked on those three amendments; that each in turn, be set aside temporarily until all three have been debated, and that thereafter the first vote be 15 minutes and the two succeeding votes be 10 minutes each without, of course, intervening debate, point of order, motion, or other procedures.

Mr. SCHMITT. Reserving the right to object, I wonder if the distinguished majority leader could protect the right of the committee—and I am not saying we are prepared to do so—to offering tabling motions.

Mr. BAKER. Mr. President, the request was for the votes to occur in sequence.

Mr. CRANSTON. Will the Senator yield?

Mr. BAKER. Yes.

Mr. CRANSTON. It might be helpful for Senators who may want to get something to eat to agree on a time certain.

Mr. BAKER. Would the Senator from Connecticut be willing to agree to a time of 7 or 7:30 for the vote?

Mr. WEICKER. I am prepared to say that we will start the voting at 6:30.

Mr. BAKER. All right. Mr. President, I ask unanimous consent that the votes occur in the sequence I have just described beginning no earlier than 6:30.

Mr. SCHMITT. Mr. President, I cannot preclude the comments others may wish to make. That is 25 minutes from now, and we have two more amendments to discuss. I have no great amount of remarks to present yet, but I think 6:30 is pretty early.

Mr. CRANSTON. Why not make it 6:45? That will insure sufficient time.

Mr. WEICKER. All right, although I am prepared to spend no more than 5 minutes on each amendment, if that. I do not know how many there are who care to talk, but I do not want to waste time, especially if it is going to be a long evening anyway.

Mr. BAKER. Mr. President, I change my request to not later than 6:45.

Mr. President, before the Chair rules, I also ask unanimous consent that the time on the amendments be equally divided between the author of the amendment and the distinguished acting minority leader and his designee. Well, I guess it would be the manager of the bill and the acting minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Will the Senator yield me a few moments on the pending amendment?

Mr. WEICKER. I yield.

Mr. CRANSTON. I am delighted to

join in supporting the pending amendment by the Senator from Connecticut, which I have cosponsored, to increase, from $900 million to $969.8 million, the appropriation for the State grant program under Public Law 94–142, the Education of All Handicapped Children Act. This amendment would provide a funding level equal to that already agreed to under the Omnibus Reconciliation Act of 1981.

Under the Reconciliation Act we have already slashed billions of dollars from effective and critical social programs. As a result of fundamental flaws in the administration's economic policies, the President has asked for immediate, deeper cuts in these programs only months after proposing his initial budget targets.

In the area covered by the amendment by the Senator from Connecticut, the Federal Government clearly has an essential role to play. In providing funding for the education of handicapped students, the Federal Government is preserving its role as guarantor of minority rights. Nothing is more essential to the rights that we seek to ensure for all Americans than that of a basic education. Because there are handicapped children whose educational needs differ from nondisabled children, efforts must be undertaken to assure that this difference does not result—as it unfortunately has for too many years—in the lack of a fundamental education.

Mr. President, it is important that handicapped children do not have the additional handicap of an inadequate education. While there are many problems that continue to plague us in fully achieving the goals of the education of the all Handicapped Children Act, reducing the level of funding roughly of $50 million below the fiscal year 1981 appropriation—in real terms—which would be the result under the continuing resolution if this amendment fails—is not the way to solve these difficulties. Such a reduction would compound them.

Although there are areas in the Federal budget that can and must be cut, I strongly oppose the notion that it is necessary to cut essential programs like this one.

I would emphasize that grants for the education of handicapped children go directly into much-needed service programs to assist disabled children. These are not funds for nonessential activities rather, as I have already stated, these are funds for basic education.

Mr. President, I would also like to emphasize that the increase in funding proposed by my colleague from Connecticut is not an increase above that already agreed to in the Reconciliation Act.

In conclusion, I urge all of my colleagues—during this, the next to last month in the international year of disabled persons—to support this important amendment.

Mr. WEICKER. I thank my distinguished colleague from California for his very moving and very accurate remarks.

Mr. President, if there are no further Senators who desire to speak on this amendment, it is my intention to ask that we lay this amendment aside temporarily so that I may offer my second amendment on vocational rehabilitation.

UP AMENDMENT NO. 670

(Purpose: To increase the appropriation for States under section 100(b)(1) of the Rehabilitation Act of 1973)

Mr. WEICKER. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside and I now ask that my amendment relative to vocational rehabilitation, which is at the desk, be read.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER), for himself, Mr. STAFFORD, Mr. HATCH, Mr. RIEGLE, Mr. KENNEDY, Mr. RANDOLPH, Mr. WILLIAMS, Mr. PELL, Mr. HUDDLESTON, Mr. LEVIN, Mr. BAUCUS, Mr. LEAHY, Mr. CRANSTON, and Mr. THURMOND proposes an unprinted amendment numbered 670.

Mr. WEICKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution add the following new section:

Sec. . Notwithstanding any other provision of this joint resolution, the first paragraph relating to funds made available under this joint resolution which would otherwise be available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, as reported to the Senate on November 9, 1981, for rehabilitation services and handicapped research (contained in such reported bill on page 52, lines 2 through 10) is amended to read as follows:

For carrying out, to the extent not otherwise provided, the Rehabilitation Act of 1973, as amended, and the International Health Research Act of 1960, $991,845,000, of which $892,865,538 shall be for allotments under section 100(b)(1), $6,134,462 shall be for activities under section 110(b)(3), $650,000 shall be made available to the Navajo Tribal Council for activities under section 130, and $18,000,000 shall be for activities under section 711 of the Rehabilitation Act of 1973.

Mr. WEICKER. Mr. President, I offer this amendment on behalf of myself and Senators STAFFORD, HATCH, RIEGLE, KENNEDY, RANDOLPH, WILLIAMS, JACKSON, PELL, HUDDLESTON, LEVIN, BAUCUS, LEAHY, CRANSTON, and THURMOND.

My amendment sees to increase the basic State grants for vocational rehabilitation from the Appropriations Committee level of $854,259,000 to $899,000,000—an increase of $44,741,000.

Mr. President, vocational rehabilitation is a program which provides job training and other services to disabled adults to allow them to take their place in the working, producing segment of our society. It is a program half a century old which most simply stated works both in human and economic terms.

On the human side, let us for a moment consider the recent words of President Reagan's now confirmed choice for U.S. Commissioner of Rehabilitation Service, George A. Conn. Mr. Conn, himself disabled spoke with knowledge and conviction when he said:

> Never again can we expect disabled Americans to accept less than participation relative to the disabled individual's potential in any of life's daily activities. The long, difficult search for equity of opportunity will continue, grow, gain maturity, assume a responsible posture and contribute to the common good of this society beyond our most optimistic expectations.
>
> While there may be situations which appear to be setbacks along the way, there is no turning back. Our task is to utilize the best of modern techniques to improve habilitation, rehabilitation, placement, follow-up and evaluation services for disabled persons so that they may realize their greatest potential.
>
> And, having accomplished this, these citizens will have gained the dignity that comes with self-sufficiency independence and sound renumerative occupational experience.

Mr. President, can there be any doubt that what Mr. Conn says is accurate? Of course not, yet unless this amendment is approved, more than 120,000 disabled citizens will not receive vocational rehab services in fiscal year 1982. The "dignity" that Commissioner Conn speaks of will instead be the indignity that comes from dependence and unrealized potential.

If the loss in human terms is appalling, so also is the economic loss. It is estimated that, for every dollar spent in vocational rehabilitation, $11 will be earned by the person rehabilitated. In addition, the Congressional Budget Office estimates that an average $73 million a year is saved each year in AFDC, SSI, and State general assistance payments for persons rehabilitated in any one year. This figure does not include savings in medicaid and food stamps which obviously also occur.

My amendment will bring the amount appropriated for vocational rehabilitation State grants up to the level authorized in the Omnibus Reconciliation Act. It will not keep the program funded at last year's levels, as $120 million in SSI and SSDI payments for vocational rehabilitation will be lost. It will, however, allow us to do the very best we can under the Reconciliation Act to put disabled Americans to work and to allow them to be participating, contributing members of society—not just for their own good but for our own as a government and as a people.

I urge my colleagues to support this amendment.

Mr. President, let me say that vocational rehabilitation is a program which, fulfills the philosophy of the present administration in the sense that it is money spent in order to have those who are disadvantaged or disabled take their place within our society, be able to earn their way in that society and not be on the Federal dole. This program, as the one previously discussed, represents money invested that comes back manyfold in terms of what these very special people can produce within our society. If we do not want to spend this money, then, believe me, the cost of maintaining these individuals will be far greater, in the long run. That is one of the objections I have to much of the budget cutting that is being considered.

I understand budget cutting as long as the cuts are real to the extent that

what we cut today really means fewer expenditures tomorrow. But what we are doing here is illusory. We are taking a cut today and guaranteeing greater costs in the future. I hope that with the vocational rehabilitation program as with the special education program, we shall instead make the necessary investment.

Mr. President, I want to raise one point in the course of my debate with the distinguished Senator from New Mexico. I realize the difficult choices he had to make, but constantly, during the course of the debate in the Committee on Appropriations, the point was made that we, as members of that committee, had to look at the entire scope of appropriations rather than at individual programs. Yet, I think there are some choices to be made here on the floor as to what programs are important in our society.

Vocational rehabilitation is not a welfare program, Mr. President. It is not a handout program. It is a program that sets people on their own feet, gives them their rightful place within our society, enables them to earn their own way. In the course of doing that, it gives each one of us justifiable pride in how we view our neighbor in this country.

I urge my colleagues, again. to adopt this amendment. Again, Mr. President, let me say that, in the course of the discussions in the committee, it might have been possible to compromise out a million or two more. But that would not have done the job. I was never interested in just saying, "Well, I obtained some more money for vocational rehab," not if obtaining the additional dollars meant, say, cutting special education. I recognize the budgetary restraints and we tried to fall well within them. However, if anything meaningful is to be done in vocational rehabilitation, it has to be done at the levels I recommend in this amendment. I urge its adoption.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, the committee allowance now in the bill is the same as the House allowance, and maintains last year's level of $854 million for the vocational rehabilitation program. It provides vocational rehabilitation services to approximately 1 million handicapped individuals.

This again, Mr. President, is one of the very few programs not being cut below last year's appropriation, despite the budget request for only $768 million. That is, the committee's recommendation is already $86 million over the President's request.

Again, I think the commitment of the committee to the needs of the handicapped, for education as well as rehabilitation, is very clear. Unlike almost all other discretionary programs, these programs related to the handicapped have been held at or above the 1981 level.

There is nothing, Mr. President, to prevent States from increasing their share of funding contributions to this program. Right now, the Federal Government pays 80 percent of the cost, including the salaries of State employees who have administered the program. I ask you, if an additional $45 million, as proposed by the Senator from Connecticut—potentially less after conference because, again, we will be above the House if this amendment is accepted—and spread out among 50 States is going to make a substantial impact, will it make anywhere near the impact that could be made by reducing the administrative overhead costs of this program, improving efficiency and effectiveness, and attempting to serve more people at the current funding levels?

This is one program, Mr. President, where there is no income test. I am not saying there should be; nevertheless, we must realize that, unlike most of the programs that we are talking about in this budget, which are aimed at serving the disadvantaged, this program does serve even those who can afford to serve themselves.

This is not the only program providing vocational rehabilitation services for the handicapped. The Senate should remember that fact. In 1980, 88.5 percent of the CETA vocational training funds were spent for the handicapped, an increase from 6.6 percent in 1979. For all of CETA, this means about $320 million will be spent for training of the handicapped in fiscal 1982.

This is based on the Senate recommendation and is over and above the $854 million under discussion here specifically for vocational rehabilitation. Mr. President, that means that well over $1.1 billion is in this bill for vocational rehabilitation for the handicapped.

In addition, Mr. President, the committee recommended $680 million for State employment service agencies, which, by law, must give priority consideration to vocational counseling, referral to training, and placing handicapped individuals in permanent jobs.

Finally, Mr. President, I recite those facts relative to the committee's numbers to make it clear to our colleagues that the committee has not been oblivious to the needs of the handicapped and their vocational rehabilitation any more than we have been oblivious to the needs of the handicapped for education.

We have done far more than we have been given credit for by the submission of these amendments—and this in the face of a budget which is $3.2 billion over the President's September request in budget authority and $2.6 billion over the President's request in outlays.

Mr. CRANSTON. Mr. President, I support the amendment offered by my colleague from Connecticut (Mr. WEICKER), which I join in sponsoring, to increase from $854.3 million to $899 million, the appropriation level for the basic State grant program under the Rehabilitation Act of 1973. This amendment would provide a funding level equal to that already agreed to under the Omnibus Reconciliation Act of 1981.

In the area of providing rehabilitation services and counseling covered by this amendment as was the case in the Senator from Connecticut's earlier amendment on special education, the Federal Government clearly has an essential role to play. The Federal Government, in assisting the States to provide vocational rehabilitation counseling to disabled persons, is helping to assure the reality of the American ideal of equal opportunity for all of its citizens. The goal of assuring each and every American the rights to achieve self-sufficiency, and to contribute to a productive society on as equal a basis as possible in the workplace, represents one of the best examples of the critical role the Federal Government must continue to play.

Under the basic State grant program, States contribute a 20-percent match to the Federal allotment for providing essential services to help physically and mentally handicapped persons to become gainfully employed. If this amendment fails, States will receive an amount considerably less than the fiscal year 1981 appropriation—before taking inflation into consideration. Even though the amount contained under the continuing resolution for this basic State grant program is comparable to the amount appropriated last year, because State departments of rehabilitation received funds under two major programs in fiscal year 1981, but essentially only one in fiscal year 1982, the funds available to these State departments will be significantly reduced. Under the social security rehabilitation programs, the States received an additional amount of $124 million during fiscal year 1981 for providing basic rehabilitation services to Social Security Administration beneficiaries. These programs were repealed under the Reconciliation Act and replaced with new programs that almost eliminate entirely funds from this source for the State vocational rehabilitation agencies.

Mr. President, I also emphasize that the increase in funding proposed by my colleague from Connecticut is not an increase above that already agreed to in the Reconciliation Act. In conclusion, I urge all of my colleagues—during this, the next to last month in the international year of disabled persons—to support this important amendment.

Mr. WEICKER. Mr. President, I think it is necessary to point out why we return to these reconciliation figures and why this is an entirely different situation from that presented anywhere else in the budget.

The fact is that when it came to education and the various health care programs and special education programs and rehabilitation programs, it was necessary for the administration to sit down and compromise on the various differences between themselves and members of the Committee on Labor and Human Resources. Those negotiations went on for several weeks. Without them, no bill would have been reported. The specific beneficiaries were the education budget and the budgets which are under discussion here by virtue of amendments today.

So when the Senator from New Mexico says that we cannot fund these programs at the reconciliation levels, I would agree with him. I would not expect it to be done for everybody, but I would expect it for these programs because nobody else, or no other portion of the budget, went through the process that these portions went through several months ago.

When it comes to the adequacy of the amounts, they are not adequate. Never mind the inflation factor. We have cited the figures as to what is needed by the people involved, and they fall far short of what is going to be able to do the job.

So I say to the Senator that I am sorry you are discomfited by the fact that I say that these people and these programs have been rebuffed; they have been. You cannot have it both ways. If you want to balance the budget and you want to do it at the expense of these people, then so be it. You have your balanced budget.

I say the same thing to the rest of my colleagues. You cannot have it both ways.

These are expensive programs at the very outset, in terms of rehabilitation, in terms of special education. They are expensive at the outset. But in terms of total return, a dollar return, not even a human return, they are very inexpensive. There are no offsets in these amendments I have proposed.

I recall being in a debate with my good friend from North Carolina, Senator HELMS, several months ago, in which he tried to achieve additional funds for Gallaudet College—a very worthwhile amendment. I pointed out to him at that time that the tragedy of putting the disadvantaged and the disabled of this Nation into the arena and having them fight among themselves for the scraps being doled out by Congress and by the President is demeaning to all of us. I do not intend to do that here.

I do not intend to see those who need vocational rehabilitation and special education get their assistance at the expense of somebody else in the Nation who needs our special care.

If an additional $44 or $69 million unbalances the budget—and I think my colleagues know full well this is not what is unbalancing the budget—so be it.

I already have heard in Connecticut: "Well, Senator, you're being fiscally irresponsible. You're not going along with the President. You're not balancing that budget."

Well, I suppose that in this particular instance, it certainly is not part of the balancing act. But I am the one who has to go to those schools. I am the one who has to go to the hospitals. I am the one who has to talk to these people, and I cannot give them two messages, and I am not going to do it.

So, if every now and then I get nailed at a chamber of commerce meeting, believe me, it is far more rewarding to see what can be done to bring about useful lives in the schools and the other places where these very special people with their various infirmities convene.

No, I had a choice to make when this new round of budget cuts came up. It was to either accept a pittance and go along with the subcommittee, or whether to take a stand; and I felt I would rather take a stand. I might lose in the committee but let us get the matter out here on the floor and maybe even if there is a loss here, and I am not sure we are going to lose on all these amendments, but let the case be stated clearly in terms of when the American people have to pass upon what it is that we did.

In the case of those who are the beneficiaries of these programs, I am delighted to unbalance the budget in order that there might be some balance as to the worth of lives in this Nation.

Mr. SCHMITT. Mr. President, other members of the subcommittee and of the full committee made a different decision than the distinguished Senator from Connecticut, and that was to try to serve to the best of our ability all the interests that come under the jurisdiction of the Labor and Health and Human Services and related agencies appropriations bill.

If the Senator from Connecticut is trying to get me to take offense at his remarks, I will not.

I did not in the committee when similar remarks were made about the motivations and integrity of our efforts. I just would hope that he and others would remember that it is inflation that is the cruel hoax that is being played on the handicapped and all in this country, particularly those who can least afford to care for themselves.

We have allowed an unrestrained growth in the Federal budget and particularly in those areas of so-called entitlements, in the availability of loan guarantees and a variety of other low-interest loans, some with very great merit, but we have, as some have said recently, hemorrhaged for a decade or more until now we have imposed on the handicapped and we have imposed on all of our citizens an almost unbearable burden of inflation which is translated into absolutely unbearable burdens of high interest rates for many of these people.

There is where we have the problem but even in the face of that, the committee has recognized the unique needs of the handicapped. And I have said it before and I will say it again, in so recognizing we have stayed at or above the fiscal year 1981 levels, and we have ignored the well-meaning and understandable attempts of the administration to reduce these programs to even lower levels than those for 1981.

The administration is concerned and I guess overall we would have to say more concerned than Congress about inflation because they have asked us to do more than we have been willing to do. But in these areas we differed with their judgment, and I think correctly differed with their judgment, and in spite of the unfortunate remarks of the Senator from Connecticut about the motivations of the members of the subcommittee and the full Appropriations Committee we did take into account the very, very special needs of the handicapped.

I hope that our colleagues will recognize that and allow this committee and allow this subcommittee chairman to move forward to try to obtain the very best funding levels for these programs as can be obtained in our deliberations with our colleagues from the other body.

Mr. RANDOLPH. Mr. President, as a cosponsor of the amendment to increase funding for the rehabilitation State grant program to the reconciliation level of $899 million, I emphasize that this vital program is very cost-effective.

I join with the able chairman of the Subcommittee on the Handicapped, Senator WEICKER, in stressing the value of the vocational rehabilitation program. A recent study by the Rehabilitation Services Administration indicates that for every dollar spent on rehabilitating a handicapped individual, $11 is returned to the Nation's economy.

Information from the Rehabilitation Services Administration indicates that expenditures for vocational rehabilitation are associated with offsetting savings in public assistance effort. This program assists handicapped persons and benefits our society as a whole.

VOCATIONAL REHABILITATION PROGRAMS

● Mr. STAFFORD. Mr. President, I rise in support of Senator WEICKER's amendment to increase the State grant funding in the Vocational Rehabilitation Act from $854 to $899 million. The additional $45 million will bring their allocation up to the March reconciliation level.

The Vocational Rehabilitation Act was first enacted in 1920. The purpose was to provide services to those people who had been injured in industrial accidents. The object is to get disabled workers back into the work force.

World War II, Korea, and Vietnam sent home thousands of young men with only one arm or leg each or paralyzed or blinded. Where is their future? Between the programs for veterans and the Vocational Rehabilitation Act these young men have an opportunity to again become useful, contributing, tax-paying citizens.

Over the years, as the act has been amended so that those who have birth defects, polio, or suffer severe injury from an accident are able to receive services. During fiscal year 1980, over 277,000 disabled persons were rehabilitated, according to the annual report to the President and the Congress on Federal Activities Related to the Administration of the Rehabilitation Act of 1973, as amended.

The report states that:

In the first year after closure, persons rehabilitated in fiscal year 1979 are expected to pay an estimated $88.8 million more in social security payroll taxes than they would have paid without the intervention of rehabilitation services. In addition, an increase of Federal income tax payments of $99.3 million is projected for the first year, as are $14.2 million in State and local income taxes and $28.5 million in State and local sales tax receipts.

Further, a decrease in dependency on public assistance of $39.8 million will be effected in the first year after rehabilitation. Since the projected cost of services for all cases closed in fiscal year 1979 was $1,072,000,000 it will take only four years for the investment in rehabilitation to be totally paid off.

Mr. President, this is a cost-effective program. By increasing the funding we are also increasing the investment the Federal Government has made. This investment is not only reflected in the statistics I have stated but also in human living.

Self-esteem, independence, increased mobility are only part of the gains made by using the VR process. Stress and burden are lifted from the shoulders of family members as the disabled person achieves the ability to care for himself.

We are seeing an increase in the number of disabled individuals in the work force, many of whom are professionals. These people, through the VR program,

have fought to attain their goal as taxpaying citizens and participating members of their communities.

Mr. President, I would like to read the following letter from Mr. Nancy Pagenstecher of Ohio.

MENTOR, OHIO,
October 28, 1981.

DEAR SENATOR STAFFORD: I would like to voice my opinion on the proposed cuts for vocational rehabilitation. As a handicapped person myself, who was helped by the Bureau of Vocational Rehabilitation, I am very much against these proposed cuts. Instead, I feel this agency should be allotted the maximum appropriation allowed by law so as to allow for continuation of quality services to the handicapped. It seems to me that this agency is accomplishing what the President claims to be working toward—getting individuals back to work so they will become tax paying citizens. It seems such a minor investment to rehabilitate someone when they will ultimately work many years and become tax paying citizens as a result. I hope you will give this matter serious consideration.

Respectfully,
NANCY G. PAGENSTECHER.

Most of us are ordinary people living ordinary lives in the general scheme of things. The handicapped person is an extraordinary individual trying very hard to live an ordinary life.

Mr. President, I urge my colleagues to join in agreeing to this amendment.●

Mr. WEICKER. Mr. President, if there are no further Senators desiring to speak on this amendment, I ask unanimous consent that it be temporarily laid aside and that my amendment dealing with the low-income energy assistance be read.

The PRESIDING OFFICER. Does the Senator wish to request the yeas and nays before it is laid aside?

Mr. WEICKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WEICKER. The yeas and nays have been ordered on the first amendment, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. WEICKER. I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second?

The is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Without objection, the amendment is laid aside.

UP AMENDMENT NO. 671

(Purpose: To increase the appropriations for low-income assistance payments program for fiscal year 1982)

The PRESIDING OFFICER. The third amendment will be stated.

The bill clerk read as follows:

The Senator from Connecticut (Mr. WEICKER), for himself, Mr. STAFFORD, Mr. HEINZ, Mr. COHEN, Mr. CHAFEE, Mr. DURENBERGER, Mr. EAGLETON, Mr. LEAHY, Mr. PELL, Mr. KENNEDY, Mr. RIEGLE, Mr. DODD, Mr. TSONGAS, Mr. MOYNIHAN, Mr. BRADLEY, Mr. LEVIN, Mr. MITCHELL, Mr. WILLIAMS, and Mr. RANDOLPH, proposes an unprinted amendment numbered 671.

Mr. WEICKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution add the following new section:

SEC. . Notwithstanding any other provision of this joint resolution, there is appropriated $200,000,000 for low-income home energy assistance program which is in addition to amounts appropriated under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, as reported to the Senate on November 9, 1981, for such program.

Mr. WEICKER. Mr. President, I offer this amendment on behalf of myself and Senators STAFFORD, HEINZ, COHEN, CHAFEE, DURENBERGER, EAGLETON, LEAHY, PELL, KENNEDY, RIEGLE, DODD, TSONGAS, MOYNIHAN, BRADLEY, LEVIN, MITCHELL, WILLIAMS, and RANDOLPH.

Mr. President, my amendment will increase the fiscal year 1982 appropriation for the low-income energy assistance program by $200 million. This amendment restores the $200 million cut recommended by the committee and will bring this program back to the fiscal year 1981 level.

I had planned to offer this amendment when H.R. 4560, the fiscal year 1982 Labor-HHS-Education bill, reached the Senate floor. As it looks now, the full Senate will not have the opportunity to consider H.R. 4560 before Thanksgiving—if at all. With the cold winter months rapidly approaching, I think it is essential that we consider this issue today.

I will be brief, but I would like to relate some statistics to my colleagues. From January 1975 through February 1980, the price of fuel oil rose 158 percent while the price of natural gas and electricity rose 155 percent and 70 percent, respectively. All three have dramatically exceeded the rise in the Consumer Price Index for the comparable period of time.

Americans are projected to spend even more on home energy this year. The average low-income household, depending on price trends, weather conditions, and conservation practices, can expect to spend, on the average, from $1,100 to $1,900 on home heating expenses during the 1981–82 heating season. Even with Federal and State energy assistance, low-income households can expect to pay 14 percent of their income, as compared to 4 percent spent by other households, on home energy costs.

Our Nation can ill afford to accept the Appropriations Committee recommendation to reduce Federal support for this program by $200 million. This program provides essential services to the elderly, poor, and disabled of our Nation. By reducing funding, we will be jeopardizing the lives of those who are most deserving of our support.

Mr. President, even with the funds provided by my amendment this program is going to fall far short of the number of eligible low-income households that are burdened with disproportionately high energy costs. If we wanted to reach last year's program level, in terms of the number of people served, CBO estimates that we would have to add some $500 million.

Mr. President, I would like to know how you are going to explain a balanced budget to someone who has just frozen to death in his home.

This has gotten to be absolutely ridiculous. This obsession with a campaign slogan is not reality. No budget is going to be balanced; not in the years 1981, 1982, or 1983, and now we are told because this whopping individual tax deduction was given we are going to be $60 or $70 billion off in 1984.

My concern right now is what is going to happen from this point in November to next spring as far as lives are concerned.

Now we are going to hear and I have heard it all before in the Appropriations Committee how there is some big abuse that was involved with the program, someone applied that should not have gotten it. I have no doubt about that.

But I know that the vast majority of the people who applied for assistance under this program were legitimate recipients.

The PRESIDING OFFICER. The time of the Senator from Connecticut has expired. The remaining time belongs to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, how much time is remaining to the Senator from New Mexico?

The PRESIDING OFFICER. Six minutes and 42 seconds.

Mr. SCHMITT. I yield 2 minutes to the Senator from Connecticut if he wishes to continue.

Mr. WEICKER. The Senator from New Mexico is very kind. I would appreciate it if he would yield 2 minutes to the Senator from Minnesota.

Mr. SCHMITT. I yield 2 minutes to the Senator from Minnesota.

Mr. DURENBERGER. Mr. President, I thank the Senator from New Mexico for yielding, and I thank the Senator from Connecticut for bringing up this amendment today.

Mr. President, I rise to speak in support of the amendment offered by the Senator from Connecticut.

There have been changes in our fuel assistance programs as a result of reconciliation that make this amendment essential for the coming winter. I refer of course to the fact that we no longer have a weatherization program, per se. When I am back home and speak with my constituents on the subject of energy prices, it is most often the weatherization efforts funded by the Federal Government, from our commitment to use the windfall profit tax to return doubled oil prices to those who pay them, that receive the praise.

People do not want to have to depend on the Federal Government in order to be able to pay their fuel bills. But decontrol and the price spirals of the last decade have made it necessary in so many cases. I think of the elderly couples in the rural parts of my State who are living in housing constructed 50 and 60 years ago and built to a size that would accommodate large families. They have raised their families and remain there on

the homestead to enjoy their retirement. But fuel prices are literally robbing them of their security. They are being forced out of the homes because the fixed income that they had counted on to meet their needs is not sufficient to pay the heating bill.

That, Mr. President, is a national tragedy and it is one that we in the Senate have consistently promised to remedy. The best remedy is not the low-income assistance program but weatherization. The elderly of our Nation do not want to watch over Congress in November each year to find out if they will be able to stay in their homes through one more winter. They want independence and weatherization makes that possible.

Fortunately, the Reconciliation Act passed in July authorizes use of the funds appropriated for low-income energy assistance on weatherization projects as well; 15 percent of whatever amount appropriated can be devoted to weatherization under the plan submitted by the State. If the Weicker amendment carries we will have substantially restored the mix of weatherization and energy assistance programs that we had in the last fiscal year.

I think that is a good result. It means that we can continue to provide energy independence for the elderly and low-income families. It means that our national requirement for heating oil can be reduced even further. And it means that the Senate will have honored the commitment that we made when oil prices were decontrolled. That commitment was based on the windfall profit tax. We promised the Nation that to the extent the revenues flowing from decontrol were not necessary to encourage further exploration and production, they would be returned to the Treasury and through the Treasury to energy consumers to help them be less dependent on high price fossil fuels and to assist those who could not afford decontrol.

That is a commitment that we can honor here this afternoon by passing the Weicker amendment. I urge my colleagues to vote for this amendment.

Mr. SCHMITT. Mr. President, I yield to the Senator from Maine.

Mr. COHEN. Mr. President, I rise in support of the amendment offered by my good friend from the State of Connecticut, Senator WEICKER, that will restore funding for the low-income energy assistance program to last year's level.

While I am fully cognizant of the fiscal context within which we will consider the continuing appropriations resolution today, I would emphasize that the elderly and low-income residents of Northern States, such as Maine, view this program with immediate, even life and death concern.

As a representative from New England, I am acutely aware of the energy situation we face throughout the country. Severe climate, energy-wasteful housing stock, and dependence on foreign oil all combine to make the cost of fuel in New England the highest in the Nation.

Last winter, the price of home heating oil soared from $1 per gallon to $1.40—all in a matter of 3 months. The rise in energy costs has hit all American families, but the elderly and low-income individuals living on fixed incomes have suffered the most.

As a member of the Senate Special Committee on Aging, I have heard firsthand of the hardships our elderly citizens have experienced in trying to meet their winter heating bills. We must all be conscious of the costs incurred by Federal programs.

But to subject the low-income energy assistance program to a substantial funding reduction is to victimize elderly Americans by contributing to their fears, anxieties, uncertainties, and perhaps to the destruction of their health and spirit. I cannot justify to the older residents of Maine, nor to myself, the introduction of more anxiety into their lives.

At a time when a single dollar cannot purchase even a gallon of heating oil, our elderly and low-income residents must strive to reduce their expenditures on basic necessities throughout the year, so that some small savings may be available when temperatures drop and furnaces are fired. Those savings are undertaken at risk to personal health, but the pennies are saved in order to preserve some personal dignity and self-sufficiency when winter arrives.

In recognition of the desperate plight of many elderly and low-income Americans, Congress appropriated $1.85 billion last year to assist these individuals in meeting their energy costs. This has been helpful, but it has not been enough.

Over 54,000 Maine households received Federal energy assistance last year, and the number of eligible families is expected to increase this year. If the committee recommendation is accepted, fewer families will receive assistance this winter and, for those families fortunate enough to receive aid, the benefit levels will be greatly reduced.

The average energy expenditure for Maine households served by the home energy assistance program last year was $1,773. If benefit levels are cut in half from an average of $454 last year to $224 this year, even those families receiving assistance will suffer extreme hardship—$224 may only keep them warm for a few weeks in the dead of winter.

I am deeply concerned about the prospects this winter for our poor and elderly households in this Nation. Winter has already arrived in the northern reaches of my State. Furnaces are already relieving the chill of night. We need to provide the necessary funding to prevent the hardships that are just around the corner.

There is no question that energy assistance is a crisis program. I ask my colleagues to consider this amendment in that context, and not solely in the context of national austerity.

LOW-INCOME HOME ENERGY ASSISTANCE

● Mr. DENTON. Mr. President, I rise in opposition to the amendment. This amendment would increase the appropriations level of the low-income home energy assistance program by $200 million over the Appropriations Committee's recommendation and by a full $450 million over the President's budget request. We simply must not permit such increases to drive this country further toward economic disaster. Every Senator here knows we are faced with a trillion dollar debt—$1 trillion.

I do not like cutting the funding level of worthwhile programs that assist the economically disadvantaged any more than anyone else in this Chamber does. Nevertheless, Mr. President, if this country goes broke because of continued deficit spending, the Government that is supposed to assist the disadvantaged will be disadvantaged itself. A bankrupt country cannot provide for the needs of its poor or anyone else for that matter.

I believe we must and will continue to assist our poor and elderly with their home energy needs. However, we cannot lose sight of the forest for the trees. I am not convinced that $1,850,000,000 is necessary for the low-income home energy assistance program in light of the economic conditions which we face today.

LOW-INCOME ENERGY ASSISTANCE PROGRAM

● Mr. RIEGLE. Mr. President, I am pleased to be a cosponsor of the Weicker amendment restoring the appropriations for low-income energy assistance to $1.875 billion—a level adequate to provide needed assistance to low-income households in meeting energy costs this winter.

The low-income energy assistance program is vital to poor, disabled and elderly citizens of this country. These individuals, struggling to make ends meet on fixed incomes, cannot hope to keep pace with rising home energy costs. Without adequate funding for the low-income energy assistance program and a forecast for a harsh winter in many parts of this Nation, the lives of citizens with limited resources could well be in jeopardy. Unlike other Americans, the poor cannot further conserve energy consumption without affecting their health. Most live in older, nonweatherized homes and have no resources for insulation.

Mr. President, my own State of Michigan can anticipate the loss of $12 million in funding for low-income energy assistance if the present committee figures are sustained. Michigan's low-income citizens are already experiencing great hardship as a result of the severe recession in my State, as well as deep cuts to social service programs upon which these people depend.

Using February 1981 prices, an average low-income Michigan household will spend $695 annually for gas home energy or $1,534 for oil home energy. This is likely to increase somewhere above $1,900 by this winter. In the single coldest month, a low-income Michigan household will spend roughly $260 per month for home energy. Cuts in essential energy assistance programs can only further the deprivation and suffering of poor, disabled, and elderly citizens in Michigan.

I urge my colleagues to join me in support for the Weicker amendment. We cannot allow the quality of life of our Nation's low-income people to be eroded or severely jeopardized by the change of seasons.●

● Mr. STAFFORD. Mr. President, I rise as a cosponsor of the pending amendment to support the restoration of $200 million to the low-income energy assistance program.

It is essential that the Congress continue adequate funding for this Federal program designed to help keep needy Americans warm in the frigid winter weather that surely lies just a few short weeks ahead.

In simple terms, the emergency energy assistance program is designed to help needy persons meet the skyrocketing cost of fuel.

The Senate has already agreed to authorize $1.875 billion for the emergency energy assistance program in fiscal year 1982.

The House of Representatives has approved $1.825 billion for the program.

Mr. President, the amount of funding for the program is the most important issue and the most vital one to needy and elderly Vermonters and those needy and elderly who live in other New England and northern tier States, for we know we can count on long, cold winters in our part of the country.

We also know that we can count on high energy costs. The price of fuel oil, electricity, and natural gas has skyrocketed well beyond the inflation rate for other items on the Consumer Price Index.

And, we are told that the price of home energy will continue to rise at excessive rates in the future.

We all recognize that the cost of essential home energy imposes a disproportionately larger burden on households with fixed incomes, with low incomes and even with middle incomes.

In some cases the costs associated with essential home energy can reach half the total income of a low-income family.

The Northeast-Midwest Congressional Coalition has compiled estimates that the average household energy bill in New England last year was $1,325. That is more than a threefold increase over the 1970 average cost of $386.

That is the highest average for any region in the Nation, and we all know that cost will be going up this winter.

Thus, it is vital that the Senate continue to provide adequate help to needy families to meet those essential energy costs.

Even in this time of tight Federal budgets, Congress must recognize the need to make available enough money to assure that no Vermonter, or any other American, will have to run the risk of freezing this winter.

I shall continue to vote Federal spending cuts wherever possible, but I cannot believe the American taxpayer wants to achieve those spending cuts at the expense of the health and well-being of those who are less fortunate.

Mr. President, I urge my fellow Senators to support this amendment to restore the $200 million to the emergency fuel assistance program.●

● Mr. WILLIAMS. Mr. President, I support the amendment to increase appropriations for the low-income energy assistance program for fiscal year 1982.

Price increases for home energy over the past few years have caused a hardship for some low-income households, particularly those who heat with oil. The OPEC price increase has caused dramatic price increases over the past months, and it has become apparent that efforts to offset home energy price increases for low and fixed income households need to be expanded to avoid the cruel choice between heating and eating for many of these households. The rapid rise in home energy costs have far outpaced any increases in income available to low-income households.

The Low Income Energy Assistance Act, which I sponsored was passed just last year. The services provided were specifically targeted to those individuals most in need—the very same individuals this administration claims it will continue to protect. I would submit that the administration's "social safety net" has become seriously tattered and is most assuredly in need of substantial repair.

To those who would uncritically endorse the wholesale elimination of, or drastic reductions in Federal programs, I say, let us take a closer look and exercise the greatest and most careful judgment, before we emasculate programs that provide vital services that are essentially the difference between life and death.

I have consistently expressed my support for devising a program for economic recovery and am firmly committed to achieving that goal. However, I am gravely concerned that we not devise confused and chaotic methods to accomplish those goals.

I would urge my colleagues to exercise some forethought in this instance and to remember we are not dealing only with dollar figures. We are dealing with human lives.●

Mr. PELL. Mr. President, I support the amendment offered by my colleague from Connecticut, Senator WEICKER, to bring the funding for the low-income energy assistance program up to the level approved by the House of Representatives.

Double digit annual increases in the cost of home heating have reached levels that the average American can no longer bear. Last year $1.85 billion was appropriated for this program and 50 million people, predominantly senior citizens, were served. This year even more families will need protection to brace themselves against the economic effect of oil decontrol, and new oil price increases.

According to the Congressional Budget Office it would require approximately $2.3 billion to maintain the current levels of assistance, in real terms. However, the continuing resolution would reduce the current appropriation by $200 million.

This would be a 12-percent reduction from last year's appropriation, which means that this year while the price of home energy will be more than 25 percent higher, the elderly, the poor and moderate-income workers could have their purchasing power under this program reduced by 37 percent.

Mr. President, my State is at the very end of the energy supply pipeline, and 70 percent of all its homes are heated with oil, the most expensive and uncertain energy source.

If funding for the heating assistance program is reduced, some unlucky State official in Rhode Island will have to make a series of painful choices to determine which beneficiaries are "most" in need. This is a cruel and heartless choice which should never have to be made. The individuals who are victims of this process are the same people that will also be losing food stamps, health care services and other Federal assistance.

I wonder how much these individuals can take, Mr. President, and how much Congress expects them to take. I want to commend the Senator for his leadership on this issue and hope that my colleagues will support this amendment.

Mr. SCHMITT. Mr. President, as recently as fiscal year 1979 the program under consideration had a total of only $200 million allocated to it. The growth of this program has obviously been astronomical, since we are dealing now with a committee recommendation of $1.65 billion.

The need is clearly there, but Mr. President, the program is not being efficiently administered, and I should also add that the committee has put $250 million above the President's request into this program in spite of what have been the problems in this program.

It is not an entitlement program. The States can use their allocation however they choose and target those with the greatest need. But, unfortunately, there are in some instances reported, and the Senator from California will make mention of these later, these funds are going for nonenergy costs and payments.

States should be able and willing to augment the Federal payment for low-income energy assistance, to improve their management, and to see to it that the people about whom the committee is concerned, about whom the Senator from Connecticut, the Senator from Minnesota, the Senator from West Virginia, and the Senator from Maine are all concerned, to make sure those people are well served.

There is no question that a problem exists. The problem is they are not being served efficiently, and many are not getting the assistance they need.

Most States have laws prohibiting utility companies from shutting off the heat in anyone's home during the winter months. So no one will freeze to death as a result of the funding in this program, which is still $250 million higher than the President's request.

The subcommittee and the full committee have not been oblivious to the needs of the handicapped, or of those who cannot afford energy costs. I hope our colleagues in the Senate will support the committee position on all three amendments.

MOTION TO TABLE UP AMENDMENT NO. 669

Mr. President, at this time I would like to move to table the first amendment of the Senator from Connecticut, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. WEICKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WEICKER. First of all, do we have the yeas and nays on the third amendment?

The PRESIDING OFFICER. We do not.

Mr. WEICKER. I ask for the yeas and nays on the third amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Now, Mr. President, what was the unanimous-consent agreement?

The PRESIDING OFFICER. The motion to table is pending.

Mr. WEICKER. My parliamentary inquiry is what was the unanimous-consent request agreed to?

The PRESIDING OFFICER. The agreement was for back-to-back votes in relation to the three amendments.

Mr. SCHMITT. Mr. President, if the Senator from Connecticut will yield on his parliamentary inquiry, I asked the majority leader specifically to reserve my right to make a tabling motion.

Mr. WEICKER. Does the unanimous-consent request include votes on the amendments or does it make provision for tabling motions?

The PRESIDING OFFICER. The unanimous-consent request made provision for the tabling of amendments, tabling motions in relation to the amendments.

Mr. WEICKER. I am sorry, I did not understand.

The PRESIDING OFFICER. By specifying the vote in relation to an amendment the right to table is preserved.

Mr. WEICKER. Is it the position of the Chair that the tabling motion of the Senator from New Mexico is in order?

The PRESIDING OFFICER. It is in order.

Mr. WEICKER. I thank the Chair.

The PRESIDING OFFICER. There is a sufficient second.

The yeas and nays were ordered.

Mr. SCHMITT. Mr. President, I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico to lay on the table the amendment (UP No. 669) proposed by the Senator from Connecticut. The yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Vermont (Mr. LEAHY), the Senator from New York (Mr. MOYNIHAN), the Senator from New Jersey (Mr. BRADLEY), and the Senator from West Virginia (Mr. ROBERT C. BYRD) would vote "nay."

The PRESIDING OFFICER (Mr. SPECTER). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 39, nays 56, as follows:

[Rollcall Vote No. 406 Leg.]

YEAS—39

Abdnor	Gorton	Percy
Andrews	Grassley	Proxmire
Baker	Hatfield	Quayle
Boren	Hayakawa	Roth
Byrd, Harry F., Jr.	Helms	Schmitt
Cohen	Inouye	Simpson
Danforth	Johnston	Stennis
Denton	Kasten	Stevens
Dixon	Laxalt	Symms
Domenici	Lugar	Tower
East	Mattingly	Wallop
Exon	McClure	Warner
Garn	Murkowski	
	Nickles	

NAYS—56

Armstrong	Glenn	Mitchell
Baucus	Hart	Nunn
Bentsen	Hatch	Packwood
Biden	Hawkins	Pell
Boschwitz	Heflin	Pressler
Bumpers	Heinz	Pryor
Burdick	Hollings	Randolph
Cannon	Huddleston	Riegle
Chafee	Humphrey	Rudman
Chiles	Jackson	Sarbanes
Cochran	Jepsen	Sasser
Cranston	Kassebaum	Specter
D'Amato	Kennedy	Stafford
DeConcini	Levin	Thurmond
Dodd	Long	Tsongas
Dole	Mathias	Weicker
Durenberger	Matsunaga	Williams
Eagleton	Melcher	Zorinsky
Ford	Metzenbaum	

NOT VOTING—5

Bradley	Goldwater	Moynihan
Byrd, Robert C.	Leahy	

So the motion to lay on the table UP amendment No. 669 was rejected.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the motion to lay on the table was rejected.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SCHMITT. Mr. President, I ask unanimous consent, if it is agreeable to the Senator from Connecticut, that we vitiate the order for the yeas and nays and agree to the amendment by voice vote.

The PRESIDING OFFICER. Is there objection? Without objection it is so ordered.

The question is on agreeing to the amendment.

The amendment (UP No. 669) was agreed to.

(Later the following occurred:)

Mr. WEICKER. Mr. President, on the first amendment dealing with special education, I did not move to reconsider after the voice vote, and I ask unanimous consent that I may be permitted to do so now.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KENNEDY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 670

The PRESIDING OFFICER. The question is on agreeing to amendment No. 670. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. LONG. Mr. President, on this vote, I have a pair with the Senator from New York (Mr. MOYNIHAN). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. STEVENS: I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Vermont (Mr. LEAHY) and the Senator from West Virginia (Mr. ROBERT C. BYRD) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 55, nays 39, as follows:

[Rollcall Vote No. 407 Leg.]

YEAS—55

Armstrong	Hawkins	Packwood
Baucus	Heflin	Pell
Biden	Heinz	Pressler
Bumpers	Hollings	Pryor
Burdick	Huddleston	Randolph
Cannon	Humphrey	Riegle
Chafee	Inouye	Sarbanes
Chiles	Jackson	Sasser
Cochran	Jepsen	Specter
Cranston	Kassebaum	Stafford
D'Amato	Kennedy	Stennis
DeConcini	Levin	Stevens
Dodd	Mathias	Thurmond
Durenberger	Matsunaga	Tsongas
Eagleton	Melcher	Weicker
Ford	Metzenbaum	Williams
Glenn	Mitchell	Zorinsky

	McClure	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Long, against.

NOT VOTING—5

Bradley	Goldwater	Moynihan
Byrd, Robert C.	Leahy	

So Mr. WEICKER's amendment (UP No. 670) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 671

The PRESIDING OFFICER. The question is on agreeing to amendment

No. 671. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Vermont (Mr. LEAHY) and the Senator from New York (Mr. MOYNIHAN) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 41, nays 54, as follows:

[Rollcall Vote No. 408 Leg.]

YEAS—41

Biden	Hatfield	Mitchell
Bumpers	Hawkins	Pell
Burdick	Heinz	Randolph
Cannon	Hollings	Riegle
Chafee	Huddleston	Rudman
Cohen	Humphrey	Sarbanes

East	Murkowski	
Exon	Nickles	

NOT VOTING—5

Bradley	Goldwater	Moynihan
Byrd, Robert C.	Leahy	

So Mr. WEICKER's amendment (UP No. 671) was rejected.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon is recognized.

Mr. HATFIELD. Mr. President, the Senator from Ohio (Mr. METZENBAUM) is the next on the list here of amendments to be offered.

Therefore, I ask unanimous consent that we temporarily set aside the pending motion to reconsider by Mr. BRADLEY.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I state the proposition that as a comanager of the bill I will set aside temporarily the pending committee amendment in order to provide the clear road for other amendments to be offered.

Mr. BAKER. Mr. President, will the Senator permit me to make an inquiry first?

Mr. HATFIELD. Yes.

Mr. BAKER. Mr. President, it is 7:40 p.m. almost, and it is pretty clear to me that there is little hope that we can finish this bill in the immediate future and that we will be very late tonight.

First, I wish to put Senators on notice that we will be in for a long, long time and, second, to suggest so we can try to arrange some time for the convenience of Members, for instance, to eat or to take care of other duties for an hour or thereabouts, perhaps we could identify two or three amendments and sequence them and stack votes until a time certain.

I wonder if the managers of the bill will be agreeable to considering some such arrangement.

Mr. HATFIELD. Mr. President, I say to the leader that I am very pleased to provide that window for Members to do if that is all right with the minority, and I have no reason to understand otherwise.

Mr. METZENBAUM. Mr. President, I do not think that the Senator from Wisconsin is in the Chamber. I think he went out for a bite to eat.

I am certain he will have no objection to that procedure of stacking the votes.

About what time would that be? Would that be around 8:30 p.m.?

Mr. BAKER. Mr. President, since we do not know what amendments are going to be proposed, and there is an unofficial list, rather than try to make that firm, let me do this, if the Senator will yield to me still further:

Mr. President, I ask unanimous consent that any rollcall votes that are ordered between now and 8:45 p.m. be stacked to occur in sequence without intervening motion, debate, appeal, or point of order, and that the first vote be 15 minutes in length and subsequent votes be 10 minutes in length each.

Mr. FORD. Mr. President, will the majority leader make that 9 p.m.?

Mr. BAKER. Mr. President, let me change the request until 9 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair and thank all Senators.

Mr. FORD. I thank the majority leader.

SECTION 18 AND UMTA SECTION 5 PROGRAMS

Mr. STAFFORD. Mr. President, I want to clarify a matter with the distinguished chairman of the Transportation Subcommittee (Mr. ANDREWS). My inquiry is with regard to the funds for the section 18 and UMTA section 5 programs. It is my understanding that during consideration of the continuing resolution, the Appropriations Committee included language which clearly directs the funds available in these two programs to be equally divided so that one-half the sums appropriated for each program shall be apportioned and allocated on the basis of 1970 census data and one-half the sums appropriated for each program shall be apportioned and allocated on the basis of 1980 census data. I inquire of the distinguished Senator whether my understanding of the language as contained in the continuing resolution is correct.

Mr. ANDREWS. The distinguished Senator from Vermont (Mr. STAFFORD) is correct in his understanding of the language in the continuing resolution regarding the apportionment and allocation of the sums appropriated for the section 18 and section 5 programs.

Mr. STAFFORD. I urge my distinguished colleagues on the Appropriations Committee to make every effort to retain this language and I thank the distinguished chairman of the subcommittee (Mr. ANDREWS) for his attention to this matter.

Mr. HATFIELD. I would be glad to yield to the Senator from Ohio who has been a patient man in yielding to other Senators and letting them go ahead of him, and I am very appreciative of it.

UP AMENDMENT NO. 672

(Purpose: To increase the appropriations for the Dual Benefits Payments Account under the Railroad Retirement Act of 1974)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) for himself, Mr. ROTH, Mr. SARBANES, Mr. KENNEDY, Mr. MOYNIHAN, Mr. PRYOR, Mr. BURDICK, Mr. WILLIAMS, Mr. RIEGLE, Mr. BRADLEY, Mr. MELCHER, and Mr. PELL proposes an unprinted amendment numbered 672.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution add the following new section:

SEC. . Notwithstanding any other provision of this joint resolution, there is appropriated an additional $90,000,000 for the payment of windfall benefits, as provided under section 15(d) of the Railroad Retirement Act of 1974, which, together with the amounts appropriated under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, for the payment of such benefits, shall be the maximum amount available for payments through September 30, 1982.

Mr. METZENBAUM. Mr. President, the amendment I have offered today, along with the cosponsors I have enumerated is designed to correct an injustice inflicted by the Congress upon 400,000 retired railroad employees. Two months ago, these retirees found their monthly retirement checks reduced by an average of $20.

Specifically, our amendment would add $90 million to the dual benefit payments account under railroad retirement and restore the cut that these retirees have suffered. This cut in benefits is a result of failure by the Congress to appropriate for fiscal year 1982 the total amount needed to fully fund the benefits promised to them in 1974 by the Congress, when changes were made in the Railroad Retirement System.

Prior to 1974, railroad employees could be insured under both railroad retirement and social security. The benefits that these working people built up were part of the total compensation package offered through their employment and were considered deferred wages.

For many of them, the combined benefits derived from the two plans were bigger than they would be had the employees paid into a single pension system.

This difference between the combined benefit received from both systems, and the amount that would have been received had the benefit been calculated on combined earnings under social security has been called a windfall.

The 1974 act was designed to eliminate any further opportunity to qualify for windfall, but the employers and retirees already eligible to receive benefits from both systems had their rights grandfathered. This component was to be financed by Federal Government general revenues.

In the last few years, OMB has clearly ignored congressional intent by failing to request the appropriations required to fully fund this account. The shortfall which resulted was made up from the general railroad retirement account. This procedure has created a serious drain on the entire railroad retirement system.

During the budget reconciliation, Congress made several changes in the railroad retirement fund. These changes were primarily aimed at insuring the fund's solvency, they included cost saving provisions amounting to $400 million in fiscal year 1982. In addition to these changes, Congress provided for paying the "windfall" benefit from a specific "dual benefits payments account" and stopped the practice of funding the shortfalls to the windfall account through the general retirement fund. The total cost to fully fund the account is $440 million. This bill, however, provides only $350 million, a $90 million shortfall.

The Railroad Retirement Board has assumed an appropriation of $350 million and reduced benefits accordingly. We cannot fault the Board for acting accordingly. They cannot spend money they do not have. But it is a fact, Mr. President, that this action has imposed severe hardship on many older Americans, whose average incomes amount to slightly over $300 per month—a little more than $3,600 per year. That does not leave a margin, and for them a $20 monthly cut is truly harmful.

The following are examples of what the cuts mean to some retirees:

WOMAN—PINE HILL, NEW JERSEY

I think this is a very unfair thing to do to a retiree who is a cripple and on a small pension like I am. I know this applies to many more beside myself. I think something should be done about this and the cuts should be restored to the retirees.

WOMAN—ORLANDO, FLORIDA

I think it is a cowardly act for them to cut the pensions of us defenseless senior citizens, and I hope they never get voted into office again, as I need this money for doctors and medicine as I have heart trouble, phlebitis and labyrinthitis.

MAN—ABILENE, TEXAS

I know that $25.71 a month doesn't seem like much to people making a large salary or people who are able to work to make up for this decrease but neither my wife nor I am able to seek any kind of employment to help make up for this loss.

Food, medicine, heat and gasoline, which are so vital to people our age, keep increasing in price. They cost just as much for us as they do for working people.

I understand that some widows in their 80's and 90's are having their retirement benefits reduced. They hardly make enough to get by on now. It certainly seems unfair that nothing is being done to help them to have a better living.

MAN—STRASBURG, PENNSYLVANIA

My wife and I are on fixed incomes. I am handicapped with partial paralysis in both hands. My wife and I need our railroad retirement pension check in full.

MAN—ARCADIA, CALIFORNIA

A little note from the Railroad Retirement Board which is quite disturbing due to the fact we also recently received a note from our landlord of a $75.00 increase in our rent.

And food and clothing continues to rise. I don't know how the powers that be expect us to get by. Also medical fees are sky high.

MAN—SAN LEANDRO, CALIFORNIA

If I was to go down to Santa Barbara and Reagan's ranch and steal one of his horses I would be put in jail and they would forget where they left the key, but they can deliberately and without any question steal from the poor retired people.

MAN—TACOMA, WASHINGTON

As you can see, from the enclosed letters, my wife and I are already victims of the President's juggling act, in his efforts to balance the national budget.

Please do all you can to see that this appropriation is restored, in full, for the next fiscal year, or at least not reduced any more. Thank you.

Mr. President, the fact is that by reducing benefits, we are breaking a solemn promise made by the Congress to those who are today drawing railroad retirement. And as usual, we are placing the burden of budget cuts upon those who can least afford to bear them.

Mr. President. the Congress has acted to shore up the financially troubled Railroad Retirement Fund. We have prevented the creation of new categories of beneficiaries. We accomplished this task with the support of labor and management. And now, Mr. President, we must correct this injustice that has been inadvertently inflicted on the retirees.

I urge my colleagues to join with me in restoring legitimate benefits to these retirees by adding $90 million to the account.

I yield to the Senator from Delaware.

Mr. ROTH. Mr. President, I thank the distinguished Senator from Ohio for yielding to me.

I am very pleased today to be able to join him as a principal sponsor of this important amendment. Like the Senator from Ohio, I am deeply concerned that we maintain a commitment to the railroad retirees. It is a commitment that I feel was made by Congress solemnly, and one that we should maintain this year.

I have been one who has worked hard for reductions in the Federal budget as well as the tax cuts which were accomplished in recent months. We have taken monumental strides toward righting this Nation's economy and hopefully we will soon be seeing the results of these efforts.

One of our most difficult problems has been the need to strengthen the social security program, so that the basic pension program is protected and the financial stability of the trust fund is insured. But in addressing this issue we have recognized our commitment to current and future retirees. We have understood that we cannot place the burden of curing our economic ills on the backs of our senior Americans.

I believe that the issue which we discuss today is one which involves similar commitments. The activity of the Congress in legislating a railroad retirement system over the last several decades, including the Railroad Retirement Act of 1974 and subsequent appropriations, has created an obligation to assist in the resolution of short- and long-term problems facing the Railroad Retirement Trust Fund. While steps have been taken which will help restore the continued stability of the system, a reduction of appropriations to fund current pensions has resulted in reduced monthly income to many retirees who have come to depend on these minimal benefits.

We are generally talking about total retirement benefits of a very few hundred dollars per month, and though reduction applies to only one segment of that total pension, the loss of some $20 to $25 per month can impose severe hardship on fixed income retirees dealing with the difficult economic conditions that we are working so hard to improve.

I cannot agree to reduce the pensions of senior citizens while we are spending billions of dollars for farm supports and unnecessary public works projects.

I think the vote today is one of fulfilling commitments and, in that vein, I urge the Senate's adoption of this amendment.

Mrs. KASSEBAUM. Mr. President, Congress in 1974, having decided to protect those individuals already entitled to dual benefits, before correcting future dual benefit programs, while correcting future dual benefit programs, is committed to uphold the agreement that was entered into at that time. I will be supporting this measure for that reason.

Mr. President, I want to add my support to the amendment offered by the Senator from Ohio, Mr. METZENBAUM. This amendment addresses the plight of approximately 400,000 railroad retirees who faced a loss in retirement income on October 1 when a 21-percent reduction

in so-called windfall benefits went into effect.

It is important to point out that this is a fixed group of retirees—limited to individuals who were qualified both for railroad retirement and for social security benefits prior to 1974. Railroad retirement law changes made in 1974 prevent other retirees from receiving similar windfalls.

When Congress agreed to establish a separate account for the payment of windfall benefits to individuals "grandfathered" under the 1974 act, it was naturally assumed that sufficient funds would be appropriated to provide full payment of benefits. Unfortunately, this has not proven to be the case, and appropriated amounts fall approximately $90 million short of the amounts needed. I feel strongly that Congress should hold up its end of the agreement made in the 1974 law. Having decided to protect those individuals already entitled to dual benefits while correcting future dual entitlement programs, Congress should meet its commitment.

For the most part, we are talking about a group of older individuals who have relied on the Railroad Retirement System for many years. We are talking about a group which will be shrinking, not growing, in size. We must live up to the promises we have made to these retirees, and the Metzenbaum amendment offers us an opportunity to do so.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, the $350 million recommended by the committee and by the House for railroad retirement benefits is the full amount of the President's March budget request and the same as last year's appropriations.

Despite the fact that the President has now revised his budget request downward to $308 million for these retirement benefits, no further cutback has been recommended by the full committee.

Unless the President revises his budget request it will be difficult for Congress to raise the appropriation above the current level without further increasing the possibility, which we already face with this bill, of a veto.

This particular benefit has been named a windfall benefit, and even though I am sure the Senator is correct that some individuals have become accustomed to it, nevertheless, it was an unintended benefit enhancement over and above the regular railroad retirement benefit, and the social security.

This benefit was originally intended for low-income workers not highly paid railroad workers. When Congress revised this act it agreed to phase out the so-called windfall to railroad retirees.

Had they been covered by social security or any other private pension plan, railroad workers would not be receiving a high level of benefits strictly attributed to this specific windfall.

Both social security and regular railroad retirement benefits have been increasing based on changes in the Consumer Price Index. The 21-percent reduction in railroad benefits is partially offset, therefore, by other retirement income. The average reduction in total benefits is only 6 percent, not 21 percent, for these retired railroad workers.

In many of these so-called windfall benefit cases not only the former wage earners but their spouses are drawing both regular railroad and windfall benefit checks. The average benefit payment to a spouse is $216 over and above whatever the retired railroad worker may be receiving.

This is probably the only pension program, private pension program, Mr. President that is subsidized at the taxpayer's expense. Congress should concentrate on phasing out Federal funding for railroad retirement and putting it on a sound trust-funded basis paid for by the beneficiaries.

I have been a strong supporter of that concept and will continue to believe that the only solution to the basic problem of railroad retirement benefits is to find a trust fund mechanism that can be paid for by workers and by associated means within their industry.

A new provision in the reconciliation legislation, Mr. President, forces a cutback in railroad retirement benefits, and this is not a requirement of the appropriations bill. The authorizing committees could recommend repeal of this provision so that trust funds can once again be used to overcome the deficit in Federal funds for the so-called windfall benefit payments. Alternatively, the authorizing committees could give the railroad board the option of continuing to use trust funds to maintain current benefit levels.

Finally, Mr. President, we should recognize that the 1974 Railway Retirement Act was passed in a totally different fiscal environment than that which faces us today. We may no longer be able to afford the full level of these extra benefits over and above the regular social security benefits that are now being paid to retired railroad workers.

So, Mr. President, I think the committee's position that is referenced in the continuing resolution is the correct one, and I hope we can find a way to ease this transition.

However, at this point the committee would have to oppose this $90 million add-on to a bill already $5.2 billion over in budget authority and $2.6 billion over in outlays.

Mr. MELCHER. Mr. President, as a cosponsor I strongly support the amendment of the Senator from Ohio and commend him for his championship of the 400,000 elderly retired railroad workers who have had their retirement incomes cut as of October 1 of this year. Hundreds of Montanans are deeply disturbed by these cuts, and rightly so.

The Budget Reconciliation Act, in the language relevant to railroad retirement, should reassure the retirees that in the long run their basic pensions are secure. However, the one provision of this otherwise very good railroad retirement amendment, which prohibits transfer of funds to pay so-called windfall benefits when the appropriation for this purpose is inadequate, has resulted in a shocking and sad surprise to hundreds of thousands of retired railroad workers and their spouses. With only a few days warning of the cut of 21 percent in the so-called windfall benefits these senior citizens found their checks reduced. They cannot understand why, with cost-of-living increases coming to others on social security, Federal, or military retirement, their retirement checks are cut back.

This amendment will bring a happier Thanksgiving and a better New Year to 400,000 railroad retirees. Their pensions are meager enough as it is, without adding insult to injury by the cuts that were made in their retirement checks. This amendment is essential to restore their full retirement benefits.

Mr. EAGLETON. Mr. President, I rise in support of the amendment of the Senator from Ohio to restore full benefits to railroad retirees.

As many of my colleagues will remember prior to the Railroad Retirement Act of 1974, railroad employees could earn independent social security and railroad retirement benefits. In 1974, Congress placed the Railroad Retirement and Social Security Trust Funds in the same financial position they would have occupied had railroad service been covered by social security, eliminating the possibility of future retirees receiving benefits under both accounts.

However, those entitled to both benefits before 1975 were exempted from the change and Congress authorized annual appropriations from general revenues from 1976 to the year 2000 to finance the cost of phasing out the original dual benefit. In past years, the Office of Management and Budget clearly ignored congressional intent by failing to request the full amount of general revenue necessary to fund the dual benefit, thus creating a serious drain on the Railroad Retirement Trust Fund.

The Omnibus Budget Reconciliation Act, passed earlier this year, made a number of changes in the Railroad Retirement system designed to put the Trust Fund on a more sound financial footing. The major change in the benefit structure was the removal of the obligation to pay dual benefits from the main Railroad Retirement Trust Fund, and the creation of a separate dual benefits payments account to be funded by an annual appropriation.

It is the funding level of that dual benefits payments account which is the subject of the instant amendment.

Two months ago, 400,000 railroad retirees were notified that their dual benefits were reduced by 21 percent, as a result of failure by the administration to request funds sufficient to fund fully that account. The continuing resolution before us perpetuates this injustice by failing to provide the necessary appropriation to fund the dual benefits payments account.

The Metzenbaum amendment will insure that the full benefits to which railroad retirees are entitled will be paid. I

urge all of my colleagues to join with me in support of this amendment to protect the retirement benefits of current railroad retirement recipients.

Mr. BRADLEY. Mr. President, I rise in support of this critical amendment to restore $90 million to the dual benefits payment account.

To see why the dual benefits payment account should not be underfunded, it is essential to review the history of these retirement benefits. Prior to 1975, railroad employees could receive both social security and railroad retirement benefits if they engaged in employment covered by the two systems.

Since one individual could receive both benefits at the same time, many considered this an unearned enrichment, a windfall. To reduce the cost of the program, Congress passed the Railroad Retirement Act of 1974.

That act coordinated the two types of benefits to eliminate duplications.

Unfortunately, even with the reduction in benefits, the benefit payments, which were intended to be funded with general revenues, grew substantially more than estimated.

Reforms were adopted this year to assure the solvency of the Railroad Retirement System. Congress decided to limit the windfall benefits to the annual congressional appropriation by establishing the dual benefits payment account. The Railroad Retirement Board must prorate the windfall payments from the new account to fit the moneys appropriated to it.

To fund the current dual benefit payments would require an appropriation of $440 million, but the responsible committees in Congress have recommended an appropriation of only $350 million. It is estimated that this will require the Railroad Retirement Board to reduce benefits by over 20 percent.

Mr. President, substantial reductions have already been made in the system over the past 7 years. Congress understood that benefits would be reduced when we changed the method of computing railroad retirement benefits, but I do not believe Congress intended to reduce benefits by merely underfunding the dual benefits payment account.

Current retirees have earned these dual benefits. I urge the Senate to adopt this amendment and not unfairly and precipitously reduce these needed benefits.

Mr. HATCH. I ask unanimous consent that I be joined as a cosponsor on this amendment offered by Senators ROTH and METZENBAUM.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I rise in support of the amendment offered by the distinguished Senator from Delaware (Mr. ROTH) and the distinguished Senator from Ohio (Mr. METZENBAUM) adding $90 million to the windfall benefits appropriation for the railroad retirement trust fund. Without this amendment, Congress will be appropriating $350 million to fund this account, which currently provides benefits to over 385,000 retirees and dependents.

The problem, as has been dramatically shown over the last 2 months, is that the current appropriation level is not adequate to fully fund the benefits which retirees are entitled to under the law. In October and November, annuitants sustained a 21 percent cut in the windfall benefits component of the pension checks. For many individuals, particularly elderly widows, this was a substantial and almost unconscionable loss of income. Many can barely make it through the month on their meager income.

I realize of course that the administration early this year did recommend funding only to the $350 million level. And indeed the Budget Committee, in supporting the President's program, adopted this level. Likewise, the Appropriations Committees of both Houses in light of the action of the Budget Committee have felt compelled to limit appropriations short of the full funding level of $440 million.

However, in fairness to the administration and the Budget and Appropriation Committees, it must be stressed that there were very significant events intervening the last 9 months which in a real sense unintentionally frustrated the legitimate expectations of all concerned—the retirees, the administration, the Budget and Appropriations Committees. This summer, in the context of the Omnibus Reconciliation Act of 1981, the Congress substantially restructured the railroad retirement system. This was done to prevent inevitable bankruptcy of the trust fund.

Major changes in benefits and in funding, agreed to by both representatives of labor and the railroad industry, were made to make the trust fund financially solvent. One of the critical changes was to create a separate windfall benefits account into which the annual appropriations would be placed. Windfall benefits could only be paid from this account. If Congress did not appropriate adequate funds, then this benefit component would invariably have to be cut in a given fiscal year.

Previously Congress since 1977 had not been fully funding the windfall benefits component. However, retirees entitled to such benefits never actually suffered any loss in a given year. This was because the trust fund simply drew upon other funds available under the railroad retirement trust fund. As one can readily see, of course this would have the effect of further accelerating the drain on the trust fund as a whole.

By creating a separate windfall benefits account this last summer, such drawing upon other parts of the trust fund is no longer possible. In a real sense, by creating this separate account Congress must now directly face the question each year whether to fully fund the windfall benefits account. That question under the current congressional budget procedures must be faced early each year, when the administration begins to formulate budget requests, and when the budget committees begin developing the first concurrent budget resolution, which sets the spending ceilings for all Federal programs.

When this process was begun this past spring for fiscal year 1982, the old law was in effect—and the reasonable expectation of all the parties, based on past practice, was that windfall benefits would not be cut even if Congress did not provide a full appropriation. In midstream, however, the law was changed. Yet at the time the railroad retirement law was changed this summer no provision was made for allowing under the Budget Act ceilings an increase in appropriation to the full level of $440 million.

In short this amendment enables Congress to untie its hands and to not allow retirees and widows to suffer a loss in needed income. I realize that the administration has embarked upon a difficult and thankless task of attempting to balance the budget and to restore the economic well-being of this Nation. And this has meant reductions in spending in many areas.

However, I think the Congress has done a responsible job throughout this past year in avoiding cuts of replacement income being provided to current beneficiaries. Without this amendment, current beneficiaries will suffer such a cut. I therefore believe that in this area of fiscal readjustment we must not reduce the current level of windfall benefits being paid to retirees. The amendment should be adopted.

Mr. NICKLES. Mr. President, I plan to vote against this amendment which would increase by $90 million Federal funding of railroad dual windfall benefits. I urge my colleagues to join me in defeating this amendment and would hope that they would consider the following facts when deciding.

First, proponents of this amendment allege that the fiscal year 1982 reduction in windfall benefits was an inadvertent injustice that was not anticipated when the Railroad Retirement Act Amendments were passed as part of the Omnibus Budget Reconciliation Act of 1981. Nothing could be further from the truth.

As with all legislation in the reconciliation bill, Congressional Budget Office projections were required. All parties involved in the railroad retirement amendments had those figures available to them. The Congressional Budget Office broke the railroad retirement package down item by item. One item was clearly marked "Windfall Benefits Separation/Limiting Benefits to Appropriations" and showed the following outlay reductions:

[In millions]

Fiscal year 1982	—$90
Fiscal year 1983	—68
Fiscal year 1984	—41

I have here a letter with attachments which was jointly signed by rail labor and management chief negotiators on railroad retirement—Ollie M. Berge for labor and Charles Hopkins for management. The letter was dated July 21, 1981, and was sent in response to a request by several Senators and myself. The letter urges our endorsement of the comprehensive package of amendments put together by the House Democrats and states that immediate passage is necessary to prevent the financial collapse of the railroad retirement system.

Attached to that letter is their esti-

mates of the savings when their package was enacted. Again, this is an item-by-item breakdown. One item reads "Windfall Benefits Separation/Limiting Benefits to Appropriations." They show the following savings in outlays which are even higher than CBO's:

[In millions]

Fiscal year 1982	−$96
Fiscal year 1983	−96
Fiscal year 1984	−91

I want the point to be made clearly, Mr. President, that both CBO figures and rail labor-management figures are based on a maximum funding to the windfall account of $250 million. The only reason, Mr. President, that rail labor-management wanted a separate windfall benefits account was because they knew that windfall appropriations would not exceed $350 million. If windfalls were going to be fully funded, there would be no reason to set up a separate account since with full funding the retirement funds would have no slack to pick up.

Let me read a few pertinent quotes from that rail labor-management letter and its attachments:

Passage of the present bill will save the system for its millions of present and future beneficiaries and will do so not at public expense but at the expense of railroad employees and employers. It also is compatible with and indeed promotive of the budget reconciliation targets.

The rail retirement system faces many of the same problems as the Social Security program. A much larger number of beneficiaries than active employees burdens the system. This is the reason that additional taxes and curtailed benefits are proposed for railroad employees, as is also the case for workers covered by the Social Security System. The sacrifices of rail labor and management incorporated in this legislation for railroad pensions should keep the system financially sound.

To the contrary, the proposal controls the overall rate of benefit escalation. There are some benefit liberalizations, including a new future benefit formula. However, there are constraints imposed in other areas such as windfall separation and survivor benefits by over $300 million in FY 1982. This overall benefit restraint will strengthen the retirement fund. That restraint will mean reduced budget outlays, as projected by the Congressional Budget Office.

And finally, one of the reasons rail labor-management supports the Dingell bill is because it:

Places dual benefits (or windfall) in an account that is separate from the basic railroad retirement system and thereby ends the drain on the system resulting from the annual shortfall in the windfall appropriations by Congress and automatically limits windfall benefits to whatever level is consistent with the annual appropriations.

Mr. President, these quotes clearly indicate that rail labor-management knew that enactment of the package they endorsed would result in this reduction of windfall benefits. Rail labor is playing a two-face role, Mr. President. They were here this summer saying we know Congress will not increase its appropriation, so please set up a separate account so that we do not have to make up the difference. Now they tell their members, "well when we agreed to that package we expected Congress to fully fund windfalls—so write Congress."

Now, Mr. President, let me move on to a second factor which must be considered. What did rail labor gain by agreeing to this windfall reduction. There were offsetting benefit increases. First, a permanent tier II COLA was enacted. Less than 5 percent of collectively bargained agreements include such a permanent COLA. Second, a new tier II benefit computation formula was adopted. Third, rail labor-management desperately fought for the Railroad Retirement Board to be given borrowing authority against the financial interchange. This also was enacted. Lastly, they were given early action on their legislation to prevent their fund insolvency, which was anticipated forthcoming in April of 1982.

Mr. President, I also wish my colleagues would consider the following remarks from William Adams, chairman of the Railroad Retirement Board in a letter dated January 14, 1981, to the Honorable THOMAS O'NEILL, JR., Speaker of the House of Representatives:

When Congress restructured railroad retirement benefits in 1974 into (1) a social security equivalent, (2) an industry pension, and (3) a windfall component, the cost to the general taxpayer of subsidizing railroad windfalls was estimated to require 25 level, annual appropriations of $250 million, for a total subsidy of $6.25 billion. In the 1976 Railroad Retirement Board 13th Actuarial Valuation, the windfall costs were reestimated at $363 million annually, a 45 percent increase in two years. In the 1979 14th Actuarial Valuation, the latest reestimate, windfall costs were projected at $500 million annually—twice the initial 1974 estimate. Since the $500 million estimate does not assume any inflation after 1980, the estimated cost is virtually certain to increase again in the Board's next Actuarial Valuation, scheduled for 1982.

It is apparent that without a change in existing law limiting the cost of windfall benefits, there will be an ever-increasing drain on the general fund of the Treasury.

Sound public policy dictates that there be a ceiling on the amount of dollars flowing from the general taxpayer to pay the cost of the windfall benefits. The $350,000,000 ceiling set forth in the draft bill being submitted is a full 40 percent greater than the $250,000,000 contemplated at the time of the 1974 legislation and is the maximum amount the Administration believes should be made available from the general fund of the Treasury for this purpose.

Mr. President, we are already overfunding windfalls by $100 million annually over and above the price tag Congress bought when it agreed to fund windfalls. The current $350 million annual appropriation amounts to a taxpayer subsidy of $700 per year per current rail worker, the amount annually required from either labor or management to fund the $350 million windfall if Congress did not.

Let me add, Mr. President, that when Congress adopted the Railroad Retirement Act of 1974, an amendment was offered and accepted to make windfall appropriations on a level funding basis rather than current need. Thus under that commitment, everyone understood that for periods of time windfalls would be underfunded and the railroad retirement fund would make up the difference and in the later years windfalls would be overfunded. Windfalls were not substantially draining the railroad retirement fund. The fund was paying out monthly over $200 million more in benefits than taxes taken in. Windfall required $90 million a year.

Because of irresponsible action by rail labor-management their fund was in serious jeopardy and once again Congress is asked to help them out. From 1970 to 1980 the following percentage changes have occured:

[In percent]

RR Workforce	−17
Number of Beneficiaries	+3.4
Benefit Paid	+188
Balance in Amount	−40.3

Who are these individuals who are experiencing these small reductions. A 21 percent cut sounds big, but lets look more closely. A railroad retirement check can be made up of four components—a social security equivalent, a private pension component, a supplemental annuity, and a windfall. Only windfalls are affected here. Railroad retirement checks range from an average spouse only amount of $240 a month to a maximum for retiree and spouse with maximum service to $1,557 a month. An employee average windfall is $111, a spouse's $92 and a survivor's $47. The average reduction in a monthly check currently experienced since October 1, 1981, is employee $23, spouse $19 and survivor $10.

If anyone thinks that is overly harsh let me add this caveat. All components of a railroad retirement check are tax-free benefits. How many other retirees receive, tax-free, their private pension portion of their retirement pay?

These are not deferred wages these individuals are having cut back. These are benefits arising as a result of a quirk in law which allowed one to receive benefits under two retirement systems. You moonlight outside of railroad, earn a minimum of social security quarters and receive the minimum social security benefit amount as a windfall above and beyond your social security equivalent portion of your retirement check. Once again, Mr. President, we have another example of reduce the Federal budget as long as it does not affect me.

Mr. President, with all this in mind, I urge my colleagues to join me in opposing this amendment. The House funded this at $350 million; an amendment to increase funding failed at the Senate Appropriations Committee and they also agree to fund at $350 million. Let the Senate now confirm those two previous actions by holding to $350 million, a full $100 million over our original price tag, by defeating this amendment.

Thank you, Mr. President.

● Mr. WILLIAMS. Mr. President, I strongly support the amendment by the Senator from Ohio, which I am pleased to cosponsor. This amendment is intended to correct a serious wrong that has been inflicted on hundreds of thousands of our railroad retirement pensioners.

In the past several weeks, about 400,000 railroad retirees have learned, to their horror, that their retirement checks un-

der the Federal railroad retirement system are being drastically cut as a result of actions taken by this Congress and the administration in the budget reconciliation process. Two out of every five people receiving railroad retirement benefits have been made the victims of a 21-percent cut in their so-called "windfall dual benefits"—the amount paid to retirees who were insured for social security benefits before 1975. From my State of New Jersey, and from across the country, we have heard an outcry of pain from our railroad retirees who are suffering from these serious cuts in benefits.

Indeed, a serious injustice has been inflicted on these retirees. Prior to 1974, individuals engaged in covered employment under both the Railroad Retirement Act and the Social Security Act were entitled to benefits under both acts. In 1974, Congress eliminated dual-benefit coverage, but authorized annual appropriations through the year 2000 for so-called "dual windfall benefits" for railroad retirees who had retired prior to 1974 to partially compensate them for their loss in benefits. Congress made a commitment to these retirees to fully fund these "dual windfall benefits."

Now, as a result of actions taken by us during the budget reconciliation process, we have inadvertently reneged on this commitment. These changes in the railroad retirement system were addressed primarily at restoring the solvency of the general retirement fund. However, in addition to these changes, Congress provided that the windfall dual benefit would be paid out of a specific dual benefits payments account and stopped the practice of borrowing from general funds to fund the windfall dual benefits. Regrettably, this fund is currently appropriated at only $350 million, while total cost to fully fund the account is $440 million. As a result, the retirement benefits of hundreds of thousands of our railroad retirees have been severely cut.

We must take immediate action to redress the injustice that has been inflicted on our railroad retirees. We must take immediate action to live up to the commitment that we made these railroad retirees in 1974 and fully fund the dual benefits payments account. It is right and proper that we take action today to restore the benefits to which our railroad retirees are lawfully entitled. For these reasons, I strongly urge the adoption of this amendment.●

Mr. SCHMITT. Mr. President, I yield to the distinguished Senator from Oregon. I may be right back.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, we have now completed the discussion on the Metzenbaum amendment and are ready to move on to another amendment. The deck has already been cleared with my first request on the matter of setting aside the Bradley motion to reconsider and the committee technical amendment in order to keep the sequence of these amendments going until 9 o'clock.

Mr. METZENBAUM. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. METZENBAUM. Mr. President, is it necessary for us to make any special arrangement or special order in order to see to it that this will be the first vote at 9 p.m.?

The PRESIDING OFFICER. No, there is not. That will be the regular order established earlier this evening.

Mr. METZENBAUM. I thank the Chair and I thank the manager of the bill for his cooperation.

Mr. HATFIELD. Mr. President, I now yield the floor to the distinguished Senator from Virginia for an amendment that he and I earlier discussed and I believe he has yet to submit for formal consideration.

The PRESIDING OFFICER. The Senator from Virginia.

UP AMENDMENT NO. 673

(Purpose: To limit certain budget authority to the budget estimates)

Mr. HARRY F. BYRD, JR. Mr. President, I send to the desk an amendment on behalf of myself and the Senator from Oklahoma (Mr. NICKLES) and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Virginia (Mr. HARRY F. BYRD, JR.), for himself and Mr. NICKLES, proposes an unprinted amendment numbered 673.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add a new section:

SEC. . Notwithstanding any other provision of this joint resolution, the appropriations, funds or other authority for projects or activities covered by this joint resolution which are funded under appropriations bills exceeding the budget estimates in budget authority shall not be in excess of the budget estimates as of November 20, 1981, until such appropriations bills are enacted; except that this section shall not operate to reduce funding for those activities described in Sections 401(c)(2)(C), 401(d)(1)(A) or 401(d)(1)(B) of the Congressional Budget Act of 1974 below any levels which may be established in an appropriations bill prior to its enactment.

Mr. HARRY F. BYRD, JR. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HARRY F. BYRD, JR. Mr. President, the Senator from Oregon and the Senator from Virginia discussed this amendment earlier. So I will be very brief.

What it does is this: It specifies that, until an appropriation bill becomes law, the budget estimate submitted by the President prior to November 20, 1981, that that budget estimate shall be the prevailing figure for the particular department involved until such time, and only until such time, as the appropriation bill becomes law.

Now the adoption of this amendment would be an action of the Congress, just as much as any other vote of the Congress. The resolution, as amended by this proposal, would be the will of the Congress, arrived at after debate.

Second, the amendment grants no new power to the President. The Congress under my proposal would set both the budget authority in this resolution and, just as important, the budget authority in all subsequent appropriation bills. The power of the President would remain just as it is now, to sign or veto. He has that power now. He would have no additional power under this amendment.

The purpose of the amendment is to seek a lower figure, lower spending figure, than the present resolution. The President feels that the total figure is too great. He has indicated the possibility of a veto.

This proposal is an effort to solve the dilemma in which the Congress finds itself. The appropriations bills should have become law almost 2 months ago. The deadline was September 30.

This proposal protects and preserves the appropriations process. It should be acceptable to the Congress as a whole because it assures the opportunity for careful scrutiny at each step of the legislative process—committee action, votes by each House, conference and final action on conference reports. It should be acceptable to the President because he can examine each appropriation on its merits. Clearly, there would be no incentive for a veto of this resolution if the pending amendment were adopted.

I say again, Mr. President, that what the amendment does is to specify that until an appropriation bill becomes law, that the budget estimate as submitted by the President will be the prevailing figure. But as soon as the appropriation bill is enacted into law for that particular department, then the figure in the appropriation bill would be the prevailing figure.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, we had a very delightful colloquy this morning on this issue and put it in an historic context. I think the Senator has made a very eloquent case for this.

I would only summarize my opposition to the amendment on the basis that it seems to me we ought to maintain the reference in the continuing resolution to a congressional action—that is to say, a House-passed bill, a Senate-passed bill, a conference report, whatever it might be—rather than yielding the reference level to the executive branch of Government. Otherwise, it seems to me we have sort of abandoned or we have given up, yielded, our basic role in the whole budgetary process. I think that would be my summarized position.

Mr. HARRY F. BYRD, JR. Will the Senator yield?

Mr. HATFIELD. I am happy to yield.

Mr. HARRY F. BYRD, JR. The President's figure would prevail only until the budget process was completed; namely, the appropriation bill was enacted into law. And it would prevail only if the President's figure is lower than the appropriation bill.

In summary, I would say that it seems to me that it does preserve the appropriations process because, as soon as the appropriation bill becomes law, then the figure in that appropriation bill is the prevailing figure and the President's budget estimate is no longer in that position.

Mr. HATFIELD. I thank the Senator for his further clarification.

Mr. President, I yield the floor at this time to the Senator from Florida, for the purpose of presenting an amendment.

The PRESIDING OFFICER. The Senator from Florida.

AMENDMENT NO. 635

(Purpose: To prohibit the obligation or expenditure of funds for the detention of certain aliens at facilities in the State of Florida)

Mrs. HAWKINS. Mr. President, I call up my amendment No. 635 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Florida (Mrs. HAWKINS), for herself and Mr. CHILES, proposes amendment numbered 635:

At the bottom of page 26, add the following:

SEC. 124. None of the funds appropriated by this joint resolution may be obligated or expended after March 1, 1982, for the detention of any entrant, any applicant for political asylum or for refugee status, or any other alien which would cause the total number of aliens to exceed five hundred and twenty-five at the facility known as Krome North, located in the State of Florida, or to exceed five hundred an twenty-five at the other facility in the State of Florida for the detention of aliens awaiting exclusion, deportation, or resettlement which is not used for such purpose on the date of enactment of this joint resolution.

Mrs. HAWKINS. Mr. President, the amendment that I have called up will place a cap, effective March 1, 1982, on the number of illegal aliens that can be detained at the Immigration and Naturalization Service (INS) facility known as Krome North. I have a number of reasons for offering this amendment:

First, the overcrowding at the facility has caused pitiful conditions; second, the facility has become a symbol to the people of south Florida of an immigration policy that is ineffective; and third, while long-term solutions are on the horizon, Florida needs help now and cannot wait for any solutions that may or may not materialize. Some of my colleagues from Florida and I have made these points before.

The result was that the Senate adopted identical language in another appropriations bill, and the House adopted similar language in one of their appropriations bills. I am offering this amendment again today to this continuing resolution because the need for this kind of action is great and because it will not add or subtract 1 cent from this appropriations bill.

I will not repeat all of my earlier remarks on this amendment. However, I believe that it would be beneficial to quickly review the conditions in Krome North, and in south Florida that necessitate prompt action on this amendment.

Krome North is an old nike missile site that was converted into a detention facility by the INS in order to cope with the large number of aliens that have been illegally entering Florida. This facility was designed to hold 525 detainees. However, currently it is holding roughly 1,110. These overcrowded conditions have led to breakdowns in the water and sewage systems giving rise to unhealthy and unsanitary conditions.

This facility is predominantly populated by Haitians who are generally characterized as an obedient people, but several months ago the overcrowding and unsanitary conditions at the camp led to riots and demonstrations. I believe that these pitiful conditions cannot be allowed to persist. The camp's population must be returned to its designed level.

The conditions that the recent influx of Cubans and Haitians have imposed on south Florida are equally bleak. Most people do not realize that Dade County, in south Florida, including the city of Miami, has been more heavily affected by an increase in the alien population than any other county in the country.

One out of every nine people currently living in Dade County entered the country within the last year and a half. The results of this massive influx have been devastating. Housing is impossible. Police and fire departments are overworked. Sewer, water, and electric systems are strained.

Jails and schools are filled beyond capacity. Unemployment is high. Tourism, an essential industry in south Florida, is down 20 percent, and crime has skyrocketed. In the city of Miami from 1979–80, robberies were up 103 percent, murders were up 59 percent, auto thefts were up 68 percent, and the rest of the crime statistics were equally appalling; 1981 statistics indicate that the crime rate in some categories has gone even higher. Headlines note Miami is now the murder capital of the world.

In south Florida, the Krome North detention facility has come to symbolize the national policies that have allowed these conditions to develop.

Not long ago on a church sign in Miami I saw the following words: "Why has the United States abandoned Miami?" Merely announcing the lowering of the population of the camp down to 525 would send a signal to the people of south Florida that they have not been abandoned, that the Senate is willing to take effective action to remedy some of the problems facing the area.

Attorney General William French Smith has been most helpful in appealing judicial opinions that hindered relocating the illegals.

I know that the INS is working to have a permanent detention facility constructed at Fort Drum, N.Y. My amendment allows for a reasonable amount of time for INS to arrange for alternate space for the overflow from Krome North. Neither I nor the people of Miami would want this overflow released on the streets of Miami, as Deputy Attorney General Edward C. Schmults said he would be forced to do if required to implement the cap immediately. It is my hope and INS's expectation to have this permanent facility constructed by the effective date of this amendment.

So I would ask for your support on this amendment because it would restore humane conditions to Krome North, because it would show this Congress resolve to tackle difficult immigration problems, because it provides the INS with sufficient time to find additional space for the Krome North overflow, because this amendment has been accepted by the Senate before, and because it will not affect the funding levels in this appropriations bill.

Mr. HATFIELD. Mr. President, the amendment offered by the Senator from Florida is one which has been considered by the Appropriations Committee and was incorporated in the State, Justice, Commerce appropriations bill.

Because action on that bill has not been completed, I understand her reason for attaching it to the continuing resolution. There is no objection. Therefore the committee will accept it as part of the continuing resolution.

The PRESIDING OFFICER (Mr. HATCH). The question is on agreeing to the amendment.

The amendment (No. 635) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mrs. HAWKINS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, at this time I yield the floor to the Senator from Minnesota for a matter he wishes to raise.

Mr. DURENBERGER. Mr. President, I first suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SCHMITT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, the distinguished junior Senator from California, Senator HAYAKAWA, is with us and has an amendment which he wishes to propose at this time. I yield to him for that purpose.

UP AMENDMENT NO. 674

(Purpose: To assure that funds made available for the Low-Income Home Energy Assistance program are specifically used to make payments in accordance with section 2605(b) (1) and (2) of the Omnibus Budget Reconciliation Act of 1981)

Mr. HAYAKAWA. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from California (Mr. HAYAKAWA) proposes an unprinted amendment numbered 674.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution, add the following new section:

SEC. . Notwithstanding any other provision of this joint resolution, each State shall establish such fiscal control procedures as are necessary to assure that the funds made available under this resolution for the low-income energy assistance program are used for payments in accordance with section 2605(b) (1) and (2) of the Omnibus Budget Reconciliation Act of 1981 and that each eligible household receiving such payments does not use the payments for any other purpose than the purpose described in section 2602(a)".

Mr. HAYAKAWA. Mr. President, my amendment would remedy a serious abuse that has arisen under the low-income energy assistance or LIEAP program. Funding for this program is, of course, included in the bill before us. Currently, the statute permits the various States to disburse this money directly to recipients, with no assurances that they will actually use it for their energy bills. This has resulted in the use of these funds in a manner never intended by Congress.

For example, the California State Office of Economic Opportunity (OEO) recently released a plan for the 1981–82 low-income energy assistance plan. As currently designed, an eligible household may now receive a direct energy assistance payment of up to $400, spend none of this money on energy bills, and allow a shut off situation to develop. Threatened by a shut off, this same recipient can apply for energy crisis intervention assistance from the OEO and receive an additional $200; no strings attached. There is no provision requiring that any of this money will be used to pay overdue utility bills. Moreover, under the regulatory policies of the public utilities commission, it is difficult to shut off such customers.

Clearly, this program is being abused. There have been reports in several States of recipients cashing their LIEAP checks at liquor stores. In some cases payments have continued to be sent long after the recipient was reported deceased.

This amendment, Mr. President, is to make possible a cure of this abuse and this waste of money, money that is intended for low-income energy assistance but is often used in liquor stores, not to say brothels.

I do not say this lightly because there is documentary evidence of this latter fact.

The problem, Mr. President, is that the States are not required, or able, to account for the ultimate disbursal of these funds. Last year in California, for example, the State OEO spent almost $70 million, ostensibly to help the needy pay their fuel bills. Today, not one dime of that money can be accounted for.

The Washington Post of November 1, 1981, cited similar problems in Maryland. I would like to quote from that article:

The state of Maryland has offered nearly $2 million in excess federal energy assistance funds to needy families who will be able to spend the money—originally meant to pay household fuel bills—on anything they want.

The amendment I offer today will correct this situation. I am sure that my friend from New Mexico agrees that money appropriated by the Congress should be spent for the purpose intended. This amendment assures that funds are disbursed in a direct and accountable manner, but in no way imposes an obligation that the States use any particular method of disbursement.

I am certain that my colleagues will agree that in a time of fiscal austerity, we must be particularly mindful that every dollar appropriated by Congress reaches its proper destination. I urge your approval of this amendment.

I understand there is no objection to the amendment on either side. I yield the floor.

Mr. SCHMITT. Mr. President, the Senator from California has, on numerous occasions, brought this particular situation to the attention of the Appropriations Committee, and to the Senator from New Mexico specifically.

The problems that he has mentioned coincide with other problems that have come to light in other States.

I have talked with a number of Senators, including the distinguished Senator from Kansas, the chairman of the Finance Committee, and I think there is general agreement that this amendment should be accepted.

I congratulate the Senator on his initiative.

Mr. HAYAKAWA. I thank the distinguished Senator from New Mexico.

Mr. SCHMITT. Mr. President, I move that the amendment be accepted.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 674) was agreed to.

Mr. SCHMITT. I move to reconsider the vote by which the amendment was agreed to.

Mr. HAYAKAWA. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 675

(Purpose: To eliminate funds for MSHA coverage of independent construction contractors on surface of mine sites and of state and county governments)

Mr. HATFIELD. Mr. President, Senator SASSER is next up but because he is not here, I am going to continue the practice of urging the Chair to recognize Senators who have amendments that we believe will be adopted and therefore not require a record vote. I ask the Chair to recognize the Senator from Montana (Mr. MELCHER).

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MELCHER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 675.

Mr. MELCHER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following:

"*Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer or enforce any standard, rule, regulation or order under the Federal Mine Safety and Health Act of 1977 with respect to any independent construction contractor who is engaged by an operator for the construction, repair or alteration of structures, facilities, utilities or private ways or roads located on (or appurtenant to) the surface areas of any coal or other mine, and whose employees work in a specifically demarcated area, separate from actual mining or extraction activities; and provided further that no funds shall be obligated or expended to prescribe, issue, administer or enforce any standard, rule, regulation or order under the Federal Mine Safety and Health Act of 1977 on any State or political subdivision thereof.

Mr. MELCHER. Mr. President, this amendment has nothing to do with commerical sand, gravel, and stone. It neither adds nor deletes funds.

It corrects an aberration on the Labor Department's interpretation of the law which contends that independent construction contractors engaged in surface construction on a mine site are covered by the Mine Safety and Health Act.

These contractors and their employees are covered by OSHA for similar work on nonmine property. Under the present interpretation, they are thus covered primarily by OSHA, and also by MSHA, if they have a contract to build a garage, office building, road, and so forth, on a mine site. This is ridiculous and wasteful.

The purpose of the amendment is threefold:

First. To provide proper protection to construction workers against construction hazards which MSHA inspectors are not trained to recognize and,

Second. To eliminate the current double regulation of independent construction contractors who currently are regulated by OSHA and MSHA. The amendment would restrict coverage to OSHA only.

Third. To eliminate coverage of county road crews.

My amendment will not eliminate all safety and health protection from surface construction workers as some claim. They will be under the protection of OSHA. The courts have so ruled several times in similar circumstances.

Neither will the amendment require mine operators to be under the jurisdiction of OSHA as well as MSHA, as a similar provision in the House Labor-Human Health Services appropriations bill does, since it applies to independent construction contractors engaged by a

mine operator, but not to work performed by the mine operator's employees.

One other important benefit of this amendment is to relieve MSHA inspectors of the current diversion from their duty to inspect mines, while they try to regulate surface construction for which they have neither guidelines from MSHA nor any expertise. Their job is mine inspection, not construction inspection.

This amendment further withholds funds from MSHA to eliminate their present practice of harassing county commissioners and road crews who are responsible for repair of county roads.

These county and city, or townships workers are not miners by any stretch of the imagination. Most spend only a few days or weeks repairing rural roads. The safety record on this type of work is very good.

MSHA personnel should be doing their crucial jobs protecting real miners and stop wasting their valuable time on county employees who work only incidentally with sand and gravel for a small part of the year.

This amendment is supported by the Associated General Contractors, the Building Trades AFL–CIO, National Association of Counties, American Mining Congress, and is not opposed by the United Mineworkers or the Steelworkers.

Mr. President, what this amendment does is take MSHA out of the business of having to look at a construction job on the mine site. It would mean that the contractor and the workers there would be subject to OSHA. That fits because those workers are subject to OSHA on every other job that they are on except where they might be building a building on a mine site or mining property. It has nothing to do with the mining of anything, it has nothing to do with underground; it is on the surface.

Mr. President, we have had a bill introduced a number of times, sponsored by a sizable number of Senators—Senators BUMPERS and GOLDWATER, FORD, CHILES, HATFIELD, PRYOR, BURDICK, BAUCUS, BOSCHWITZ, CANNON, WALLOP, MCCLURE, MELCHER, SYMMS, ABDNOR, NUNN, and BOREN. What the amendment seeks to do is take these workers and those contractors out from under a different set of regulators when they happen to be building on a minesite.

The amendment that I offer, Mr. President, as far as I know, has no enemies at all. I think it is a good, straightforward step. I hope the Senate can accept it.

Mr. SCHMITT. Mr. President, the distinguished Senator from Montana has, indeed, found the universal amendment, the one for which I also know of no opposition, the one which everyone supports that I am familiar with in my mining State of New Mexico, as well as his of Montana and many others throughout the country. It does not make any sense to this Senator, nor do I believe it makes any sense to the Senate, to have two agencies overseeing the regulation of these mine properties.

I am happy on behalf of the committee to accept the Senator's amendment and move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana.

The amendment (UP No. 675) was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

Mr. President, if I may have the attention of the Senators from Montana, I am advised by the staff that we may need to revise some of the language in the amendment to make it conform with the language of the continuing resolution. I ask unanimous consent that I may do that without in any way vitiating the vote.

Mr. MELCHER I have no objection to that.

The PRESIDING OFFICER. Without objection, it is so ordered.

The motion to lay on the table was agreed to.

UP NO. 676

(Purpose: To provide that provisions relating to payment for ineffective drugs contained in H.R. 4560 shall be incorporated into the continuing resolution only for the period ending March 31, 1982)

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Minnesota (Mr. DURENBERGER) for himself and Mr. BAUCUS, proposes an unprinted amendment numbered 676:

At the end of the joint resolution add the following new section:

SEC. . Notwithstanding any other provision of this joint resolution, the provisions of section 210 of the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act, 1982 (H.R. 4560), as passed by the House of Representatives on October 6, 1981, and the provisions of section 209 of such Act as reported by the Senate Committee on Appropriations on November 9, 1981, shall be applicable only during the period ending March 31, 1982, with respect to sums appropriated pursuant to this joint resolution.

LESS THAN EFFECTIVE DRUGS

Mr. DURENBERGER. Mr. President, as part of the Omnibus Reconciliation Act of 1981, section 2103, the Senate Finance Committee accepted a House provision prohibiting payment under part B of medicare and the use of Federal matching funds under medicaid for prescription drugs that have not been determined by the FDA to be effective. The change went into effect on October 1, 1981, and applies to about 125 prescription drugs.

There has been much confusion and misinformation surrounding section 2103. So much so, that a rider was added to the House appropriations bill, offered by Representative BLILEY, which would not allow funds for the implementation or enforcement of the provision. By reference, the continuing resolution before us incorporates the Bliley amendment.

The amendment I offer today on behalf of myself as chairman of the Subcommittee on Health of the Committee on Finance and Senator MAX BAUCUS, ranking minority member of that subcommittee, would provide that the Bliley amendment shall not be incorporated into the continuing resolution.

I wish initially to point out that the Finance Committee acceptance of section 2103 was not done simply in the rush to complete action on the Reconciliation Act, as has been suggested by supporters of the appropriations action.

Mr. President, the issue simply boils down to this: When there is not enough money to go around, we should not be using our limited health care dollars for drugs which have not been demonstrated to be effective.

This issue has a long history. In 1971, HEW issued regulations prohibiting expenditure of Federal funds under its direct care programs for less than effective drugs. This means that the Department does not pay for these drugs in its own health care facilities, which include Public Health Service and Indian Health Service hospitals and clinics. The Defense Department and the Veterans' Administration have also followed this policy.

In 1972, 1974, 1979, and again in 1980, GAO recommended regulations to preclude the purchase of drugs judged to be ineffective or possibly effective under medicaid. In 1974, GAO estimated that approximately $40 million was spent on these drugs. Two previous Secretaries of the Department of Health, Education, and Welfare, including Caspar Weinberger in 1975, told Congress that reimbursement should be stopped. Two previous Surgeons General and two previous FDA Commissioners also recommended termination of reimbursement.

I wish to make it clear, Mr. President, that section 2103 does not take the drugs in question off the market; it merely says we are not going to use Federal tax dollars to pay for them under medicare and medicaid. Moreover, for every less than effective drug not paid for as a result of section 2103, there is a substitute drug which has been proven effective and which can be paid for.

As I am sure my colleagues are aware, drug coverage under the medicaid program is optional. The States may choose not only whether to provide drugs but also what specific drugs they will cover. Pharmacies and pharmacists are familiar with the formularies many States prepare which list exactly what drugs are covered. In some six States and the District of Columbia, the drugs determined to be less than effective by FDA are already excluded from coverage; in other States, only certain high-cost drugs are covered.

What I am suggesting, Mr. President, is that limiting payment to certain drugs is not a new practice; it is one that has been in place for years.

Drugs affected by this provision, and those already excluded from payment under the medicaid program in many States, are not being taken off the market. We are simply saying we are not

willing to use limited Federal dollars to pay for them.

One additional point: The provision included in the reconciliation bill which we are supporting with this amendment will have little effect on the medicare program. As I am sure my colleagues are aware, the provision relates only to part B of the medicare program, which primarily covers physician services and outpatient care rather than hospital care. Under part B, medicare currently does not, under almost all circumstances, pay for outpatient drugs. Thus, this provision has little or no effect on medicare beneficiaries.

This happened because the committee that approved the measure did not have jurisdiction over medicare part A and, thus, that matter was not in conference when the medicaid and medicare part B provision was accepted.

We could fix that right now with a simple amendment, but I do not believe that the continuing resolution is the proper forum for such an action, just as I do not believe that the Bliley amendment belongs on the appropriations bill.

Mr. President, perhaps the most succinct appraisal of this whole matter was stated in a letter to me from Bill Hutton, executive director of the 3.5-million-member National Council of Senior Citizens:

The Council strongly favors enforcement of the ban on ineffective drugs under medicare and medicaid. Both the National Academy of Sciences and the Food and Drug Administration have determined that these drugs do not work. The drug manufacturers have had 19 years to prove they work and have failed to do so, and there are substitutes for all these drugs that have been proven effective. It is time for the government to stop wasting its money on ineffective drugs and to stop endangering the health of millions of medicare and medicaid recipients, including our members. Six states and the District of Columbia have already banned these drugs from their medicaid programs, and I urge the Senate to uphold the ban on these drugs and reject the Bliley amendment.

A similar letter was received from the 10.5-million-member American Association of Retired Persons/National Retired Teachers Association. They stated:

By maintaining reimbursement for these less than effective drugs, medicare and medicaid beneficiaries may be denied the opportunity for more effective drug treatment. Substitute drugs with proven effectiveness are available so patients would be able to received needed drug treatment; moreover, the long-term savings achieved by treating a patient with a drug of proven effectiveness may well be substantial.

Mr. President, I trust that the Members of this body will agree on the commonsense approach of section 2103 and will support our amendment.

Mr. President, I ask unanimous consent that the letters from representatives from each of the organizations I referred to, along with responses made to the various arguments against section 2103, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL COUNCIL OF SENIOR CITIZENS,
Washington, D.C., October 22, 1981.

Re: Bliley Amendment to Continue Medicare and Medicaid Payments for Ineffective Drugs.

Hon. DAVID DURENBERGER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DURENBERGER: I understand that the Senate is considering an amendment to the appropriations bill for the Department of Health and Human Services that is similar to the Bliley amendment that passed the House of Representatives on October 6, 1981 (Section 210 of H.R. 4560). This amendment would prohibit enforcement of Section 2103 of the Omnibus Budget Reconciliation Act of 1981 which stops payment under Medicare Part B and Medicaid for ineffective drugs.

On behalf of the 3,500,000 members of the National Council of Senior Citizens, I urge you to reject the Bliley amendment. The Council strongly favors enforcement of the ban on ineffective drugs under Medicare and Medicaid. Both the National Academy of Sciences and the Food and Drug Administration have determined that these drugs do not work. The drug manufacturers have had 19 years to prove they work and have failed to do so, and there are substitutes for all these drugs that have been proven ineffective. It is time for the government to stop wasting its money on ineffective drugs and to stop endangering the health of millions of Medicare and Medicaid recipients, including our members. Six states and the District of Columbia have already banned these drugs from their Medicaid programs, and I urge the Senate to uphold the ban on these drugs and reject the Bliley amendment.

Sincerely,

WILLIAM R. HUTTON,
Executive Director.

NATIONAL COUNCIL OF SENIOR CITIZENS,
Washington, D.C., November 13, 1981.

Hon. DAVID DURENBERGER,
Chairman, Subcommittee on Health, Senate Finance Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR DURENBERGER: The National Retired Teachers Association and the American Association of Retired Persons urge you to be actively involved in striking the "Bliley Amendment" from H.R. 4560, the Labor-HHS Appropriations bill, when it is considered on the Senate floor. The "Bliley Amendment" reverses Section 2103 of the 1981 Omnibus Budget Reconciliation Act which terminates reimbursement under Medicare Part B and Medicaid for "DESI" drugs.

Section 2103 denies reimbursement only for those pre-1962 drugs (approved when safety but not efficacy was required) which have been determined by the National Academy of Sciences and the FDA to be less than effective for all indications, for which a Notice of an Opportunity for a Hearing (NOOH) has been published), and where no compelling justification for its medical need exists.

By maintaining reimbursement for these less than effective drugs, Medicare and Medicaid beneficaries may be denied the opportunity for more effective drug treatment. Substitute drugs with proven effectiveness are available so patients would be able to receive needed drug treatment; moreover, the long-term savings achieved by treating a patient with a drug of proven effectiveness may well be substantial.

Again, NRTA–AARP urge that an amendment to strike the Bliley Amendment be offered on the Senate floor when H.R. 4560 is considered.

Sincerely,

PETER W. HUGHES,
Legislative Counsel.

RESPONSES TO ARGUMENTS MADE AGAINST SECTION 2103

1. Medicare and Medicaid beneficiaries will be discriminated against by being denied access to drugs available to other citizens.

Response: For every ineffective or possibly effective drug not paid for as a result of section 2103, there is a substitute drug which has been proven effective and which can be paid for. As Bill Hutton, Executive Director of the 3.5 million member National Council of Senior Citizens said:

"The Council strongly favors enforcement of the ban on ineffective drugs under medicare and medicaid. Both the National Academy of Sciences and the Food and Drug Administration have determined that these drugs do not work. The drug manufacturers have had 19 years to prove they work and have failed to do so, and there are substitutes for all these drugs that have been proven effective. It is time for the government to stop wasting its money on ineffective drugs and to stop endangering the health of millions of medicare and medicaid recipients, including our Members. Six states and the District of Columbia have already banned these drugs from their medicaid programs, and I urge the Senate to uphold the ban on these drugs and reject the Bliley amendment."

The National Retired Teachers Association-American Association of Retired Persons also opposed the appropriations rider that would permit the continuation of payment for less than effective drugs. As Peter Hughes, Legislative Counsel for the 10.5 million member organization stated:

"By maintaining reimbursement for these less than effective drugs, medicare and medicaid beneficiaries may be denied the opportunity for more effective drug treatment. Substitute drugs with proven effectiveness are available so patients would be able to receive needed drug treatment; moreover, the long-term savings achieved by treating a patient with a drug of proven effectiveness may well be substantial."

In addition, there is nothing in section 2103 which would prohibit States or individuals from purchasing less than effective drugs on their own.

2. Drug companies will be denied due process inasmuch as the FDA has not yet made a final determination that the drugs in question should be removed from the market.

Response: Government plays two roles with respect to these less than effective drugs. As a regulator, Government decides whether or not drugs should be available on the market. In this case, the drug companies have already had 19 years to develop and submit data to convince the FDA that the drugs in question are effective.

As a prudent purchaser Government must decide what items and services it should finance from its limited funds. It is time the Government exercised its discretion by limiting its payments to the proven alternatives which have been determined to be effective.

This action by the Congress is certainly not without precedent. Both the medicare and medicaid laws authorize the establishment of safeguards against inappropriate care. Both the State and Federal Governments have administratively evaluated medical services and items and based decisions not to pay for them on finding them to be less than effective.

3. FDA has changed its preliminary finding on ineffectiveness 152 times.

Response: Section 2103 applies only to drugs for which a Notice of Opportunity for Hearing (NOOH) has been issued. Of the 900 NOOH drugs for which a final determination has already been made, only 15 have been upgraded to "effective."

4. The Department of Health and Human Services (HHS) doesn't know which drugs are

affected; and physicans and pharmacists would be burdened with lengthy lists.

Response: On October 30, 1981, the Department of HHS provided States and medicare carriers and intermediaries with a list of drugs for which payment would be denied. Both the State medicaid programs and medicare now restrict the items and services they will pay for. For example, virtually every State maintains a formulary of the drugs for which it will pay or lists drugs which are not reimbursable. Under section 2103, the drugs in question would simply be added to these lists.

5. The Department of HHS has consistently opposed this type of provision.

Response: Two previous Secretaries of the Department, including Caspar Weinberger in 1975, told Congress that reimbursement should be stopped in the manner carried out by section 2103. Two previous Surgeon Generals and two previous FDA Commissioners also recommended similar termination of reimbursement. In 1971 HEW issued regulations prohibiting expenditure of Federal funds under its direct care programs (e.g., PHS and Indian Hospitals) for less than effective drugs. This policy has also been applied by the Defense Department and the Veterans Administration.

6. CBO indicated that there are no savings related to section 2103.

Response CBO's position is that no data is available to enable it to determine the cost and savings that would occur due to the substitution of effective drugs for less than effective drugs.

But apart from the question of the specific level of savings that might or might not occur, it is not unreasonable to surmise that ineffective medicine costs more in the long run than effective medicine. In November of 1979 GAO, in repeating its recommendation, stated:

". . . If our recommendation was implemented Federal Medicaid funds would be more effectively used and the health care of medicaid recipients would be improved through the substitution of drugs having evidence of effectiveness for drugs having little or no evidence of effectiveness."

Mr. DURENBERGER. At this time, Mr. President, I yield to my distinguished colleague and friend (Mr. BAUCUS) who is the ranking minority member on the subcommittee.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I very much appreciate the efforts on the part of the Senator from Minnesota.

Mr. President, I am pleased to join my distinguished colleague, the chairman of the Finance Committee's Subcommittee on Health, in opposing the provision of the continuing resolution that would prohibit enforcement of section 2103 of this year's Reconciliation Act.

Section 2103 bars Federal payment for less than effective drugs under medicaid and part B of medicare. It has already been put into effect.

Mr. President, it has been argued that section 2103 was adopted in haste—that it was poorly thought out and poorly conceived. Nothing could be further from the truth.

To begin with, the some 125 drugs for which Federal reimbursement would be withheld have been under review since the early part of the 1960's. They were found to be less than effective, first, by the National Academy of Sciences and then by the Food and Drug Administration.

By 1971, the drugs in question were barred from PHS hospitals and Indian hospitals and clinics. Shortly thereafter, the VA and the Defense Department followed suit by prohibiting their use.

In 1972, 1974, 1979, and again in 1980, GAO recommended that these same drugs should be barred from Federal reimbursement. Two previous Secretaries of HEW, including Casper Weinberger in 1975, told Congress that they believed that reimbursement should be stopped. Two previous Surgeon Generals and two previous FDA commissioners also recommended termination of reimbursement for these unproven drugs.

In passing section 2103, the Congress acted as a prudent consumer should—it put a stop to the use of scarce Federal dollars for the purchase of drugs that are less than effective. And, for every drug affected by section 2103, there is a substitute which has been proven effective and which can be paid for.

Mr. President, senior citizens themselves see the issues very clearly, as the letters which my distinguished chairman just read show. As Bill Hutton of the 3.5-million member National Council of Senior Citizens pointed out:

It is time for the government to stop wasting its money on ineffective drugs and to stop endangering the health of millions of medicare and medicaid recipients.

Mr. President, in these days of fiscal austerity, when we find it necessary to eliminate benefits that older people need and want, does it make any sense to continue paying for drugs which have failed to prove their value in the almost two decades they have had to do so?

I urge the Members of this body to join us in voting to amend the continuing resolution to prevent it from interfering with the enforcement of section 2103.

Mr. President, today there are 18,000 drugs which are available on the market and which are reimbursable by medicaid and medicare. The question here is very simple. It is whether 125 of those 18,000 drugs which are not effective and not found to be effective by FDA should also be reimbursable by medicare and medicaid. To ask the question is to answer it, in these days when we are trying to balance the budget and cut down on waste in Government, and it seems to me that those 125 of 18,000 should not be reimbursable.

There are drugs available among the remaining 18,000 to take care of the same needs supposedly addressed by the 125 drugs.

In addition, these 125 have been reviewed for the last 19 years, and for 19 years the pharmaceuticals have not yet been proven to FDA satisfaction to be effective.

Previous to that, Secretary Weinberger, the Secretary of HEW, ruled that these kinds of drugs should not be reimbursable. GAO stated many times—in 1972, 1974, 1979, and 1980—its recommendation that these drugs should not be reimbursable.

The Senator from Minnesota has listed the organizations that are in favor of this amendment.

The hour is late, and the arguments are many. I thank the Senator for his efforts here, because they are very worthwhile.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. DURENBERGER. I yield.

Mr. DOLE. Mr. President, the Senator from Kansas supports the action of the distinguished Senator from Minnesota (Mr. DURENBERGER), and applauds his willingness to resolve this particular issue.

While I believe that the Federal Government, as a payor, should not pay for drugs not determined to be effective, I recognize the difficulties in disseminating information to the States and to the druggists in those States, and I agree that additional time for implementation is reasonable.

The distinguished Senator from Virginia (Mr. WARNER), the Senator from Pennsylvania (Mr. SPECTER), and Senators DURENBERGER and BAUCUS ought to be thanked for their efforts to resolve this matter.

INEFFECTIVE DRUGS

● Mr. KENNEDY. Mr. President, I rise in support of the amendment of the distinguished chairman and ranking minority member of the Finance Committee's Health Subcommittee.

I find it ironic that the issue of whether or not the medicare and medicaid programs will continue to pay for ineffective drugs is being debated at all in this body.

Throughout the debate on the budget—in committees, on the Senate floor, in conference—we constantly hear the refrain—we have got to cut the budget, we have got to cut out waste, we have got to cut back the size of the Federal Government even if it means some people will get hurt in the process.

And we have cut the budget—with a vengance.

We have cut out $200 million in low income energy assistance.

We have drastically reduced support for education programs, school lunches, and health services.

We have reduced the growth in the Federal share of medicaid at a time when health care costs are skyrocketing.

And yet here we are arguing over whether limited Federal dollars should be spent on ineffective drugs.

Both the National Academy of Sciences and the Food and Drug Administration have determined that these drugs are less than effective.

If evidence does exist that would prove efficacy, the drug companies have had 19 years to provide FDA with that evidence.

The Federal Government does not pay for these drugs in their direct patient care programs. The Department of Defense and Veterans' Administration hospitals do not purchase or prescribe these drugs. Neither does the Indian Health Service. Why should the medicare and medicaid programs pay for ineffective drugs?

More importantly, why should medicare and medicaid beneficiaries—the aged and the poor—be treated with ineffective drugs when, for each of these drugs, there is a drug product that is effective?

I urge adoption of the amendment.●

Mr. SCHMITT. I understand that the parties who are particularly interested in the so-called Bliley amendment have reached a compromise, and that compromise is represented by the amendment before the Senate. Before moving the amendment, however, I understand that the Senator from Virginia may wish to make a few remarks.

Mr. WARNER. Mr. President, I congratulate the proponents of this amendment. I wish to clarify that these drugs will be reimbursed—the category mentioned here will be reimbursed—through March 31, 1982, but not a day longer.

Mr. DURENBERGER. The Senator is correct in that assumption.

Mr. WARNER. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (UP No. 676) was agreed to.

Mr. SCHMITT. I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I ask the Chair to recognize the Senator from Tennessee (Mr. SASSER) for the purpose of offering an amendment.

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

UP AMENDMENT NO. 677

(Purpose: To provide for the reduction in funds appropriated or otherwise made available by this Act for payments not required by law)

Mr. SASSER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Tennessee (Mr. SASSER) for himself and Mr. PRYOR proposes an unprinted amendment numbered 677.

Mr. SASSER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

To the committee amendment, add the following:

SEC. . (a) The total funds appropriated or otherwise made available by this Act for payments not required by law shall be reduced by three per centum, except for those projects or activities provided for under the Defense and Military Construction Acts, and except for the Social Security Administration account entitled "Limitation on Administrative Expenses", veterans' medical care, and the Food Stamp Program.

(b) In carrying out subsection (a), the amount appropriated or otherwise made available by this Act for any program, project, grant, or activity under which payments are not required by law shall not be reduced by more than one per centum.

(c) In carrying out subsection (a), the amount appropriated or otherwise made available by this Act to pay salaries, benefits, and related expenses of Federal employees classified under Schedule A, B, or C and excepted from the competitive service under section 3302 of title 5, United States Code, shall be reduced by 33 per centum.

(d) Any reductions in the amounts appropriated or otherwise made available by this Act which are necessary to carry out subsection (a) and which are in addition to the reductions described in subsections (b) and (c) shall be made from amounts available for—

(1) official reception and representation activities;

(2) publicity or propaganda activities designed to influence legislation pending before the Congress or the legislature of any State;

(3) advertising or public relations activities;

(4) consultant services;

(5) chefs or personal cooks;

(6) chauffeurs;

(7) limousines; and

(8) travel.

Mr. SASSER. Mr. President, my amendment provides for an across-the-board cut in the continuing resolution for payments not required by law. This amendment would reduce Federal spending authorized by this resolution by several billion dollars.

The amendment specifically prohibits cuts in entitlement programs. Expenditures for entitlements are required by law. Under my amendment, veterans' benefits would be protected. The Social Security Administration is protected. Revenue sharing payments are protected. There are no cuts in the Department of Defense appropriations. The amendment protects the much touted "safety net."

My amendment responds to the need to cut spending in this resolution, I think, in a very responsible way. The amendment instructs the executive branch to live up to its rhetoric and cut and reduce Federal spending where it should be cut, in the fat in the budget, in the fraud, waste, and abuse.

The amendment stipulates that no single program can be cut more than 1 percent. The remainder of the cuts would come from those areas where we find the greatest waste and the greatest abuse in Federal spending.

The amendment would require, for example, that political employees in the executive branch be reduced by one-third. The administration has indicated an approach which provides for large reductions in civil service employees. As many as 75,000 civil service employees are going to be terminated. Most of those employees have faithfully and efficiently performed their duties in departments and agencies of the executive branch. My amendment merely adds some equity to the policy of this administration.

If we are going to reduce the number of Federal employees who fall under civil service, it only stands to reason that we should also have a reduction in the number of those employees who are not protected by civil service but who are essentially political appointees.

My amendment also says that the remainder of the reductions should be taken from the big ticket items in the budget, such as travel. We held hearings not too long ago—as a matter of fact, last year—in the Legislative Appropriations Subcommittee of the full Appropriations Committee. At that time, we learned that enormous sums are being expended for Federal travel. Taking the average length of a trip and the average aid fare for that trip, we calculated that, using those figures, more than 20,000 Federal employees could be in the air 365 days a year, including Christmas and other holidays. We calculated that this number of Federal employees would fill every seat on the Lockheed 1011 fleet presently operating in this country. We reviewed many travel vouchers and concluded that there is great abuse in the Federal travel program.

Mr. President, my amendment also mandates a cut in Government consultants. The distinguished Senator from Arkansas (Mr. PRYOR) has spoken long and eloquently on this floor about the continuing and expanding problem related to the abuse of Government consultants. He has documented that billions of dollars that are expended every year for consultants who produce voluminous reports that simply gather dust on the shelves in agencies and departments around Washington.

My amendment also is directed at the public relations activities of the various agencies of Government. We are all familiar with the films that are made by the various agencies, and their efforts to use public relations techniques to advance their aims and objectives. Perhaps that would not be so reprehensible if the taxpayers were not footing the bill.

There are other frivolous activities, and perks of the Cabinet Secretaries and high-ranking officials, such as cooks, chauffeurs, and that sort of thing. My amendment mandates cuts in those areas as well.

So, Mr. President, I think my amendment is a realistic one. We can cut Federal spending, and I think we can cut it in a fair and equitable manner. We can cut Federal spending and still protect the so-called safety net and still allow for substantial increases in the defense budget.

Under my amendment, spending in the Department of Defense will still remain at the highest point in history, approximately $200 billion, a $25 billion increase over fiscal year 1981.

Mr. President, during the political season last year we were told and the American people were told that the Federal budget could be balanced and it could be balanced by cutting out waste, fraud, and abuse.

The President said that $25 billion or more could be cut from this budget in fraud, waste, and abuse. In September 1980 the President said that fraud, waste, and abuse accounted for more than 10 percent of all the Federal spending.

Mr. David Stockman in the amazing revelations that he made in a recent magazine article indicated that $20 to $30 billion in waste and fat could be cut from the defense budget alone. As I recall he characterized the Pentagon as a swamp of waste.

Mr. President, our amendment goes to the heart of waste in Federal spending, travel and consultants, and other areas which are the subject of the most abuse.

This amendment cuts Federal spending and still preserves congressional priorities. The amendment gives the ad-

ministration the opportunity to fully embrace the rhetoric that it used in the past and mandates cuts to the budget in the most equitable manner.

Mr. President, I think all the Members of this body want to cut waste and inefficiency in Federal spending. I think all of the Members of this body on both sides of the aisle want to balance the budget, and I think all of the Members of this body on both sides of the aisle want a national defense as strong as this country needs, a national defense that can fully meet the defense needs not just of this country but of the free world.

This amendment provides for a cut in Federal spending. The amendment provides progress toward a balanced budget. The amendment provides for a stronger national defense.

I think it is important that we point out again that this amendment does not make a reduction in the crucial areas of defense spending.

I reiterate that the Social Security Administration is protected. And there will be no cut in veterans' benefits under this particular amendment. I am sure that all of my colleagues have been inundated by letters, calls, and requests from veterans' organizations and pleas from veterans and their families that no further cuts take place in veterans' benefits. This amendment protects the Veterans' Administration.

Mr. President, I send to the desk a modification of my amendment.

The PRESIDING OFFICER (Mr. ABDNOR). The amendment is so modified.

The modified amendment is as follows:

H.J. RES. 3

SEC. . (a) The total funds appropriated or otherwise made available by this Act for payments not required by law shall be reduced by three per centum, except for these projects or activities provided for under the Defense and Military Construction Acts, and except for the Social Security Administration account entitled "Limitation on Administrative Expenses", veterans' medical care, and the food stamp program.

(b) In carrying out subsection (a), the amount appropriated or otherwise made available by this Act for any program, project, grant, or activity under which payments are not required by law shall not be reduced by more than one per centum.

(c) In carrying out subsection (a), the amount appropriated or otherwise made available by this Act to pay salaries, benefits, and related expenses of Federal employees classified under Schedule A, B, or C and excepted from the competitive service under section 3302 of title 5, United States Code, shall be reduced by 33 per centum.

(d) Any reductions in the amounts appropriated or otherwise made available by this Act which are necessary to carry out subsection (a) and which are in addition to the reductions described in subsections (b) and (c) shall be made from amounts available for—

(1) official reception and representation activities;

(2) publicity or propaganda activities designed to influence legislation pending before the Congress or the legislature of any State;

(3) advertising or public relations activities;

(4) consultant services;

(5) chefs or personal cooks;

(6) travel.

(7) limousines; and

(8) travel

Mr. HATFIELD and Mr. SASSER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee has the floor.

Mr. HATFIELD. Who has the floor?

The PRESIDING OFFICER. The Senator from Tennessee has the floor.

Mr. SCHMITT. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SCHMITT. Does the Senator retain the right to the floor upon modifying an amendment?

The PRESIDING OFFICER. The Senator has the right to retain the floor.

Mr. SASSER. Yes.

Mr. President, I wish to point out that this amendment does not disrupt or reduce revenue sharing payments. State and local governments all across this country are in severe distress.

Mr. HATFIELD. Will the Senator yield for a question?

Mr. SASSER. I yield to the distinguished chairman.

Mr. HATFIELD. What I am really trying to do is get a copy of the modification and see what we have been talking about. It has been difficult to know what the subject matter is. We had to go to the desk to get a copy of the amendment and now the modification. I am anxious to find out what the Senator's proposal is.

Could the Senator provide us with a copy of the modification?

Mr. SASSER. Yes.

Mr. President, I am delighted to provide the distinguished chairman a copy of my modified amendment.

Mr. HATFIELD. I thank the Senator for providing us with a copy of the amendment.

Mr. SASSER. Mr. President, I yield to the distinguished Senator from Arkansas.

Mr. PRYOR. Mr. President, I appreciate my very distinguished friend from Tennessee yielding to me at this point in this debate on the Sasser amendment. I am very pleased to announce that I have the great privilege of joining my friend from Tennessee as one of the cosponsors of this particular amendment.

I do not think there is ever a weekend or a time that any of us in this body go back home, back to our respective States and hometowns and traveling out in the hustings that we have to do but that we do not hear from our constituents saying cut the waste and fat out of Government.

It goes without saying we can see, even during these particular and very tight economic times that we are faced with at this moment in this Nation's history how very tight the budgetary restraints might be, how very concerned the people of this country are with balancing the budget and moving this Nation back into a period of firm economic soundness upon which this country was founded.

Still that being the fact I think that it goes without saying that most of the citizens of America still support those programs which fill and which touch human needs, those programs which help the disabled, the elderly, the veteran, the sick, and the afflicted.

Mr. President this amendment offered by the Senator from Tennessee (Senator SASSER) I think is precisely that amendment and precisely that vehicle.

This body can choose this evening in going forward and carrying out the true mandate of the people of this country, to cut out the waste and cut out the fat.

Just about a year ago, as I recall, there was a very splendid book published entitled "Fat City."

"Fat City," without any elaboration on that book or any further elaboration on the title or the implication of that title, clearly is an indication that our own Nation's Capital is "Fat City" itself. We are the "Fat City." We make up the "Fat City." We are responsible for the "Fat City." And today "Fat City" has become the No. 1 target of the average taxpayer of America because the average taxpayer is mad, he is infuriated, and he sees day after day and week after week waste, fraud, and abuse.

Finally, Mr. President, I think that this particular amendment offered by the Senator from Tennessee answers that great call from our fellow citizens to do something about the fat that we have in our Federal Government.

I think the passage of the Sasser amendment will send a very small, a very direct, and a very loud signal across this country not only to the taxpayers but also to the bureaucracy, to the agencies, to the departments that we are sick and tired of what we call waste, fraud, and abuse.

I think, too, Mr. President, that we can look—I see my friend from Wisconsin on his feet, also the Senator from Tennessee.

Mr. SASSER. Mr. President, I would like to commend the distinguished Senator from Arkansas for the statements he has made this evening. I would also like to commend the Senator from Arkansas and call the Senate's attention to the diligent work he has done during the time that he served in this body to root out waste, fraud, and abuse wherever he has found it, and particularly in the field of Government consultants.

The Senator from Arkansas has held some very timely, perceptive, and thought-provoking hearings into the problem of excessive abuse of Government consultants by the various agencies of Government, and I wish to take this opportunity to commend him for that.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. SASSER. I will yield for a question to the distinguished Senator from Wisconsin.

Mr. PROXMIRE. I want to ask my good friend from Tennessee if he has had an opportunity to read "The Fleecing of America?"

Mr. SASSER. I say to my distinguished friend from Wisconsin that I have read that book, indeed. As a matter of fact, it became a bestseller at one bookstore in my State, in Nashville, Tenn., and I appreciate the author mentioning in that publication some of the efforts of the junior Senator from Tennessee.

Mr. PROXMIRE. Yes indeed, and I want to tell the Senator that I certainly intend to support his amendment.

But I would like to ask, as I understand it, the Senator is proposing a reduction

of 3 percent, with some exceptions, and then in paragraph (b) he says:

> The amount appropriated or otherwise available by this Act for any program, project, grant, or activity under which payments are not required by law shall not be reduced by more than 1 per centum.

Then he says to carry out the provisions of subsection (a) to make it necessary to make it a 3-percent overall cut, he provides for a 33-percent reduction in certain salaries, benefits, and related expenses that apparently apply to personnel which are politically appointed; is that correct?

Mr. SASSER. That is correct.

Mr. PROXMIRE. Then, in addition to that, he would take the rest out of a whole series of widely abused expenditures by the Federal Government; is that right?

Mr. SASSER. That is correct.

Mr. PROXMIRE. Out of official reception and representation activities; publicity or propaganda activities designed to influence legislation—in other words, lobbying; advertising or public relations activities; consultant services; chefs or personal cooks; chauffeurs, and limousines, and I think nobody has more vividly dramatized the abuse of travel. The Senator from Tennessee was the one who pointed out that at any one time there are what, thousands—

Mr. SASSER. 20,000.

Mr. PROXMIRE. 20,000 Federal employees who are in the air paid for by the taxpayers.

So I think this is an amendment obviously designed to reduce waste in the Federal Government.

But I wonder if the Senator can tell me what happens if (b), (c), (d) do not add up to 3 percent? Where do we get the additional 3 percent and where is the adjustment made by the executive branch?

Mr. SASSER. I thank the distinguished Senator from Wisconsin for his support for this amendment and I thank him for his fine comments.

I believe that (b), (c), and (d) under this amendment will reach the desired level.

Mr. HATFIELD. Mr. President, will the Senator yield for a question, if the Senator from Wisconsin has finished?

Mr. SASSER. I yield to the distinguished chairman for a question.

Mr. HATFIELD. I want to say to the Senator from Tennessee, as he knows the Appropriations Committee held some early hearings on some of these matters in the use of consultants and others in which there has been fairly well-demonstrated abuse and over-use, and I appreciate the Senator's interest in these.

But I must say I am a little puzzled as to precisely how this would work out and, therefore, if I could just ask a few questions: As I understand the Senator's section (a) of his amendment he is seeking a 3-percent reduction from the appropriation level with exceptions which would be—what would be the base that the Senator is using, 3 percent of what?

Mr. SASSER. I say to the distinguished chairman we would be reducing 3 percent of as much as $200 billion.

Mr. HATFIELD. Of $200 billion?

Mr. SASSER. $200 billion.

Mr. HATFIELD. That would be about $6 billion, would it not? Three percent would be a $6 billion figure that the Senator is attempting to achieve.

Mr. SASSER. Three percent would be $6 billion approximately.

Mr. HATFIELD. Approximately $6 billion.

I understand, therefore, that in section (b), section (c), and section (d) is how he is going to collect or how he is going to find the $6 billion; is that correct?

Mr. SASSER. That is correct.

Mr. HATFIELD. What is the figure the Senator has on those subsections? For instance, I looked at subsection (c) and it says "under Schedule A, B, or C and excepted from the competitive service under section 3332 of title 5, United States Code, shall be reduced by 33 per centum."

What figure will that give the Senator toward his $6 billion target?

Mr. SASSER. I beg the distinguished chairman's pardon, I did not hear the question.

Mr. HATFIELD. I am asking how the $6 billion is going to be achieved by his subsections (b), (c), and (d). Our rough computations on those would indicate that you cannot get $6 billion out of those subsections, but I would like to prove it one way or the other.

What is the target figure under each of these subsections? What do you get out of (c) and (d)? How many dollars out of each one?

Mr. SASSER. I say to the distinguished chairman that it is our view that we can get the remaining 2 percent which could be as much as $4 billion out of (b), (c), and (d) and I might say that in the field of Government——

Mr. HATFIELD. How much? I am sorry, I did not hear it.

Mr. SASSER. Approximately $4 billion out of (b), (c), and (d).

Mr. HATFIELD. Can the Senator identify how much out of each of those subsections where he is going to get the other $2 billion?

Mr. SASSER. I would say to the distinguished Senator from Oregon that the total of travel and consultants and the other items listed in my amendment could be in excess of $18 billion.

Mr. HATFIELD. You mean including defense or excluding defense?

Mr. SASSER. Excluding defense. The total travel and consultant portion and the other items could approximate somewhere in the neighborhood of $18 billion.

Mr. HATFIELD. As I say I am merely trying to get a grasp of how the Senator computes his goal of $6 billion because we have made some very rough, quick estimates here on these various subsections, and I must say very frankly, and I emphasize they are rough estimates, that we do not find anywhere in the neighborhood of $6 billion and, therefore, I think the Senator, in preparing this amendment, maybe out of his raw data or his homework, would have the figures that would indicate what each of these subsections would produce in order to achieve his basic goal in section (a). That is my question.

Mr. SASSER. I would say to the distinguished Senator from Oregon that the President of the United States has said himself that we could cut $25 billion out of this budget in fraud, waste, and abuse. In September 1980 the President said that fraud, waste and abuse accounted for about 10 percent of our Federal spending. I am confident that we can find $6 billion out of fraud, waste, and abuse in this budget and in this continuing resolution, excluding the various entitlement programs, and excluding cuts in the Department of Defense.

Mr. HATFIELD. Would the Senator yield further for a question? We could probably trade estimates all evening. In order to get this somewhat to a head, does the Senator have any documentation for these statistics or for these figures?

Mr. SASSER. I say to the distinguished Senator from Oregon that, based on the object class analysis furnished us by the Office of Management and Budget, we are confident that these savings can be realized.

I would say, that based on my own hearings into waste and abuse in Federal travel, I am confident that a 3-percent reduction can be achieved in the spending identified in my amendment.

Mr. HATFIELD. I agree with the Senator from Tennessee that $6 billion could very easily be wrung out. It could be wrung out of the defense budget alone, in my view, if we included that.

Mr. SASSER. I do not disagree with the distinguished Senator from Oregon.

Mr. HATFIELD. But the point is that when the Senator in section (a) excludes those various accounts from having the 3 percent applied and identifies through (b), (c), and (d) how he is going to achieve $6 billion, it seems to me that it is an impossibility. I would certainly feel much better if the Senator had not excluded these various accounts at the 3-percent level. I really think that from the data that I have seen it would take nearly a 5-percent level to get the $6 billion figure. But, again, we are obviously trading estimates.

Mr. President, we have amendments left. Therefore, unless the Senator has any closing comments to make on this, I am going to make a motion to table.

Mr. BAUCUS addressed the Chair.

Mr. HATFIELD. Does the Senator wish for me to yield? Who has the floor, Mr. President?

Mr. SASSER. I have the floor.

The PRESIDING OFFICER. The Senator from Tennessee had the floor, but he yielded to the Senator from Oregon.

Mr. SASSER. I yielded to the Senator from Oregon for a question. I yield to the Senator from Montana.

Mr. BAUCUS. I thank the Senator for yielding.

I want to make two very quick points here. The question, it seems to me, is not whether the percentage cut amounts to $6 or $4 billion. To me, that is, frankly, irrelevant. The question is whether the amendment makes sense; that is, is it in the neighborhood of the kind of cut that we want to achieve here?

I think that the percentage level does make sense. It is a question of policy, not whether the percentage cut amounts to a certain specific figure.

The second point I want to make is

based upon my own personal experience. I served 4 years in the Appropriations Committee in the House. During that time, I was very, very frustrated with the inability of Congress to find the fat and the waste in Government. OMB would come up with its people, and the various agencies would come up with their personnel. They would have all the computers and all the Federal employees at their disposal, game planning for the questions we were going to ask. We were simply mismatched. We had no idea where to find the fat and waste. It is clear to me that there is a lot of fat and waste, because OMB and the agencies tend to protect it.

A month ago, a retired military officer came up to me and told me that, based upon his experience, there are net savings that could be achieved in the Defense Department. He was a head of a major program in the Defense Department and he told me he and his people were able to fool OMB. He said his people were able to fool the Congress whenever the Congress would barely scratch the surface in this area. In his judgment, nothing had changed.

I know the Defense Department is exempted from the amendment offered by the Senator from Tennessee. I think we can fairly extrapolate from even that one example, even though it is only one example. We do know there is this kind of waste. And this is the kind of amendment that is geared to rooting out a lot of that waste and inefficiency.

Further, Mr. President, I think that the OMB would be doing our country a much greater service if it would spend the time—it is not glamorous work, it is very difficult work—but spend the time trying to find all this nonsense that we know occurs, rather than spending time coming up here on Capitol Hill asking us to cut programs.

It is politically expedient to cut programs. It gets headlines. It gets under people's skin when they hear about certain programs that do or do not make sense. It is not glamorous, it does not get headlines for OMB to root around in these agencies to undertake the very difficult and nitty-gritty work that must be undertaken to achieve the kind of savings that I think are appropriate and can be achieved.

It is for those reasons I think the Senator is doing us a big service here tonight by trying to focus truly on a lot of the nonsense that occurs in the budget. I hope the Senate agrees to his amendment.

Mr. CRANSTON. Will the Senator yield?

Mr. SASSER. I yield to the distinguished Senator from California.

Mr. CRANSTON. I rise to compliment the Senator from Tennessee on a very ingenious and, I think, constructive amendment. I basically oppose these across-the-board cuts, because I do not think that is the wise way to make saving. This is not a typical across-the-board cut and, therefore, I can support it.

I am glad to see the emphasis on removing or reducing the Federal payroll by getting at the political appointees and taking on such matters as official reception and representation activities; publicity or propaganda activities designed to influence legislation pending before the Congress or the legislature of any State; advertising or public relations activities; consultant services; chefs or personal cooks; chauffeurs; limousiness; and travel.

That is a very fine area to strike out at. The Senator wisely protects all major programs by making certain that they will not be reduced by more than 1 percent. Certainly, there can be a 1-percent cut that will not do damage to any major program. Therefore, I am delighted to support the Senator's amendment and I praise him for bringing it up.

Mr. SASSER. I thank the distinguished Senator from California for his comments.

Let me just add that, with regard to cutting those who seek to influence legislation who work for the executive branch of Government, I am sure that many of my colleagues have had the experience of being lobbied ad infinitum by the representatives of the various Federal agencies. I am sure my colleagues who serve on either the Appropriations Committee or the Budget Committee have had that experience.

I well remember instances when we could hardly get into the Appropriations Committee room, because it was so crowded with lobbyists or legislative liaison groups, or whatever they call themselves, who work for the various agencies of Government. We have the ironic situation of the elected representatives of the taxpayers being lobbied at taxpayers' expense by persons on the Federal payroll trying to get more of the taxpayers' money for their particular programs.

I am sure our distinguished chairman of the Appropriations Committee has noticed this and has been struck, as I have, by the irony of this. And the taxpayers are the ones that are footing the bill for the whole process.

Mr. President, I ask unanimous consent that Senator DECONCINI be made a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I now move to table the amendment.

Mr. BAUCUS. Mr. President, will the Senator yield?

Mr. HATFIELD. For what purpose?

Mr. BAUCUS. Further discussion of the amendment.

Mr. HATFIELD. We have a unanimous-consent agreement entered into that we would begin stacking the votes to accommodate Senators at 9 o'clock and that those votes would begin at 9 o'clock. I would be very happy to yield to the Senator for a minute. But I would have to make my motion before 9 o'clock in order to keep this stacked. The Senators from Washington and Virginia want a minute for another matter, a privileged matter. So I would have to ask the Senator to accommodate the timeframe. I could yield 30 seconds to the Senator from Montana in order to yield to the Senators from Washington and Virginia.

Mr. CRANSTON. Mr. President, I ask unanimous consent that we extend the time by, say, 3 minutes to allow Senators to speak briefly and to bring up this conference report.

The PRESIDING OFFICER. Is there objection? Without objection it is so ordered.

Mr. HATFIELD. Mr. President, under that extension, I yield 2 minutes to the Senator from Montana for the purpose of any remarks.

Mr. BAUCUS. I thank the Senator. If there are other Senators who wish to speak during this 3-minute interval, I would be more than willing to accommodate them.

Mr. HATFIELD. Mr. President, I ask unanimous consent that I may yield 1 minute to the Senators from Washington and Virginia for a privileged motion and then I would ask that the Senator from Montana be recognized for the remaining period of time.

Then I ask that the Senator from Montana be recognized for the remaining period of time, sufficient for me to make a tabling motion on the amendment offered by the Senator from Tennessee and the Senator from Arkansas.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I ask unanimous consent that the present business be temporarily laid aside and that the Senate proceed to the consideration of the conference report on H.R. 3413.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION OF APPROPRIATIONS TO THE DEPARTMENT OF ENERGY FOR NATIONAL SECURITY PROGRAMS—CONFERENCE REPORT

Mr. WARNER. Mr. President, I submit a report of the committee of conference on H.R. 3413 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3413) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 18, 1981.)

Mr. WARNER. Mr. President, the conference report before the Senate authorizes vital national defense programs of the Department of Energy. These programs include the research and development, testing, production, and maintenance of our nuclear weapon stockpile. Our strategic deterrent policy depends on a credible, yet safe and reliable weapons inventory.

The conferees agreed to a total authorization of $5.120 billion, which is $44.9 million less than the amount authorized by the Senate and $55.65 million more than the amount authorized by the House. Let me highlight a few issues from the Statement of Managers:

SPECIAL NUCLEAR MATERIALS PRODUCTION AND SPECIAL ISOTOPE SEPARATION

A shortage of special nuclear materials may occur between 1985 and 1990 unless additional measures are taken to remedy the problem of declining productivity of the aging reactors at the Richland, Wash., and Savannah River, S.C., plants. At these production facilities, serious efforts are underway to replace and upgrade obsolete equipment and facilities, to convert the N-reactor at Richland to the production of weapons grade material, to upgrade and restart the Purex processing plant at Richland, and the L-reactor at Savannah River, and to train the required operating personnel.

Even if these efforts are completely successful, additional sources of plutonimum may be required. One candidate source is the construction of one or more replacement production reactors. A second possible source is a special isotope separation process to enrich materials for weapons use.

The conferees believe that because of potential economies, the special isotope separation program should be accelerated. The recommended funding for operating expenses for special isotope separation was increased from $21.8 million to $30 million to accelerate the programs at both the Los Alamos and Lawrence Livermore National Laboratories toward the demonstration phase. Under the conferees' recommendation, the atomic vapor isotope separation program at the Livermore Laboratory would receive $17 million and the molecular isotope separation program at the Los Alamos Laboratory would receive $13 million. The Los Alamos Laboratory would be expected to proceed with the design and installation of a pilot plant which could utilize existing facilities at the Savannah River plant.

The conferees agreed to authorize additional funds for an advanced isotope separation laboratory to be built at the Livermore Laboratory. This laboratory was initially authorized, and funds appropriated, in fiscal year 1981. No funding was requested for fiscal year 1982. This facility, which could be in operation by 1983, is absolutely essential if the atomic vapor process is to reach the demonstration stage.

INERTIAL CONFINEMENT FUSION

The conferees were concerned that the $104.7 million requested for operating expenses for the inertial confinement fusion (ICF) program would not permit orderly progression of this important research and development effort. The Congress has authorized and appropriated well over a billion dollars and made large investments in facilities and equipment for this program. Three large facilities are nearing completion. The proposed 25-percent decrease from the fiscal year 1981 funding level would force severe reductions in the scientific and engineering teams involved in the design and operation of these important facilities.

No reasons have been offered to the Congress for this precipitous decision to curtail the development of ICF as a laboratory method for simulating the effects of nuclear weapons. It should be noted that a severe curtailment of the weapons-related ICF program, as proposed, will eliminate any chance that ICF could be developed as a future energy source.

The conferees authorized $142.3 million for ICF operating expenses for fiscal year 1982. Furthermore, the conferees believe that $50 million should be appropriated to permit completion on schedule of the NOVA facility at the Lawrence Livermore National Laboratory. The NOVA facility will be the most powerful ICF system in operation for many years and should provide the data which substantiates the efficacy of ICF as a laboratory simulation system and as a potential energy system.

DEVELOPING THE DEPARTMENT OF ENERGY DEFENSE PROGRAMS BUDGET

The conferees felt that the present method used to develop the Department of Energy (DOE) defense programs budget is unsatisfactory. Under current practices, defense programs must compete for funding directly with all other activities of the Department of Energy. At the Office of Management and Budget (OMB) the same competition prevails, since budget oversight for DOE defense programs is controlled by the Associate Director of OMB for Energy. There appears to be little, if any, effort to match DOE defense requirements with other defense requirements. As a result, DOE defense programs are annually underfunded.

Although these concerns were noted last year in Senate Report No. 96-920, no action has been taken or an explanation given why the OMB Associate Director for National Security Programs does not also have oversight of the DOE defense programs budget, or why the control remains misplaced with the Associate Director for Energy.

The Director of the Office of Management and Budget has been requested to provide the Committees on Armed Services of the Senate and House of Representatives within 90 days, after the date of enactment of the Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1982, his findings relative to this important issue, together with plans for any changes to the current programing and budget review processes.

Mr. President, I urge my colleagues to support this conference report.

Mr. JACKSON. Mr. President, I join in the statement just made by the distinguished Senator from Virginia. The report is a unanimous one. I move adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. WARNER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SECOND CONTINUING APPROPRIATION, 1982

The Senate continued with the consideration of House Joint Resolution 357.

UP AMENDMENT NO. 677

Mr. HATFIELD. Mr. President, I yield 1½ minutes to the Senator from Montana and retain 30 seconds for my motion.

Mr. BAUCUS. Mr. President, I would first like to urge adoption of the amendment based in part upon personal experiences I have had with various Federal agencies which I think are wasting a lot of their advertising budget.

I asked my staff, for example, several months ago to go to one agency, in this case it was HUD, and spend 2 hours to find examples of all the pamphlets they distribute.

They went down there unannounced, with no preparation, and found a carton which they filled up with pamphlets, weighing 40 pounds, a lot of crazy pamphlets.

I went through them. One, for example, said how to find an apartment in Poland. You read it through and you find out that it does not address that question. We all know the way to find an apartment in Poland. It is easy. Go to Poland and look for an apartment.

I will just tell the Members of the Senate that these projects can be cut drastically. They are counterproductive and wasteful. I think we should spend a greater part of our time trying to cut these budgets rather than cutting programs.

Mr. President, it is for that reason that I urge adoption of the amendment. I thank the Senator for yielding.

Mr. HATFIELD. Mr. President, I now move to table the Sasser amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to vote on UP amendment No. 672, offered by the Senator from Ohio.

Mr. HATFIELD. That is the Metzenbaum amendment.

The PRESIDING OFFICER. The Senator is correct. That will be followed by a vote on UP amendment No. 673, offered by the Senator from Virginia, Mr. HARRY F. BYRD, JR.

Mr. HATFIELD. And then, Mr. President, that is to be followed by what?

The PRESIDING OFFICER. That vote will be followed by a vote on the tabling motion of the Sasser amendment.

Mr. HATFIELD. In other words, under the previous order we have three votes stacked up to begin immediately. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. A further inquiry. Are these 15-minute votes?

The PRESIDING OFFICER. The Chair will state, under the previous order the first vote will be a 15-minute vote and the two succeeding votes will be 10 minutes each.

Mr. HATFIELD. A further inquiry, Mr. President. I understand included in the unanimous-consent agreement were two 10-minute votes, back to back.

The PRESIDING OFFICER. The Senator is correct.

Mr. CRANSTON. Mr. President, may I inquire if that was not the order on the previous rollcalls but not the current rollcalls, that there be shortened rollcalls after the first one?

The PRESIDING OFFICER. The Chair will state to the Senator from California that the Journal will show it is for this series of rollcalls also.

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I suggest that we begin the vote.

UP AMENDMENT NO. 672

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio (UP 672). The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from New Jersey (Mr. BRADLEY), and the Senator from West Virginia (Mr. ROBERT C. BYRD) would each vote "yea."

The PRESIDING OFFICER (Mr. GARN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 61, nays 34, as follows:

[Rollcall Vote No. 409 Leg.]

YEAS—61

Andrews	Glenn	Metzenbaum
Baucus	Grassley	Mitchell
Bentsen	Hart	Nunn
Biden	Hatch	Pell
Boren	Hawkins	Pressler
Bumpers	Heflin	Proxmire
Burdick	Heinz	Pryor
Cannon	Hollings	Randolph
Chafee	Huddleston	Riegle
Chiles	Inouye	Roth
Cranston	Jackson	Sarbanes
D'Amato	Jepsen	Sasser
DeConcini	Johnston	Specter
Dixon	Kassebaum	Stennis
Dodd	Kasten	Stevens
Domenici	Kennedy	Tsongas
Durenberger	Levin	Weicker
Eagleton	Long	Williams
Exon	Mathias	Zorinsky
Ford	Matsunaga	
Garn	Melcher	

NAYS—34

Abdnor	Gorton	Percy
Armstrong	Hatfield	Quayle
Baker	Hayakawa	Rudman
Boschwitz	Helms	Schmitt
Byrd, Harry F., Jr.	Humphrey	Simpson
	Laxalt	Stafford
Cochran	Lugar	Symms
Cohen	Mattingly	Thurmond
Danforth	McClure	Tower
Denton	Murkowski	Wallop
Dole	Nickles	Warner
East	Packwood	

NOT VOTING—5

Bradley	Goldwater	Moynihan
Byrd, Robert C.	Leahy	

So the amendment (UP No. 672) was agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 673

The PRESIDING OFFICER (Mr. GARN). Under the previous order, the Senate will proceed to vote on UP amendment No. 673. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY) and the Senator from West Virginia (Mr. ROBERT C. BYRD) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from West Virginia (Mr. ROBERT C. BYRD) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 23, nays 73, as follows:

[Rollcall Vote No. 410 Leg.]

YEAS—23

Armstrong	East	Kasten
Bentsen	Grassley	Long
Byrd, Harry F., Jr.	Hatch	Mattingly
	Hayakawa	Nickles
Chiles	Heflin	Proxmire
DeConcini	Helms	Quayle
Denton	Humphrey	Symms
Dole	Johnston	Warner

NAYS—73

Abdnor	Gorton	Pell
Andrews	Hart	Percy
Baker	Hatfield	Pressler
Baucus	Hawkins	Pryor
Biden	Heinz	Randolph
Boren	Hollings	Riegle
Boschwitz	Huddleston	Roth
Bumpers	Inouye	Rudman
Burdick	Jackson	Sarbanes
Cannon	Jepsen	Sasser
Chafee	Kassebaum	Schmitt
Cochran	Kennedy	Simpson
Cohen	Laxalt	Specter
Cranston	Levin	Stafford
D'Amato	Lugar	Stennis
Danforth	Mathias	Stevens
Dixon	Matsunaga	Thurmond
Dodd	McClure	Tower
Domenici	Melcher	Tsongas
Durenberger	Metzenbaum	Wallop
Eagleton	Mitchell	Weicker
Exon	Moynihan	Williams
Ford	Murkowski	Zorinsky
Garn	Nunn	
Glenn	Packwood	

NOT VOTING—4

Bradley	Goldwater	Leahy
Byrd, Robert C.		

So the amendment of Mr. HARRY F. BYRD, JR. (UP No. 673) was rejected.

UP AMENDMENT NO. 677, AS MODIFIED

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to vote on agreeing to the motion to lay on the table UP amendment No. 677, as modified. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY) and the Senator from West Virginia (Mr. ROBERT C. BYRD) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from West Virginia (Mr. ROBERT C. BYRD) would vote "nay."

The PRESIDING OFFICER (Mr. HATCH). Are there any other Senators wishing to vote?

The result was announced—yeas 52, nays 44, as follows:

[Rollcall Vote No. 411 Leg.]

YEAS—52

Abdnor	Grassley	Percy
Andrews	Hatch	Pressler
Armstrong	Hatfield	Quayle
Baker	Hawkins	Roth
Boschwitz	Hayakawa	Rudman
Chafee	Heinz	Schmitt
Cochran	Helms	Simpson
Cohen	Jepsen	Specter
D'Amato	Kassebaum	Stafford
Danforth	Kasten	Stevens
Denton	Laxalt	Symms
Dole	Lugar	Thurmond
Domenici	Mathias	Tower
Durenberger	Mattingly	Wallop
East	McClure	Warner
Garn	Murkowski	Weicker
Glenn	Nickles	
Gorton	Packwood	

NAYS—44

Baucus	Exon	Metzenbaum
Bentsen	Ford	Mitchell
Biden	Hart	Moynihan
Boren	Heflin	Nunn
Bumpers	Hollings	Pell
Burdick	Huddleston	Proxmire
Byrd, Harry F., Jr.	Humphrey	Pryor
	Inouye	Randolph
Cannon	Jackson	Riegle
Chiles	Johnston	Sarbanes
Cranston	Kennedy	Sasser
DeConcini	Levin	Stennis
Dixon	Long	Tsongas
Dodd	Matsunaga	Williams
Eagleton	Melcher	Zorinsky

NOT VOTING—4

Bradley	Goldwater	Leahy
Byrd, Robert C.		

So the motion to lay on the table UP amendment No. 677, as modified, was agreed to.

Mr. HATFIELD. Mr. President, let me update the situation as to where we are.

In a moment, I will ask the leader to return to morning business for a couple of minutes for the Senator from Wisconsin to place material into the RECORD. Then, upon returning to the bill, it would be my intention to ask the Chair to yield to the Senator from Kansas (Mr. DOLE) and the Senator from New York (Mr. D'AMATO) to resolve the one technical committee amendment we have had set aside before we could ever accept any other amendments. We adopted all these

committee amendments en bloc with one exception. That one exception was one which related to industrial revenue bonds. That matter can be, I understand, taken care of—Mr. President, I will retrace my steps a moment.

Mr. President, I have just been given updated information. It has not quite been resolved. Therefore, Mr. President, rather than yielding for that purpose, I ask the Chair, with the order we have tried to maintain here, that the Senator from Rhode Island (Mr. PELL) be recognized as the next Senator to offer an amendment. We will then have to go through that process of setting aside the technical amendment and the motion to reconsider on Mr. BRADLEY to get to Mr. PELL.

Before we do that, Mr. President, I would like to yield at this time to the leader for the purpose of returning to morning business.

Mr. BUMPERS. Will the Senator yield?

Mr. BAKER. I yield.

Mr. BUMPERS. I understood that I was next. Will I be next after morning business?

Mr. HATFIELD. At the time I indicated to the Senator from Arkansas that he would be next it was prior to the time of 9 o'clock. Senator PELL at that time was off the Hill. We had retained him in that place. We thought we were going to have more time to take up another amendment in that time. The Senator from Arkansas would follow. Mr. PELL will be followed by Mr. BRADLEY and Mr. BRADLEY will be followed by Mr. BUMPERS.

Mr. DECONCINI. Does the Senator have me listed there?

Mr. HATFIELD. We have Mr. DECONCINI after Mr. SPECTER. The same list has been given to the ranking minority leader and the Democratic leadership so that everyone has the same list. We are all working from the same list.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 10:10 p.m., during which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

INITIAL SUCCESS OF MILWAUKEE COUNTY'S WORKFARE PROGRAM

Mr. PROXMIRE. Mr. President, can we devise efficient programs to require welfare recipients to work to earn their welfare?

Last Sunday's edition of the Milwaukee Journal contained a fascinating article evaluating the revised Milwaukee County work relief program designed to do just this.

While the program does have its problems and critics, Milwaukee County's workfare program appears to be succeeding to a substantial degree. It is letting welfare recipients earn their grants and at the same time gain valuable job experience.

The present program has been operating only since July when it replaced another type of workfare program in the county. Over this short period of time, the program has placed 316 people in either government or nonprofit jobs. This is a fine record of achievement given the fact that unemployment in Milwaukee County has been rising steadily as the entire Nation slips into a recession.

I have personally attended meetings where Milwaukee County officials assign jobs to welfare recipients under the county's previous workfare program and can heartily agree with the comments of the county administrator who said that work relief programs encourage a work-ethic mentality and a feeling of self-esteem in the participants.

It is encouraging to note that almost 50 people who had been in the program now have full-time jobs and are off welfare.

The county intends to have the program grow from 1,000 job slots in 1981 to 3,500 in 1982.

Critics of the program have charged that its administrative procedures have been faulty, the experience for workers demeaning, and the monetary incentives for workers slight.

However, when I worked with the program, I heard few complaints. People were glad to get a job. And certainly, the discipline of reporting to work regularly to earn their welfare checks, provided a discipline and a dignity that did them more good than harm.

Mr. President, last March I introduced legislation that would require all able-bodied persons of working age—except mothers with small children—to work as a condition of receiving welfare.

I believe the initial success of of Milwaukee County's new workfare program demonstrates the wisdom of pursuing this approach to welfare reform.

I ask unanimous consent that the article on work relief from the Milwaukee Journal of November 15, 1981 be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WORK RELIEF: EARNING ITS KEEP?

(By Kevin Merida)

From the point of view of its administrators, Milwaukee County's five-month-old Work Relief Program for general assistance recipients is succeeding: It is letting welfare recipients earn their grants and gain valuable job experience.

From the standpoint of critics, including some workers and employers who have been active in the program, its administrative procedures have been slow, the experience for workers demeaning and the monetary incentive for the workers slight.

There are other points of view about work relief, some favorable, some not.

Labor unions, for example, have been alert to keep employers from using work-relief employes for union jobs. The program's own rules say no worker in the program may "replace a regular worker."

That rule makes a mockery of the program from the point of view of some community activists.

Thus, Joseph Volk of the private advocacy group Community Advocates said:

"It's just basically make-work. . . . It's doing . . . things like cleaning the floor after the janitor has already done it."

But the view from the top is quite different.

CHIEF IS SATISFIED

Jamilla Connor, who heads the program for the Department of Social Services, says the program has been very effective. She credits it with encouraging "a work-ethic mentality . . . self-esteem" in participants.

She points out that almost 50 people who have been in the program now have full-time jobs. Not all those jobs are with the individual's work-relief employer.

Moreover, supporters say, the proportion of participants who get off welfare, the so-called termination rate, is high—43 percent. That is considerably higher than the 25 percent level that was expected when the program began in July. That success, of course, is right in line with one of the main goals of the program—to reduce the welfare rolls.

"Naturally, you're not going to find a whole lot of jobs out there. Times are tight," says Connor. "But we do try to match employees and their skills. . . . [Participants] welcome the chance to get placed in a work-type situation."

FOUR OUT OF FIVE ELIGIBLE

Thomas Doyle is assistant director of the program, and he also is upbeat about it.

"For the most part, the agencies have been very pleased with our matches," he said.

All general assistance applicants who meet the program's eligibility criteria and are medically able to work—about four out of five applicants, according to officials—are referred to the program's headquarters at 6th and Walnut Sts.

If those who are found to be physically fit later refuse an offered job, they almost certainly will not receive general assistance. There may be some second referrals and occasional legitimate reasons for missing appointments, but Joseph Breiner of the Department of Social Service's financial-aid division says:

"For the most part they would be terminated from the money payments."

It should be noted here, however, that only a small percentage of those who apply for general assistance get jobs through the program. Jobs are scarce and, when an applicant gets none, he gets the usual money payments.

LIMITED TO NEW FILINGS

The program has been operating only since July—when the county's troubled Work Assistance Program was terminated—and it is only applicants who have applied for aid since then who have been referred to it. This leaves out most of the general assistance population, who are still collecting cash grants.

That has been the occasion of some resentment from those who have to work for their grants.

The latest welfare statistics indicate that more than 3,200 people were added to the general assistance rolls from the time the program began through Sept. 30. But just slightly more than half that number were referred to the program. This apparent procedural slowness has been used to argue that the program is administratively cumbersome.

Kenneth Ramminger, acting director of the department, replies:

"I think their processing has been as fast as their capability. I guess what we're saying is the job is being done well. It's better to do the job well than to force things for the sake of volume."

After the initial appointment at the program office—for which the wait may be more than a few weeks—general assistance recipients are given tests to determine educational level, job skills and physical strength among other things.

8–15 HOURS A WEEK

They are then referred to one of the more than 50 agencies and government offices that have agreed to participate in the program. Now, if the candidate is successful in an in-

terview with the potential employer, he begins working 8 to 15 hours a week, depending on the amount of his general assistance grant.

But those hired are not paid wages.

Instead, what the program does is give welfare recipients an opportunity to work for their general assistance checks. It is what bureaucrats call an abatement program: By working, the recipient repays the county for its assistance.

By the same token, general assistance recipients who do not work are, in law at least, incurring a debt they could be forced to pay. Welfare officials concede that seldom happens.

Another catch is that the abatement—repayment—is figured at a rate of $2.70 an hour, which is below the minimum wage.

CHEAP LABOR POOL

Some community activists say the concept of abatement is merely a smokescreen behind which the county provides itself and other agencies with cheap labor. More than half of the employing groups are county departments and institutions, and these represent 40 percent of the total number of job slots obtained for the program in 1981.

Welfare advocates have warned that the county is sure to face a lawsuit challenging the below-minimum-wage repayment rate. However, under the budget now adopted for 1982, an expanded Work Relief Program will use an abatement rate of $3.35 an hour—the present federal minimum wage—as of Jan. 1.

Under the budget, which was adopted by the Milwaukee County Board last week, the program will grow from 1,000 job slots in 1981 to 3,500 in 1982 at a cost to taxpayers of about $2 million for administrative expenses. Under the plan, the county is to find employers for 2,000 of the slots. The 1,500 other slots will be provided by DePaul-Sertoma Industries, which now uses 60 work-relief people in a metals reclamation project.

Both Connor and Doyle say there have been no complaints from employers or complaints about employers.

JOB CONTENT DEFENDED

Both also reject the characterization of the jobs as make-work.

"It's not just all menial tasks," said Connor. "There are a lot of jobs where the job skills are not important, and there are a lot of jobs where the job skills are very important. But the training and experience are always meaningful."

The latest statistics on the program—current through Nov. 6—show how effective it is in warding off potential general assistance recipients.

Of the 1,734 eligible general assistance applicants referred to the program since July, 677—only 39 percent—were actually placed in jobs.

Of that same eligible number, 204—almost 12 percent—decided they did not want to go through with the process and did not show up for an initial appointment with a caseworker.

Another 509, or 29 percent, did not show up for the next phase—the skills appraisal, which includes the tests mentioned earlier.

In addition, 101 people did not show up for job interviews and were either dropped from the program or are now in the process of being dropped.

ONLY 316 WORKING

What this means is that, as of Nov. 6, there were 316 people working in a program that was budgeted for 1,000 slots in 1981. Another 183 people were still being processed.

When the program started, officials predicted that they would have filled 775 job slots by now. Obviously, the program has fallen way short.

"You have to look at the whole picture when you assess the program," said Doyle. "A lot of people say you've only got 300 working. Well, 300 is not bad. . . . If you meet the goal of the program, that's good."

For some agencies, the program has been rather a gift. Since the program is financed with county dollars, employers spend nothing for the extra help they get. All these employers are either non-profit agencies or government offices.

"NICE TO HAVE AROUND"

Curative Workshop's Conrad Linski, who coordinates the program there, has been pleasantly surprised.

"I thought it would be worse," he said. "I'm really surprised. . . . It's a nice thing to have around but not a necessity."

Linski said work-relief employes filled the void left when Curative laid off 50 Comprehensive Employment and Training Act (CETA) workers in February. Most of the employes are cutting grass and doing other yard and custodial work.

Officials at the Veterans' Administration Medical Center and DePaul-Sertoma Industries—the program's two largest users among non-profit agencies—give the program mixed grades.

At DePaul, which has participated in similar work projects for more than a decade, the turnover rate is high. But officials are generally pleased. At the Veterans' Administration facility, the jury is still out on the program, an official said.

As of Nov. 6, the two agencies had a total of 96 work-relief employes; 60 at DePaul, and 36 at the VA Center. However, while the latest program statistics showed that DePaul's program was at capacity, the VA center still had not filled 94 anticipated slots for this year.

James Roseborough, the coordinator for the program at the medical center, was asked to explain.

"I'm not really sure," he said. "I really wouldn't be able to answer that."

For some agencies, the program has been a headache. It has meant more administrative work than results have justified. High turnover and absenteeism have been big problems.

"Quite frankly, we haven't been satisfied," said Paul Brancheau, an assistant vice president at Mount Sinai Medical Center.

Mount Sinai has contracted with the county to make 34 slots available this year, but as of Nov. 2 it had not hired a single person.

ABSENCES PILE UP

At Goodwill Industries, the biggest problem has been absenteeism. Alice Fletcher, Goodwill's program coordinator, laid the blame on the abatement concept.

"There's less incentive because it's an abatement program," she said. "That ruins their chances to present a good picture to the employer who may possibly have a full-time job for them."

Fletcher estimated that 10 to 15 of the 35 people who had filled job slots there under the program had been terminated. She said employes would come to work a few days but then start missing days.

Seymour Gray, a legal aide at the institute, said his group chiefly objected to the abatement concept.

"The reason they went for an abatement program is that they didn't have the money to pay people minimum wage as regular workers," he said.

Volk, of Community Advocates, noted that the earlier program had had a training component. And Volk spoke of serious administrative and communications problems in the new program.

"What we're doing," Volk said, "is adding another bureaucracy for people to get lost in, and they're getting lost."

SKOKIE: THE NIGHTMARE LINGERS ON

Mr. PROXMIRE. Mr. President, on Tuesday evening, a television movie was aired entitled "Skokie." This program dealt with events surrounding a 1978 attempt by the American Nazi Party to march through Skokie, Ill., a predominantly Jewish neighborhood.

"Skokie" raised many noteworthy issues. Included among them were controversies surrounding the first amendment rights of freedom of speech and assembly. The movie depicted the dilemma facing survivors of the holocaust who now must decide whether to permit Nazis to march through their neighborhood, or attempt to stop that march, possibly violating the same rights which 40 years earlier were denied to them.

All of these issues are raised in the shadow of the holocaust, which stands as the most horrifying example of genocide in human history. Underlying the entire movie is the central theme that for the survivors of the holocaust, the horror never ends. Even after 40 years, the memories are almost alive, the deep scars remain ever sensitive.

One can only try to imagine the life of a holocaust survivor. Random events conjure up horrifying nightmares, nightmares all the more frightening because they are real. As "Skokie" accurately depicts, a child's innocent question: "How did Grandma die?" instantly brings back memories of innocent men, women, and children stripped of all dignity and herded like cattle into the gas chambers.

Mr. President, we know how Grandma died. Six million innocent people were murdered in the most calculated, vile example of man's inhumanity toward his fellow man. Yet the memories of this genocide remain. They are passed down from the survivors to their children and even to their grandchildren, whose lives should not be darkened by such shadows.

"Skokie" brought home the fears as well as the memories which yet linger for the survivors of the holocaust. Such feelings persist while these people live under the most democratic and representative government that the world has known. What then, can we possibly imagine, must be the feelings of those who now suffer torture, persecution, and even death at the hands of contemporary oppressors.

Mr. President, nothing can bring back the lives of the victims of the holocaust, or the other acts of genocide which have occurred. Nor is it possible to end the perpetual nightmares of those who somehow survived. However, this Nation can make a firm commitment to help assure that such an event never occurs again. By its ratification of the Genocide Convention, the United States will help to insure that no other generation is witness to an Auschwitz or a Dachau, that no other people have to live with the nightmares which never end.

POSSIBLE BRIBERY ABROAD

Mr. PROXMIRE. Mr. President, I wish to bring to the attention of my colleagues

an article appearing in the New York Times today setting forth the testimony from the Justice Department that it has under investigation 54 cases of possible bribery abroad by American corporations, five of which involve possible payment of bribes to foreign heads of state.

The Foreign Corrupt Practices Act passed unanimously in 1977 by Congress prohibits bribes to foreign officials by American companies to gain business.

Mr. President, this revelation comes at the time when the Reagan administration is making an effort to cut the heart out of the Foreign Corrupt Practices Act. S. 708 which is on the Senate Calendar would make changes in the FCPA which make it more likely that such bribes would occur and that raises serious questions that these investigations will be compromised by the Justice Department.

Bribery is bad business. It destroys the free market; it tarnishes our image as a democracy and has severe foreign policy implications. No good management needs to bribe to gain business.

We need to keep a good strong bribery bill on the books. I hope the Senate will reject S. 708.

I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FIFTY-FOUR CASES OF POSSIBLE BRIBERY ABROAD

(By Jeff Gerth)

WASHINGTON.—Justice Department officials told a House panel today that they were investigating 54 cases of possible bribery of foreign officials by American companies. Five of the cases, they said, involve the heads of foreign governments.

At the same time, Justice Department lawyers and officials from the Securities and Exchange Commission testified that prosecutions under the Foreign Corrupt Practices Act of 1977, which prohibits bribery of foreign officials, had been sparse in recent years, although investigations were continuing in a number of cases.

The disclosures came before the Telecommunications, Consumer Protection and Finance Subcommittee of the House Committee on Energy and Commerce. The subcommittee is holding oversight hearings on the antibribery law. Business lobbyists have called the House hearings a "roadblock" to passage of a bill, approved in September by the Senate Banking Committee, that would weaken the 1977 act's bribery ban.

In addition to the five cases involving the possible payment of bribes to foreign heads of state, the Justice Department told the subcommittee it was studying cases involving reported payments to one vice president or deputy prime minister, two aides to a president or prime minister, two members of a royal family, 22 agency chairmen, directors or cabinet ministers and 23 agency subdirectors or deputy cabinet ministers.

The Justice Department noted that none of the investigations "concerns an alleged payment which is known to be legal in the foreign country in which it was made."

The Justice Department declined to identify the foreign officials and countries involved or the American corporations that might have made illegal payments.

The department did say, however, that the payments under investigation ranged from $5,000 to $35 million. All were made since 1977 as American corporations sought foreign contracts.

The corporate community and the Reagan Administration have made changing the 1977 law a major priority. The Administration wants to narrow the range of payments that would be outlawed and to lessen the standards that would apply in responsibility for payments. But the testimony at today's hearing, according to Congressional aides, seemed to complicate the prospects for quick Congressional revision of the act.

Jonathan C. Rose, the Assistant Attorney General for legal policy, has announced support of the Senate bill. But he said at today's hearing that parts of that bill, in detailing allowable "facilitating payments," were ambiguous.

In a statement for the subcommittee, Mr. Rose said the 1977 act needed to be amended and clarified because of "overly broad" language and ambiguities. This argument has frequently been made by other Administration officials and business lobbyists.

The Foreign Corrupt Practices Act was passed in the wake of widespread disclosures by hundreds of American corporations that they had made questionable payments, including bribes, to foreign officials to obtain business abroad. These disclosures had serious foreign policy implications, especially in friendly countries such as Japan.

In the last few years, however, business groups have called the legislation burdensome, ambiguous and an impediment to competing for foreign trade. In response to these complaints, the Justice Department and S.E.C. have issued guidelines to clarify and limit enforcement of the act.

Statistics introduced at today's hearing illustrate the limited enforcement of the 1977 law.

For example, Mr. Rose noted that the Justice Department had brought only two public prosecutions under the Foreign Corrupt Practices Act—one a civil injunctive action and the other involving a guilty plea by a corporation to a criminal violation. Mr. Rose explained that the paucity of prosecutions arose from the complexities of the cases and difficulties of obtaining evidence from foreign countries.

THE VOTING RIGHTS ACT

Mr. COCHRAN. Mr. President, once again, I come before this body to discuss S. 1761, legislation I have introduced to amend the Voting Rights Act of 1965. My bill provides a new preclearance procedure whereby a political subdivision would petition the local Federal district court for a declaratory judgment in order to preclear electoral changes. I have proposed that this procedure be applicable to all 50 States so that the voting rights of all citizens will be protected.

As my colleagues are aware, electoral changes are now precleared by the Voting Section of the Department of Justice. But many of you may not be aware of the mechanics of this procedure or of the many inadequacies with which it is fraught.

Historically, Congress intended that electoral change proposals would be precleared through the Federal District Court for the District of Columbia, which would issue a declaratory judgment if the change were not discriminatory in its purpose or effect. The administrative procedure was added, really as an afterthought, to provide a prompt process for preclearing simple electoral changes. No one anticipated that the administrative procedure would become the main avenue for preclearance. Little attention was given to delineating which changes should be submitted to the court and which to the Department or to the problems that would develop.

In 1977, the General Accounting Office conducted a study of the Voting Section and the preclearance procedure. Its findings were published in its report, "Voting Rights Act—Enforcement Needs Strengthening," in 1978. Additional analysis of the departmental procedure is contained in "Compromise Compliance: Implementation of the Voting Rights Act" by H. Ball, D. Krane, and T. Lauth. I am aware of no more recent or extensive study of the administrative procedure than these.

The Voting Section of the Department of Justice is composed of two units—the Submission and the Litigative Staff—which employed, at the time of the GAO study, 14 attorneys, 13 paraprofessionals, and 2 staff assistants. The Submission Unit, which is the unit responsible for the review of electoral change submissions, consists of one attorney, a paraprofessional director, and 11 paraprofessional positions filled with law students, college graduates qualified for GS 5–10 level jobs, and others. These paraprofessionals, possessing little or no legal training nor demographic or statistical skills, review the preclearance submissions and make the determination whether or not the proposed change has a discriminatory purpose or effect.

The paraprofessional is trained to spot such troublesome changes as at-large elections, redistricting, and changes in the location of polls. Often his investigation is accomplished by telephone calls to onsite persons. Additional information is gathered from minority groups or individuals. The determination by the paraprofessional is then reviewed by the supervising staff.

This procedure of review and determination by paraprofessionals prompted Justice Powell to state:

> No senior officer in the Justice Department—much less the Attorney General—could make a thoughtful, personal judgment on an average of twenty-five preclearance petitions per day. Thus, important decisions made on a democratic basis . . . are finally judged by unidentifiable employees of a federal bureaucracy, usually without anything resembling an evidentiary hearing. (446 U.S. 205 n. 17).

The procedure has also been described by Prof. Howard Ball as a "dual track" process. The first track consists of the review of the submissions and a determination by the paraprofessional, who consults interested persons and minority groups for information concerning the submission. The second track consists of the discussions between the supervising attorney and officials from the submitting jurisdiction. Local attorneys contact the Department of Justice prior to formal submission, which leads to informal approval without local minority participation.

Other problems in the procedure have been identified by the General Accounting Office. In its review, the GAO found that decisions on submissions were being made by the Department without all the data required by the Federal regulations.

Fifty-nine percent of the 271 submission files reviewed did not contain the required data. The GAO also reported that some submission files could not be located and that data inaccuracies limited the use of the Department's computer system.

The GAO was critical of the Department's procedures for soliciting the views of interest groups and individuals. The review of submission files revealed that only 55 percent contained comments by interested groups or persons and only 1 percent of those commenting were advised of the review decision. Interviews with black leaders indicated that 35 percent had no knowledge of the Department's preclearance procedures, 90 percent were not on the mailing list, and 80 percent had rarely or never been consulted by Department personnel.

The GAO cited the Department's difficulty in complying with the 60-day review period as another deficiency and recommended that procedures be developed to insure the prompt review of submissions. The GAO based its recommendations on its finding that, in 6.8 percent of the submissions reviewed, a department decision was not rendered until at least 100 days from the initial receipt of the submission. The GAO further found that over 50 percent of the requests for additional information were made on the 60th days after receipt. A request for additional information tolls the 60-day period. Upon receipt of the requested information, the 60-day period begins to run anew. Over 70 percent of the requests for additional information were made at least 55 days after receipt, and only 2 percent were made within 30 days.

Finally, the GAO was critical of the Department's failure to develop formal procedures for identifying jurisdictions not submitting voting changes, informing jurisdictions of their responsibilites to preclear, and determining whether jurisdictions are implementing election laws over the Department's objection.

Mr. President, certainly these problems and deficiencies in the administrative preclearance procedure that I have just cited justify the consideration by this body of an alternative mechanism for insuring the voting rights of our citizens. Complex legal determinations are being "processed" by paraprofessionals who lack legal or other special skills and many times, the factual data required by the regulations. Files have been lost and computer data is inaccurate. Minority participation is minimal and a "dual track" system seems to limit further the opportunity for minority groups or persons to have input into the preclearance procedure. Review of submissions extends well beyond the 60-day period permitted, and requests for information have become a tactic for further delay.

Mr. President, what was envisioned as a system for prompt preclearance of simple submissions has become a quagmire of voluminous submissions requiring the collection and evaluation of complex political, social, and legal data with personnel too limited in number and skills to adequately and properly do so. But additional personnel alone, I submit, cannot resolve the problems of administrative preclearance.

What is required is the expertise of our Federal court system, and I propose that we utilize it. My proposal would provide an expedited procedure in Federal district court for the review of preclearance submissions.

Federal judges, experienced in the review and evaluation of complex issues, would determine whether or not a proposed electoral change has a discriminatory purpose or effect. The Department of Justice, served with process as the defendant in the declaratory judgment action, would still have 60 days to review the submission and interpose an objection, or make a request for additional information. Interested persons or groups would be notified of the submission and permitted to intervene as a matter of right. While many of these provisions are the same as the current administrative practice, the difference is that they will be supervised by the court.

Mr. President, I urge my fellow Senators to give careful consideration to my proposal. If the Judiciary Committee holds hearings, I hope the Members will undertake a review of the current administrative procedures and the new procedure that I have offered.

AMERICAN HISTORY MONTH

Mr. BENTSEN. Mr. President, on March 17 I introduced Senate Resolution 98 which designates February "American History Month" and requests that the President call upon Americans across this great land to celebrate our Nation's history with appropriate programs, activities, and ceremonies. February has long been considered historically significant because the birthdays of two of our most revered Presidents, George Washington and Abraham Lincoln, are celebrated during that month. In 1982 we will commemorate the 250th anniversary of the birth of George Washington and, in my view, that is an especially compelling reason for the Senate to pass this resolution.

The study and appreciation of American history enables each of us to become more aware of this Nation's rich past and the lives of those individuals who crafted the fundamental principles which govern us today. Setting aside February as "American History Month" will provide all Americans a time for reflection, celebration, and renewal of the ideals that have shaped this democracy; and it will insure that contributions of generations that have gone before will be remembered.

Mr. President, I want to thank my colleagues for joining with me to secure passage of Senate Resolution 98.

MORE INSANITY IN THE NAME OF PREDATOR CONTROL

Mr. CRANSTON. Mr. President, I am disappointed and dismayed to note that the U.S. Fish and Wildlife Service has announced its return to two discredited policies of predator control, and its failure—implicit in its announcement—to provide any new directions for the animal damage control program. The Service wants toxic collars on sheep, field testing of the deadly poison known as compound 1080, and reinstatement of an abandoned policy of permitting the gassing or shooting of entire dens of coyotes.

The Reagan administration's attempt to revitalize the livestock industry by killing more coyotes and doing more research on deadly poisons simply dodges the real issue and constitutes an affront to both sides.

The ruination of the livestock industry is coming about through inflation, foreign competition, and shifting economic pressures—not coyotes. A vital, but ailing American industry needs a real program for economic recovery not a program for the indiscriminate slaughter of coyotes, as well as birds or other animals that may feed off the poisoned carcasses.

Those who believe that stronger predator control measures should be advanced will also be disappointed, for different reasons.

Compound 1080—which the administration now proposes for use in sheep collars and for field trials in Texas and Montana—was banned by President Nixon in 1972. Even when 1080 was used virtually without restriction, U.S. Forest Service data shows that the compound did not solve predator problems.

It is wasteful, nonproductive, and wrong to try to reverse the clock on a predator control method that has been thoroughly examined and subsequently rejected by the executive branch, the Environmental Protection Agency, and the public.

The administration will also permit denning—a practice banned for 2 years—wherein entire dens of coyotes are destroyed with carbon monoxide gas or by gunfire. This is simply a license to exterminate a species. Every available evidence says that control programs should be focused on the offending individual rather than on the species as a whole.

Nowhere in the administration's announcement is there mention of nonlethal, non-capture predator control methods, appropriate livestock husbandry techniques, shepherds and guard dogs, other forms of assistance to the livestock industry.

With this move, we have simply stepped back in time. And the livestock industry is once again the loser.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:07 a.m., a message from the House of Representatives, delivered by

Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, with amendments:

S. 1551. An act to amend title 5, United States Code, to extend the period within which physicians comparability contracts may be entered into, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 203. A concurrent resolution requesting certain reports relating to the Tennessee Valley Authority Act of 1933 and prohibiting certain transactions by the Board of Directors of that Authority.

ENROLLED BILLS SIGNED

At 10:41 a.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bills:

S. 815. An act to authorize appropriations for fiscal year 1982 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, and for other purposes; and

S. 1133. An act to amend the National Advisory Committee on Oceans and Atmosphere Act of 1977 to authorize appropriations to carry out the provisions of such act for fiscal year 1982, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

At 1:27 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3414) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 224. Concurrent resolution to express the support of the Congress for the President's initiatives for peace.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4482. An act to establish a U.S. Court of Appeals for the Federal Circuit, to establish a U.S. Claims Court, and for other purposes; and

H.R. 4995. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

ENROLLED BILL SIGNED

At 4:41 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled joint resolution:

H.R. 3454. An act to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the intelligence and intelligence-related activities of the U.S. Government, for the Intelligence Community Staff, and for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes.

HOUSE BILLS PLACED ON THE CALENDAR

The following bills were read twice by unanimous consent, and placed on the calendar:

H.R. 4482. An act to establish a U.S. Court of Appeals for the Federal Circuit, to establish a U.S. Claims Court, and for other purposes.

H.R. 4995. An act making appropriations for the Department of Defense for the fiscal year ending Septembr 30, 1982, and for other purposes.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred as follows:

H. Con. Res. 203. A concurrent resolution requesting certain reports relating to the Tennessee Valley Authority Act of 1933 and prohibiting certain transactions by the Board of Directors of that Authority; to the Committee on Environment and Public Works.

ENROLLED BILLS PRESENTED

The Secretary reported that on today, November 19, 1981, he had presented to the President of the United States the following enrolled bills:

S. 815. An act to authorize appropriations for fiscal year 1982 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, and for other purposes; and

S. 1133. An act to amend the National Advisory Committee on Oceans and Atmosphere Act of 1977 to authorize appropriations to carry out the provisions of such act for fiscal year 1982, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, without amendment, and unfavorably:

S. Con. Res. 48. A concurrent resolution disapproving the proposed sale to Pakistan of F-16 aircraft (together with minority views) (Rept. No. 97-276).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MOYNIHAN:

S. 1868. A bill to amend the Trade Act of 1974 with respect to trade adjustment assistance for workers; to the Committee on Finance.

By Mr. D'AMATO (for himself and Mr. JOHNSTON):

S. 1869. A bill to amend the Public Utility Holding Act of 1935 to simplify its administration and to remove restrictions no longer necessary to the protection of investors and consumers; to the Committee on Banking, Housing, and Urban Affairs.

S. 1870. A bill to amend the Public Utility Holding Company Act of 1935 to improve financial performances in the electric and gas utility industries by removing unnecessary impediments to the exercise of sound and prudent business judgment by utility executives; to the Committee on Banking, Housing, and Urban Affairs.

S. 1871. A bill to amend section 2 of the Public Utility Holding Company Act of 1935; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. GARN (for himself and Mr. HATCH):

S. 1872. A bill to amend the Act establishing the Capitol Reef National Park in the State of Utah to provide for a grazing phase-out schedule, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. CHILES:

S. 1873. A bill to designate components of the National Wilderness System in the State of Florida and to prohibit the issuance of phosphate mining leases in the Osceola National Forest; to the Committee on Energy and Natural Resources.

By Mr. THURMOND:

S. 1874. A bill to amend section 376 of title 28, United States Code, in order to reform and improve the existing program for annuities for survivors of Federal Justices and judges; to the Committee on the Judiciary.

By Mrs. HAWKINS (for herself and Mr. CHILES):

S. 1875. A bill to grant the consent of Congress to Harbour Island, Incorporated, Tampa, Florida, to construct and maintain two fix-span bridges in and over Garrison Channel, Tampa, Florida; to the Committee on Environment and Public Works.

By Mr. HATFIELD:

S. 1876. A bill to amend the Federal Highway Beautification Act to permit the States to allow business and residential directional signs on Interstate and primary systems; to the Committee on Environment and Public Works.

By Mr. DOMENICI (for himself and Mr. SCHMITT):

S. 1877. A bill to provide for the reinstatement and validation of United States oil and gas lease numbered NM-12846; to the Committee on Energy and Natural Resources.

By Mr. HEINZ:

S. 1878. A bill to direct the Secretary of the Interior to offer lifetime leases to certain individuals leasing dwellings in the Delaware Water Gap National Recreation Area, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. CRANSTON (for himself, Mr. HUDDLESTON, Mr. DODD, Mr. WILLIAMS, Mr. SARBANES and Mr. RIEGLE):

S.J. Res. 129. Joint resolution directing the Depository Institutions Deregulation Committee to pursue policies to promote safety and soundness of financial institutions; to the Committee on Banking, Housing, and Urban Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MOYNIHAN:

S. 1868. A bill to amend the Trade Act of 1974 with respect to trade adjustment assistance for workers; to the Committee on Finance.

TRADE ADJUSTMENT ASSISTANCE AMENDMENTS OF 1981

● Mr. MOYNIHAN. Mr. President, I rise to speak on two bills I am introducing—one today and another I introduced yesterday with my distinguished colleague, Senator DANFORTH—concerning the

trade adjustment assistance (TAA) program. Some 18 years ago this Congress made a commitment to protect workers who lose their jobs because of imports, a commitment to assist them in adjusting to new, competitive conditions. However, in recent months this body has cut the budget of this program by a devastating 77 percent and accepted severe substantive changes that for all practical purposes have put an end to the TAA program, and alas, to our obligation to those workers who lose their jobs as a direct result of our Federal trade policies.

The first of these bills fulfills a commitment that Senator DANFORTH and I made during the debate over the Budget Reconciliation Act. At that time, my distinguished colleague and I introduced an amendment to postpone the effective date of a provision that would have changed the contributed importantly standard for adverse trade impact certification to a far more restrictive standard of substantial cause. While neither the administration, the Congressional Budget Office, nor the Department of Labor had made an estimate of the number of workers who would lose their eligibility for TAA benefits if the Congress accepted this change, the CBO report was clear:

> The changes in certification procedures proposed by the administration would unambiguously reduce TAA participation.

Senator DANFORTH and I were able to secure only a 6-month postponement of this unnecessarily harsh and restrictive standard. As we promised then, however, we are now introducing legislation to insure that the contributed importantly standard stays in place for good. Indeed, even without specific estimates, we have witnessed before the exceeding restrictiveness of the substantial cause test. This is the same standard that is used in escape clause cases to determine import injury to industries under section 201 of the 1974 Trade Act.

Of the 29 industry petitions for import relief under the escape clause since 1977, the ITC determined that imports were a substantial cause of injury in only 18 of them. Of these, however, the President accepted only one of the ITC recommendations for relief.

What is more, without any change in the current contributed importantly standard, the Labor Department is now certifying TAA petitions at one-fifth the rate in 1975. Only 10 percent of the petitions to the Labor Department for TAA eligibility are currently certified.

In effect, the administration's plans to impose more restrictive criteria would only limit the pool of experienced workers who could take advantage of the opportunities for adjustment under the TAA program.

Mr. President, this bill, however, concerns only one of the many serious, substantive changes that the administration proposed and this Congress accepted in a well-intentioned effort to cut TAA costs. Admittedly, the costs of this program during the auto crisis were extraordinarily high. A $200 million program suddenly rose to levels of $1 and $2 billion. But what is alarming is that by its recent actions, this Congress has begun to challenge the very rationale of this program, to deny any responsibility of the Government to compensate and assist workers when they are injured by Federal policies.

Indeed, the administration estimates that 67 percent of the workers who would have been eligible for benefits under the old program will not be eligible under the administration's program that this body recently agreed to write into law.

Successful passage of our bill to retain the current certification standard is clearly not enough. Under this standard, only 17,000 workers have been certified for TAA since the start of this year. In contrast, the average number of workers certified in every other year since the program began in 1975 has been 204,820. This difference in the number of workers certified is incomprehensible, and I submit, an outrage. Indeed, this evidence must cause us to sympathize with the sentiments of those affected by the new law, such as Lane Kirkland, president of the AFL–CIO. In his testimony before the Trade Subcommittee he argued:

> The AFL–CIO believes that the United States needs an improved trade adjustment assistance program for workers injured by imports. Experience for the past 20 years underscores the urgency of improving benefits for those who lose their jobs from this cause. The current budget would effectively end trade adjustment assistance. The paltry sum now available in the budget amounts to another broken promise to those who pay the price of trade liberalization.

Moreover, the Senate Finance Committee never had the opportunity to consider extensively the administration's TAA proposals. The distinguished chairman of the Trade Subcommittee, however, has announced hearings on the TAA program to be held on December 7, 1981. For the purposes of these hearings, I am introducing a more comprehensive TAA bill in order that the most egregious, but seemingly unnoticed changes to the TAA program that were recently adopted will be addressed.

The first provision of my bill is the same that I have already discussed. It retains the contributed importantly standard beyond the 180-day postponement provided for in the Budget Reconciliation Act.

The second provision entitles workers to the job search, relocation, and training assistance provided for in sections 236, 237, and 238 of the Trade Act of 1974. Indeed, the stated intent of the administration's proposals to alter the TAA program was to shift the program's traditional emphasis on cash benefits for workers displaced by imports toward a much stronger emphasis on retraining.

The object was to reduce the class of workers eligible for any benefits (cash or training) by tightening eligibility criteria and then spending $112 million on retraining these workers. To date, however, no funds have been appropriated for TAA training, and in effect, the very thrust of the administration's program has been negated. If this administration and this Congress are genuinely serious about strengthening the training aspects of the program, we must eliminate any barrier that may thwart the availability of this training money. We therefore must make training an entitlement.

The third provision of this bill extends the coverage of the TAA program to suppliers of independent parts and services. If the workers in a firm are certified for TAA, it defeats the entire purpose of adjustment to deny TAA assistance to those workers in firms which provide parts or service to that import injured firm, and as a result, are indirectly, but seriously injured by imports as well. There is an issue of equity here, as well as of economics. In effect, we must help the entire industry adjust to reap the full benefits of free trade.

The fourth provision of my bill exempts from the calculation of the 26-week-work eligibility requirement the weeks a worker has been on workman's compensation or has been unjustifiably laid off, but later compensated. I think this provision is simply fair, commonsense. A worker who has been unjustifiably fired is not unwilling to work, he is just unable to do so. Accordingly, he should be eligible for TAA assistance.

The last provision is one I really do not think was clear to this body when we accepted the administration's TAA program. Consider if you will a worker who has lost his job because of imports, but who has yet to enter a training program. Under the new law, if he is offered a minimum wage job or above after his first 26 weeks of unemployment compensation he loses his eligibility for all his TAA benefits, both cash benefits as well as training assistance. I do not know of a skilled laborer who could not be offered a minimum wage job. The catch here, then, is that it is possible under the law as written that no one who was eligible for TAA would ever receive TAA assistance.

These are the provisions with which those who are hurt by imports are most concerned. We need to hear from them in the upcoming hearings, and we need to hear from the administration if and how they intend to address these problems under the new law. I look forward with interest to hearing this exchange.

I would remind this body that an understanding was reached with the American labor movement at the time that the Tokyo round of multilateral negotiations was considered by this body. The understanding was that trade adjustment assistance would be available to ease the shock of shifting economic activities brought about by American national trade policy. In large part, we have already reneged on this obligation. I would hope, however, that this body will be receptive to carefully reviewing the recent changes that we so quickly put in place, to hearing from those who are affected by these changes, and surely to considering such proposals as I have just laid out.

Mr. President, I thank the Chair and ask unanimous consent that both bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1865

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2514(a)(2)(A) of the Omnibus Budget Reconciliation Act of 1981 (relating to the effective date of amendments relating to group eligibility requirements for adjustment assistance for workers under the Trade Act of 1974) is amended by striking out "the 180th day after the date of the enactment of this Act" and inserting in lieu thereof "October 1, 1983".

S. 1868

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Trade Adjustment Assistance Amendments of 1981".

GROUP ELIGIBILITY REQUIREMENTS

SEC. 2. (a) Section 222 of the Trade Act of 1974 (19 U.S.C. 2272), as amended by section 2501 of the Omnibus Budget Reconciliation Act of 1981, is amended—

(1) in paragraph (3), by striking out "were a substantial cause of" and inserting in lieu thereof "contributed importantly to", and by striking out "of such decline" and inserting in lieu thereof "to such decline"; and

(2) by amending the last sentence to read as follows:

"For purposes of paragraph (3), the term 'contributed importantly' means a cause which is important but not necessarily more important than any other cause.".

(b) The amendments made by subsection (a) shall be effective with respect to all petitions for certification filed under section 221 of the Trade Act of 1974 on or after the 180th day after the date of the enactment of the Omnibus Budget Reconciliation Act of 1981.

ENTITLEMENT TO TRAINING

SEC. 3. (a) Section 236(a)(1) of the Trade Act of 1974 (19 U.S.C. 2296(a)(1)) is amended by striking out "the Secretary may approve such training" and inserting in lieu thereof "the Secretary shall approve such training".

(b) The amendment made by subsection (a) shall be effective with respect to determinations regarding training under section 236 of the Trade Act of 1974 that are made on or after the date of the enactment of this Act.

WORKER COVERAGE FOR SUPPLIERS OF ESSENTIAL PARTS OR SERVICES

SEC. 4. (a) Section 222(3) of the Trade Act of 1974 (19 U.S.C. 2272(3)), as amended by section 2 of this Act, is further amended by inserting ", or with respect to the production of which such workers' firm or appropriate subdivision thereof provides essential parts or essential services," after "subdivision thereof".

(b) The amendment made by subsection (a) shall be effective with respect to petitions for certification filed under section 221 of the Trade Act of 1974 on or after the date of the enactment of this Act.

TREATMENT OF WORKMEN'S COMPENSATION AND BACK PAY TIME FOR PURPOSES OF WORKER QUALIFICATION

SEC. 5. (a) Section 231(a)(2) of the Trade Act of 1974 (19 U.S.C. 2291(a)(2)) is amended—

(1) by striking out "or" at the end of subparagraph (B);

(2) by redesignating subparagraph (C) as subparagraph (D);

(3) by inserting after subparagraph (B) the following:

"(C) does not work for any reason, but with respect to which such worker is subsequently awarded back-pay; or";

(4) by striking out clauses (i) through (iii); and

(5) by striking out "not more than the following number of weeks may be treated as such weeks of employment under this sentence:" and inserting in lieu thereof "not more than a total of 3 weeks may be treated as such weeks of employment under subparagraphs (A) and (D).".

(b) The amendments made by subsection (a) shall be effective with respect to weeks beginning on or after the date of the enactment of this Act.

SUITABLE WORK STANDARD FOR TRA ELIGIBLE WORKERS RECEIVING EXTENDED BENEFITS OR TRA

SEC. 6. (a) Section 202(a)(3)(C) of the Federal-State Extended Unemployment Compensation Act of 1970 is amended—

(1) by striking out "(C) For purposes" and inserting in lieu thereof "(C)(i) Except as provided in clause (ii), for purposes"; and

(2) by adding at the end thereof the following new clause:

"(ii) For purposes of this paragraph the term 'suitable work' means, with respect to any worker who would be eligible for a trade readjustment allowance under the Trade Act of 1974 but for the fact that he is eligible for extended compensation under this Act, work of a substantially equal or higher skill level than the worker's past adversely affected employment (as determined for purposes of the Trade Act of 1974), and wages for such work at not less than 80 percent of the individual's average weekly wage for his most recent base period.".

(b) Section 231(a)(4) of the Trade Act of 1974 (19 U.S.C. 2291(a)(4)) is amended by striking out "202(a)(3)" and inserting in lieu thereof "202(a)(3)(ii)".

(c) The amendments made by subsections (a) and (b) shall be effective with respect to weeks of unemployment beginning on or after the date of the enactment of this Act.●

By Mr. D'AMATO (for himself and Mr. JOHNSTON):

S. 1869. A bill to amend the Public Utility Holding Company Act of 1935 to simplify its administration and to remove restrictions no longer necessary to the protection of investors and consumers; to the Committee on Banking, Housing, and Urban Affairs.

S. 1870. A bill to amend the Public Utility Holding Company Act of 1935 to improve financial performance in the electric and gas utility industries by removing unnecessary impediments to the exercise of sound and prudent business judgment by utility executives; to the Committee on Banking, Housing, and Urban Affairs.

S. 1871. A bill to amend section 2 of the Public Utility Holding Company Act of 1935; to the Committee on Banking, Housing, and Urban Affairs.

LEGISLATION TO AMEND THE PUBLIC UTILITY HOLDING COMPANY ACT

● Mr. D'AMATO. Mr. President, I am pleased today to be introducing with my distinguished colleague from Louisiana (Senator JOHNSTON) three bills which are intended to reduce the barriers to diversification which the Public Utility Holding Company Act has imposed on gas and electric holding company systems.

It is important at this point to make clear that I am not committed to any or all of these proposals at this time, but they raise legitimate and timely concerns which merit the serious consideration of the Senate.

Our Nation's utility systems are experiencing serious financial difficulties. Despite considerable rate increases over the past decade, the industry has had difficulty raising needed capital on reasonable terms. The common stocks of utility companies are selling well below their book values, and lowered bond ratings have resulted in higher interest charges that are ultimately passed on to consumers.

The three measures which I am sponsoring are indicative of the view held by the different segments of the utility industry that the Public Utility Holding Company Act is a major impediment to meaningful attempts to improve the economic well-being of the utility industry. Many in the industry believe that broader authority to diversify into nonutility operations through a holding company structure would improve their overall profitability, and thereby benefit both investors and consumers.

S. 1869, S. 1870, and S. 1871 are designed to permit this to occur:

S. 1869 would remove the Securities and Exchange Commission's authority to deny exemptions from the act where the holding company meets certain standards for exemption and would expand the types of holding company systems that could qualify for such exemptions.

S. 1870 removes the requirement for prior approval by the SEC of acquisitions of nonutility businesses by registered holding companies and changes the standards for determining when the SEC could require divestiture of such businesses. The bill also amends the act's procedures for SEC review of financing decisions, the scope of the SEC's authority over financing and investment decisions, and provisions relating to the regulation of service, sales, and construction contracts.

S. 1871 redefines the term "public utility company" as used in the act to exclude a broader class of gas utility systems from regulation under the act.

PURPOSES OF THE PUBLIC UTILITY HOLDING COMPANY ACT

The Public Utility Holding Company Act of 1935 was enacted to eliminate numerous abusive practices in which the huge and powerful utility holding company systems of the 1920's engaged. These practices were found to harm investors and consumers but to be outside the reach of effective State regulation. The act authorized the Securities and Exchange Commission to require holding company systems to adopt integrated, simplified structures, and to prevent the recurrence of abusive practices through the regulation of financing, acquisitions and dispositions of assets, service arrangements, and conflicts of interest.

By all accounts, many of these purposes have been accomplished. Yet the continuing need for the act's burdensome requirements has never fully been addressed. It has been suggested that the removal or relaxation of some of the act's provisions would assist utilities in improving their financial condition. In addition, certain amendments might remove artificial incentives to structure utility systems in ways which avoid regulation under the act. Today, only 12 utility systems are in fact so regulated.

THE ISSUES TO BE ADDRESSED

The proposed amendments to the act may be the appropriate vehicles to re-

duce the present burdens on profitability and stability. We cannot fail to address the bills I have introduced because of the very fragile condition of many of our utilities and the impact their condition may have upon the energy production of this Nation.

The recent performance of the utility industry has raised the need for utilities to explore the possibilities of diversification. For the industry as a whole, prices are constantly going up, fueled by higher production costs and spiraling interest rates. Many believe that the industry is currently experiencing its worst financial problems in 40 years and should be classified in critical condition. Soaring construction costs, which have been estimated to be as high as $500 billion through the end of the decade, have become coupled inextricably with declining sales growth. As a result, returns can be expected to continue their downward trend.

Decreased returns and profits lessen the ability of utilities to convert from oil to coal, and to nuclear energy power generating facilities. And the projects must proceed if we are to provide the necessary energy to operate an expanding economy and reduce our dependence on imported oil. Recent events in the Middle East have illustrated only too vividly the volatility of that region and the possibility of a future cutoff of their petroleum. Our energy policy must not only recognize the need to encourage the development of alternate energy sources, but also address the need to revitalize a faltering utility industry right here at home.

Diversification may very well be the proper method for utilities to raise capital for their energy production facilities. However, many important issues must be addressed. How would diversification affect investors and consumers? Will possible unwise and imprudent investments in other industries lead to yet higher utility rates for consumers? What are the implications of our Nation's energy policy? Will diversification be able to provide the necessary capital for the future construction requirements of the utilities? What role should the Federal Government play in an area where State regulation has become so pervasive?

I trust these bills will be the focal point for a discussion of the issues I have raised and hope that we begin this debate with all deliberate speed. If we do not, we may very well be caught in a situation without the available energy resources to meet our domestic needs.

Mr. President, I ask unanimous consent that the bills be printed in the RECORD.

There being no objection, the bill were ordered to be printed in the RECORD, as follows:

S. 1869

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Public Utility Holding Company Act Amendments of 1981".

FINDINGS AND STATEMENT OF PURPOSES

SEC. 2. (a) The Congress hereby finds that—

(1) business, market, and regulatory developments over the forty-six year history of the administration of the Public Utility Holding Company Act of 1935 have rendered certain of the provisions of the Act—

(A) unnecessarily restrictive of business activity; or

(B) duplicative of a broad range of regulatory controls administered by State and Federal authorities under a number of other laws; and

(2) an adequate basis exists for lessening the regulatory control of, and burden on, registered holding companies and subsidiary companies and subsidiary companies thereof, consistent with the protection of investors and consumers.

(b) The purposes of this Act are—

(1) to remove restrictions on business activity no longer necessary or appropriate in the public interest; and

(2) to simplify and allow for greater flexibility in the administration of the remaining requirements of the Public Utility Holding Company Act of 1935.

DEFINITIONS

SEC. 3. Section 2(a) of the Public Utility Holding Company Act of 1935 is amended—

(1) by amending paragraph (18) thereof to read as follows:

"(18) 'Utility assets' means the facilities, in place, of any electric utility company directly employed in, and the primary function of which is, the production, transmission or distribution of electric energy, or the facilities, in place, of any gas utility company directly employed in, and the primary function of which is, the transportation or distribution of natural or manufactured gas or the production of manufactured gas."; and

(2) by adding at the end thereof the following new paragraph:

"(30) 'Unsound financial practice' means a financial practice which the Commission determines would result in an unreasonable risk to investors or consumers, giving due consideration to the financial practices of public-utility companies and holding-company systems which are not subject to regulation under section 6 and section 7 of this title.".

REFORM OF SECURITIES ISSUANCE CONTROLS

SEC. 4. Section 6 and 7 of the Public Utility Holding Company Act of 1935 are amended to read as follows:

"REGULATED SECURITY TRANSACTIONS BY REGISTERED HOLDING AND SUBSIDIARY COMPANIES

"SEC. 6. (a) Except in accordance with a declaration effective under section 7, it shall be unlawful for any registered holding company or subsidiary company thereof, by use of the mails or any means or instrumentality of interstate commerce, or otherwise, directly or indirectly—

"(1) to issue or sell any security of such company; or

"(2) to exercise any privilege or right to alter the priorities, preferences, voting power, or other rights of the holders of an outstanding security of such company, unless the issue, sale, renewal or guaranty of, or assumption of liability on, such security is exempted from this subsection under, or pursuant to the authority of, subsection (b) of this section.

"(b)(1) The provisions of subsection (a) shall not apply to—

"(A) the issue, sale, renewal or guaranty of, or assumption of liability on, a note or draft (including the pledge of any security as collateral therefor) by a registered holding company or subsidiary company thereof if such note or draft—

"(i) is not part of a public offering,

"(ii) matures or is renewed for not more than nine months, exclusive of days of grace, after the date of such issue, sale, renewal, or assumption of liability thereon, and

"(iii) aggregates (together with all other then outstanding notes and drafts of a maturity of nine months or less, exclusive of days of grace, as to which such company is primarily or secondarily liable) not more than ten per centum of the aggregate of the capital surplus and retained earnings and the principal amount of the other securities of such company then outstanding;

"(B) the issue, by a registered holding company or subsidiary company thereof, of a security issued pursuant to the terms of any security outstanding on January 1, 1935, giving the holder of such outstanding security the right to convert such outstanding security into another security of the same issuer or of another person, or giving the right to subscribe to another security of the same issuer or another issuer;

"(C) the issue, sale, renewal or guaranty of, or assumption of liability on, a security by a subsidiary company of a registered holding company if—

"(i) such subsidiary company is a public-utility company,

"(ii) such issue, sale, renewal or guaranty of, or assumption of liability on, a security is issued for the purpose of financing the business of such subsidiary company, or in connection with the financing of the business of another subsidiary company in the same holding-company system, and

"(iii) such issue, sale, renewal, guaranty or assumption of liability is expressly authorized by the State commission of the State in which such public-utility company subsidiary company is organized and doing business;

"(D) the issue, sale, renewal or guaranty of, or assumption of liability on, a security by a subsidiary company of a registered holding company if—

"(i) such subsidiary company is not a public-utility company, a holding company, or an investment company, and

"(ii) such issue, sale, renewal, guaranty assumption of liability is issued for the purpose of financing the business of such subsidiary company, or in connection with the financing of the business of another subsidiary company in the same holding-company system;

"(E) the issue, sale, renewal or guaranty of, or assumption of liability on, any security by a registered holding company or subsidiary company thereof which issue, sale, renewal, guaranty or assumption of liability occur pursuant to a plan filed and made part of a declaration effective under section 7; or

"(F) the guaranty of, assumption of liability on, a security of a subsidiray company by its registered holding company which is not itself a public-utility company, if the aggregate of the principal amount and par value of the securities which are the subject of all such guarantees and assumptions of liability is not more than ten per centum of the aggregate of capital, capital surplus and retained earnings and the principal amount of the other securities of such registered holding company then outstanding.

"(2) Notwithstand the exemptions provided in paragraph (1) of this subsection, the Commission may, by rules or regulations, establish such requirements with respect to the consolidated security structure of a registered holding company system as are necessary to prevent an unsound financial practice.

"(3)(A) In addition to the exemptions provided in paragraph (1) of this subsection, the Commission may, by order, upon application by a registered holding company or subsidiary company thereof, exempt from the provisions of subsection (a) the issue, sale, renewal, or guaranty of, or assumption of liability on, any security if the Commission determines the application of subsection a) to such issue, sale, renewal, guaranty, or assumption of liability is not necessary or appropriate in the public interest or for the protection of investors or consumers.

"(B) The Commission's order under this paragraph granting any such exemption may impose such terms and conditions as the

Commission find are necessary to prevent an unsound financial practice.

"(4) Within ten days, or whatever longer period the Commission prescribes by rule or regulation, after any issue, sale, renewal or guaranty of, or assumption of liability on, any security exempted from the application of subsection (a) by or under authority of this section, such registered holding company or subsidiary company thereof shall file with the Commission a certificate of notification in such form as setting forth such information as the Commission may be rules and regulations or order prescribe as necessary or appropriate in the public interest or for the protection of investors or consumers.

"DECLARATIONS BY REGISTERED HOLDING AND SUBSIDIARY COMPANIES IN RESPECT OF SECURITY TRANSACTIONS

"SEC. 7. (a) A registered holding company or subsidiary company thereof may file a declaration with the Commission, regarding any of the acts enumerated in subsection (a) of section 6, in such form and together with such information as the Commission may prescribe by rules and regulations or order.

"(b)(1) Except as otherwise provided in this subsection, a declaration filed under this section shall become effective on the 20th day after the filing thereof unless the Commission prior to such effective date shall have issued a preliminary order to the declarant, together with a statement of its reasons—

"(A) disapproving such declaration, or

"(B) approving such declaration subject to terms and conditions.

If the declarant files notice with the Commission of its acceptance of a preliminary order subject to the terms and conditions imposed by the Commission, such preliminary order shall become final without further order or proceeding or opportunity for hearing, and the declaration shall become effective pursuant to such order upon the filing of such notice.

"(2) Within a reasonable time after the issuance of a preliminary order under paragraph (1) and after an opportunity on the part of the declarant for hearing upon such preliminary order, unless the declarant files with the Commission, notice of the withdrawal of its declaration or notice of its acceptance of such preliminary order, the Commission shall enter a final order, together with a statement of its reasons—

"(A) approving such declaration,

"(B) disapproving such declaration, or

"(C) approving such declaration subject to terms and conditions.

"(3) A declaration filed under this section may be in the form of a plan which may provide for the issue, sale, renewal or guaranty of, or assumption of liability on, securities at such times as the declarant may determine to be appropriate over, or within, a period of twelve months or such longer period as the Commission may allow.

"(4)(A) Amendments to a declaration may be made with the consent of the Commission or upon such terms and conditions as the Commission may, by rule or regulation, prescribe as consistent with the purposes of this section.

"(B) If an amendment to a declaration is filed prior to the 20th day after the filing of such declaration, unless the Commission shall at the time such amendment is filed, consent to the filing thereof, the declaration shall not become effective until the later of the 20th day after the filing of such declaration or the fifth day after the filing of such amendment.

"(5) The Commission may, by order, without requirement for an opportunity for hearing, upon application, having due regard for the public interest and the interest of investors and consumers, permit a declaration to become effective at a date earlier than the date upon such declaration would otherwise become effective pursuant to paragraph (1) or subparagraph (B) of paragraph (4) of this subsection.

"(C) If a State Commission or State securities commission, having jurisdiction over any of the acts enumerated in subsection (a) of section 6, shall inform the Commission that State laws applicable to an act which is the subject of a declaration filed under this section have not been complied with, the Commission shall not permit such declaration to become effective unless and until the Commission is satisfied that such compliance has been effected."

"(d)(1) Except as provided in subsection (c), the Commission shall permit to become effective a declaration regarding the issue, sale, renewal or guaranty of, or assumption of liability on, a security unless it determines that the acts which are the subject of the declaration involve an unsound financial practice.

"(2) If the Commission issues an order under subsection (b), disapproving a declaration regarding the issue, sale, renewal or guaranty of, or assumption of liability on, a security or approving such a declaration subject to terms and conditions, the Commission's order shall specify the unsound financial practice which it determines to be involved in the acts which are the subject of such declaration.

"(3) The Commission's authority to impose terms and conditions under this section with respect to a declaration regarding the issue, sale, renewal, or guaranty of, or assumption of liability on, a security shall be limited to those terms and conditions which it finds are necessary to prevent the unsound financial practice required to be specified in the Commission's order.

"(e) Except as provided in subsection (c), the Commission shall permit to become effective a declaration regarding the exercise of any privilege or right to alter the priorities, preferences, voting power, or other rights of the holders of an oustanding security, unless the Commission finds that such exercise of such privilege or right will result in an unfair or inequitable distribution of voting power or is otherwise detrimental to the interest of investors or consumers, giving due consideration to the practices of public-utility companies and holding-company systems which are not subject to regulation under section 6 of this title and this section.".

ELIMINATION OF PRIOR COMMISSION APPROVAL OF DIVERSIFIED BUSINESS ACTIVITY

SEC. 5. The Public Utility Holding Company Act of 1935 is amended—

(1) in section 9(a)(1)—

(A) by inserting "of a public-utility company" after "securities"; and

(B) by striking out "or any other interest in any business";

(2) in section 10—

(A) by inserting "For purposes of section 9—" before "(a)";

(B) by striking out ", or of any other interest in any business," in subsection (a);

(C) by striking out "; and" at the end of paragraph (2) of subsection (a) and inserting in lieu thereof a period; and

(D) by striking out paragraph (3) of subsection (a) in its entirety;

(3) in section 10(c)(1), by striking out ", or of any other interest,";

(4) in section 11(a)—

(A) by striking out "necessary or", and

(B) by striking out "the operations of";

(5) in section 11(b)—

(A) by amending paragraph (1) to read as follows:

"(1) To require by order, after notice and opportunity for hearing, that each registered holding company, and each subsidiary company thereof, shall take such action as the Commission shall find necessary to limit the operations of the holding-company system of which such company is a part to a single integrated public-utility system, and to such other businesses as are appropriate to such integrated public-utility system: *Provided however*, that the Commission shall permit a registered holding company to continue to control one or more additional integrated public-utility systems, if, after notice and opportunity for hearing, it finds that—

"(A) each of such additional systems cannot be operated as an independent system without the loss of substantial economies which can be secured by the retention of control by such holding company of such system;

"(B) all of such additional systems are located in one State, or in adjoining States, or in a contiguous foreign country; and

"(C) the continued combination of such systems under the control of such holding company is not so large (considering the state of the art and the area or region affected) as to impair the advantages of localized management, efficient operation, or the effectiveness of regulation.

The Commission shall permit as appropriate to one or more integrated public-utility systems the retention of an interest in any business (other than the business of a public-utility company as such) whether or not functionally related to the business of the integrated public-utility system or systems, unless the Commission shall determine, based upon specific factual findings, that such interest is material to such system or systems and its retention is detrimental to the protection of investors or consumers."; and

(B) by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any other provisions of this title, the Commission shall permit a registered holding company to retain any combination in existence on May 1, 1981, of gas utility systems and electric utility systems unless the Commission finds, after notice and opportunity for hearing, that the combination of systems fails to satisfy the requirements of clauses (B) and (C) of paragraph (1).".

MODIFICATION OF CONTROLS ON INTER-COMPANY TRANSACTIONS

SEC. 6. The Public Utility Holding Company Act of 1935 is amended—

(1) in section 12—

(A) by striking out in subsection (b) "It shall be unlawful for any registered holding company or subsidary company thereof" and inserting in lieu the following: "Except in the case of a transaction which is expressly authorized by the State commission of the State in which such registered holding company or such registered holding company or such subsidiary company is organized and doing business as a public-utility company, it shall be unlawful for any registered holding company which is a public-utility company or for any public-utility company subsidiary of a registered holding company";

(2) by striking out in subsection (d) "It shall be unlawful" and inserting in lieu the following: "Except in the case of a sale of utility assets used or operated by a public-utility company subsidiary expressly authorized by a State commission with jurisdiction to regulate such subsidiary company, it shall be unlawful"; and

(3) by striking out in subsection (f) "It shall be unlawful for any registered holding company or subsidiary company thereof" and inserting in lieu the following:

"Except in the case of a transaction which is expressly authorized by the State commission of the State in which such registered holding company or such subsidiary company is organized and doing business as a public-utility company, it shall be unlawful for any registered holding company which is a public-utility company or for any public-utility company subsidiary of a registered holding company"; and

(2) in section 13, by adding at the end thereof the following new subsection:

"(h) In the exercise of its authority under this section, the Commission—

"(1) shall not determine the permissible cost to be charged to an associate company by any subsidiary company of a registered holding company by taking into account any earnings fairly and equitably attributable to transaction with, the performance of services for, or sale of goods to, any person which is not an associate company; and

"(2) notwithstanding any other provisions of this title, may, by order, upon application by a registered holding company or any subsidiary company thereof, if it determines that such action is consistent with the public interest and the interest of investors and consumers, permit a subsidiary company of a registered holding company to perform any—

"(A) sales contract;

"(B) service contract (other than a contract for the performance of traditional management services); or

"(C) construction contract for an associate company at a price (or pursuant to a method of pricing which results in a price) which may be in excess of such subsidiary company's costs, provided such price is equal to or less than the price of comparable contracts performed by persons who are not associate companies or equal to or less than the market of such goods.".

CONFORMING CHANGE TO SECURITIES ISSUANCE PROCEDURES

SEC. 7. Section 20(c) of The Public Utility Holding Company Act of 1935 is amended by striking out "Orders" in the last sentence and inserting in lieu thereof "Except as provided in section 7, orders".

S. 1870

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Diversification Amendments to the Public Utility Holding Company Act of 1935".

FINDINGS AND STATEMENT OF PURPOSE

SEC. 2. The Congress hereby finds that—

(1) the electric and gas utility industries in the United States, once strong and stable, are now experiencing serious and intractable financial difficulties, the consequences of which threaten the existence of these vital national resources, together with the citizens and industry of the United States dependent thereon;

(2) while there may be a number of alternatives available to remedy the financial difficulties confronted by the electric and gas utility industries, it is in the best interests of investors and consumers to encourage the most expeditious of the financial remedies available;

(3) the diversification of a business portfolio, when done prudently, is recognized as both a technically and operationally sound means of improving corporate financial performance by spreading or countering business risk;

(4) prudently managed diversification into nonutility businesses is a normal business practice that could substantially improve the financial performance of certain electric and gas utilities;

(5) it is in the public interest to remove unnecessary and unintended impediments to the exercise of sound and prudent business judgment by utility executives;

(6) the Public Utility Holding Company Act of 1935 (P.L. 74-333) was intended to correct abuses in the manner in which the utility industry was then conducting its affairs; the legislative intent was not, however, to prevent or in any way interfere with those normal and prudent business practices the benefits of which would accrue to both investors and consumers;

(7) certain provisions of the Public Utility Holding Company Act of 1935 nevertheless act to increase, rather than decrease, business risk in a manner that is detrimental to the interests of investors and consumers by effectively discouraging diversification by electric and gas utilities into nonutility businesses; and

(8) the amendment of the Public Utility Holding Company Act of 1935 to provide for the establishment of a new exemption for holding companies with a subsidiary public-utility company meeting certain defined criteria and the establishment of definitive exemptions would be consistent with the public interest and the interests of investors and consumers and would eliminate those provisions which inhibit normal and prudent business practices and result in increased risk to investors and consumers.

STATEMENT OF PURPOSES

SEC. 3. The purposes of this Act are—

(a) to remove technical restrictions imposed by the Public Utility Holding Company Act of 1935 on those utilities prudently operating in the best interests of their investors and consumers that find it desirable and beneficial to diversify their business activities;

(b) to provide a new exemption under section 3 for a holding company with one subsidiary public-utility company that operates in one or more States contiguous to the State in which such subsidiary public-utility company is organized;

(c) to provide an exemption for holding companies created by companies that are presently exempt under section 3(a)(2) of the Public Utility Holding Company Act of 1935; and

(d) to provide definitive exemptions in subsection (a) of section 3 so as to reduce the risk of the exercise of prudent business judgment related to diversification by such utilities.

AMENDMENTS TO THE PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

SEC. 4. The Public Utility Holding Company Act of 1935 is amended to read as follows:

"POWER TO MAKE PARTICULAR EXEMPTIONS REGARDING HOLDING COMPANIES, SUBSIDIARY COMPANIES, AND AFFILIATES

"SEC. 3. (a) The Commission, by rules and regulations upon its own motion, or by order upon application, shall unconditionally exempt any holding company, and every subsidiary company thereof as such, from all provisions of this title, except paragraph (2) of subsection (a) of section 9, if—

"(1) such holding company, and every subsidiary company thereof which is a public-utility company from which such holding company derives, directly or indirectly, any material part of its income, are predominantly intrastate in character and carry on their business substantially in a single State in which such holding company and every such subsidiary company thereof are organized;

"(2) such holding company is predominantly a public-utility company whose operations as such do not extend beyond the State in which it is organized and States contiguous thereto;

"(3) such holding company is only incidentally a holding company, being primarily engaged or interested in one or more businesses other than the business of a public-utility company and (A) not deriving, directly or indirectly, any material part of its income from any one or more subsidiary companies, the principal business of which is that of a public-utility company, or (B) deriving a material part of its income from any one or more such subsidiary companies, if substantially all the outstanding securities of such companies are owned, directly or indirectly, by such holding company;

"(4) such holding company is temporarily a holding company solely by reason of the acquisition of securities for purposes of liquidation or distribution in connection with a bona fide debt previously contracted or in connection with a bona fide arrangement for the underwriting or distribution of securities;

"(5) such holding company is not, and derives no material part of its income, directly or indirectly, from any one or more subsidiary companies which are, a company or companies the principal business of which within the United States is that of a public-utility company; or

"(6) such holding company has only one subsidiary public-utility company and such subsidiary public-utility company's operations as such do not extend beyond the State in which it is organized and States contiguous thereto.

"(b) If a holding company otherwise qualifies for an exemption pursuant to subsection (a) of this section, that exemption shall not be affected by the ownership by a public-utility subsidiary of such holding company of a public-utility company provided that the ownership of such public-utility company by the public-utility subsidiary of such holding company is exempt pursuant to paragraph (2) of subsection (a) of this section.

"(c) The Commission, by rules and regulations upon its own motion, or by order upon application, shall exempt any subsidiary company, as such, if a holding company from any provision or provisions of this title, the application of which to such subsidiary company the Commission finds is not necessary in the public interest or for the protection of investors, if such subsidiary company derives no material part of its income, directly or indirectly, from sources within the United States, and neither it nor any of its subsidiary companies is a public-utility company operating in the United States.

"(d) Within a reasonable time after the receipt of an application for exemption under subsection (a) or (c), the Commission shall enter an order granting, or, after notice and opportunity for hearing, denying or otherwise disposing of such application. The filing of an application in good faith under subsection (a) by a person other than a registered holding company shall exempt the applicant from any obligation, duty, or liability imposed in this title upon the applicant as a holding company until the Commission has acted upon such application. The filing of an application in good faith under subsecton (c) shall exempt the applicant from any obligation, duty, or liability imposed in this title upon the applicant as a subsidiary company, until the Commission has acted upon such application. Whenever the Commission on its own motion, or upon application by the holding company or any subsidiary company thereof exempted by any order issued under subsection (a), or by the subsidiary company exempted by any order issued under subsection (c), finds that the circumstances which gave rise to the exemption no longer exist, the Commission shall by order revoke such order.

"(e) The Commission may, by rules and regulations, conditionally or unconditionally exempt any specified class or classes of persons from the obligations, duties, or liabilities imposed upon such persons as subsidiary companies or affiliates under any provision or provisions of this title, and may provide within the extent of any such exemption that such specified class or classes of persons shall not be deemed subsidiary companies or affiliates within the meaning of any such provision or provisions, if and to the extent that it deems the exemption necessary or appropriate in the public in-

terest or for the protection of investors or consumers and not contrary to the purposes of this title.".

S. 1871

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2(a)(5) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79b(a)(5)) is amended by striking out the period at the end thereof and inserting in lieu thereof the following: ", except a gas utility company—

"(A) which owns or operates no facilities described in paragraph (4) of this subsection other than facilities used for the distribution at retail of natural or manufactured gas wholly within a single State; or

"(B) the intrastate gas utility rates of which are subject to regulation by a State authority or authorities of contiguous States.

The exception contained in the preceding sentence shall apply to a gas utility company only if every compay which controls, directly or indirectly, such gas utility company either is the issuer of a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934, or is controlled, directly or indirectly, by such an issuer.".●

● Mr. JOHNSTON. Mr. President, under the Public Utility Holding Company Act of 1934 (PUHCA), the Securities and Exchange Commission (SEC) regulates the essential financial decisions of public utility holding companies and their subsidiaries, including both electric and gas retail distribution companies and nonutility subsidiaries.

The act requires those companies to obtain prior SEC approval of most financing activities including securities issuances and other assumptions of liability, and of significant investment decisions including acquisition of all other businesses and disposition of utility company securities and assets.

Congress armed the SEC with these extraordinary powers to direct the financial affairs of these private companies because in 1935 their complex and diverse structures rendered ineffectual attempts by States to regulate them.

Moreover, the then untried Federal securities laws seemed inadequate to prevent the re-creation of the abusive financial practices that inlay the then existing utility holding company structures.

In contrast to the formidable and somewhat mysterious holding company structures of the past, a holding company system today is a straightforward business management device, the primary function of which is to manage, operate, and provide services to public utility companies. It functions in an ordered and commercial setting, subject to the well-established regulatory schemes of State and Federal laws governing corporations generally and public utilities specifically.

The SEC's administration has accomplished many of the fundamental objectives of the act; holding company systems have been integrated and greatly simplified. Today only a small number remain subject to plenary regulation under the act.

However, those companies still subject to SEC jurisdiction must accommodate both the planning and substance of their financial and investment decisions to the constraints of prior SEC review.

For these companies, regulation under PUHCA substantially limits the scope of management discretion by affirmatively prohibiting the pursuit of certain investment opportunities, and by effectively precluding the exercise of financing options that cannot await the conclusion of SEC review procedures.

The bills we are introducing today would substantially relax the extent to which utility holding companies would be subject to the plenary authority of the SEC. We do not pretend that the substance of these bills is or should be the final word on this matter.

They do clearly indicate, however, that the Public Utility Holding Company Act has outlived its usefulness. While it accomplished its intended objectives in the economic climate of the 1930's, in the world of the 1980's it does little more than stifle the independent business discretion of those it seeks to regulate.

I commend these bills and their desired goals to the Senate for comprehensive review.●

By Mr. GARN (for himself and Mr. HATCH):

S. 1872. A bill to amend the act establishing the Capitol Reef National Park in the State of Utah to provide for a grazing phaseout schedule, and for other purposes; to the Committee on Energy and Natural Resources.

CAPITOL REEF NATIONAL PARK

● Mr. GARN. Mr. President, I am today introducing a bill to amend the Capitol Reef National Park enabling statute, which would amend the grazing phaseout provision of that law. On December 18, 1971, Congress enacted Public Law 92-207 designating the recently enlarged Capitol Reef Naitonal Monument as a national park. In the last 90 minutes of his term, President Lyndon Johnson had issued a proclamation enlarging the monument to 245,229 acres, about six times its original acreage. It is accurate to say that the ranchers, local officials and others directly affected by this action had an inadequate opportunity to comment at that time.

Public Law 92-207 provides for a phaseout of livestock grazing following expiration of the then-current permits and one period of renewal. Implementation of this provision has taken the form of a schedule calling for one 10-year renewal for holders of 10-year permits and 10 1-year renewals for holders of 1-year grazing permits. These permits would be terminated between May 31, 1982 and May 31, 1992.

The grazing provision contained in this law was that accepted by the Senate-House conference on the bill. Earlier the Senate had rejected this method of grazing phaseout and had instead passed a provision which would have allowed permit renewal for up to 25 years from the date of enactment and thereafter during the lifetime of the permit holder and the lifetime of his heirs or successors. It is readily apparent, Mr. President, that the grazing phaseout ultimately enacted was much harsher than the one originally intended by the Senate.

My purpose, therefore, in introducing this bill is to address some serious inequities in this grazing phaseout schedule before they are forced to occur.

First, from the perspective of the permit holders, 45 ranching families would be directly affected by the termination of grazing. For many of these ranchers, termination would fall at or near the midpoint of their productive ranching careers. Furthermore, a large percentage would be forced to sell their livestock and perhaps their base operating land and facilities under forced sale conditions, at a significant loss.

Second, from the viewpoint of the local economy, the counties around Capitol Reef are among the more depressed in the State of Utah and the Nation. Wayne and Garfield counties, furthermore, are more dependent on livestock grazing than almost any area in the State. Therefore, the elimination of grazing as presently scheduled is certain to add serious strain to the local economy as well as the hardship of the individuals concerned.

Let me briefly address the question of the park itself. Going back to the establishing act of August 25, 1916, we read that the Secretary of Interior may allow grazing within any national park, monument, or reservation if it is not detrimental to the primary purpose for which the unit was created. The expansion of the boundaries of Capitol Reef National Monument referred to above encompassed significant amounts of land which have historically been used for livestock grazing. Now these lands are within the boundaries of Capitol Reef National Park. The park also includes a fruit-producing area which Park Service officials have had the wisdom to preserve intact and in operation, owing to its historical value. Considering that livestock grazing in the Capitol Reef actually predates the fruit production concern, it would seem consistent to take another look at the way Congress has provided for the termination of this historic activity. As for the primary purpose of the park, there appears to be no inherent resource conflict between scenic or scientific values at the park and livestock grazing. Livestock are placed on the range November 1 of each year, after most of the park is closed to tourists, and are removed by May 31, prior to major usage by tourists. And the tourists who actually do get to see the cattle being trailed out of the park seem delighted to view this historical part of the Old West in action. Finally, the "waterpocket fold," the unique formation for which the park was established, is not susceptible to damage by livestock grazing, to my understanding, owing to natural barriers and existing management programs.

In assessing the conditions at Capitol Reef in the context of the overall situation of grazing in national parks, one final inequity surfaces. The grazing phaseout imposed on this park is substantially harsher than that set up for other parks where grazing has historically occurred. The rate of phaseout originally passed by the Senate was identical

to the schedule established for Grand Teton National Park, for example.

As I pointed out earlier, that proposal would have allowed a permitholder to renew his permit for a period of 25 years from the date of establishment of the park, and thereafter during the lifetime of the permitholder and the lifetime of his heirs.

This approach to phasing out of livestock grazing is fair and humane. It recognizes grazing for its historical longevity and for its value as the livelihood to individuals pursuing that way of life. It recognizes the family nature of the operation of ranching, which played such an important role in the old West and still characterizes the family life of a large number of Utahns today.

Mr. President, I cannot see that grazing as a historical activity is any less valuable in Capitol Reef than it is in other parks. I cannot believe that grazing is less important to those doing it in the Capitol Reef area than it is to ranchers in other park areas. I also cannot believe that the negative—for park purposes—impact of grazing in other areas can be any less than it is in Capitol Reef.

It should also be pointed out, Mr. President, that the only alternative remaining if we do not reevaluate and change the present phaseout schedule, is for the Federal Government to go in and fence off the park area. That could mean up to 150 miles of fencing at upward of $3,000 to $4,000 per mile, and I am sure that the merits of the situation will show that solution to be ridiculous.

Mr. President, the House-Senate conference on the fiscal year 1982 Interior and related agencies appropriations bill recently concluded. In these deliberations, the House and Senate agreed to a 1-year moratorium on the grazing phaseout at Capitol Reef, which is scheduled to begin in May 1982.

I have every confidence that this provision will become law, and let me emphasize what its purpose is. This 1-year moratorium will enable the Congress to take another look at the Capitol Reef grazing situation, without the threat or pressure of an imminent phaseout of grazing. It buys us time to calmly and thoughtfully consider a new and better approach.

By no means is the appropriations bill language intended to circumvent the authorizing committee's jurisdiction. We have simply obtained some time in which the authorizing committee will be able to look at the situation I have described here and see whether it is not in the best interests of everyone concerned to amend the grazing phaseout now contained in the statute. I believe that my submission of this bill demonstrates that the Appropriations Committees of the House and Senate acted in good faith.

In light of these circumstances, Mr. President, I am proposing that the enacting statute for Capitol Reef National Park be amended to replace the present grazing phaseout provision with the provision originally contained in the Senate bill considered in the 92d Congress and which is in effect for Grand Teton National Park.

I am convinced that my bill would provide a fair and equitable solution to the full range of concerns which are at issue here, and I urge my colleagues in the Senate to give it careful and, ultimately, favorable consideration.●

By Mr. CHILES:

S. 1873. A bill to designate components of the National Wilderness System in the State of Florida and to prohibit the issuance of phosphate mining leases in the Osceola National Forest, Fla.; to the Committee on Energy and Natural Resources.

FLORIDA WILDERNESS ACT OF 1982

● Mr. CHILES. Mr. President, today the House Interior Subcommittee on Public Lands and National Parks voted to report to the full Interior Committee legislation to prohibit phosphate mining in the Osceola National Forest in Florida. This is an issue I have been very much interested in, and I am extremely pleased that the House has taken this first important step forward in making sure the Osceola is protected from the damages associated with phosphate strip mining. I am introducing the legislation approved by the House subcommittee today, so that the Senate can begin to work hand in hand with the House on this matter which is so critical to the State of Florida.

At the present time the Department of the Interior is reviewing 41 preference right lease applications for phosphate mining covering 52,000 acres of the forest. If approved, Mr. President, mining could take place on almost one-third of the forest's acreage. Environmental studies have pointed to the adverse impact of strip mining on water resources, timber production, and swampland preservation.

In addition, phosphate mining would significantly impact existing uses of the forest for recreation activities and would pose serious threats to wildlife habitats and populations found in the forest. The Florida Congressional Delegation, the State of Florida, local and regional agencies, and countless citizens of my State are opposed to this mining. Yet, in spite of the wide-based and intense opposition, the administration has made clear its intent to push forward in issuing these leases.

It is for this reason quick action by the House and Senate is necessary in order to insure the continued use and protection of this small, but valuable forest resource in my State. The vote today by the House subcommittee to approve this legislation sets the stage for further action in that body. It also sends a clear signal to the Senate that momentum is building in opposition to the administration's plan. I hope the Senate will follow the House example in this regard.

Earlier this year, I introduced legislation in the Senate to accomplish the goal of protecting the Osceola National Forest from strip mining. This bill, S. 1138, is pending in the Senate Energy and Natural Resources Committee. Since this legislation was introduced, the House subcommittee has had the opportunity to hold a hearing on the leasing question and to explore a variety of proposals designed to prevent strip mining in the Osceola National Forest. The bill approved by the subcommittee today represents a consensus on a number of issues, and I am pleased that it incorporates some of the provisions of my bill, S. 1138.

In brief, Mr. President, this bill prohibits phosphate mining in the Osceola National Forest and sets forth a procedure for resolving the pending lease applications so that the companies are treated fairly.

Under the provisions of the bill I am introducing today, the Secretary of the Interior is authorized to determine which of the lease applicants are entitled to a lease. Those lease applicants who are found to have a lease right could then exercise a number of options in lieu of being issued the phosphate mining lease. The company could exchange lease rights to lands in the Osceola for leases on other public lands. Or, the company could ask that the lease application be suspended until such time as Congress agrees to open up the Forest for mining. Or, the company could receive a monetary credit in the amount determined to the value of the lease right which could be used for bidding rights, bonus rental or royalty payments on other mineral leases. In addition, in lieu of the options outlined above, the Secretary of the Interior may also offer to purchase the lease right from the applicant.

Mr. President, I have come before the Senate on a number of occasions to discuss the controversy surrounding phosphate mining in the Osceola National Forest. It is time Congress acts to put to rest the question of mining in the forest. Congress has a responsibility to encourage an effective management policy for the Osceola that recognizes the multiple uses and rich natural resources associated with the forest. In addition, it is important that the pending lease applications for phosphate mining be settled in a timely manner. This bill seeks to achieve both these goals and parallels the proposal under active review by the House of Representatives.

The issues surrounding phosphate mining in the Osceola National Forest are numerous and complex. I realize the Senate committee may have additional recommendations on how best to address the leasing question. I am certainly open to additional suggestions.

It is my hope, however, now that we see the ball rolling in the House, that the Senate as well will begin moving on this important matter. I hope this bill will set the stage for resolving the long-lived controversy of strip mining in the Osceola National Forest.●

By Mr. THURMOND:

S. 1874. A bill to amend section 376 of title 28, United States Code, in order to reform and improve the existing program for annuities for survivors of Federal justices, and judges; to the Committee on the Judiciary.

JUDICIAL SURVIVORS ANNUITIES REFORM ACT OF 1981

Mr. THURMOND. Mr. President, today I offer legislation entitled the Ju-

dicial Survivors Annuities Reform Act of 1981. This bill is intended to amend section 376 of title 28 of the United States Code to more equitably adjust provisions dealing with annuities for the families of deceased judges. The thrust of this legislation is to update those sections which affect children and to upgrade spousal annuities by increasing the "ceiling" amount and creating a "floor" amount.

At present, the annuities for children of deceased judges are determined by statutorily designated dollar figures. Needless to say, as time passes, fixed statutory figures become increasingly inadequate. In response to the situation, this measure would eliminate these dollar figures and would substitute instead a formula based upon a percentage of the salary of the judicial officer for a 3-year-high period.

This proposal will leave intact the two "classes" of children presently found in the law—a class of those in which the spouse is receiving an annuity and a class of those in which the spouse is not receiving an annuity or is deceased. Moreover, the age limitations for children would remain the same—age 18 for unmarried children except for those unmarried children between ages 18 and 22 who are full-time students.

However, by the provisions of this bill, the amounts available for children's annuities would increase depending upon the salary of the particular judicial officer. For example, under the present law, if there are three surviving children in the first class—an existing spousal annuity—each child would receive a monthly grant of $129. Following the same example, each of the three children in the second class—no spousal annuity—would receive $155 each month.

Under the new proposal, the annuity amounts would vary according to the judicial salary and the number of children. The three surviving children of a district judge in either class would each receive annuities equaling $390 per month.

The second major amendment in this bill addresses the computation of annuities for surviving spouses. At the present time, a formula based upon a 3-year high salary average and the years of service with a factoring figure of 0.0125 is utilized to determine the annuity. The maximum annuity amount is 40 percent, and this is achievable after 32 years of creditable service. There is no "floor" or minimum amount.

The proposal I offer today would increase the factoring figure utilized in the formula to 0.0150 to allow annuities to contemplate higher costs in these inflationary times. Moreover, this bill will raise the "ceiling" or maximum amounts on annuities to 50 percent of the judicial salary. In order for a spouse to receive this maximum benefit, the judicial officer will have to serve for slightly more than 33 years.

Most importantly, this bill will create a floor of 30 percent of the judicial officer's salary which will vest after 3 complete years of creditable service. This "floor" feature is especially important to our judges who during the past two decades have assumed their positions at the average age of 51. Inadequate annuity amounts for survivors whose spouses die in the early years of judicial service constitute the problem most in need of a remedy.

Naturally, in order to partially offset the costs of the program and to maintain its actuarial integrity, it will be necessary to increase the percentage of judicial contribution. This measure requires that participating judges contribute 5 percent of their salary to the program.

Finally, I think that it is important to note that this program is not mandatory. It is a voluntary program, and due to the costs to the individual, it is more likely that it will appeal to older judges for whom the cost of life insurance may be prohibitive. The surviving spouses and children of deceased judicial officers are the real beneficiaries of this measure, and they deserve our consideration, which will be fully given when we inquire into all aspects of this proposal during hearings on this subject.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1874

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Judicial Survivors' Annuities Reform Act of 1981."

SEC. 2. (a) Subsections (b) and (d) of section 376 of title 28, United States Code, are amended by striking out "4.5 percent" each place it appears and inserting in lieu thereof "5.0 percent".

(b) Subsection (c) of section 376 of title 28, United States Code, is amended by striking the first sentence and inserting in lieu thereof the following: "There shall also be deposited to the credit of the "Judicial Survivors' Annuities Fund," in accordance with such procedures as may be prescribed by the Comptroller General of the United States, amounts required to maintain the actuarial balance of the program as such amounts are actuarially determined on an annual basis in accordance with the provisions of Pub. L. 95–595 (31 U.S.C. § 68a)."

(c) Subsection (h)(1)(B) of section 376 of title 28, United States Code, is amended by striking clauses (i) and (ii) and inserting in lieu thereof:

"(i) 10 percent of the average annual salary amount determined in accordance with the provisions of subsection (1) of this section; or

"(ii) 20 percent of such average annual salary amount, divided by the number of children;"

(d) Subsection (h)(1)(C) of section 376 of title 28, United States Code, is amended by striking clauses (ii) and (iii) and inserting in lieu thereof:

"(ii) 20 percent of the average annual salary amount determined in accordance with the provisions of susbection (1) of this section; or

"(iii) 40 percent of such average annual salary amount, divided by the number of children;"

(e) Subsection (1) of section 376 of title 28, United States Code, is amended:

(i) by striking out "1¼ percent" and inserting in lieu thereof "1.5 percent"; and

(ii) by striking out the existing proviso and inserting in lieu thereof:

Provided, That such annuity shall not exceed an amount equal to 50 percent of such average annual salary, nor be less than an amount equal to 30 percent of such average annual salary, and that any amount determined in accordance with the provisions of this subsection shall be reduced to the extent required by subsection (d) of this section, if applicable.

(f) Subsection (h)(2) of section 376 of title 28, United States Code, is amended by striking out the period following "remarriage" and adding "prior to the attainment of sixty years of age.".

SEC. 3. The benefits conferred by this Act shall immediately become available to any individual becoming eligible for an annuity under section 376 of title 28, United States Code, on or after the date upon which this Act becomes effective. *Provided,* That although the rights of any judicial official electing to come within the purview of section 376 of title 28, United States Code, on or after the date upon which this Act becomes effective, shall be determined exclusively under the provisions of that section as amended by this Act, nothing in this Act shall be interpreted to cancel, abrogate or diminish any rights to which an individual or his or her survivors may be entitled by virtue of that individual having contributed to the judicial survivors annuity fund before the date upon which this Act becomes effective.

SEC. 4. At any time within one hundred and eighty days after the date upon which this Act becomes effective, any judicial official who has been participating in the judicial survivors annuity program created by the Act of October 19, 1976 (90 Stat. 2603) shall be entitled to revoke his or her earlier election to participate in that program and thereby completely withdraw from participation in the program as reformed by this Act: *Provided,* That (a) any such revocation may be effected only by means of a writing filed with the Director of the Administrative Office of the United States Courts, (b) any such writing shall be deemed to have become effective no sooner than the date upon which that writing is received by the Director, (c) upon receipt of such a writing by the Director, any and all rights to survivorship benefits for such judicial official's survivors shall terminate, and all amounts credited to such judicial official's individual account, together with interest at 3 percent per annum, compounded on December 31 of each year to that date of revocation, shall thereafter be returned to that judicial official in a lump-sum refund payment, and (d) any judicial official who effects such a revocation and who subsequently again becomes eligible and elects to join the judicial survivors annuities program created by this Act under the provisions of section 376 of title 28, United States Code, as amended by this Act, shall be permitted to do so only upon the redeposit of the full amount of the refund obtained under this section plus interest at 3 percent per annum, compounded on December 31 of each year from the date of the revocation until the date upon which that amount is redeposited. Any judicial official who fails to effect a revocation in accordance with the right conferred by this section within one hundred and eighty days after the date upon which this Act becomes effective shall be deemed to have irrevocably waived the right to that revocation.

SEC. 5. This Act shall become effective on the first day of the third month following the month in which it is enacted.

By Mrs. HAWKINS (for herself and Mr. CHILES):

S. 1875. A bill to grant the consent of Congress to Harbour Island, Incorporated, Tampa, Fla., to construct and maintain two fix-span bridges in and over Garrison Channel, Tampa, Fla.; to

the Committee on Environment and Public Works.

GARRISON CHANNEL, TAMPA, FLA.

● Mrs. HAWKINS. Mr. President, I rise today to offer legislation that allows Harbour Island Incorporated to construct and maintain two fix-span bridges in and over Garrison Channel in Tampa, Fla. These bridges will enable the planned development of a billion-dollar residential and commercial project on Seddon Island which is an integral part of plans already underway for the revitalization of the downtown Tampa area. By releasing the Federal Government from its responsibility for Garrison Channel, Federal taxpayers will be saved the cost of maintaining the channel. At the same time the city of Tampa will benefit from the creation of an estimated 6,000 new permanent jobs and the addition of approximately $28 million to the city's ad valorum tax rolls. Private citizens, the business community, and local government agencies are united in support of the Seddon Island Development. Mr. President, this bill will materially help the people in Tampa and at the same time reduce the Federal budget. I urge its speedy passage.●

By Mr. HATFIELD:

S. 1876. A bill to amend the Federal Highway Beautification Act to permit the States to allow businesses and residential directional signs on Interstate and primary systems; to the Committee on Environment and Public Works.

HIGHWAY BEAUTIFICATION ACT OF 1981

● Mr. HATFIELD. Mr. President, I would like to speak on behalf of the State of Oregon and introduce an amendment to the Highway Beautification Act of 1965. It has recently come to my attention that the U.S. Department of Transportation seeks to withhold some $10 million in highway funds from the State of Oregon because the erection of 14 road signs statewide does not comply with Federal specifications under the 1965 act. Oregon has made every effort to keep its lands litter-free, its water purified and its esthetic quality incomparable.

In that light, I find this action by the Department of Transportation slightly mystifying. In response, I am introducing this amendment to the Highway Beautification Act which will allow States to erect business and recreational directional signs or displays which conform to DOT specifications. With this small change, we can protect the 10-percent share of Oregon's Federal highway funds which are presently threatened.

Mr. President, in 1971 the voters of Oregon overwhelmingly supported a referendum to place a deposit price of 5 and 10 cents on all soda and beer cans or bottles. Since enactment in 1972, our roads, parks, and various recreational resorts are virtually litter-free.

Oregon was the first State to enact such a law, and since then, six others have followed suit. We also have constant support by volunteer organizations throughout the State to keep our highways beautified. It is not uncommon to drive into Oregon's scenic mountain ranges and see teams of volunteers toting plastic garbage bags down the highways, trying to preserve the cleanliness of our State highways. The Willamette River "cleanup" is another example. Due to pollutants, farm runoff and the deteriorating sewage systems of the latter 1950's, the Mid-Willamette Valley's major waterway became a health hazard. Sparked by State and local government concern about a biologically safe water system, a stringent 10-year program was quickly mandated and adopted. Today, due to this action, waterskiing, swimming and fishing for freshwater trout are common practices on the Willamette.

Mr. President, I could continue to speak about all the programs the State and local governments of Oregon have enacted to preserve its beauty, but I think my point is clear. Oregon is, and will continue to be, a prudent manager of its natural beauty. Federal intervention on this scale will do little good and could cause much harm to State efforts to protect its highway environment.

At this time I would like unanimous consent to enter the following letter into the RECORD. In it, Secretary of Transportation Drew Lewis agrees that "several States are experiencing problems in administering certain provisions of this program, similar to the State of Oregon." And one source tells me that Oregon may be one of the only two States that are even close to complete compliance.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., April 15, 1981.

Hon. MARK O. HATFIELD,
U.S. Senate,
Washington, D.C.

DEAR MARK: Thank you for your recent letter requesting advice relative to an inquiry from Representative Mary Alice Ford of the Oregon House Committee on Transportation concerning Oregon House bill 2045 and possible imposition of the 10-percent penalty provision of the Federal Highway Beautification Act of 1965, as amended.

First, let me assure you that we are committed to alleviating the difficulties that are associated with the highway beautification program. Several States are experiencing problems in administering certain provisions of this program, similar to the State of Oregon. We are well aware of Oregon's sentiments regarding the future direction of the highway beautification program as a result of testimony provided by State officials during the program reassessment effort that is currently underway.

Presently we are awaiting a report from the National Advisory Committee on Outdoor Advertising and Motorist Information which was established to conduct the reassessment. As a part of this effort, you can be assured that every consideration will be given to the comments which were provided by the State of Oregon.

Specifically, the State of Oregon has allowed the erection of two classes of signs ("business identification" and "residential directional") in nonconforming areas, which are in violation of existing Federal law. The Federal Highway Administration has been working with the State on this problem since 1978, and has done everything administratively possible to resolve the issue without success.

The Oregon Legislature is presently considering legislation concerning both the "business identification" and "residential directional" classes of signs in the form of House bills 2983 and 2045, respectively. If these bills continue to allow the erection and maintenance of these types of signs in areas adjacent to Interstate and primary highways, they will not resolve the existing problem of compliance with Federal law, but will be in conflict with it.

While we are sympathetic to the problems confronting the State of Oregon, we have no choice but to enforce the existing law. Until such time as any recommended administrative and legislative changes to this program are effected, the 10-percent penalty provision is a reality.

I appreciate the opportunity to clarify this matter for you.

Sincerely,

DREW.

Mr. HATFIELD. Mr. President, this is not an unprecedented amendment. In the first session of the 96th Congress, the distinguished Senator from Vermont (Mr. STAFFORD) sponsored S. 344. That bill would have established "a statewide system to control the erection and maintenance of outdoor advertising signs, displays and devices adjacent to the interstate and primary systems." Unfortunately, S. 344 died in the waning days of Congress.

Mr. President, I would like to ask unanimous consent that the bill and a letter of transmittal be inserted at this point in the RECORD.

There being no objecion, the bill was ordered to be printed in the RECORD, as follows:

S. 1876

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, The Federal Highway Beautification Act, Section 131 of title 23, United States Code, is amended as follows:

(1) By adding immediately after subsection (o) the following new subsection:

(p) A State may allow activities not visible from the main travelled way of a highway on the Interstate System or the primary system to erect signs, displays or devices adjacent to such highway which, at a minimum, conforms to the size, lighting, and spacing standards promulgated by the Secretary for directional signs under subsection (c)(1) of this section, identifying the location of the activity, if the activity is not able to advertise its presence through a sign permitted under subsection (c)(3) of this section."

(2) By relettering existing subsections (p) and (q) of such section as (q) and (r), respectively, including any reference thereto.●

By Mr. DOMENICI (for himself and Mr. SCHMITT):

S. 1877. A bill to provide for the reinstatement and validation of U.S. oil and gas lease numbered NM–12846; to the Committee on Energy and Natural Resources.

REINSTATEMENT AND VALIDATION OF AN OIL AND GAS LEASE

● Mr. DOMENICI. Mr. President, Federal oil and gas lease NM–12846 is an 800-acre lease, 320 acres of which are part of a Federal land working interest unit called the Quail Unit, comprising 3,840 acres in Lea County, N. Mex. Getty Oil Co. is the unit operator with Gulf and 11 other parties participating. On December 12, 1980, prior to the end of the primary term, drilling was begun on lease NM–12846. The well was drilled to a depth of 15,200 feet and completed as a producing well at a total cost of $2,455,266. Through

a clerical and computer error, Gulf failed to pay the rental due by January 2, 1981. Upon discovery of the failure to pay rental, Gulf tendered the late rental check which was duly accepted and cashed by the BLM. Notice of termination was received on October 19, 1981, and Gulf appealed the decision of the BLM on October 21, 1981.

Strong equitable reasons exist for reinstatement. Development of the lease commenced well before the end of the primary term; the Quail Unit was formed on September 1, 1980; actual drilling commenced on December 12, 1980; more than $2 million was expended in development and the failure to promptly pay the rental on January 2 resulted from clerical and computer error.

Public Law 90–245 enacted on May 12, 1970, provided certain authority to the Secretary of the Interior to reinstate Federal oil and gas leases which had terminated for failure to pay the full amount of the rental or failure to pay it timely. In granting new authority to the Secretary, the House Committee on Interior and Insular Affairs recognized that by limiting reinstatement to those cases wherein the full amount of the rental due, including any back rental must be paid or tendered within 20 days of the due date of the lease, some otherwise deserving cases might not be reinstated under this legislation.

The committee was concerned about "intentional" mistakes, that is "* * * whereby unethical operators could knowingly underpay or submit rentals late and thereby gain additional time while an oilfield 'play' is developing." The committee concluded that, "[I]n balancing the advantage of a more liberal relief provision against the committee's desire to reduce the incentive for 'intentional' mistakes, the latter course was chosen. In the event truly deserving cases arise that cannot meet the 20-day provision recourse to private relief legislation may be necessary." This is one of those "truly deserving cases."

The rental amount here involved is $400. A small sum compared to the expenditure involved in establishing the Quail Unit and the more than $2 million expended in the drilling of the well.

Mr. President, I have been asked by a New Mexico investor to examine the equities of this case. After looking at it carefully, I feel this legislation is necessary to insure that a slight, inadvertent oversight does not result in a loss of millions.●

By Mr. HEINZ:

S. 1878. A bill to direct the Secretary of the Interior to offer lifetime leases to certain individuals leasing dwellings in the Delaware Water Gap National Recreation Area, and for other purposes; to the Committee on Energy and Natural Resources.

LEASING OF DWELLINGS IN THE DELAWARE WATER GAP NATIONAL RECREATION AREA

● Mr. HEINZ. Mr. President, today I am pleased to introduce this bill which seeks to delay the pending eviction faced by 142 tenants currently living within the Delaware Water Gap National Recreation Area. The bill would create a uniform and comprehensive lease-back policy for all residents who now lease their homes from the National Park Service.

The Delaware Water Gap National Recreational Area was originally conceived as a complement to the Tocks Island dam project, and was later incorporated into the wild and scenic rivers system in 1978. In the course of acquiring land for the Tocks Island project and the surrounding recreational area, the National Park Service forced residents to sell their property and leave the area. Of the remaining tenants who lease their residences from the Park Service, there are approximately 15 residents with life estate rights, 70 year-round residents with 5-year special use permits, and 142 seasonal residents who hold 2-year special use permits which expire on December 31, 1981.

After striving for 2 years to reach an equitable and workable solution with the National Park Service and the Department of the Interior, I am seeking a legislative solution to establish a uniform lease-back policy which would permit all of the current residents to continue to lease their residences under a life estate arrangement. The bill would also give ample time to residents to undertake any necessary corrective measures to conform their homes to minimum health and safety standards.

If no legislative action is taken to implement a uniform lease-back policy in the Delaware Water Gap National Recreational Area, the evictions will go ahead as planned, subjecting many of these residents to an abrupt termination of their lifetime seasonal retreats. The current policy set forth by the National Park Service does not provide ample time to bring the seasonal residences up to the health, safety, and building standards which are required. Furthermore, it is uncertain as to whether any of the year-round residents will be able to renew their 5-year leases.

I urge my colleagues to give prompt consideration to this bill.●

By Mr. CRANSTON (for himself Mr. HUDDLESTON, Mr. DODD, Mr. WILLIAMS, Mr. SARBANES, and Mr. RIEGLE):

S.J. Res. 129. Joint resolution directing the Depository Institutions Deregulation Committee to pursue policies to promote the safety and soundness of financial institutions; to the Committee on Banking, Housing, and Urban Affairs.

DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE

Mr. CRANSTON. Mr. President, I am delighted to be joined by Senators HUDDLESTON, DODD, WILLIAMS, SARBANES, and RIEGLE in introducing this joint resolution directing the Depository Institutions Deregulation Committee (DIDC) to pursue policies to promote the safety and soundness of financial institutions during the mandated interest rate deregulation process.

The Depository Institutions Deregulation Committee was established last year as part of the Depository Institutions Deregulation Act of 1980. It was created by Congress to oversee the orderly phaseout of deposit interest rate ceilings imposed on financial institutions. When Congress created the DIDC, we realized that it would have the difficult task of formulating a deregulatory schedule that balanced the need for more competitive interest rates for savers with the requirement that the fiscal integrity of financial institutions during the phaseout period be maintained.

The excessive actions taken by the DIDC as a result of its meeting of September 22, 1981, upset this delicate balance. At a time when over 60 percent of the Nation's savings institutions are operating in the red, the DIDC increased the passbook rate by 50 basis points; adopted a new 4-week averaging computation formula that increased money market certificate rates; and removed IRA-Keogh account interest rate ceiling for new 1½ year certificates beginning December 1. In addition, the DIDC authorized penalty free transfers from existing IRA-Keogh accounts into new certificates.

All of the DIDC's actions would significantly increase the cost of funds to all depository institutions. Although the increase in the passbook rate was subsequently rescinded, it would have cost thrift institutions three-quarters of a billion dollars in earnings each year. However, the increase in interest rates was so small that no new funds would be attracted to these accounts.

The seriousness of this problem was highlighted during the hearing on October 19, 1981, in the Senate Banking Committee, in which Secretary of the Treasury Donald Regan testified. I asked Secretary Regan at the hearings what new information he and other members of the DIDC used as a basis for their vote to increase the passbook rate when previous requests for increases had been repeatedly considered and turned down by the DIDC because of the severe earnings problems of thrift institutions. His reply was as follows:

Secretary REGAN. I was convinced at that time that something had to be done to stanch the flow of funds out of the thrift institutions. They were losing funds out of passbook savings rapidly. The reason had to be that they were not paying competitive interest rates, and while there was a certain basic amount that probably would stay in the institutions, gradually most of it would erode, as more and more people came to realize that 5½ percent or 5 percent does not not compete effectively with 15 percent. And in an effort to make them more competitive, I wanted to take the first step, however small. And a half a percentage point increase was a small step in that direction of making them more competitive in interest rates.

We have been told that the money for all savers certificates is not coming out of the money market funds to the extent that we initially assumed it would. Later this may turn out to be a false blip or something of that nature, but at least the initial indications are that in the first week of all savers, money market funds increased rather than decreased.

To put it mildly, I'm confused as to what is going on there. I can find no one who has made any detailed study of where the money is coming from. So we decided, "We can always revisit this question. We are going to have further meetings of the DIDC, so let's back off now to see what is going on and find out if most of that ASC money is coming from passbook savings, so that the half-

percent increase isn't going to stanch that flow."

I was extremely dismayed to learn that the DIDC took such a precipitious action without a firm understanding of the market forces governing the flow of deposits from passbook accounts to all savers certificates. This action seemed to have been taken without due consideration of the possible negative impact on the already ailing thrift industry and was based upon a lack of substantive data.

In view of this I am introducing this resolution directing the DIDC not only to review its rule creating the new IRA-Keogh account, but to refrain from all actions that increase the cost of funds to depository institutions until economic conditions improve as unanimously agreed to by the deregulation committee. The resolution also mandates the DIDC to work toward a deregulation framework that is conducive to the continued viability of all depository institutions and, in particular, the thrift industry.

I am also concerned about the wisdom of creating a new IRA-Keogh account, without market interest rate limitations. The rules governing the new IRA-Keogh accounts could lead to an interest rate war similar to the one that the financial markets experienced in 1973 when the precurser of the DIDC—the coordinating committee—authorized a 4-year certificate with a minimum denomination of $1,000 and no interest rate ceilings. This so called "wild card" certificate clearly contributed to the mortgage credit crunch which began in the fall of 1973 and continued until the spring of 1974.

The FDIC attributed the failure of a commercial bank to wild card certificates and also discovered that these accounts hampered efforts to accomplish a supervisory merger of the failed institutions. These wild cards have just as serious impact on small banks as thrifts. Congress has had to step in before to control "wild card" certificates in the past, and we do not want this kind of situation to happen again.

Therefore, I am introducing this resolution to require the DIDC to consider setting a market rate ceiling on IRA-Keogh accounts so that an orderly market transition is encouraged when financial institutions begin to offer these new accounts. I am in no way suggesting that consumers should receive less than market rates; my concern is that bidding up over market rates in these IRA-Keogh accounts would be damaging or destructive to the economic health of depository institutions.

Perhaps a review of the less than stellar history of the DIDC will underscore my assertion that many of the DIDC's actions are not well thought out. In May of 1980 the DIDC, with Paul Volcker as its chairman, raised the ceilings on 6-month money market certificates by 25 basis points and on 2½-year small saver certificates by 50 basis points. These actions provided little return for the small saver while these actions alone cost savings and loan associations roughly $475 million.

In June of 1981, under the chairmanship of Secretary Regan, the DIDC acted to further speed up the deregulation process by removing a 12-percent cap on the small savers certificate. Even more significant, the DIDC proposed removing all interest rate ceilings on certificates with maturities of 4 years or more. The U.S. League of Savings Associations challenged this action in the courts, and the courts decided that the DIDC had exceeded its authority. Nevertheless, the fact that the DIDC attempted to take this action while thrifts were experiencing unprecedented earnings and liquidity pressures underscores its lack of concern for thrifts and the housing market they serve.

One of the most recent actions that the DIDC took was to allow brokering of deposits in connection with all savers certificates by Wall Street firms. Under the arrangement, brokerage firms were allowed to market ASC's across the country with the resulting deposits flowing only to a few large institutions. Permitting savers to open ASC accounts with brokerage houses circumvents the will of Congress that local financial institutions and the local mortgage markets were to be the beneficiaries of this program. Although my resolution does not speak to the ASC brokering problem, I believe that the DIDC's regulatory interpretation is unwise and that the DIDC should assess what harm may have ensued from this policy.

It appears that the DIDC has attempted to speed up the deregulation process without adequate regard for the safety and soundness of thrift institutions. If the viability of the Nation's thrift institutions is to be maintained and if credit is to begin flowing back to the depressed housing industry, the DIDC must be more responsive to the thrift industry and evaluate more carefully the impact of its decisions on the mortgage market.

I am pleased to announce that Richard Pratt, Chairman of the Federal Home Loan Bank Board, is in full agreement with this resolution. In fact, in his capacity as a member of the DIDC, he not only has requested a review of the rules governing the IRA-Keogh accounts, but has publicly spoken out on the lack of concern for the thrift's problems by the DIDC. It is my hope that through the actions taken by Chairman Pratt, and through those of us introducing this resolution, that a greater sensitivity will be fostered on the part of other members of the DIDC. The DIDC must deliberate more fully on the impact of its actions on the thrift industry.
